## Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

**Submission information.** See **Information for Authors** at the end of this issue.

**Publisher Item Identifier.** The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

**Publication on the AMS website.** Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

**Subscription information.** *Proceedings of the American Mathematical Society* is published monthly and is also accessible electronically from [www.ams.org/journals/](http://www.ams.org/journals/). Subscription prices for Volume 143 (2015) are as follows: for paper delivery, US\$1489.00 list, US\$1191.20 institutional member, US\$1340.10 corporate member, US\$893.40 individual member; for electronic delivery, US\$1310.00 list, US\$1048.00 institutional member, US\$1179.00 corporate member, US\$786.00 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$5 for delivery within the United States; US\$52 for delivery outside the United States. Subscription renewals are subject to late fees. See [www.ams.org/journal-faq](http://www.ams.org/journal-faq) for more journal subscription information.

**Back number information.** For back issues see [www.ams.org/bookstore](http://www.ams.org/bookstore).

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2294 USA.

**Copying and reprinting.** Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Permissions to reuse portions of AMS publication content are handled by Copyright Clearance Center's RightsLink® service. For more information, please visit <http://www.ams.org/rightslink>.

Translation rights and licensed reprint requests should be sent to [reprint-permission@ams.org](mailto:reprint-permission@ams.org).

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

## Editorial Information

To be published in the *Proceedings*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication. *Proceedings* Editors solicit and encourage publication of worthy papers of **length not exceeding 15 published pages**. Published pages are the same size as those generated in the style files provided for  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$  or  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$ .

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/proc>.

In an effort to make articles available as quickly as possible, articles are electronically published on the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish is required before we can begin processing your paper. After a paper is accepted for publication, the Providence office will send a Consent to Publish to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

## Information for Authors

**Initial submission.** All articles submitted to this journal are peer reviewed. The AMS has a single blind peer-review process in which the reviewers know who the authors of the manuscript are, but the authors do not have access to the information on who the peer reviewers are. The AMS uses Centralized Manuscript Processing for initial submission. Authors should submit a PDF file using the Initial Manuscript Submission form found at [www.ams.org/submission/proc](http://www.ams.org/submission/proc) or send one copy of the manuscript to the following address: Centralized Manuscript Processing, PROCEEDINGS OF THE AMS, 201 Charles Street, Providence, RI 02904-2294 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Proceedings* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence and at most 150 words. Included with the footnotes to the paper should be the 2010 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from [www.ams.org/msc/](http://www.ams.org/msc/). The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from [www.ams.org/msnhtml/serials.pdf](http://www.ams.org/msnhtml/serials.pdf). To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at [www.ams.org/mrlookup/](http://www.ams.org/mrlookup/).

**Electronically prepared manuscripts.** Manuscripts should be electronically prepared in  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$ . To this end, the Society has prepared  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$  author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the  $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{T}\mathcal{E}\mathcal{X}$  style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web.

Authors may retrieve an author package for *Proceedings of the AMS* from [www.ams.org/proc/procauthorpac.html](http://www.ams.org/proc/procauthorpac.html) or via FTP to [ftp.ams.org](ftp://ftp.ams.org) (login as `anonymous`, enter your complete email address as password, and type `cd pub/author-info`). The *AMS Author*

*Handbook* and the *Instruction Manual* are available in PDF format from the author package link. The author package can also be obtained free of charge by sending email to [tech-support@ams.org](mailto:tech-support@ams.org) or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When requesting an author package, please specify the publication in which your paper will appear. Please be sure to include your complete email address.

**After acceptance.** The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the Web at [www.ams.org/submit-book-journal/](http://www.ams.org/submit-book-journal/), sent via email to [pub-submit@ams.org](mailto:pub-submit@ams.org), or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. Complete instructions on how to send files are included in the author package.

**Electronic graphics.** Comprehensive instructions on preparing graphics are available starting from [www.ams.org/authors/journals.html](http://www.ams.org/authors/journals.html). A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

**AMS policy on making changes to articles after publication.** Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually published to the AMS website, changes cannot be made in place in the paper. The AMS does not keep author-related information such as affiliation, current address, and email address up to date after a paper is electronically published.

