Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Editorial Policy

To be published in the Proceedings, a paper must be correct, new, nontrivial and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. Proceedings Editors shall solicit, and encourage publication of, worthy papers of length not exceeding 16 (8\frac{1}{2}\text{"} \times 11\text{"}) typewritten, double-spaced pages. If \text{T\!e\!X} or a similar system is used, submitted manuscripts should not exceed 10 \text{\LaTeX} preprint style or \text{\LaTeX} article style pages.

Very short notes not to exceed two printed pages are also accepted, and appear under the heading \textbf{Shorter notes}. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the \textbf{Shorter notes} department.

On January 23, 1979, the Council of the American Mathematical Society abolished blind refereeing as a policy for the Proceedings, but decided that any author who so requests and who provides a blind copy of a manuscript will have the manuscript refereed blind.

Two copies of a manuscript should be submitted. If blind refereeing is intended, one should be complete and one blind, and then the latter will be sent to the referee without disclosure of the author's name or institution.

SUBSCRIPTION INFORMATION. PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 108–110 (1990) are $432 list; $346 institutional member; $259 individual member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25: subscribers in India must pay a postage surcharge of $38. Expedited delivery to destinations in North America—$30; elsewhere—$67. Combination paper and microfiche subscription prices are $575 list; $460 institutional member. Microfiche of each issue will be mailed the fastest way possible before the camera copy is sent to the printer. Microfilm subscriptions may be purchased from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

BACK NUMBER INFORMATION. Back number prices per volume are for Volumes 1–89, $117 list, $93 institutional; for Volumes 90–92, $134 list; $107 institutional member; for Volumes 93–95, $179 list; $143 institutional member; for Volumes 96–98, $198 list; $158 institutional members; for Volumes 99–104, $209 list; $168 institutional member; for Volumes 105–107, $214 list; $171 institutional member.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

PROCEEDINGS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to PROCEEDINGS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

Manuscript Information

1. Articles submitted for publication should be no more than 16 (8½" × 11") typewritten, double-spaced pages. If \TeX{} or a similar system is used, submitted manuscripts should not exceed 10 \AMS-\TeX{} preprint style or \AMS-\LaTeX{} article style pages. The Manual for Authors, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet. Authors must keep complete copies of their manuscripts, and editors will acknowledge receipt. To encourage the submission of manuscripts in electronic form using \TeX{} and the \AMS-\TeX{} macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

2. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The abstract should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article. This may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

3. A Copyright Transfer Agreement is required before a paper will be published in the Proceedings. A copy of the form is sent with the acknowledgement of receipt of manuscript from the Providence office of the Society. Authors are urged to return the forms immediately to prevent delays in processing and publishing of the manuscript.

OFFPRINTS AND ADDRESS CHANGES. Any inquiries concerning a paper which has been accepted for publication, including information regarding offprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 150 pages. Papers currently being accepted by the editors will be published in 12–14 months.

COPYING AND REPRINTING. Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $0.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper. The numbers in parentheses are the first two digits of major classification from the 1980 Mathematics Subject Classification (1985 Revision) and describe the fields being handled by the editor.

LOGIC AND FOUNDATIONS (03 04)
Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48109-1003

COMBINATORICS, COMPUTER SCIENCE AND INFORMATION THEORY (05 15 68 94)
Jeffry N. Kahn, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903

COMMUTATIVE ALGEBRA (06 12 13 14 15 18)
Louis J. Ratliff, Jr., Department of Mathematics, University of California, Riverside, California 92502

NUMBER THEORY (11)
William Adams, Department of Mathematics, University of Maryland, College Park, Maryland 20742

GENERAL ALGEBRA (16 17 18 08)
Maurice Auslander, Department of Mathematics, Brandeis University, P.O. Box 9110, Waltham, Massachusetts 02254-9110

GROUP THEORY (20)
Warren J. Wong, Department of Mathematics, University of Notre Dame, Notre Dame, Indiana 46556

REAL VARIABLES (26 28 40)
Andrew M. Bruckner, Department of Mathematics, University of California, Santa Barbara, California 93106

COMPLEX VARIABLES (30 31 32)
Clifford J. Earle Jr., Cornell University, White Hall, Ithaca, New York 14853

ORDINARY DIFFERENTIAL EQUATIONS AND DYNAMICAL SYSTEMS (33 34 39 49 58)
Kenneth R. Meyer, Department of Mathematical Sciences, University of Cincinnati, Cincinnati, Ohio 45221-0025

PARTIAL DIFFERENTIAL EQUATIONS (35 49 53)
Barbara L. Keyfitz, Department of Mathematics, University of Houston, Houston, Texas 77204-3476

GENERAL ANALYSIS (31 32 41 42 43 44 45)
J. Marshall Ash, Department of Mathematics, DePaul University, Chicago, Illinois 60614

FUNCTIONAL ANALYSIS AND OPERATOR THEORY (46 47)
Palle E. T. Jorgensen, University of Iowa, Iowa City, Iowa 52242

FUNCTIONAL ANALYSIS AND CONVEXITY (46 52)
William J. Davis, Department of Mathematics, Ohio State University, Columbus, Ohio 43210

