Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Proceedings of the American Mathematical Society* is published monthly. Beginning January 1996 *Proceedings* is accessible from www.ams.org/journals/. Subscription prices for Volume 137 (2009) are as follows: for paper delivery, US\$1161 list, US\$929 institutional member, US\$1045 corporate member, US\$697 individual member; for electronic delivery, US\$1045 list, US\$836 institutional member, US\$941 corporate member, US\$627 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$49 for surface delivery outside the United States and India; US\$75 to India. Expedited delivery to destinations in North America is US\$89; elsewhere US\$163. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

Back number information. For back issues see www.ams.org/bookstore.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Proceedings of the American Mathematical Society (ISSN 0002-9939) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Proceedings*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Whole No. 606

December 2009

A. ALGEBRA, NUMBER THEORY, AND COMBINATORICS

B. A. Sethuraman and Klemen Šivic, Jet schemes of the commuting matrix pairs scheme	3953
Sebastian Burciu, Normal Hopf subalgebras of semisimple Hopf algebras	3969
Mathias Beiglböck, Arithmetic progressions in abundance by combinatorial tools	3981
Atsushi Noma, Multisecant subspaces to smooth projective varieties in arbitrary characteristic	3985
William Y. C. Chen and Cindy C. Y. Gu, The reverse ultra log-concavity of the Boros-Möll polynomials	3991
Youngook Choi, On the syzygies of quasi-complete intersection space curves ...	3999
Alberto Elduque, Jordan gradings on exceptional simple Lie algebras	4007
Cristian Virdol, On the Birch and Swinnerton-Dyer conjecture for elliptic curves over totally real number fields	4019
Stéphane R. Louboutin, On the divisibility of the class number of imaginary quadratic number fields	4025
Claude Cibils, Aaron Lauve, and Sarah Witherspoon, Hopf quivers and Nichols algebras in positive characteristic	4029
Tobias J. Osborne, Almost commuting unitaries with spectral gap are near commuting unitaries	4043
Vorrapan Chandee, Explicit upper bounds for L -functions on the critical line ..	4049
Daniel J. Katz, Point count divisibility for algebraic sets over $\mathbb{Z}/p^{\ell}\mathbb{Z}$ and other finite principal rings	4065
D. Arcara and F. Sato, Recursive formula for $\psi^g - \lambda_1\psi^{g-1} + \cdots + (-1)^g\lambda_g$ in $\overline{\mathcal{M}}_{g,1}$	4077
Fernando Sancho de Salas and Pedro Sancho de Salas, A direct proof of the theorem on formal functions	4083
Cindy De Volder and Halszka Tutaj-Gasińska, Higher order embeddings of certain blow-ups of \mathbb{P}^2	4089

B. ANALYSIS

R. Dhanya, J. Giacomoni, and S. Prashanth, Isolated singularities for the exponential type semilinear elliptic equation in \mathbb{R}^2	4099
Jason Asher, A Kurosh-type theorem for type III factors	4109
Jitsuro Sugie and Ayano Endo, Attractivity for two-dimensional linear systems whose anti-diagonal coefficients are periodic	4117
Krzysztof Frączek, Density of mild mixing property for vertical flows of Abelian differentials	4129
Boo Rim Choe, Hyungwoon Koo, and Michael Stessin, Carleson measures for Bergman spaces and their dual Berezin transforms	4143
Kyung Hoon Han, Noncommutative L_p -space and operator system	4157
Markus Biegert, On traces of Sobolev functions on the boundary of extension domains	4169
Alexei Rybkin and Vu Kim Tuan, A new interpolation formula for the Titchmarsh-Weyl m -function	4177
Fumiko Futamura, Localizable operators and the construction of localized frames	4187
Thomas C. Sideris and Luis Vega, Stability in L^1 of circular vortex patches ..	4199
J. Hounie, A proof of Bochner's tube theorem	4203

François Treves , On the solvability of vector fields with real linear coefficients ..	4209
Ming-Yi Lee, Chin-Cheng Lin, and Ying-Chieh Lin , A wavelet characterization for the dual of weighted Hardy spaces	4219
Daniel M. Oberlin , A uniform estimate for Fourier restriction to simple curves	4227

D. GEOMETRY

Alan Stapledon , Ehrhart theory for Lawrence polytopes and orbifold cohomology of hypertoric varieties	4243
---	------

F. STATISTICS AND PROBABILITY

Gérald Tenenbaum , Lois du logarithme itéré avec pondérations additives	4255
--	------

