

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

INDEX, VOLUMES 31-40  
1929-1936

	VOL.	PAGES
ADAMS, C. R. On the linear partial $q$ -difference equation of general type.....	31 <sub>2</sub>	360-371
----- Note on integro- $q$ -difference equations.....	31 <sub>4</sub>	861-867
----- On summability of double series.....	34 <sub>2</sub>	215-230
----- The space of functions of bounded variation and certain general spaces.....	40 <sub>3</sub>	421-438
ADAMS, C. R., and CLARKSON, J. A. On definitions of bounded variation for functions of two variables.....	35 <sub>4</sub>	824-854
----- Properties of functions $f(x, y)$ of bounded variation.....	36 <sub>4</sub>	711-730
AGNEW, R. P. The behavior of bounds and oscillations of sequences of functions under regular transformations.....	32 <sub>4</sub>	669-708
----- The effects of general regular transformations on oscillations of sequences of functions.....	33 <sub>2</sub>	411-424
----- On Riesz and Cesàro methods of summability.....	35 <sub>2</sub>	532-548
ALBERT, A. A. A determination of all normal division algebras in sixteen units.....	31 <sub>2</sub>	253-260
----- New results in the theory of normal division algebras....	32 <sub>2</sub>	171-195
----- On direct products, cyclic division algebras, and pure Riemann matrices.....	33 <sub>1</sub>	219-234
	33 <sub>4</sub>	999
----- On normal division algebras of type $R$ in thirty-six units	33 <sub>1</sub>	235-243
----- On direct products.....	33 <sub>3</sub>	690-711
----- Normal division algebras of degree four over an algebraic field.....	34 <sub>2</sub>	363-372
----- On normal simple algebras.....	34 <sub>3</sub>	620-625
----- Non-cyclic algebras of degree and exponent four.....	35 <sub>1</sub>	112-121
----- Cyclic fields of degree eight.....	35 <sub>4</sub>	949-964
----- Normal division algebras over a modular field.....	36 <sub>2</sub>	388-394
----- On normal Kummer fields over a non-modular field.....	36 <sub>4</sub>	885-892
----- On cyclic fields.....	37 <sub>3</sub>	454-462
----- Normal division algebras of degree $p^e$ over $F$ of characteristic $p$ .....	39 <sub>1</sub>	183-188
----- Simple algebras of degree $p^e$ over a centrum of characteristic $p$ .....	40 <sub>1</sub>	112-126
ALBERT, A. A., and HASSE, H. A determination of all normal division algebras over an algebraic number field.....	34 <sub>3</sub>	722-726

