ERRATUM TO “APPROXIMATION OF CONVEX BODIES BY AXIALLY SYMMETRIC BODIES”

MAREK LASSAK

(Communicated by Eric Bedford)

Theorem 3 on page 3081 of [1] was inadvertently printed incorrectly. The correct wording follows:

Theorem 3. For every convex body $C \subset E^2$ there is a straight line $L$ cutting off a subset of area at least $\frac{1}{8}|C|$ from $C$ which remains in $C$ after folding it along $L$.
