E. B. VAN VLECK: *A determination of the number ...*

- P. 130, l. 16. This line should be $E\left(\frac{X+2}{2}\right) + E\left(\frac{Y+2}{2}\right) - 2$.
- P. 130, l. 17. For (22) read (21).
- P. 130, l. 10 up. " $\lambda - \lambda'_i - \lambda'_j + 1$ " $\lambda'_1 + \lambda'_i > \lambda'_j + 1$.

E. H. MOORE: *On the projective axioms of geometry.*

Pp. 142-158. In Hilbert's system I, II the axiom I4 is not redundant. The error in my proof of the dependence of I4 lies in the omission of a citation of I4 in proof of the second statement of ll. 21-24, p. 143. That statement, call it I4*, is in effect: If two planes have their respective sets of incident points identical, they are themselves identical. The axiom I4 does depend upon I1-3, 5, 7, II 1-3, 5 and I4*.—E. H. M.

- P. 143, l. 22. Insert the references (I2; I4).—The connection is in a 1-1 way.
- P. 146, l. 6 up. Omit *indeed*.
