secure greater generality, in the corresponding footnote for Theorems I and IV.

P. 318, l. 3. In the parenthesis at the right hand end of the line, for $\alpha$ read $\alpha'$.

P. 323, l. 10 up. For $0 < \alpha < \frac{c}{m}$ read $0 < \alpha$.

P. 327, l. 3. " $\phi(\alpha, x)$ " read $|\phi(\alpha, x)|$.

G. A. Bliss, *A new form of the simplest problem* ....

P. 411, l. 3 up. The function $E(x, y, \sigma, \tau)$ should be defined as the negative of the expression given.