Corrections of critical errors may be made to the paper by submitting an errata article to the Editor. The errata article will be published electronically, will appear in a future print issue, and will link back and forth on the Web with the original article.

**Secure manuscript tracking on the Web.** Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from [www.ams.org/mstrack/](http://www.ams.org/mstrack/). An explanation of each production step is provided on the Web through links from the manuscript tracking screen. Questions can be sent to [proc-query@ams.org](mailto:proc-query@ams.org).

**Inquiries.** Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to [proc-query@ams.org](mailto:proc-query@ams.org) or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2294 USA.

## Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at [www.ams.org/proc/procsubmit.html](http://www.ams.org/proc/procsubmit.html).

Managing Editor: Ken Ono, Emory University, Atlanta, GA 30322 USA; e-mail: [ono@mathcs.emory.edu](mailto:ono@mathcs.emory.edu)

### 1. ODE, PDE, GLOBAL ANALYSIS, AND DYNAMICAL SYSTEMS

Coordinating Editor: Nimish Shah, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210 USA; e-mail: [shah@math.osu.edu](mailto:shah@math.osu.edu)

**Ergodic theory and dynamical systems**, Nimish Shah

**Global analysis**, Guofang Wei, University of California, Santa Barbara, 552 University Road, Santa Barbara, CA 93106-3080 USA; e-mail: [wei@math.ucsb.edu](mailto:wei@math.ucsb.edu)

**Global analysis, noncommutative geometry, and the mathematics of string theory**, Varghese Mathai, School of Mathematical Sciences, The University of Adelaide, SA 5005, Australia; e-mail: [mathai.varghese@adelaide.edu.au](mailto:mathai.varghese@adelaide.edu.au)

**Ordinary differential equations and dynamical systems**, Yingfei Yi, School of Mathematics, Georgia Institute of Technology, Atlanta, GA 30332-0001 USA; e-mail: [yi@math.gatech.edu](mailto:yi@math.gatech.edu)

**Partial differential equations**, Joachim Krieger, École Polytechnique Fédérale de Lausanne Bâtiment des Mathématiques Station 8, CH-1015 Lausanne, Switzerland; e-mail: [joachim.krieger@epfl.ch](mailto:joachim.krieger@epfl.ch)

### 2. TOPOLOGY AND GEOMETRY

Coordinating Editor: Michael Wolf, Rice University, P. O. Box 1892, MS 136, Houston, TX 77005-1892 USA; e-mail: [mwolf@rice.edu](mailto:mwolf@rice.edu)

**Algebraic topology**, Michael A. Mandell, Indiana University Bloomington, 831 E. Third Street, Bloomington, IN 47405 USA; e-mail: [mmandell@indiana.edu](mailto:mmandell@indiana.edu)

**Differential geometry**, Lei Ni, University of California, San Diego, La Jolla, CA 92093 USA; e-mail: [lني@math.ucsd.edu](mailto:lني@math.ucsd.edu); [lني.math.ucsd@gmail.com](mailto:lني.math.ucsd@gmail.com)

**Geometric analysis**, Michael Wolf

**Geometric topology**, Kevin Whyte, University of Illinois at Chicago, 851 S. Morgan Street, Chicago, IL 60607-7045 USA; e-mail: [kwhyte@math.uic.edu](mailto:kwhyte@math.uic.edu)

**Topology of manifolds and knot theory**, Martin Scharlemann, University of California, Santa Barbara, 552 University Road, Santa Barbara, CA 93106-3080 USA; e-mail: [mgscharl@math.ucsb.edu](mailto:mgscharl@math.ucsb.edu)

### 3. ANALYSIS

Coordinating Editor: Mei-Chi Shaw, University of Notre Dame, Notre Dame, IN 46556-0398 USA; e-mail: [mei-chi.shaw.1@nd.edu](mailto:mei-chi.shaw.1@nd.edu)