	VOL.	PAGES
AYRES, W. L. Concerning the arc-curves and basic sets of a continuous curve, second paper . . . . .	31 <sub>3</sub>	595-612
—— On the regular points of a continuum . . . . .	33 <sub>1</sub>	252-262
BAMFORTH, F. R. Surface transformations . . . . .	32 <sub>3</sub>	417-450
BAMFORTH, F. R., and BIRKHOFF, G. D. Divergent series and singular points of ordinary differential equations . . . . .	32 <sub>1</sub>	114-146
BARTKY, W., and MACMILLAN, W. D. Permanent configurations in the problem of four bodies . . . . .	34 <sub>4</sub>	838-875
BASYE, R. E. Simply connected sets . . . . .	38 <sub>2</sub>	341-356
BATEMAN, H. The $k$ -function, a particular case of the confluent hypergeometric function . . . . .	33 <sub>4</sub>	817-831
BECKENBACH, E. F., and RADÓ, T. Subharmonic functions and minimal surfaces . . . . .	35 <sub>3</sub>	648-661
—— Subharmonic functions and surfaces of negative curvature . . . . .	35 <sub>3</sub>	662-674
BELL, E. T. Certain invariant sequences of polynomials . . . . .	31 <sub>3</sub>	405-421
—— Numbers of representations of integers in a certain triad of ternary quadratic forms . . . . .	32 <sub>1</sub>	1- 5
—— Analytic functions in the irregular field of all numerical functions . . . . .	32 <sub>4</sub>	869-878
—— Singular relations between certain arithmetical functions . . . . .	33 <sub>1</sub>	65- 71
—— Arithmetical composition and inversion of functions over classes . . . . .	33 <sub>4</sub>	897-933
—— The Latin square, or cyclic, functions . . . . .	35 <sub>3</sub>	734-745
—— Polynomial diophantine systems . . . . .	35 <sub>4</sub>	903-914
—— On the power series for elliptic functions . . . . .	36 <sub>4</sub>	841-852
—— General relations between Bernoulli, Euler, and allied polynomials . . . . .	38 <sub>3</sub>	493-500
—— A functional equation in arithmetic . . . . .	39 <sub>3</sub>	341-344
BERNSTEIN, B. A. A set of four postulates for Boolean algebra in terms of the "implicative" operation . . . . .	36 <sub>4</sub>	876-884
BINNEY, J. H. An elliptic system of integral equations on summable functions . . . . .	37 <sub>2</sub>	254-265
BIRD, M. T., CARMICHAEL, R. D., and MARTIN, W. T. On a classification of integral functions by means of certain invariant point properties . . . . .	40 <sub>3</sub>	462-473
BIRKHOFF, G. Integration of functions with values in a Banach space . . . . .	38 <sub>2</sub>	357-378
BIRKHOFF, G., and HALL, P. On the order of groups of automorphisms . . . . .	39 <sub>3</sub>	496-499
BIRKHOFF, G. D., and BAMFORTH, F. R. Divergent series and singular points of ordinary differential equations . . . . .	32 <sub>1</sub>	114-146

	VOL.	PAGES
BLACK, A. H. Types of involutorial space transformations associated with certain rational curves. . . . .	34 <sub>4</sub>	795-810
BLISS, G. A., and HESTENES, M. R. Sufficient conditions for a problem of Mayer in the calculus of variations. . . . .	35 <sub>1</sub>	305-326
BOAS, R. P. Some theorems on Fourier transforms and conjugate trigonometric integrals. . . . .	40 <sub>2</sub>	287-308
BOCHNER, S. Summation of multiple Fourier series by spherical means. . . . .	40 <sub>2</sub>	175-207
BOCHNER, S., and VON NEUMANN, J. Almost periodic functions in groups, II. . . . .	37 <sub>1</sub>	21- 50
BOSANQUET, L. S. Some arithmetic means connected with Fourier series. . . . .	39 <sub>2</sub>	189-204
BRAHANA, H. R. Groups $\{S, T\}$ whose commutator subgroups are abelian. . . . .	35 <sub>2</sub>	386-396
— Metabelian groups of order $p^{n+m}$ with commutator subgroups of order $p^m$ . . . . .	36 <sub>4</sub>	776-792
— Note on irreducible quartic congruences. . . . .	38 <sub>2</sub>	395-400
BRISTOW, L. Expansion theory associated with linear differential equations and their regular singular points. . . . .	33 <sub>2</sub>	455-474
BROWN, A. B. Functional dependence. . . . .	38 <sub>2</sub>	379-394
BROWN, A. B., and KOOPMAN, B. O. On the covering of analytic loci by complexes. . . . .	34 <sub>2</sub>	231-251
— The Riemann multiple-space and algebroid functions. . . . .	36 <sub>3</sub>	618-626
BULLOCK, R. C. Non-conjugate osculating quadrics of a curve on a surface. . . . .	35 <sub>2</sub>	518-531
BURINGTON, R. S. On the equivalence of quadrics in $m$ -affine $n$ -space and its relation to the equivalence of $2m$ -pole networks. . . . .	38 <sub>1</sub>	163-176
CAIRNS, S. S. An axiomatic basis for plane geometry. . . . .	35 <sub>1</sub>	234-244
— The generalized theorem of Stokes. . . . .	40 <sub>1</sub>	167-174
CALUGARÉANO, G. Les fonctions polygènes comme intégrales d'équations différentielles. . . . .	31 <sub>2</sub>	372-378
— On differential equations admitting polygenic integrals. . . . .	32 <sub>1</sub>	110-113
CAMERON, R. H. Almost periodic transformations. . . . .	36 <sub>2</sub>	276-291
CAMP, B. H. The multinomial solid and the chi test. . . . .	31 <sub>1</sub>	133-144
CARLITZ, L. On Galois fields of certain types. . . . .	32 <sub>3</sub>	451-472
— On abelian fields. . . . .	35 <sub>1</sub>	122-136
— On the representation of a polynomial in a Galois field as the sum of an even number of squares. . . . .	35 <sub>2</sub>	397-410
CARMICHAEL, R. D. Systems of linear difference equations and expansions in series of exponential functions. . . . .	35 <sub>1</sub>	1- 28
CARMICHAEL, R. D., MARTIN, W. T., and BIRD, M. T. On a		