COMPLEX VARIABLES, FUNCTIONAL ANALYSIS, AND OPERATOR THEORY (30 46 47)
Paul S. Muhly, Department of Mathematics, University of Iowa, Iowa City, Iowa 52242

LIE GROUPS AND GEOMETRY (22 51 53)
Jonathan M. Rosenberg, Department of Mathematics, University of Maryland, College Park, Maryland 20742

SET THEORETIC TOPOLOGY (54)
Franklin D. Tall, Department of Mathematics, University of Toronto, Ontario M5S 1A1, Canada

METRIC AND GEOMETRIC TOPOLOGY (54 57)
James E. West, Department of Mathematics, Cornell University, Ithaca, New York 14853

ALGEBRAIC AND DIFFERENTIAL TOPOLOGY (55 58)
Frederick R. Cohen, Department of Mathematics, University of Rochester, Rochester, New York 14627

PROBABILITY AND CERTAIN OTHER FIELDS (60–94 inclusive)
Lawrence F. Gray, Department of Mathematics, University of Minnesota, Minneapolis, Minnesota 55455
George C. Papanicolaou, Applied Mathematics Division, New York University-Courant Institute, 251 Mercer Street, New York, New York 10012

All other communications should be addressed to the Managing Editor, William J. Davis, at the above address.
Recurrent homeomorphisms on $\mathbb{R}^2$ are periodic. By Lex G. Oversteegen and E. D. Tymchatyn ................................................................. 1083
On hyperspaces of polyhedra. By Katsuro Sakai ............................................. 1089
Covers of Dehn fillings on once-punctured torus bundles. II. By Mark D. Baker .... 1099
A short solution of Markov’s problem on connected group topologies. By Dieter Remus 1109
Decompositions of differentiable semigroups. By John P. Holmes .......................... 1111
No continuum in $E^2$ has the TMP. I. Arcs and spheres. By L. D. Loveland ............ 1119
Links not concordant to boundary links. By Charles Livingston ............................ 1129

H. COMBINATORICS

On the road coloring problem. By Joel Friedman .............................................. 1133
Antihook differences and some partition identities. By A. K. Agarwal .................. 1137

SHORTER NOTES

A nonstandard delta function. By Todor Todorov .............................................. 1143
Examples of Poincaré duality groups. By Geoffrey Mess ................................. 1145
PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY
CONTENTS
Vol. 110, No. 4 December 1990 Whole No. 378

A. ALGEBRA AND NUMBER THEORY
Representation of tree permutations by words. By John A. Maroli ................. 859
All types implies torsion. By Walter Parry .......................... 871
Finite coverings by cosets of normal subgroups. By M. M. Parmenter .......... 877

B. ANALYSIS
On Bloch’s constant. By Mario Bonk .................................. 889
The extension of the theorems of Č. V. Stanojević and V. B. Stanojević. By Sheng Shuyun .......... 895
A result about the Hilbert transform along curves. By Linda V. Saal .......... 905
On non-self-adjoint operator algebras. By Edward G. Effros and Zhong-Jin Ruan .. 915
A nullset for normal functions in several variables. By Juhani Riihentaus ...... 923
On contractions without disjoint invariant subspaces. By Katsutoshi Takahashi . 935
The Cesàro means and strong laws of large numbers for orthogonal sequences in von Neumann algebras. By Ewa Hensz ......... 939
Example of an algebra which is nontopologizable as a locally convex topological algebra. By W. Żelazko .......... 947
A spread relation for entire functions with negative zeros. By Faruk F. Abi-Khuzam ... 951
Second order estimates in interpolation theory and applications. By Mario Milman and Thomas Schonbek ............ 961
Brangesian spaces in the polydisk. By Dinesh Singh ..................... 971
On a Lipschitz invariant of normed spaces. By Yoav Benyamini ............. 979
The algebra of decomposable operators in direct integrals of not necessarily separable Hilbert spaces. By Reinhard Schafitzel .......... 983
Decay and boundedness results for a model of laminar flames with complex chemistry. By Joel D. Avrin .......... 989
Oscillation of neutral differential equations with periodic coefficients. By Qingguang Huang and Shaozhu Chen .......... 997
Convergence of the Schur algorithm. By Olav Niåstad .......... 1003

D. GEOMETRY
Index and total curvature of surfaces with constant mean curvature. By Manfredo P. do Carmo and Alexandre M. da Silveira ........ 1009
On the impossibility of ruler-only constructions. By V. J. Baston and F. A. Bostock .... 1017
Pseudoholomorphicity of closed minimal surfaces in constantly curved 4-spaces. By Chi-Ming Yau .......... 1027
Nonexistence of 4-dimensional almost Kaehler manifolds of constant curvature. By David E. Blair .......... 1033
Positive centers and the Bonnesen inequality. By Michael E. Gage .......... 1041

E. LOGIC AND FOUNDATIONS
Pairwise incompatible generic families. By Wojciech Guzicki .............. 1049

G. TOPOLOGY
Proper hereditary shape equivalences preserve small weak infinite dimensionality. By Richard P. Millspaugh .......... 1055
Homology of branched cyclic covers of knots. By Stanley Ocken .......... 1063
Arc-smoothness and contractibility in Whitney levels. By Alejandro Illanes ........ 1069
Tucker–Ky Fan colorings. By K. S. Sarkaria .......... 1075