**Banach spaces and linear functional analysis**, Thomas Schlumprecht, Texas A&M University, 3368 TAMU, College Station, TX 77843-3368 USA; e-mail: [schlump@math.tamu.edu](mailto:schlump@math.tamu.edu)

**Geometric function theory**, Jeremy Tyson, University of Illinois, 1409 W. Green Street, Urbana, IL 61801 USA; e-mail: [tyson@math.uiuc.edu](mailto:tyson@math.uiuc.edu)

**Geometric measure theory and its applications**, Tatiana Toro, University of Washington, Box 354350, Seattle, WA 98195-4350 USA; e-mail: [toro@math.washington.edu](mailto:toro@math.washington.edu)

**Harmonic analysis**, Alexander Iosevich, University of Rochester, Rochester, NY 14627 USA; e-mail: [iosevich@math.rochester.edu](mailto:iosevich@math.rochester.edu)

**Microlocal analysis and spectral theory**, Michael Hitrik, University of California, Los Angeles, Los Angeles, CA 90095-1555 USA; e-mail: [hitrik@math.ucla.edu](mailto:hitrik@math.ucla.edu)

**Operator algebras**, Marius Junge, University of Illinois at Urbana-Champaign, 1409 W. Green Street, Urbana, IL 61801-2975 USA; e-mail: [junge@math.uiuc.edu](mailto:junge@math.uiuc.edu)

**Operator theory and spaces of holomorphic functions**, Pamela B. Gorkin, Bucknell University, Lewisburg, PA 17837 USA; e-mail: [pgorkin@bucknell.edu](mailto:pgorkin@bucknell.edu)

**Several complex variables**, Franc Forstneric, University of Ljubljana, Jadranska 19, 1000 Ljubljana, Slovenia; e-mail: [franc.forstneric@fmf.uni-lj.si](mailto:franc.forstneric@fmf.uni-lj.si)

#### 4. ALGEBRA, NUMBER THEORY, COMBINATORICS, AND LOGIC

Coordinating Editor: Pham Huu Tiep, University of Arizona, 617 N. Santa Rita Avenue, Tucson, AZ 85721-0089 USA; e-mail: [tiep@math.arizona.edu](mailto:tiep@math.arizona.edu)

**Algebraic and arithmetic geometry**, Lev Borisov, Rutgers University, Piscataway, NJ 08854 USA; e-mail: [borisov@math.rutgers.edu](mailto:borisov@math.rutgers.edu)

**Algebraic number theory and arithmetic geometry**, Romyar T. Sharifi, University of Arizona, 617 N. Santa Rita Avenue, Tucson, AZ 85721-0089 USA; e-mail: [sharifi@math.arizona.edu](mailto:sharifi@math.arizona.edu)

**Automorphic and modular forms**, Kathrin Bringmann, Mathematisches Institut der Universität zu Koeln, Weyertal 86-90, D-50931 Koeln, Germany; e-mail: [kbringma@math.uni-koeln.de](mailto:kbringma@math.uni-koeln.de)

**Combinatorics**, Patricia L. Hersh, North Carolina State University, Box 8205, Raleigh, NC 27695-8205 USA; e-mail: [plhersh@ncsu.edu](mailto:plhersh@ncsu.edu)

**Commutative algebra**, Irena Peeva, Cornell University, 212 Garden Avenue, Ithaca, NY 14853 USA; e-mail: [irena@math.cornell.edu](mailto:irena@math.cornell.edu)

**Group theory**, Pham Huu Tiep

**Lie algebras and quantized enveloping algebras**, Kailash C. Misra, North Carolina State University, Box 8205, Raleigh, NC 27695-8205 USA; e-mail: [misra@math.ncsu.edu](mailto:misra@math.ncsu.edu)

**Logic and foundations**, Mirna Džamonja, School of Mathematics, University of East Anglia, Norwich NR4 7TJ, United Kingdom; e-mail: [h020@uea.ac.uk](mailto:h020@uea.ac.uk)