G. TOPOLOGY

Henry Segerman , On spun-normal and twisted squares surfaces	4259
Erica Flapan and Hugh Howards , Every graph has an embedding in S^3 containing no non-hyperbolic knot	4275
J. A. Hillman , Embedding 3-manifolds with circle actions	4287
Guangxiang Su , Burghelea-Haller analytic torsion for manifolds with boundary	4295
Maciej Paluszyński and Krzysztof Stempak , On quasi-metric and metric spaces	4307

INDEX TO VOLUME 137 (2009)

- Abadie, Fernando, and Laura MartíPérez. *On the amenability of partial and enveloping actions*, 3689
- Abe, Noriyuki. *Vanishing of extensions of twisted Verma modules*, 3923
- Abe, Takuro, Hiroaki Terao, and Masahiko Yoshinaga. *Totally free arrangements of hyperplanes*, 1405
- Ahlgren, Scott, Nadia Masri, and Jeremy Rouse. *Vanishing of modular forms at infinity*, 1205
- Ahn, Cheonghee, Hi Jun Choe, and Kijung Lee. *A long time asymptotic behavior of the free boundary for an American put*, 3425
- Albujer, Alma L., and Luis J. Alías. *Spacelike hypersurfaces with constant mean curvature in the steady state space*, 711
- Aldi, Marco. *Twisted homogeneous coordinate rings of abelian surfaces via mirror symmetry*, 2741
- Alías, Luis J. See Albujer, Alma L.
- Alon, Noga, Lech Drewnowski, and Tomasz Łuczak. *Stable Kneser hypergraphs and ideals in \mathbb{N} with the Nikodým property*, 467
- Alon, Noga, Jarosław Grytczuk, Michał Lason, and Mateusz Michałek. *Splitting necklaces and measurable colorings of the real line*, 1593
- Altinel, Tuna, and John S. Wilson. *On the linearity of torsion-free nilpotent groups of finite Morley rank*, 1813
- Amdeberhan, Tewodros, Luis A. Medina, and Victor H. Moll. *Asymptotic valuations of sequences satisfying first order recurrences*, 885
- Anchouche, Boudjemâa. *Analyticity of compact complements of complete Kähler manifolds*, 3037
- Andersen, Kenneth F., and Parasar Mohanty. *Restriction and extension of Fourier multipliers between weighted L^p spaces on \mathbb{R}^n and \mathbb{T}^n* , 1689
- Andrews, George E., and Lance L. Littlejohn. *A combinatorial interpretation of the Legendre-Stirling numbers*, 2581
- Appleby, John A. D., Xuerong Mao, and Markus Riedle. *Geometric Brownian motion with delay: mean square characterisation*, 339
- Aqzzouz, Belmesnaoui, and Aziz Elbour. *Erratum to: Compactness properties for operators dominated by AM-compact operators*, 2813
- Aramayona, Javier, Hugo Parlier, and Kenneth J. Shackleton. *Constructing convex planes in the pants complex*, 3523
- Araujo, Jesús. *Multiplicative bijections of semigroups of interval-valued continuous functions*, 171
- Aravire, Roberto, and Bill Jacob. *Relative Brauer groups in characteristic p* , 1265
- Araya, Tokuji. *The Auslander-Reiten conjecture for Gorenstein rings*, 1941
- Arcara, D., and F. Sato. *Recursive formula for $\psi^g - \lambda_1 \psi^{g-1} + \dots + (-1)^g \lambda_g$ in $\overline{\mathcal{M}}_{g,1}$* , 4077
- Argerami, Martín, and Pedro Massey. *Towards the carpenter's theorem*, 3679
- Arizmendi E., Octavio, and Victor Pérez-Abreu. *The S -transform of symmetric probability measures with unbounded supports*, 3057
- Arslan, Feza, Pınar Mete, and Mesut Şahin. *Gluing and Hilbert functions of monomial curves*, 2225
- Ash, Avner. *Set-theoretic Hida projectors*, 1235
- Asher, Jason. *A Kurosh-type theorem for type III factors*, 4109
- Atici, Ferhan M., and Paul W. Eloe. *Initial value problems in discrete fractional calculus*, 981
- Austin, Tim, Assaf Naor, and Yuval Peres. *The wreath product of \mathbb{Z} with \mathbb{Z} has Hilbert compression exponent $\frac{2}{3}$* , 85
- Azami, Jafar, Reza Naghipour, and Bahram Vakili. *Finiteness properties of local cohomology modules for \mathfrak{a} -minimax modules*, 439
- Badea, Catalin, Sophie Grivaux, and Vladimir Müller. *Multiples of hypercyclic operators*, 1397
- Badi, Adel B. *An index theorem for Toeplitz operators on the quarter-plane*, 3779
- Bae, Sunghan, and Linsheng Yin. *Cyclotomic units in function fields*, 401
- Bagarello, Fabio, Atsushi Inoue, and Camillo Trapani. *Bicommutants of reduced unbounded operator algebras*, 3709
- Bahturin, Yuri, Mikhail Kochetov, and Susan Montgomery. *Group gradings on simple Lie algebras in positive characteristic*, 1245
- Baladi, Viviane, and Daniel Smania. *Analyticity of the SRB measure for holomorphic families of quadratic-like Collet-Eckmann maps*, 1431

