Journals Published by the

American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains some of the officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1951. The subscription price is $7.00. Sets of volumes of the BULLETIN are available as follows: Vols. 1–36 (1894–1930), $7.00 each; Vols. 37–53 (1931–1947), $9.00 each; Vols. 54–55 (1948–1949), $11.00 each; Vol. 56 (1950), $7.00.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

One volume of six numbers is planned for 1951. The subscription price is $11.00. Vol. 1 (1950) is available at the price of $11.00.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the PROCEEDINGS.

Normally two volumes of three numbers each are published annually. The price per volume is $6.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) consist of two number each. Sets of volumes are available as follows: Vol. 1–21 (1900–1920), $7.00 each; Vols. 22–32 (1921–1930), $8.00 each; Vols. 33–36 (1931–1934), $9.00 each; Vols. 37–69 (1935–1950), $6.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by 13 mathematical organizations both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly excepting July and the price per annual volume is $20.00. Orders for complete volumes only are accepted. Volumes 1–11 are available at $20.00 per volume.

Published in January, March, May, July, September, and November by the American Mathematical Society, Menasha, Wis., and 531 West 116th Street, New York 27, N. Y.

Entered as second class matter at the post office at Menasha, Wis. Acceptance for mailing at special rate of postage provided for in the Act of February 28, 1925, embodied in paragraph 4, section 538, P. L. and R., authorized May 9, 1935.

Subscriptions for the BULLETIN of the American Mathematical Society, the PROCEEDINGS of the American Mathematical Society, and the TRANSACTIONS of the American Mathematical Society may be addressed to the publication office, Menasha, Wis., and subscriptions for MATHEMATICAL REVIEWS may be addressed to the publication office, Lancaster, Pa. However, subscriptions for all these journals should preferably be addressed to the American Mathematical Society, 531 West 116th Street, New York 27, N.Y.

TABLE OF CONTENTS
VOLUME 70, JANUARY TO JUNE, 1951

AGMON, S. Functions of exponential type in an angle and singularities of Taylor series 492

BERKOVITZ, L. D. Circular summation and localization of double trigonometric series 323

BERS, L. Boundary value problems for minimal surfaces with singularities at infinity 465

BING, R. H. A characterization of 3-space by partitionings 15

BOWEN, N. A., and MACINTYRE, A. J. Some theorems on integral functions with negative zeros 114

CALABI, E., and DVORETZKY, A. Convergence- and sum-factors for series of complex numbers 177

CAMERON, R. H., and GRAVES, R. E. Additive functionals on a space of continuous functions. I 160

DVORETZKY, A., and CALABI, E. Convergence- and sum-factors for series of complex numbers 177

GOODMAN, A. W., and ROBERTSON, M. S. A class of multivalent functions 127

GRAVES, R. E., and CAMERON, R. H. Additive functionals on a space of continuous functions. I 160

HAHN, S. W. Universal spaces under strong homeomorphisms 301

HARISH-CHANDRA. On some applications of the universal enveloping algebra of a semisimple Lie algebra 28

HIRSCHMAN, I. I. The behavior at infinity of certain convolution transforms 1

HSIUNG, C. C. A general theory of conjugate nets in projective hyperspace 312

JACOBSON, N. General representation theory of Jordan algebras 509

JERISON, M. Characterizations of certain spaces of continuous functions 103

KAPLANSKY, I. The structure of certain operator algebras 219

KATO, T. Fundamental properties of Hamiltonian operators of Schrödinger type 195

KATO, T. On the existence of solutions of the helium wave equation .. 212

KOOPMAN, B. O. Exponential limiting products in Banach algebras .. 256

KOOPMAN, B. O. A law of small numbers in Markoff chains 277

MACINTYRE, A. J., and BOWEN, N. A. Some theorems on integral functions with negative zeros 114

MAUTNER, F. I. The regular representation of a restricted direct product of finite groups 531

MOTZKIN, TH. The lines and planes connecting the points of a finite set . 451

PENICO, A. J. The Wedderburn principal theorem for Jordan algebras .. 404

PRICE, C. M. Jordan division algebras and the algebras $A(\lambda)$ 291

ROBERTSON, M. S., and GOODMAN, A. W. A class of multivalent functions 127

ROBINSON, R. M. Undecidable rings 137

RUDIN, W. Uniqueness theory for Hermite series 387

SPRINGER, G. The coefficient problem for schlicht mapping of the exterior of the unit circle 421

SUZUKI, M. On the lattice of subgroups of finite groups 345

SUZUKI, M. On the L-homomorphisms of finite groups 372

WALLACE, A. D. Extensional invariance 97

Index, volumes 61–70 1–13

CONTENTS

Vol. 70, No. 1 JANUARY, 1951 Whole No. 242

Page

The behavior at infinity of certain convolution transforms. By. I. I. HIRSCHMAN 1

A characterization of 3-space by partitionings. By R. H. BING 15

On some applications of the universal enveloping algebra of a semi-simple Lie algebra. By HARISH-CHANDRA 28

Extensional invariance. By A. D. WALLACE 97

Characterizations of certain spaces of continuous functions. By MEYER JERISON 103

Some theorems on integral functions with negative zeros. By N. A. BOWEN and A. J. MACINTYRE 114

A class of multivalent functions. By A. W. GOODMAN and M. S. ROBERTSON 127

Undecidable rings. By R. M. ROBINSON 137

Additive functionals on a space of continuous functions. I. By R. H. CAMERON and R. E. GRAVES 160

Convergence- and sum-factors for series of complex numbers. By E. CALABI and A. DVORETZKY 177

Mathematical papers intended for publication in the TRANSACTIONS should be addressed to one of the editors:

Papers in algebra, number theory, logic and foundations to Saunders MacLane, University of Chicago, Chicago 37, Ill.

Papers in probability, theory of measure, and real variables to J. L. Doob, Department of Mathematics, University of Illinois, Urbana, Ill.

Other papers in analysis and applied mathematics to L. V. Ahlfors, Department of Mathematics, Harvard University, Cambridge 38, Mass.

Papers in geometry and topology to G. T. Whyburn, School of Mathematics, University of Virginia, Charlottesville, Va.

All papers should be typewritten, double spaced, and the author should keep a complete copy.

Transactions of the American Mathematical Society is indexed regularly by Engineering Index, Inc.

A Statement of Editorial Policy. Because of the large accumulation of manuscripts and the heavy demand for space and in order to avoid long delay in publication, the editors of the TRANSACTIONS may require substantial condensation of manuscripts before they are accepted. Authors must present their results in as compact a form as possible and should avoid space-consuming exposition and discussion. Long manuscripts will be subject to especial scrutiny on these points by the editors.
