ERRATUM TO "OSCILLATION OF AN OPERATOR"

BY

ROBERT WHITLEY

The definition of a $c_0$-operator on p. 66 should be reworded to make it clear that multiplicities are counted, e.g. $T$ is a $c_0$-operator if the set $\{ s: \omega(T, s) > \epsilon \}$ is finite for each $\epsilon > 0$.

ERRATUM TO "AUTOMORPHISMS OF GROUP EXTENSIONS"

BY

CHARLES WELLS

Note 3, page 191, is incorrect. The structure theorem for $\text{Aut}(E; G)$ given here is a generalization of Theorem 2.4 of [2]. It is not a generalization of results given in the other references in Note 3, contrary to the statement made there. The author apologizes for this slip, which occurred during a revision of the paper.