- Balmer, Paul. *Niveau spectral sequences on singular schemes and failure of generalized Gersten conjecture*, 99
- Bande, G., and D. Kotschick. *Moser stability for locally conformally symplectic structures*, 2419
- Bär, Renate, and Markus Brodmann. *Asymptotic depth of twisted higher direct image sheaves*, 1945
- Baricz, Árpád. *On a product of modified Bessel functions*, 189
- Barmpalias, George, Rod Downey, and Noam Greenberg. *K -trivial degrees and the jump-traceability hierarchy*, 2099
- Barov, Stoyu, and Jan J. Dijkstra. *On closed sets with convex projections under somewhere dense sets of directions*, 2425
- Barros, A., and P. Sousa. *Compact graphs over a sphere of constant second order mean curvature*, 3105
- Barto, Libor, Marcin Kozik, Miklós Maróti, and Todd Niven. *CSP dichotomy for special triads*, 2921
- Bary-Soroker, Lior. *Dirichlet's theorem for polynomial rings*, 73
- Bateman, Michael. *L^p estimates for maximal averages along one-variable vector fields in \mathbf{R}^2* , 955
- Bavula, V. V. *The group of order preserving automorphisms of the ring of differential operators on a Laurent polynomial algebra in prime characteristic*, 1891
- Baxa, Christoph. *Lévy constants of transcendental numbers*, 2243
- Behrndt, Jussi. *Realization of nonstrict matrix Nevanlinna functions as Weyl functions of symmetric operators in Pontryagin spaces*, 2685
- Behrndt, Jussi, Qutaibeh Katatbeh, and Carsten Trunk. *Non-real eigenvalues of singular indefinite Sturm-Liouville operators*, 3797
- Behrstock, Jason A., Tadeusz Januszkiewicz, and Walter D. Neumann. *Commensurability and QI classification of free products of finitely generated abelian groups*, 811
- Beiglböck, Mathias. *Arithmetic progressions in abundance by combinatorial tools*, 3981
- Bell, Jason P. *Simple algebras of Gelfand-Kirillov dimension two*, 877
- Belolipetsky, Mikhail. *On fields of definition of arithmetic Kleinian reflection groups*, 1035
- Bendaoud, M., and A. Bourhim. *Essentially spectrally bounded linear maps*, 3329
- Benjamini, Itai, and Yury Makarychev. *Dimension reduction for hyperbolic space*, 695
- Bereanu, C., P. Jebelean, and J. Mawhin. *Radial solutions for some nonlinear problems involving mean curvature operators in Euclidean and Minkowski spaces*, 161
- Bergweiler, Walter, and Alexandre Eremenko. *Meromorphic functions with linearly distributed values and Julia sets of rational functions*, 2329
- Bergweiler, Walter, Alastair Fletcher, Jim Langley, and Janis Meyer. *The escaping set of a quasiregular mapping*, 641
- Bernal-González, Luis. *Common hypercyclic functions for multiples of convolution and non-convolution operators*, 3787
- Berndt, Bruce C., and Dimitris Koukoulopoulos. *A reciprocity theorem for certain hypergeometric series*, 2369
- Bessa, G. Pacelli, and M. Silvana Costa. *Eigenvalue estimates for submanifolds with locally bounded mean curvature in $N \times \mathbb{R}$* , 1093
- Bessa, Mário, and João Lopes Dias. *Hamiltonian elliptic dynamics on symplectic 4-manifolds*, 585
- Bhowmick, Jyotishman. *Quantum isometry group of the n -tori*, 3155
- Biegert, Markus. *On traces of Sobolev functions on the boundary of extension domains*, 4169
- Bihan, Frédéric, and Frank Sottile. *Betti number bounds for fewnomial hypersurfaces via stratified Morse theory*, 2825
- Bilyk, Dmitriy. *Cyclic shifts of the van der Corput set*, 2591
- Birke, Melanie, and Holger Dette. *A note on some random orthogonal polynomials on a compact interval*, 3511
- Björklund, Michael, and Alexander Fish. *Equidistribution of dilations of polynomial curves in nilmanifolds*, 2111
- Blair-Stahn, Nathaniel D., and David B. Wilson. *Electrical response matrix of a regular $2n$ -gon*, 2015
- Bleher, Frauke M., Ted Chinburg, and Jennifer Froelich. *Capping groups and some cases of the Fontaine-Mazur conjecture*, 1551