	VOL.	PAGES
classification of integral functions by means of certain invariant point properties . . . . .	40 <sub>3</sub>	462-473
CARPENTER, A. F. Tetrads of ruled surfaces . . . . .	31 <sub>3</sub>	523-528
CARSON, J. R. The asymptotic solution of an operational equation . . . . .	31 <sub>4</sub>	782-792
CHITTENDEN, E. W. On general topology and the relation of the properties of the class of all continuous functions to the properties of space . . . . .	31 <sub>2</sub>	290-321
CHOKHATE, J. See SHOHAT, J. A.		
CHURCH, A., and ROSSER, J. B. Some properties of conversion . . . . .	39 <sub>3</sub>	472-482
CHURCHILL, R. V. On the geometry of the Riemann tensor . . . . .	34 <sub>1</sub>	126-152
---- Canonical forms for symmetric linear vector functions in pseudo-euclidean space . . . . .	34 <sub>4</sub>	784-794
CLARKSON, J. A. Uniformly convex spaces . . . . .	40 <sub>3</sub>	396-414
CLARKSON, J. A., and ADAMS, C. R. On definitions of bounded variation for functions of two variables . . . . .	35 <sub>4</sub>	824-854
---- Properties of functions $f(x, y)$ of bounded variation . . . . .	36 <sub>4</sub>	711-730
CLEVELAND, C. M. On the existence of acyclic curves satisfying certain conditions with respect to a given continuous curve . . . . .	33 <sub>4</sub>	958-978
COE, C. J. Exterior motion in the restricted problem of three bodies . . . . .	34 <sub>4</sub>	811-837
COOK, A. J. Pairs of rectilinear congruences with generators in one-to-one correspondence . . . . .	32 <sub>1</sub>	31- 46
CRAIG, H. V. On parallel displacement in a non-Finsler space . . . . .	33 <sub>1</sub>	125-142
CRAMLET, C. M. A complete system of tensors of linear homogeneous second-order differential equations . . . . .	34 <sub>3</sub>	626-644
CURRIER, A. E. The variable end point problem of the calculus of variations including a generalization of the classical Jacobi condition . . . . .	34 <sub>3</sub>	689-704
---- Proof of the fundamental theorems on second-order cross partial derivatives . . . . .	35 <sub>1</sub>	245-253
CURTISS, J. Interpolation in regularly distributed points . . . . .	38 <sub>3</sub>	458-473
CUTLER, E. H. On the curvatures of a curve in Riemann space . . . . .	33 <sub>4</sub>	832-838
---- Frenet formulas for a general subspace of a Riemann space . . . . .	33 <sub>4</sub>	839-850
DAVIS, D. R. Integrals whose extremals are a given $2n$ -parameter family of curves . . . . .	33 <sub>1</sub>	244-251
DIAMOND, A. H. The complete existential theory of the Whitehead-Huntington set of postulates for the algebra of logic . . . . .	35 <sub>4</sub>	940-948
---- Correction to a paper on the Whitehead-Huntington postulates . . . . .	36 <sub>4</sub>	893
DICKSON, L. E. Universal quadratic forms . . . . .	31 <sub>1</sub>	164-189
---- Constructions of division algebras . . . . .	32 <sub>2</sub>	319-334

