PROCEEDINGS OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

William Adams
J. Marshall Ash
Maurice Auslander
Andreas R. Blass
Andrew M. Bruckner
Dennis Burke
Frederick R. Cohen
William J. Davis, Managing Editor
Clifford J. Earle, Jr.
Lawrence F. Gray
Palle E. T. Jorgensen
Jeffry N. Kahn
Barbara L. Keyfitz
Kenneth R. Meyer
Paul S. Muhly
George C. Papanicolaou
Louis J. Ratliff, Jr.
Jonathan M. Rosenberg
James E. West
Warren J. Wong

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9939

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 15 typed pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illluminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 108–110 (1990) are $432 list; $346 institutional member; $259 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$67. Combination paper and microfiche subscription prices are $575 list; $460 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices *per volume* are for Volumes 1–89, $117 list, $93 institutional; for Volumes 90–92, $134 list; $107 institutional member; for Volumes 93–95, $179 list; $143 institutional member; for Volumes 96–98, $198 list; $158 institutional members; for Volumes 99–104, $209 list; $168 institutional member; for Volumes 105–107, $214 list; $171 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

Manuscript Information

1. Articles submitted for publication should be typewritten, double spaced, and no more than 15 ($8\frac{1}{2}" \times 11"$) pages long. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using TEX and the $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 *Revision*) representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)

Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 15 68 94)

Jeffry N. Kahn, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)

Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

GENERAL ALGEBRA (16 17 18 08)

Maurice Auslander, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

GROUP THEORY (20)

Warren J. Wong, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 57 58)

Frederick R. Cohen, Department of Mathematics, University of Rochester, Rochester, New York 14627

REAL VARIABLES (26 28 40)

Andrew M. Bruckner, Department of Mathematics, University of California, Santa Barbara, California 93106

COMPLEX VARIABLES (30 31 32)

Clifford J. Earle Jr., Cornell University, White Hall, Ithaca, New York 14853

NUMBER THEORY (11)

William Adams, Department of Mathematics, University of Maryland, College Park, Maryland 20742

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)

Kenneth R. Meyer, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

PARTIAL DIFFERENTIAL EQUATIONS (35 49)

Barbara L. Keyfitz, Department of Mathematics, University of Houston, Houston, Texas 77204-3476

GENERAL ANALYSIS (41 42 43 44 45)

J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)

Palle E. T. Jorgensen, University of Iowa, Iowa City, Iowa 52242

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)

William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS, AND OPERATOR THEORY (30 46 47)

Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

LIE GROUPS AND GEOMETRY (22 51 53)

Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GENERAL TOPOLOGY (54)

Dennis Burke, Department of Mathematics, Miami University of Ohio, Oxford, Ohio 45056

James E. West, Department of Mathematics, Cornell University, Ithaca, New York 14853

PROBABILITY AND CERTAIN OTHER FIELDS (60–94 inclusive)

Lawrence F. Gray, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455

George C. Papanicolaou, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, William J. Davis, at the above address.

CONTENTS—*Continued from back cover*

E. LOGIC AND FOUNDATIONS

An unboundedness property for norms of length $\geq \omega_2$. By STEVE JACKSON 487
On the Mal'cev correspondence. By CARLOS R. VIDELA 493

F. STATISTICS AND PROBABILITY

A large deviation principle for the reduction of product representations.
By N. G. DUFFIELD 503
The distribution of Rademacher sums. By S. J. MONTGOMERY-SMITH 517

G. TOPOLOGY

Density of the lexicographically ordered space $\{0, 1\}^{\alpha}$. By W. W. COMFORT 523
Higher-dimensional shift equivalence and strong shift equivalence are the same over the integers. By J. B. WAGONER 527
Michael selection theorem under weak lower semicontinuity assumption.
By KRZYSZTOF PRZESŁAWSKI and LONGIN E. RYBIŃSKI 537
A characterization of continua that contain no n-ods and no W-sets. By ELDON J. VOUGHT 545
Divisibility of generalized exponential and logarithmic coefficients. By DONALD M. DAVIS 553
Pseudo-orbits and topological entropy. By MARCY BARGE and RICHARD SWANSON 559
Uniformity and uniformly continuous functions for locally compact groups.
By PAUL MILNES 567

SHORTER NOTES

Explicit transitive automorphisms of the closed unit square. By XIAO-QUAN XU 571

PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 109, No. 2 June 1990 Whole No. 372

A. ALGEBRA AND NUMBER THEORY

When is a flat algebra of finite type? By PETER SCHENZEL 287
Settling a number of questions about hyper-Archimedean lattice-ordered groups. By PAUL CONRAD and JORGE MARTINEZ 291
A note on some elementary measures of algebraic independence. By ROBERT TUBBS . . . 297
Commutators and Π-subgroups. By ROLF BRANDL 305
Strong preinjective partitions and representation type of Artinian rings. By BIRGE ZIMMERMANN-HUISGEN 309
Cancellation counterexamples in Krull dimension 1. By ROBERT M. GURALNICK, LAWRENCE S. LEVY, and ROBERT B. WARFIELD, JR. 323
A brief proof of Jacobian hypothesis implies flatness. By MASAYOSHI MIYANISHI, LORENZO ROBBIANO, and STUART SUI-SHENG WANG 327

B. ANALYSIS

A nonlinear Perron–Frobenius theorem. By ROBERT SINE 331
Relations between Banach function algebras and their uniform closures. By TAHER G. HONARY 337
A remark on strong maximum principle for parabolic and elliptic systems. By XUEFENG WANG 343
A characterization of certain measures using quasiconformal mappings. By CRAIG A. NOLDER 349
Inverse-closed Carleman algebras of infinitely differentiable functions. By JAMIL A. SIDDIQI 357
Invariant subspaces of finite codimension for measures with thin support. By T. T. TRENT 369
On ordered Λ-bounded variation. By FRANCISZEK PRUS-WIŚNIOWSKI 375
Instantaneous shrinking in nonlinear diffusion-convection. By B. H. GILDING and R. KERSNER 385
An asymptotic bound for the iterates of certain real functions near a contractive fixed point. By LAWRENCE J. WALLEN 395
Inductive limits of normed algebras and m-convex structures. By M. OUDADESS 399
Boundedness of the Calderón–Zygmund singular integral operators on Ba spaces. By WEN-DONG CHANG 403
Reflexivity of pairs of shifts. By MAREK PTAK 409
On double cosine, sine, and Walsh series with monotone coefficients. By FERENC MÓRICZ 417
Mosco convergence and reflexivity. By GERALD BEER and JONATHAN M. BORWEIN 427
Leading terms in the heat invariants. By THOMAS P. BRANSON, PETER B. GILKEY, and BENT ØRSTED 437
Lifting homeomorphisms of a complex surface to its normalization. By WILLIAM A. ADKINS 451
Łojasiewicz's support and doubly stochastic measures. By P. MIKUSIŃSKI, H. SHERWOOD, and M. D. TAYLOR 455

C. APPLIED MATHEMATICS

A Thomson's principle for infinite, nonlinear resistive networks. By L. DE MICHELE and P. M. SOARDI 461

D. GEOMETRY

Construction of harmonic maps between pseudo-Riemannian spheres and hyperbolic spaces. By J. J. KONDERAK 469
Isoperimetric inequalities for convex cones. By PIERRE-LOUIS LIONS and FILOMENA PACELLA 477

(*Continued on inside back cover*)