- Blokh, Alexander, Michał Misiurewicz, and Lex Oversteegen. *Sets of constant distance from a compact set in 2-manifolds with a geodesic metric*, 733
- Bogges, Albert, and Andrew Raich. *A simplified calculation for the fundamental solution to the heat equation on the Heisenberg group*, 937
- Borwein, J., A. J. Guirao, P. Hájek, and J. Vanderwerff. *Uniformly convex functions on Banach spaces*, 1081
- Borwein, Peter, and Michael Coons. *Transcendence of power series for some number theoretic functions*, 1303
- Boshernitzan, Michael, and David Ralston. *Continued fractions and heavy sequences*, 3177
- Boț, Radu Ioan, and Ernő Robert Csetnek. *On an open problem regarding totally Fenchel unstable functions*, 1801
- Botelho, G., H.-A. Braunss, H. Junek, and D. Pellegrino. *Inclusions and coincidences for multiple summing multilinear mappings*, 991
- Botelho, Geraldo, and Pilar Rueda. *The Schur property on projective and injective tensor products*, 219
- Boumenir, Amin, and Vu Kim Tuan. *A trace formula and Schmincke inequality on the half-line*, 1039
- Bourget, A., T. McMillen, and A. Vargas. *Interlacing and nonorthogonality of spectral polynomials for the Lamé operator*, 1699
- Bourhim, A. *See Bendaoud, M.*
- Bouw, Irene I. *Construction of covers in positive characteristic via degeneration*, 3169
- Bownik, Marcin. *Intersection of dilates of shift-invariant spaces*, 563
- Brandolini, Luca, William Chen, Giacomo Gigante, and Giancarlo Travaglini. *Discrepancy for randomized Riemann sums*, 3187
- Braunss, H.-A. *See Botelho, G.*
- Braz e Silva, Pablo, Lucas C. F. Ferreira, and Elder J. Villamizar-Roa. *On the existence of infinite energy solutions for nonlinear Schrödinger equations*, 1977
- Breuillard, Emmanuel, Peter Friz, and Martin Huesmann. *From random walks to rough paths*, 3487
- Bringmann, Kathrin, and Karl Mahlburg. *Inequalities between ranks and cranks*, 2567
- Bringmann, Kathrin, and David Penniston. *Arithmetic properties of non-harmonic weak Maass forms*, 825
- Brodmann, Markus. *See Bär, Renate*
- Brudnyi, Alexander. *Holomorphic L^p -functions on coverings of strongly pseudoconvex manifolds*, 227
- Bruin, Henk, and Jonathan H. B. Deane. *Piecewise contractions are asymptotically periodic*, 1389
- Bruneau, Laurent, and François Germinet. *On the singularity of random matrices with independent entries*, 787
- Budney, Ryan, and Alexandra Mozgova. *An obstruction to a knot being deform-spun via Alexander polynomials*, 3547
- Bugeaud, Yann. *On sequences $(a_n \xi)_{n \geq 1}$ converging modulo 1*, 2609
- Burciu, Sebastian. *Normal Hopf subalgebras of semisimple Hopf algebras*, 3969
- Busé, Laurent, Marc Chardin, and Jean-Pierre Jouanolou. *Torsion of the symmetric algebra and implicitization*, 1855
- Cabot, Alexandre. *Asymptotics for a gradient system with memory term*, 3013
- Çampoy, A. Morales. *See Jiménez-Vargas, A.*
- Çap, Andreas. *AHS-structures and affine holonomies*, 1073
- Carl, Bernd. *On a Weyl inequality of operators in Banach spaces*, 155
- Carlson, Jon F., Sunil K. Chebolu, and Ján Mináč. *Freyd's generating hypothesis with almost split sequences*, 2575
- de Carvalho, André, Toby Hall, and Rupert Venzke. *On period minimal pseudo-Anosov braids*, 1771
- de Cataldo, Mark Andrea A., and Luca Migliorini. *On singularities of primitive cohomology classes*, 3593
- Catrina, Florin. *A note on a result of M. Grossi*, 3717
- Champanerkar, Abhijit, and Ilya Kofman. *Spanning trees and Khovanov homology*, 2157
- . *Twisting quasi-alternating links*, 2451