	VOL.	PAGES
— Waring's problem for cubic functions. . . . .	36 <sub>1</sub>	1- 12
— A new method for Waring theorems with polynomial summands. . . . .	36 <sub>4</sub>	731-748
— Cyclotomy and trinomial congruences. . . . .	37 <sub>3</sub>	363-380
— Cyclotomy when $e$ is composite. . . . .	38 <sub>2</sub>	187-200
— A new method for Waring theorems with polynomial summands, II. . . . .	39 <sub>2</sub>	205-208
DOOB, J. L. The boundary values of analytic functions. . . . .	34 <sub>1</sub>	153-170
— The boundary values of analytic functions. II. . . . .	35 <sub>2</sub>	418-451
— Probability and statistics. . . . .	36 <sub>4</sub>	759-775
— Statistical estimation. . . . .	39 <sub>3</sub>	410-421
DOUGLAS, J. Solution of the problem of Plateau. . . . .	33 <sub>1</sub>	263-321
— One-sided minimal surfaces with a given boundary. . . . .	34 <sub>4</sub>	731-756
DUNFORD, N. Integration in general analysis. . . . .	37 <sub>3</sub>	441-453
— Corrections to the paper "Integration in general analysis" . . . . .	38 <sub>3</sub>	600-601
— Integration and linear operations. . . . .	40 <sub>3</sub>	474-494
DUNFORD, N., and MORSE, A. P. Remarks on the preceding paper of James A. Clarkson. . . . .	40 <sub>3</sub>	415-420
DYE, L. A. Involutorial transformations in $S_3$ of order $n$ with an $(n-1)$ -fold line. . . . .	32 <sub>2</sub>	251-261
DYE, L. A., and SHARPE, F. R. The Bertini transformation in space. . . . .	36 <sub>2</sub>	292-305
EARL, J. M. Polynomials of best approximation on an infinite interval. . . . .	32 <sub>4</sub>	888-904
EIESLAND, J. The ruled $V_4^4$ in $S_5$ associated with a Schläfli hexad . . . . .	36 <sub>2</sub>	315-326
EMCH, A. Triple and multiple systems, their geometric configurations and groups. . . . .	31 <sub>1</sub>	25- 42
ENGSTROM, H. T. On the common index divisors of an algebraic field. . . . .	32 <sub>2</sub>	223-237
— The theorem of Dedekind in the ideal theory of Zolotarev . . . . .	32 <sub>4</sub>	879-887
— On sequences defined by linear recurrence relations. . . . .	33 <sub>1</sub>	210-218
EVANS, G. C. On potentials of positive mass. Part I. . . . .	37 <sub>2</sub>	226-253
— Potentials of positive mass. II. . . . .	38 <sub>2</sub>	201-236
FEJÉR, L. Trigonometrische Reihen und Potenzreihen mit mehrfach monotoner Koeffizientenfolge. . . . .	39 <sub>1</sub>	18- 59
FEKETE, M. Some generalizations of Paley's theorems on Fourier series with positive coefficients. . . . .	38 <sub>2</sub>	237-249
FERAUD, L. On Birkhoff's Pfaffian systems. . . . .	32 <sub>4</sub>	817-831
FIALKOW, A. Trajectories and lines of force. . . . .	38 <sub>1</sub>	89-105
— Initial motion in fields of force. . . . .	40 <sub>3</sub>	495-501
FORD, L. R. The limit points of a group. . . . .	31 <sub>4</sub>	821-828
FORT, T. Generalized factorial series. . . . .	31 <sub>2</sub>	233-240

