

TRANSACTIONS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ROBERT D. CARMICHAEL

FRANCIS R. SHARPE

JACOB D. TAMARKIN

WITH THE COÖPERATION OF

**ERIC T. BELL
OLIVE C. HAZLETT
JOHN R. KLINE
MARSTON MORSE
CAROLINE E. SEELY**

**EDWARD W. CHITTENDEN
EINAR HILLE
ERNEST P. LANE
GEORGE Y. RAINICH
CHARLES H. SISAM**

**WILLIAM C. GRAUSTEIN
AUBREY J. KEMPNER
CHARLES N. MOORE
JOSEPH F. RITT
MARSHALL H. STONE**

VOLUME 35
1933

PUBLISHED BY THE SOCIETY
MENASHA, WIS., AND NEW YORK
1933

Reprinted with the permission of The American Mathematical Society

PRINTED IN THE UNITED STATES OF AMERICA

TABLE OF CONTENTS

VOLUME 35, 1933

	PAGE
ADAMS, C. R., and CLARKSON, J. A., of Providence, R. I. On definitions of bounded variation for functions of two variables	824
AGNEW, R. P., of Providence, R. I. On Riesz and Cesàro methods of summability	532
ALBERT, A. A., of Chicago, Ill. Non-cyclic algebras of degree and exponent four	112
——— Cyclic fields of degree eight	949
BECKENBACH, E. F., and RADÓ, T., of Columbus, Ohio. Subharmonic functions and minimal surfaces	648
——— Subharmonic functions and surfaces of negative curvature	662
BELL, E. T., of Pasadena, Calif. The Latin square, or cyclic, functions	734
——— Polynomial diophantine systems	903
BLISS, G. A., and HESTENES, M. R., of Chicago, Ill. Sufficient conditions for a problem of Mayer in the calculus of variations	305
BRAHANA, H. R., of Urbana, Ill. Groups $\{S, T\}$ whose commutator subgroups are abelian	386
BULLOCK, R. C., of Jackson, Tenn. Non-conjugate osculating quadrics of a curve on a surface	518
CAIRNS, S. S., of Bethlehem, Pa. An axiomatic basis for plane geometry	234
CARLITZ, L., of Durham, N. C. On abelian fields	122
——— On the representation of a polynomial in a Galois field as the sum of an even number of squares	397
CARMICHAEL, R. D., of Urbana, Ill. Systems of linear difference equations and expansions in series of exponential functions	1
CLARKSON, J. A., and ADAMS, C. R., of Providence, R. I. On definitions of bounded variation for functions of two variables	824
CURRIER, A. E., of Cambridge, Mass. Proof of the fundamental theorems on second-order cross partial derivatives	245
DIAMOND, A. H., of Berkeley, Calif. The complete existential theory of the Whitehead-Huntington set of postulates for the algebra of logic	940
DOOB, J. L., of New York, N. Y. The boundary values of analytic functions. II.	418
GERGEN, J. J., of Cambridge, Mass. Convergence criteria for double Fourier series	29
GRAVES, L. M., of Chicago, Ill. A transformation of the problem of Lagrange in the calculus of variations	675
GRIFFIN, M., of Durham, N. C. Invariants of Pfaffian systems	929
GROVE, V. G., of East Lansing, Mich. Contributions to the theory of transformations of nets in a space S_n	683
HESTENES, M. R., of Chicago, Ill. Sufficient conditions for the general problem of Mayer with variable end points	479