- Chan, Hei-Chi. *From a Ramanujan-Selberg continued fraction to a Jacobian identity*, 2849
- Chan, Wai Kiu, and Byeong-Kweon Oh. *Almost universal ternary sums of triangular numbers*, 3553
- Chandee, Vorrapan. *Explicit upper bounds for L-functions on the critical line*, 4049
- Chang, Der-Chen, Galia Dafni, and Hong Yue. *A div-curl decomposition for the local Hardy space*, 3369
- Chardin, Marc. *See* Busé, Laurent
- Chavan, Sameer. *A spectral exclusion principle for unbounded subnormals*, 211
- Chebolu, Sunil K. *See* Carlson, Jon F.
- Chebotar, M., P.-H. Lee, and E. R. Puczyłowski. *On prime rings with commuting nilpotent elements*, 2899
- Chen, Beifang. *The Gauss-Bonnet formula of polytopal manifolds and the characterization of embedded graphs with nonnegative curvature*, 1601
- Chen, C., and C-H. Chu. *Hypercyclicity of weighted convolution operators on homogeneous spaces*, 2709
- Chen, Dezhong. *A note on Ricci signatures*, 273
- Chen, Gui-Qiang, and Benoît Perthame. *Large-time behavior of periodic entropy solutions to anisotropic degenerate parabolic-hyperbolic equations*, 3003
- Chen, William. *See* Brandolini, Luca
- Chen, William Y. C., and Cindy C. Y. Gu. *The reverse ultra log-concavity of the Boros-Moll polynomials*, 3991
- Chen, Zhen-Qing. *On notions of harmonicity*, 3497
- Chiantini, Luca, and Angelo Felice Lopez. *Corrigendum to: "Focal loci of families and the genus of curves on surfaces"*, 3951
- Chinburg, Ted. *See* Bleher, Frauke M.
- Cho, Jinseok, Jun Murakami, and Yoshiyuki Yokota. *The complex volumes of twist knots*, 3533
- Cho, Sangbum, Darryl McCullough, and Arim Seo. *Arc distance equals level number*, 2801
- Choe, Boo Rim, Hyungwoon Koo, and Michael Stessin. *Carleson measures for Bergman spaces and their dual Berezin transforms*, 4143
- Choe, Hi Jun. *See* Ahn, Cheonghee
- Choi, Youngook. *On the syzygies of quasi-complete intersection space curves*, 3999
- Chu, C-H. *See* Chen, C.
- Chu, Qing. *Convergence of weighted polynomial multiple ergodic averages*, 1363
- Cibils, Claude, Aaron Lauve, and Sarah Witherspoon. *Hopf quivers and Nichols algebras in positive characteristic*, 4029
- Cilia, Raffaella, Joaquín M. Gutiérrez, and Giuseppe Saluzzo. *Compact factorization of differentiable mappings*, 1743
- Cilleruelo, Javier, and Moubariz Z. Garaev. *Least totients in arithmetic progressions*, 2913
- Clader, Emily, Yvonne Kemper, and Matt Wage. *Lacunarity of certain partition-theoretic generating functions*, 2959
- Cocos, M. *Bounded harmonic 1-forms on complete manifolds*, 1459
- Cohen, Daniel C. *Resonance of basis-conjugating automorphism groups*, 2835
- Conrey, J. Brian, David W. Farmer, and Özlem Imamoglu. *Palindromic random trigonometric polynomials*, 1835
- Console, Sergio, and Carlos Olmos. *Curvature invariants, Killing vector fields, connections and cohomogeneity*, 1069
- Coons, Michael. *See* Borwein, Peter
- Cooper, D., D. D. Long, and M. Thistlethwaite. *Constructing non-congruence subgroups of flexible hyperbolic 3-manifold groups*, 3943
- Cortissoz, Jean. *Some elementary estimates for the Navier-Stokes system*, 3343
- Costa, M. Silvana. *See* Bessa, G. Pacelli
- Costakis, G., D. Hadjiloucas, and A. Manoussos. *Dynamics of tuples of matrices*, 1025
- Coufal, Vesta. *A parametrized fixed point theorem*, 3939
- Cox, David A., and Evgeny Materov. *Regularity and Segre-Veronese embeddings*, 1883
- Crabbe, Andrew, and Janet Striuli. *Constructing big indecomposable modules*, 2181
- Croot, Ernie, and Olof Sisask. *A new proof of Roth's theorem on arithmetic progressions*, 805
- Csetnek, Ernő Robert. *See* Bot, Radu Ioan

