Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author’s name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 99–101 (1987) are $391.00 list; $313.00 institutional member; $235.00 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25.00; subscribers in India must pay a postage surcharge of $38.00. Combination paper and microfiche subscription prices are $520.00 list; $416.00 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $110.00 list, $88.00 institutional; for Volumes 90–92, $125.00 list; $100.00 institutional member; for Volumes 93–95, $168.00 list; $134.00 institutional member; for Volumes 96–98, $185.00 list; $148.00 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-9930. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 (8\(\frac{1}{2}\)" × 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

BACKLOG. 150 pages. Papers currently being received by the editors will be published in 9–11 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner’s consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

CONTENTS—Continued from back cover

F. STATISTICS AND PROBABILITY
A LIL for occupation times of stable processes.  By NARN-RUEIH SHIEH .............. 154

G. TOPOLOGY
Orientation preserving actions of finite Abelian groups on spheres.  By RONALD M. DOTZEL .................................................. 159
Metrization of additive $\kappa$-metric spaces.  By TAKESI ISIWATA .......................... 164
Some homotopy properties of the homeomorphism groups of $R^{\infty}(Q^{\infty})$-manifolds.  By VO THANH LIEM ................................................. 169
The first eigenvalue of a scalene triangle.  By ROBERT BROOKS and PETER WAKSMAN 175
A note on Hausdorff measures of quasi-self-similar sets.  By JOHN MCLAUGHLIN .... 183
Locally Lipschitz continuous perturbations of linear dissipative operators and nonlinear semigroups.  By SHINNOSUKE OHARU and TADAYASU TAKAHASHI .......... 187
Minimal sets in recurrent discrete flows.  By RONALD A. KNIGHT ...................... 195
A continuum $X$ which is a retract of $C(X)$ but not of $2^X$.  By ALEJANDRO ILLANES 199

SHORTER NOTES
Embedding and unknotting of some polyhedra.  By K. S. SARKARIA ....................... 201

ERRATA
Correction to “A note on completely metrizable spaces”.  By E. MICHAEL .............. 204
## CONTENTS

**Vol. 100, No. 1**  
**May 1987**  
**Whole No. 335**

### A. ALGEBRA AND NUMBER THEORY

- On the $p$-adic heights of some abelian varieties. By HIDEO IMAI ............................................ 1
- Quotient rings of rings generated by faithful cyclic modules. By GARY F. BIRKENMEIER 8
- A note on pushing up. By PAUL S. FAN .......................................................... 11
- A simple proof of the theorem of Torelli based on Torelli’s approach. By ALBERTO COLLINO 16
- Embedding countable rings in 2-generator rings. By K. C. O’MEARA .............................. 21
- Two-generator groups with perfect Frattini subgroups. By M. J. EVANS 25
- Isolation theorem for products of linear forms. By T. W. CUSICK 29

### B. ANALYSIS

- An inequality for eigenvalues of Sturm-Liouville problems. By CATHERINE BANDLE and GÉRARD PHILIPPIN .................................................. 34
- Boundedness properties in Volterra integrodifferential systems. By W. E. MAHFOUD 37
- A remark on $A_1$-weights for the strong maximal function. By FERNANDO SORIA 46
- Compact composition operators on spaces of boundary-regular holomorphic functions. By JOEL H. SHAPIRO 49
- An elementary proof of the Grothendieck inequality. By RON C. BLEI 58
- Stability property of Möbius mappings. By T. IWANIEC ............................................. 61
- Convolution equations in spaces of distributions supported by cones. By ALEX MERIL and DANIELE C. STRUPPA .................................................. 70
- The asymptotic behavior of univalent functions. By HU KE and DONG XINHAN 75
- Orthogonality preserving maps and the Laguerre functional. By WILLIAM R. ALLAWAY 82
- One expression for the solutions of second order difference equations. By JERZY POPENDA .................................................. 87
- On sequences without weak* convergent convex block subsequences. By RICHARD HAYDON, MIREILLE LEVY and EDWARD ODELL 94
- On the almost everywhere convergence to $L^p$ data for higher order hyperbolic operators. By CHRISTOPHER D. SOGGE 99
- On the relation between the semigroup and its infinitesimal generator. By FRANK NEUBRANDER .................................................. 104
- Some consequences of left invertibility. By SCOTT H. HOCHWALD and BERNARD B. MORREL 109
- On the support of quasi-invariant measures on infinite-dimensional Grassmann manifolds. By DOUG PICKRELL .................................................. 111
- On the stability of exponential bases in $L^2(-\pi, \pi)$. By ROBERT M. YOUNG ............... 117
- Algebra direct sum decomposition of $C_R(X)$. II. By R. D. MEHTA and M. H.VASAVADA 123
- Restricted left invertible Toeplitz operators on multiply connect domains. By KEIJI IZUCHI and SHÛICHI OHNO .................................................. 127
- Some functional equations in Banach algebras and in application. By J. VUKMAN ............ 133
- Similarity of a linear strict set-contraction and the radius of the essential spectrum. By MAU-HSIANG SHIH .................................................. 137

### D. GEOMETRY

- A small arithmetic hyperbolic three-manifold. By TED CHINBURG ......................................... 140
- A closed surface of genus one in $E^3$ cannot contain seven circles through each point. By NOBUKO TAKEUCHI .................................................. 145

### E. LOGIC AND FOUNDATIONS

- Boolean reducts of relation and cylindric algebras and the cube problem. By H. ANDRÉKA 148