	VOL.	PAGES
FRÉCHET, M., and SHOCHAT, J. A proof of the generalized second limit-theorem in the theory of probability.....	{ 33 <sub>2</sub> 33 <sub>4</sub>	533-543 999
GEHMAN, H. M. On extending a continuous (1-1) correspondence (second paper).....	31 <sub>2</sub>	241-252
GERGEN, J. J. Convergence criteria for double Fourier series....	35 <sub>1</sub>	29- 63
GERGEN, J. J., and LITTAUER, S. B. Continuity and summability for double Fourier series.....	38 <sub>3</sub>	401-435
GERONIMUS, J. On orthogonal polynomials.....	33 <sub>1</sub>	322-328
GHOSH, S. On the solution of the equations of elastic equilibrium suitable for elliptic boundaries.....	32 <sub>1</sub>	47- 60
GILLESPIE, D. C., and HURWITZ, W. A. On sequences of continuous functions having continuous limits.....	32 <sub>3</sub>	527-543
GORE, G. D. Inscribed sequences of surfaces associated with generalized sequences of Laplace.....	36 <sub>3</sub>	530-541
GOURIN, E. On irreducible polynomials in several variables which become reducible when the variables are replaced by powers of themselves.....	32 <sub>3</sub>	485-501
GRAUSTEIN, W. C. Parallelism and equidistance in classical differential geometry.....	34 <sub>3</sub>	557-593
----- The geometry of Riemannian spaces.....	36 <sub>3</sub>	542-585
GRAVES, L. M. A transformation of the problem of Lagrange in the calculus of variations.....	35 <sub>3</sub>	675-682
----- The existence of an extremum in problems of Mayer....	39 <sub>3</sub>	456-471
GRIFFIN, M. Invariants of Pfaffian systems.....	35 <sub>4</sub>	929-939
GROVE, V. G. Nets with equal $W$ invariants.....	31 <sub>4</sub>	845-852
----- Contributions to the general theory of transformations of nets.....	31 <sub>4</sub>	853-860
----- A canonical form of Green's projective analogue of the Gauss differential equations.....	32 <sub>3</sub>	473-484
----- The transformation $E$ of nets.....	33 <sub>1</sub>	147-152
----- The transformation $C$ of nets in hyperspace.....	33 <sub>3</sub>	733-741
----- Contributions to the theory of transformations of nets in a space $S_n$ .....	35 <sub>3</sub>	683-688
----- On a certain correspondence between surfaces in hyperspace.....	36 <sub>3</sub>	627-636
----- Differential geometry of a certain type of surface in $S_4$ ....	39 <sub>1</sub>	60- 70
----- Differential geometry of a surface at a planar point.....	40 <sub>1</sub>	155-166
HALL, P., and BIRKHOFF, G. On the order of groups of automorphisms.....	39 <sub>3</sub>	496-499
HARSHBARGER, F. The geometric configuration defined by a special algebraic relation of genus four.....	33 <sub>2</sub>	557-578

	VOL.	PAGES
HASSE, H. Theory of cyclic algebras over an algebraic number field.....	34 <sub>1</sub>	171-214
— Additional note to the author's "Theory of cyclic algebras over an algebraic number field".....	34 <sub>3</sub>	727-730
HASSE, H., and ALBERT, A. A. A determination of all normal division algebras over an algebraic number field.....	34 <sub>3</sub>	722-726
HAZLETT, O. C. Homogeneous polynomials with a multiplication theorem.....	31 <sub>2</sub>	223-232
— On division algebras.....	32 <sub>4</sub>	912-925
HEDLUND, G. A. Poincaré's rotation number and Morse's type number.....	34 <sub>1</sub>	75- 97

— Some properties of prime-power groups.....	38 <sub>3</sub>	485-492
WEISS, M. J. The limit of transitivity of a substitution group..	32 <sub>2</sub>	262-283
WHITEHEAD, J. H. C. On linear connections.....	33 <sub>1</sub>	191-209