- Csörnyei, Marianna, and Ville Suomala. *Which measures are projections of purely unrectifiable one-dimensional Hausdorff measures*, 145
- Cuccu, Fabrizio, Behrouz Emamizadeh, and Giovanni Porru. *Optimization of the first eigenvalue in problems involving the p -Laplacian*, 1677
- Culler, Marc, and Peter B. Shalen. *Betti numbers and injectivity radii*, 3919
- Cuong, Nguyen Tu, and Hoang Le Truong. *Parametric decomposition of powers of parameter ideals and sequentially Cohen-Macaulay modules*, 19
- Dafni, Galia. *See* Chang, Der-Chen
- Dajczer, Marcos, and Jorge Herbert S. de Lira. *Helicoidal graphs with prescribed mean curvature*, 2441
- Dancer, E. N., and Alberto Farina. *On the classification of solutions of $-\Delta u = e^u$ on \mathbb{R}^N : Stability outside a compact set and applications*, 1333
- D'Andrea, Carlos, and Luis Felipe Tabera. *Tropicalization and irreducibility of generalized Vandermonde determinants*, 3647
- De Koninck, Jean-Marie, John B. Friedlander, and Florian Luca. *On strings of consecutive integers with a distinct number of prime factors*, 1585
- De Pauw, Thierry, and Amos Koeller. *Linearly approximatable functions*, 1347
- De Volder, Cindy, and Halszka Tutaj-Gasińska. *Higher order embeddings of certain blow-ups of \mathbb{P}^2* , 4089
- Deane, Jonathan H. B. *See* Bruin, Henk
- Debremaeker, Raymond. *First neighborhood complete ideals in two-dimensional Muhly local domains are projectively full*, 1649
- DeGrado, Jessica L., Luke G. Rogers, and Robert S. Strichartz. *Gradients of Laplacian eigenfunctions on the Sierpinski gasket*, 531
- Delay, Erwann. *Perturbative solutions to the extended constant scalar curvature equations on asymptotically hyperbolic manifolds*, 2293
- Delgado de la Mata, Félix, and Julio José Moyano Fernández. *On the relation between the generalized Poincaré series and the Stöhr zeta function*, 51
- Delpéch, Sylvain. *A short proof of Pitt's compactness theorem*, 1371
- Denne, Elizabeth, and John M. Sullivan. *The distortion of a knotted curve*, 1139
- Desai, Angela. *A class of \mathbb{Z}^d shifts of finite type which factors onto lower entropy full shifts*, 2613
- Dette, Holger. *See* Birke, Melanie
- Dhanya, R., J. Giacomoni, and S. Prashanth. *Isolated singularities for the exponential type semilinear elliptic equation in \mathbb{R}^2* , 4099
- Dias, João Lopes. *See* Bessa, Mário
- Díaz, Antonio, Adam Glessner, Nadia Mazza, and Sejong Park. *Glauber's and Thompson's theorems for fusion systems*, 495
- Didas, Michael. *On the slice map problem for $H^\infty(\Omega)$ and the reflexivity of tensor products*, 2969
- Dijkstra, Jan J. *See* Barov, Stoyu
- Downey, Rod. *See* Barmpalias, George
- Dranishnikov, Alexander N. *On the Lusternik-Schnirelmann category of spaces with 2-dimensional fundamental group*, 1489
- Drewnowski, Lech. *See* Alon, Noga
- Dubickas, Artūras. *On the limit points of $(a_n \xi)_{n=1}^\infty \pmod 1$ for slowly increasing integer sequences $(a_n)_{n=1}^\infty$* , 449
- Dukes, W. M. B., Vít Jelínek, Toufik Mansour, and Astrid Reifegerste. *New equivalences for pattern avoiding involutions*, 457
- Duncan, Alexander, and Zinovy Reichstein. *SAGBI bases for rings of invariant Laurent polynomials*, 835
- Eichmair, Michael. *The size of isoperimetric surfaces in 3-manifolds and a rigidity result for the upper hemisphere*, 2733
- Eisensträger, Kirsten, and Graham Everest. *Descent on elliptic curves and Hilbert's tenth problem*, 1951
- Elbour, Aziz. *See* Aqzzouz, Belmesnaoui
- Elder, G. Griffith. *Galois scaffolding in one-dimensional elementary abelian extensions*, 1193
- Elduque, Alberto. *Jordan gradings on exceptional simple Lie algebras*, 4007

- Elekes, Márton. *On a converse to Banach's Fixed Point Theorem*, 3139
- Elias, Juan, and Giuseppe Valla. *A family of local rings with rational Poincaré series*, 1175

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9939

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to the AMS website. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Proceedings of the American Mathematical Society* is published monthly. Beginning January 1996 *Proceedings* is accessible from www.ams.org/journals/. Subscription prices for Volume 137 (2009) are as follows: for paper delivery, US\$1161 list, US\$929 institutional member, US\$1045 corporate member, US\$697 individual member; for electronic delivery, US\$1045 list, US\$836 institutional member, US\$941 corporate member, US\$627 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$49 for surface delivery outside the United States and India; US\$75 to India. Expedited delivery to destinations in North America is US\$89; elsewhere US\$163. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

Back number information. For back issues see www.ams.org/bookstore.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Acquisitions Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Proceedings of the American Mathematical Society (ISSN 0002-9939) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2294 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Proceedings*, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of length not exceeding 10 published pages. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$.

