

## ERRATA, VOLUME 41

A. P. MORSE, *Convergence in variation and related topics*, pp. 48–83.

Page 55, line 4. Instead of  $f'(t) = \mu$  read  $|f'(t)| = \mu$ .

Page 55. In the fourth line of the four line display replace  $-$  by  $+$ .

Page 62, Lemma 4.4. Property (iii) should read, *if  $\phi$  is any function in CC which is applicable to  $f$ , then  $\phi$  is applicable to  $g$  and  $\dots$*

Also in Lemma 4.4, the last member of the first line which defines  $\Lambda(t)$  should read  $|\phi:f(t) - \phi:f(t-)|$ .

Page 64. In the statement of Lemma 4.5 and Corollary 4.1, replace  $g$  by  $f$ .

Page 74. In the second line of the statement of Theorem 5.8, replace  $[0, 1]$  by  $[0, t]$ .

Page 80. The displayed line in the statement of Theorem 8.2 should be the same as the corresponding line in Theorem 8.3.

OYSTEIN ORE, *On the theorem of Jordan-Hölder*, pp. 266–275.

In line 1, p. 274, there is a disturbing misprint. Theorem 7 is a consequence of Theorem 1, not of Theorem 5 as stated. It is essential that the conditions for Theorem 5 are *not* satisfied in this case. A simple calculation shows however that the conditions for Theorem 1 are fulfilled.
