

TRANSACTIONS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

DUNHAM JACKSON

EDWARD KASNER

HOWARD HAWKS MITCHELL

WITH THE COOPERATION OF

**RAYMOND W. BRINK
WILLIAM C. GRAUSTEIN
AUBREY J. KEMPNER
GEORGE Y. RAINICH
FRANCIS R. SHARPE**

**EDWARD W. CHITTENDEN
OLIVE C. HAZLETT
JOHN R. KLINE
JOSEPH F. RITT
JACOB D. TAMARKIN**

**JESSE DOUGLAS
EINAR HILLE
CHARLES N. MOORE
CAROLINE E. SEELY
J. H. M. WEDDERBURN**

VOLUME 31
1929

PUBLISHED BY THE SOCIETY
MENASHA, WIS., AND NEW YORK

1929

Reprinted with the permission of The American Mathematical Society

PRINTED IN THE UNITED STATES OF AMERICA

TABLE OF CONTENTS

VOLUME 31, 1929

	PAGE
ADAMS, C. R., of Providence, R. I. On the linear partial q -difference equation of general type	360
——— Note on integro- q -difference equations	861
ALBERT, A. A., of Chicago, Ill. A determination of all normal division algebras in sixteen units	253
AYRES, W. L., of Austin, Tex. Concerning the arc-curves and basic sets of a continuous curve, second paper	595
BELL, E. T., of Pasadena, Calif. Certain invariant sequences of polynomials	405
CALUGARÉANO, G., of Paris, France. Les fonctions polygènes comme intégrales d'équations différentielles	372
CAMP, B. H., of Middletown, Conn. The multinomial solid and the chi test	133
CARPENTER, A. F., of Seattle, Wash. Tetrads of ruled surfaces	523
CARSON, J. R., of New York, N. Y. The asymptotic solution of an operational equation	782
CHITTENDEN, E. W., of Iowa City, Iowa. On general topology and the relation of the properties of the class of all continuous functions to the properties of space	290
DICKSON, L. E., of Chicago, Ill. Universal quadratic forms	164
EMCH, A., of Urbana, Ill. Triple and multiple systems, their geometric configurations and groups.	25
FORD, L. R., of Houston, Tex. The limit points of a group	821
FORT, T., of Bethlehem, Pa. Generalized factorial series	233
GEHMAN, H. M., of New Haven, Conn. On extending a continuous (1-1) correspondence (second paper)	241
GROVE, V. G., of East Lansing, Mich. Nets with equal W invariants	845
——— Contributions to the general theory of transformations of nets	853
HAZLETT, O. C., of Urbana, Ill. Homogeneous polynomials with a multiplication theorem	223
HEINEMAN, E. R., of Lubbock, Tex. Generalized Vandermonde determinants	464
HICKSON, A. O., of Providence, R. I. An application of the calculus of variations to boundary value problems	563
HUTCHINSON, J. I., of Ithaca, N. Y. Properties of functions represented by the Dirichlet series $\sum (av+b)^{-s}$, or by linear combinations of such series	322
JACKSON, D., of Minneapolis, Minn. A note on closest approximation	215
KOOPMAN, B. O., of New York, N. Y. On the singularities of linear partial differential equations	687
LANGER, R. E., of Madison, Wis. The boundary problem associated with a differential equation in which the coefficient of the parameter changes sign	1
——— The asymptotic location of the roots of a certain transcendental equation.	837
——— The expansion problem in the theory of ordinary linear differential systems of the second order	868

	PAGE
LEHMER, D. N., of Berkeley, Calif. On the congruences connected with certain magic squares	529
LUBBEN, R. G., of Austin, Tex. Separation theorems with applications to questions concerning accessibility and plane continua	503
McCOY, N. H., of Iowa City, Ia. On commutation formulas in the algebra of quantum mechanics	793
MACDUFFEE, C. C., of Columbus, Ohio. An introduction to the theory of ideals in linear associative algebras	71
MANNING, W. A., of Stanford University, Calif. The degree and class of multiply transitive groups, II	643
MILES, E. R. C., of Houston, Tex. Boundary value problems for potentials of a single layer	190
MILNE, W. E., of Stanford University, Calif. On the degree of convergence of the Gram-Charlier series	422
——— On the degree of convergence of expansions in an infinite interval	907
MORSE, M., of Cambridge, Mass. The foundations of the calculus of variations in the large in m -space (first paper)	379
PIERPONT, J., of New Haven, Conn. Foucault's pendulum in elliptic space	444
RANUM, A., of Ithaca, N. Y. The singular points of analytic space-curves	145, 931
RITT, J. F., of New York, N. Y. Algebraic combinations of exponentials	654
——— On the zeros of exponential polynomials	680
ROOS, C. F., of Chicago, Ill. A general problem of minimizing an integral with discontinuous integrand	58
ROWE, C. H., of Dublin, Ireland. A kinematical treatment of some theorems on normal rectilinear congruences	919
RUPP, C. A., of State College, Pa. An extension of Pascal's theorem.	580
RUTLEDGE, G., of Cambridge, Mass. The basic power series of interpolation	807
SHEFFER, I. M., of Chicago, Ill. Expansions in generalized Appell polynomials, and a class of related linear functional equations	261
——— Systems of infinitely many linear differential equations of infinite order, with constant coefficients	281
SHOHAT, J. A. (CHOKHATE, J. A.), of Ann Arbor, Mich. On a certain formula of mechanical quadratures with non-equidistant ordinates	448
SUSCHKEWITSCH, A., of Voronesh, Russia. On a generalization of the associative law	204
VANDIVER, H. S., of Austin, Tex. On Fermat's last theorem	613
WALL, H. S., of Madison, Wis. On the Padé approximants associated with the continued fraction and series of Stieltjes	91
——— On extended Stieltjes series	771
WALSH, J. L., of Cambridge, Mass. Note on the expansion of analytic functions in series of polynomials and in series of other analytic functions	53
——— On approximation by rational functions to an arbitrary function of a complex variable.	477

TABLE OF CONTENTS

v

	PAGE
WEATHERBURN, C. E., of Christchurch, New Zealand. On curvilinear congruences.	117
WIDDER, D. V., of Minneapolis, Minn. On the expansion of analytic functions of the complex variable in generalized Taylor's series	43
——— A generalization of Dirichlet's series and of Laplace's integrals by means of a Stieltjes integral	694
WILDER, R. L., of Ann Arbor, Mich. Concerning zero-dimensional sets in euclidean space.	345
WILSON, W. A., of New Haven, Conn. Certain problems related to the cutting of a simply connected plane region by a continuum.	552
——— On linear upper semi-continuous collections of bounded continua	829
ZIPPIN, L., of Philadelphia, Pa. A study of continuous curves and their relation to the Janiszewski-Mullikin theorem	744
Errata, volume 31	931