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/proc>.

In an effort to make articles available as quickly as possible, articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send out a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. The AMS uses Centralized Manuscript Processing for initial submission. Authors should submit a PDF file using the Initial Manuscript Submission form found at www.ams.org/peer-review-submission, or send one copy of the manuscript to the following address: Centralized Manuscript Processing, PROCEEDINGS OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Proceedings* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to the paper should be the 2010 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/msnhtml/serials.pdf. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. The AMS encourages electronically prepared manuscripts, with a strong preference for $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of $\mathcal{T}\mathcal{E}\mathcal{X}$, using $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the highly preferred format of $\mathcal{T}\mathcal{E}\mathcal{X}$, but author packages are also available in $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or plain $\mathcal{T}\mathcal{E}\mathcal{X}$ are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ users will find that $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the same as $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ with additional commands to simplify the typesetting of mathematics, and users of plain $\mathcal{T}\mathcal{E}\mathcal{X}$ should have the foundation for learning $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Authors may retrieve an author package for *Proceedings of the AMS* from www.ams.org/proc/procauthorpac.html or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter your complete email address as password, and type `cd pub/author-info`). The *AMS Author Handbook* and the *Instruction Manual* are available in PDF format from the author package link. The author package can also be obtained free of charge by sending email to tech-support@ams.org (Internet) or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ and the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org (Internet), or sent on diskette to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via e-mail or diskette, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from www.ams.org/authors/journals.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

AMS policy on making changes to articles after posting. Articles are posted to the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually posted to the AMS website but not yet in an issue, changes cannot be made in place in the paper. However, an “Added after posting” section may be added to the paper right before the References when there is a critical error in the content of the paper. The “Added after posting” section gives the author an opportunity to correct this type of critical error before the article is put into an issue for printing and before it is then reposted with the issue. The “Added after posting” section remains a permanent part of

the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is initially posted.

Once the article is assigned to an issue, even if the issue has not yet been posted to the AMS website, corrections may be made to the paper by submitting a traditional errata article. The errata article will appear in a future print issue and will link back and forth on the Web to the original article online.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/. An explanation of each production step is provided on the Web through links from the manuscript tracking screen. Questions can be sent to proc-query@ams.org.

T_EX files available upon request. T_EX files are available upon request for authors by sending email to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet email, please include the email address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T_EX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T_EX files cannot be guaranteed to run through the author's version of T_EX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author's T_EX environment.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to proc-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at www.ams.org/proc/procsubmit.html.

Managing Editor: Ronald A. Fintushel, Michigan State University, East Lansing, MI 48824-1027 USA; e-mail: ronfint@math.msu.edu

1. ODE, PDE, GLOBAL ANALYSIS, AND DYNAMICAL SYSTEMS

Coordinating Editor: Chuu-Lian Terng, University of California, Irvine, CA 92697-3875 USA; e-mail: cterng@math.uci.edu

Ergodic theory and dynamical systems, Bryna Kra, Northwestern University, Evanston, IL 60208-2730; e-mail: kra@math.northwestern.edu

Global analysis, noncommutative geometry, and the mathematics of string theory, Varghese Mathai, School of Mathematical Sciences, The University of Adelaide, SA 5005, Australia; e-mail: mathai.varghese@adelaide.edu.au

Ordinary differential equations and dynamical systems, Yingfei Yi, School of Mathematics, Georgia Institute of Technology, Atlanta, GA 30332-0001 USA; e-mail: yi@math.gatech.edu

Partial differential equations, Matthew J. Gursky, University of Notre Dame, 255 Hurley Hall, Notre Dame, IN 46556-4618 USA; e-mail: mgursky@nd.edu

2. TOPOLOGY AND GEOMETRY

Coordinating Editor: Jon G. Wolfson, Michigan State University, East Lansing, MI 48824-1027 USA; e-mail: wolfson@math.msu.edu

Algebraic topology, Brooke Shipley, University of Illinois at Chicago, 851 S. Morgan Street, Chicago, IL 60607-7045 USA; e-mail: bshipley@math.uic.edu

Differential geometry (Riemannian geometry, complex geometry, and symplectic geometry), Jon G. Wolfson

Geometric analysis (geometric PDE, minimal surfaces, and harmonic maps), Richard A. Wentworth, Johns Hopkins University, Baltimore, MD 21218 USA; e-mail: wentworth@jhu.edu

