Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 105–107 (1989) are $413 list; $330 institutional member; $248 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$40. Combination paper and microfiche subscription prices are $549 list; $439 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $113 list, $90 institutional; for Volumes 90–92, $129 list; $103 institutional member; for Volumes 93–95, $173 list; $138 institutional member; for Volumes 96–98, $191 list; $153 institutional members; for Volumes 99–104, $202 list; $162 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. ☑

This publication was typeset using \AMSTeX, the American Mathematical Society's \TeX macro system.
Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 (8½" x 11") pages long. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using TeX and the AMS-TeX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

COMBINATORICS AND DISCRETE MATHEMATICS (05 15)
Thomas H. Brylawski, Department of Mathematics, University of North Carolina, Chapel Hill, North Carolina 27514

COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 68 94)
Andrew Odlyzko, Room 2C-370, Bell Laboratories, Murray Hill, New Jersey 07974

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

GENERAL ALGEBRA (16 17 18 08)
Maurice Auslander, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

GROUP THEORY (20)
Warren J. Wong, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)
Frederick R. Cohen, Department of Mathematics, University of Kentucky, Lexington, Kentucky 40506

REAL VARIABLES (26 28 40)
R. Daniel Mauldin, Department of Mathematics, North Texas State University, Denton, Texas 76203

COMPLEX VARIABLES (30 31 32)
Clifford J. Earle Jr., Cornell University, White Hall, Ithaca, New York 14853

NUMBER THEORY (11)
William Adams, Department of Mathematics, University of Maryland, College Park, MD 20742

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
Kenneth R. Meyer, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

PARTIAL DIFFERENTIAL EQUATIONS (35 49)
Barbara Lee Keyfitz, Institute for Mathematics and Its Applications, University of Minnesota, 514 Vincent Hall, 206 Church Street S. E., Minneapolis, MN 55455

GENERAL ANALYSIS (41 42 43 44 45)
J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
Palle E. T. Jorgensen, University of Iowa, Iowa City, Iowa 52242

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS AND OPERATOR THEORY (30 46 47)
Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

LIE GROUPS AND GEOMETRY (22 51 53)
Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GENERAL TOPOLOGY (54)
Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056

PROBABILITY AND CERTAIN OTHER FIELDS (60–94 inclusive)
William D. Sudderth, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

George C. Papanicolaou, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, William J. Davis, at the above address.
CONTENTS—Continued from back cover

On the homotopy type of the spectrum representing elliptic cohomology. By Andrew Baker ......................................................... 537
Periodic points for homeomorphisms of hereditarily decomposable chainable continua. By W. T. Ingram ................................................................. 549
Lattice-isotopic arrangements are topologically isomorphic. By Richard Randell .... 555
New combinatorial interpretations of two analytic identities. By A. K. Agarwal .... 561

SHORTER NOTE
A note on pseudocompact groups. By Robert Fokkink ........................................ 569
A greedoid polynomial which distinguishes rooted arborescences. By Gary Gordon and Elizabeth McMahon

The Henselian defect for valued function fields. By Jack Ohm

Graded rings and Krull Orders. By Eric Jespers and Paul Wauters

On a theorem of Feit and Tits. By Peter B. Kleidman and Martin W. Liebeck

A \( p \)-adic analogue of the Gauss-Bonnet Theorem for certain Mumford curves. By Richard M. Freije

An integrally closed ring which is not the intersection of valuation rings. By Joachim Gräter

Remarks on rings of constants of derivations. By Wei Li

Ideal theoretic complete intersections in \( P^k_\mathbb{R} \). By Apostolos Thoma

Representatives for finite sets. By Xing-De Jia

Group \( C^* \)-algebras as algebras of “continuous functions” with non-commuting variables. By Wojciech Szymański

On superposition of functions of bounded \( \varphi \)-variation. By Franciszek Prus-Wisniowski

On the existence of idempotent liftings. By S. Grekas

A simple proof of Koornwinder’s addition formula for the little \( \varphi \)-Legendre polynomials. By Mizan Rahman

On Picard’s theorem for entire quasiregular mappings. By Matti Vuorinen

On dual spaces with bounded sequences without weak* convergent convex blocks. By Thomas Schlumprecht

A new proof of uniqueness for multiple trigonometric series. By J. Marshall Ash

An iteration process for nonexpansive mappings with applications to fixed point theory in product spaces. By W. A. Kirk

Compact endomorphisms of Banach algebras II. By Herbert Kamowitz, Stephen Scheinberg and Dennis Wortman

Weighted weak-type \((1, 1)\) inequalities for rough operators. By Steve Hofmann

The Number Hides Game. By V. J. Baston, F. A. Bostock and T. S. Ferguson

Graphs with parallel mean curvature. By Isabel Maria da Costa Salavessa

Uniform bounds for isoperimetric problems. By Jerrold Siegel and Frank Williams

Canonical relativized cylindric set algebras. By Roger D. Maddux

An entropy inequality for the bi-multivariate hypergeometric distribution. By Fred Kochman, Alan Murray and Douglas B. West

Certain positive-definite kernels. By Mina Ossiander and Edward C. Waymire

The \( T1 \) theorem for Martingales. By Andrew G. Bennett

On the submetacompactness of products. By Yukinobu Yajima

Periodic point free homeomorphism of \( T^2 \). By Michael Handel

\( L^2 \)-Dolbeault complexes on singular curves and surfaces. By Peter Haskell

A note on the category of the free loop space. By E. Fadell and S. Husseini

(Continued on inside back cover)