**Noncommutative algebra and invariant theory**, Harm Derksen, University of Michigan, 530 Church Street, Ann Arbor, MI 48109-1043 USA; e-mail: [hderksen@umich.edu](mailto:hderksen@umich.edu)

**Number theory**, Matthew A. Papanikolas, Texas A&M University, 3368 TAMU, College Station, TX 77843-3368 USA; e-mail: [map@math.tamu.edu](mailto:map@math.tamu.edu)

#### 5. APPLIED MATHEMATICS, PROBABILITY, AND STATISTICS

Coordinating Editor: Mark M. Meerschaert, Department of Probability and Statistics, Michigan State University, East Lansing, MI 48823 USA; e-mail: [mcubed@stt.msu.edu](mailto:mcubed@stt.msu.edu)

**Applied probability and statistics**, David Levin, University of Oregon, Eugene, OR 97403-1221 USA; e-mail: [dlevin@uoregon.edu](mailto:dlevin@uoregon.edu)

A. ALGEBRA, NUMBER THEORY, AND COMBINATORICS

Zbigniew Jelonek, <a href="#">Affine varieties with exotic models</a> .....	1
Edgar E. Enochs and Alina Iacob, <a href="#">Gorenstein injective covers and envelopes over noetherian rings</a> .....	5
M. Ferrarotti, E. Fortuna, and L. Wilson, <a href="#">Local algebraic approximation of semianalytic sets</a> .....	13
Yuji Odaka, <a href="#">On parametrization, optimization and triviality of test configurations</a>	25
M. Cuntz and T. Hoge, <a href="#">Free but not recursively free arrangements</a> .....	35
Shane O'Rourke, <a href="#">A tree-free group that is not orderable</a> .....	41
Shiping Liu and Charles Paquette, <a href="#">Standard components of a Krull-Schmidt category</a> .....	45
Rosa M. Miró-Roig, <a href="#">On the representation type of a projective variety</a> .....	61
Grigoriy Blekherman, <a href="#">Positive Gorenstein ideals</a> .....	69
Daniel J. Hernández, <a href="#">F-invariants of diagonal hypersurfaces</a> .....	87
Abed Abedelfatah, <a href="#">On the Eisenbud-Green-Harris conjecture</a> .....	105
David A. Towers, <a href="#">On minimal non-elementary Lie algebras</a> .....	117
Sabine El Khoury, Manoj Kummini, and Hema Srinivasan, <a href="#">Bounds for the multiplicity of Gorenstein algebras</a> .....	121

B. ANALYSIS

Robert Deville, Milen Ivanov, and Sebastián Lajara, <a href="#">Construction of pathological Gâteaux differentiable functions</a> .....	129
Xiaoyao Zhou, Yaqing Zhang, and Ercai Chen, <a href="#">Topological conditional entropy for amenable group actions</a> .....	141
Xuehua Chen and Christopher D. Sogge, <a href="#">On integrals of eigenfunctions over geodesics</a> .....	151
Masahiro Ikeda and Yuta Wakasugi, <a href="#">A note on the lifespan of solutions to the semilinear damped wave equation</a> .....	163
Paolo Salani, <a href="#">A characterization of balls through optimal concavity for potential functions</a> .....	173
Heng Huat Chan and Yoshio Tanigawa, <a href="#">A generalization of a Brafman-Bailey type identity</a> .....	185
Walter Bergweiler, <a href="#">An entire function with no fixed points and no invariant Baker domains</a> .....	197
Kiran Parkhe, <a href="#">Smooth gluing of group actions and applications</a> .....	203
Åsvald Lima, <a href="#">On lifting the approximation property from a Banach space to its dual</a> .....	213
Sui-Chung Ng, <a href="#">On proper holomorphic mappings among irreducible bounded symmetric domains of rank at least 2</a> .....	219
Michael Ruzhansky and Mitsuru Sugimoto, <a href="#">Trace theorems: critical cases and best constants</a> .....	227