Geometric topology, Alexander N. Dranishnikov, University of Florida, 358 Little Hall, Gainesville, FL 32611-8105 USA; e-mail: dranish@math.ufl.edu

Low dimensional topology, gauge theory, 4-manifolds, Daniel Ruberman, Brandeis University, Waltham, MA 02254-9110 USA; e-mail: ruberman@brandeis.edu

3. ANALYSIS

Coordinating Editor: Mei-Chi Shaw, University of Notre Dame, Notre Dame, IN 46556-0398 USA; e-mail: mei-chi.shaw.1@nd.edu

Banach spaces and linear functional analysis, Nigel J. Kalton, University of Missouri, Columbia, MO 65211; e-mail: kaltonn@missouri.edu

Fourier analysis and dispersive PDE, Hart F. Smith, University of Washington, Box 354350, Seattle, WA 98195-4350 USA; e-mail: hart@math.washington.edu

Geometric function theory, Mario Bonk, University of Michigan, Ann Arbor, MI 48109-1043 USA; e-mail: mbonk@umich.edu

Geometric measure theory and its applications, Tatiana Toro, University of Washington, Box 354350, Seattle, WA 98195-4350 USA; e-mail: toro@math.washington.edu

Harmonic analysis, Michael T. Lacey, School of Mathematics, Georgia Institute of Technology, 686 Cherry Street NW, Atlanta, GA 30332-4301 USA; e-mail: lacey@math.gatech.edu

Operator algebras, Marius Junge, University of Illinois at Urbana-Champaign, 1409 W. Green Street, Urbana, IL 61801-2975 USA; e-mail: junge@math.uiuc.edu

Several complex variables, Franc Forstneric, University of Ljubljana, Jadranska 19, 1000 Ljubljana, Slovenia; e-mail: franc.forstneric@fmf.uni-lj.si

4. ALGEBRA, NUMBER THEORY, COMBINATORICS, AND LOGIC

Coordinating Editor: Martin Lorenz, Temple University, Philadelphia, PA 19122-6094 USA; e-mail: lorenz@temple.edu

Algebraic geometry, Ted Chinburg, University of Pennsylvania, Philadelphia, PA 19104-6395 USA; e-mail: ted@math.upenn.edu

Automorphic forms, number theory, and applications of number theory, Wen-Ching Winnie Li, Pennsylvania State University, University Park, PA 16802-6401 USA; e-mail: wli@math.psu.edu

Combinatorics, Jim Haglund, University of Pennsylvania, 209 S. 33rd Street, Philadelphia, PA 19104-6395 USA; e-mail: jhaglund@math.upenn.edu

Commutative algebra, Bernd Ulrich, Purdue University, West Lafayette, IN 47907-1395 USA; e-mail: ulrich@math.purdue.edu

Group theory, Jonathan I. Hall, Michigan State University, East Lansing, MI 48824-1027 USA; e-mail: jhall@math.msu.edu

Lie algebras and quantized enveloping algebras, Gail R. Letzter; e-mail: letzter.pams@verizon.net

Logic and foundations, Julia Knight, University of Notre Dame, 255 Hurley, Notre Dame, IN 46556-4618 USA; e-mail: knight.1@nd.edu

Noncommutative algebra, Birge Huisgen-Zimmermann, University of California, Santa Barbara, Santa Barbara, CA 93106-3080 USA; e-mail: bhz.pams@math.ucsb.edu

Number theory, Ken Ono, University of Wisconsin, Madison, WI 53706 USA; e-mail: ono@math.wisc.edu

5. APPLIED MATHEMATICS, PROBABILITY, AND STATISTICS

Coordinating Editor: Peter A. Clarkson, Institute of Mathematics, Statistics and Actuarial Science, University of Kent, Canterbury, CT2 7NF, United Kingdom; e-mail: P.A.Clarkson@kent.ac.uk

Applied probability and statistics, Edward C. Waymire, Oregon State University, Corvallis, OR 97331-4605 USA; e-mail: waymire@math.orst.edu

Integrable systems and special functions, Peter A. Clarkson

Partial differential equations and dynamical systems, Walter Craig, McMaster University, Hamilton, Ontario, L8S 4K1 Canada; e-mail: craig@math.mcmaster.ca

Probability, Richard C. Bradley, Indiana University, Bloomington, IN 47405-4301 USA; e-mail: bradleyr@indiana.edu

Special functions and approximation theory, Walter Van Assche, Katholieke Universiteit Leuven, Celestijnenlaan 200B, Box 2400, BE-3001 Leuven, Belgium; e-mail: walter.vanassche@wis.kuleuven.be