	PAGE
HESTENES, M. R., and BLISS, G. A., of Chicago, Ill. Sufficient conditions for a problem of Mayer in the calculus of variations	305
HOLLCROFT, T. R., of Aurora, N. Y. The general web of algebraic surfaces of order n and the involution defined by it	855
HUNTINGTON, E. V., of Cambridge, Mass. New sets of independent postulates for the algebra of logic, with special reference to Whitehead and Russell's <i>Principia Mathematica</i>	274
—— Boolean algebra. A correction	557
—— A second correction	971
JEFFERY, R. L., of Wolfville, Nova Scotia. Sets of k -extent in n -dimensional space	629
LATIMER, C. G., of Lexington, Ky. On the class number of a cyclic field	411
LEFSCHETZ, S., and WHITEHEAD, J. H. C., of Princeton, N. J. On analytical complexes	510
LEV, J., of Ithaca, N. Y. Effects of linear transformations on the divergence of bounded sequences and functions	888
LEWIS, D. C., of Cambridge, Mass. Infinite systems of ordinary differential equations with applications to certain second-order partial differential equations	792
MCCOY, N. H.; of Northampton, Mass. On the resultant of a system of forms homogeneous in each of several sets of variables	215
MCSHANE, E. J., of Chicago, Ill. Parametrizations of saddle surfaces, with application to the problem of Plateau	716
MANNING, W. A., of Palo Alto, Calif. The degree and class of multiply transitive groups, III.	585
MILLER, G. A., of Urbana, Ill. Groups in which every operator has at most a prime number of conjugates	897
MONTGOMERY, D., of Iowa City, Iowa. Sections of point sets	915
MYERS, S. B., of Cambridge, Mass. Sufficient conditions in the problem of the calculus of variations in n -space in parametric form and under general end conditions.	746
ORE, O., of New Haven, Conn. On a special class of polynomials	559
PALEY, R. E. A. C., of Cambridge, Mass. A special integral function	709
PALEY, R. E. A. C., and WIENER, N., of Cambridge, Mass. Notes on the theory and application of Fourier transforms. I-II	348
—— Notes on the theory and application of Fourier transforms. III, IV, V, VI, VII	761
PALL, G., of Montreal, Canada. The structure of the number of representations function in a binary quadratic form	491
RADÓ, T., of Columbus, Ohio. An iterative process in the problem of Plateau	869
RADÓ, T., and BECKENBACH, E. F., of Columbus, Ohio. Subharmonic functions and minimal surfaces	648

	PAGE
—— Subharmonic functions and surfaces of negative curvature . . .	662
ROTH, W. E., of Milwaukee, Wis. On the equation $P(A, X) = 0$ in matrices	689
SAKS, S., of Warsaw, Poland. On some functionals	549
—— Addition to the note on some functionals	965
SCHERBERG, M. G., of Minneapolis, Minn. The degree of convergence of a series of Bessel functions	172
SCHOENBERG, I. J., of Chicago, Ill. On finite-rowed systems of linear inequalities in infinitely many variables. II	452
SHEFFER, I. M., of State College, Pa. On the properties of polynomials satisfying a linear differential equation: Part I.	184
SHERMAN, J., of Philadelphia, Pa. On the numerators of the convergents of the Stieltjes continued fractions	64
SINGER, J., of Princeton, N. J. Three-dimensional manifolds and their Heegaard diagrams	88
SINKOV, A., of Washington, D. C. Families of groups generated by two operators of the same order	372
SNYDER, V., of Ithaca, N. Y. On a series of involutorial Cremona transformations of space defined by a pencil of ruled surfaces	341
SULLIVAN, M. M., of Cambridge, Mass. On the derivatives of Newtonian and logarithmic potentials near the acting masses	137
THOMAS, J. M., of Durham, N. C. Pfaffian systems of species one.	356
WARD, M., of Pasadena, Calif. The cancellation law in the theory of congruences to a double modulus	254
—— The arithmetical theory of linear recurring series	600
WHITEHEAD, J. H. C., and LEFSCHETZ, S., of Princeton, N. J. On analytical complexes	510
WHITNEY, H., of Princeton, N. J. A characterization of the closed 2-cell	261
WIENER, N., and PALEY, R. E. A. C., of Cambridge, Mass. Notes on the theory and application of Fourier transforms. I-II	348
—— Notes on the theory and application of Fourier transforms. III, IV, V, VI, VII	761
WIENER, N., of Cambridge, Mass., and YOUNG, R. C., of Cambridge, England. The total variation of $g(x+h) - g(x)$	327
YOUNG, R. C., of Cambridge, England, and WIENER, N., of Cambridge, Mass. The total variation of $g(x+h) - g(x)$	327
ZIPPIN, L., of Princeton, N. J. Correction to a paper on the Moore-Kline problem	972