	VOL.	PAGES
WHITEHEAD, J. H. C., and LEFSCHETZ, S. On analytical complexes. . . . .	35 <sub>2</sub>	510-517
WHITNEY, H. Non-separable and planar graphs. . . . .	34 <sub>2</sub>	339-362
— A characterization of the closed 2-cell. . . . .	35 <sub>1</sub>	261-273
— Analytic extensions of differentiable functions defined in closed sets. . . . .	36 <sub>1</sub>	63- 89
— Differentiable functions defined in closed sets. I. . . . .	36 <sub>2</sub>	369-387
— Differentiable functions defined in arbitrary subsets of Euclidean space. . . . .	40 <sub>2</sub>	309-317
WHYBURN, G. T. Cut points of connected sets and of continua. . . . .	32 <sub>1</sub>	147-154
— On the structure of connected and connected im kleinen point sets. . . . .	32 <sub>4</sub>	926-943
— Non-separated cuttings of connected point sets. . . . .	33 <sub>2</sub>	444-454
WHYBURN, W. M. Functional properties of the solutions of differential systems. . . . .	32 <sub>3</sub>	502-508
WIDDER, D. V. On the expansion of analytic functions of the complex variable in generalized Taylor's series. . . . .	31 <sub>1</sub>	43- 52
— A generalization of Dirichlet's series and of Laplace's integrals by means of a Stieltjes integral. . . . .	31 <sub>4</sub>	694-743
— Necessary and sufficient conditions for the representation of a function as a Laplace integral. . . . .	33 <sub>4</sub>	851-892
— The inversion of the Laplace integral and the related moment problem. . . . .	36 <sub>1</sub>	107-200
— A classification of generating functions. . . . .	39 <sub>2</sub>	244-298
WIENER, N., and PALEY, R. E. A. C. Notes on the theory and application of Fourier transforms. I-II. . . . .	35 <sub>2</sub>	348-355
— Notes on the theory and application of Fourier transforms. III, IV, V, VI, VII. . . . .	35 <sub>4</sub>	761-791
WIENER, N., and YOUNG, R. C. The total variation of $g(x+h) - g(x)$ . . . . .	35 <sub>1</sub>	327-340
WILDER, R. L. Concerning zero-dimensional sets in euclidean space. . . . .	31 <sub>2</sub>	345-359
— A converse of the Jordan-Brouwer separation theorem in three dimensions. . . . .	32 <sub>4</sub>	632-657
WILSON, W. A. Certain problems related to the cutting of a simply connected plane region by a continuum. . . . .	31 <sub>3</sub>	552-562
— On linear upper semi-continuous collections of bounded continua. . . . .	31 <sub>4</sub>	829-836
— On cyclic numbers of one-dimensional compact sets. . . . .	34 <sub>2</sub>	263-273
WINTNER, A., and JESSEN, B. Distribution functions and the Riemann zeta function. . . . .	38 <sub>1</sub>	48- 88

	VOL.	PAGES
WONG, B. C. Certain contact properties of linear systems of hypersurfaces.....	37 <sub>2</sub>	207-215
YOUNG, R. C., and WIENER, N. The total variation of $g(x+h) - g(x)$ .....	35 <sub>1</sub>	327-340
ZIPPIN, L. A study of continuous curves and their relation to the Janiszewski-Mullikin theorem.....	31 <sub>4</sub>	744-770
—— The Moore-Kline problem.....	34 <sub>3</sub>	705-721
—— Correction to a paper on the Moore-Kline problem.....	35 <sub>4</sub>	972
ZIPPIN, L., and MONTGOMERY, D. Periodic one-parameter groups in three-space.....	40 <sub>1</sub>	24- 36
ZYGMUND, A. On lacunary trigonometric series.....	34 <sub>3</sub>	435-446
—— Some points in the theory of trigonometric and power series.....	36 <sub>3</sub>	586-617
Errata, volume 26 (Wedderburn, J. H. M. Algebras which do not possess a finite basis, pp. 395-426).....	32 <sub>4</sub>	944
Errata, volume 29 (Ritt, J. F. A factorization theory for functions $\sum_{i=1}^n a_i e^{\alpha_i x}$ , pp. 584-596).....	34 <sub>4</sub>	938
