## TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

**THIS JOURNAL** is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the **PROCEEDINGS**.

**PREPARATION OF THE MANUSCRIPT.** All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy.

**FORM OF MANUSCRIPT.** The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the *AMS (MOS) subject classification numbers* representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to *Mathematical Reviews, Index to Volume 39* (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

**SUBMISSION OF MANUSCRIPT.** See the inside back cover of this journal.

**GALLEY PROOF.** When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

**PUBLICATION CHARGES.** The research journals of the American Mathematical Society carry a page charge of \$40.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the **NOTICES** of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

**BACKLOG.** 300 pages. Two-thirds of the papers currently being accepted by the editors will be published in 12–15 months.

**SUBSCRIPTION INFORMATION.** **TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY** is published monthly. Subscription prices for Volumes 247–256 (1979) are \$288.00 list; \$144.00 member.

**BACK NUMBER INFORMATION.** Back number prices *per volume* are: for Volumes 78–134, \$18.00 list, \$13.50 member; for Volumes 135–214, \$30.00 list, \$22.50 member; for Volumes 215–224, \$32.00 list, \$24.00 member; for Volumes 225–246, \$36.00 list, \$27.00 member. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–224 are available on 35mm microfilm from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

### MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in **TRANSACTIONS**. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the **TRANSACTIONS** so that papers intended for publication in this series should be addressed to one of the editors listed on the inside back cover.

## SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow:

**Real analysis** (excluding harmonic analysis) and **applied mathematics** to ROBERT T. SEELEY, Department of Mathematics, University of Massachusetts—Boston, Harbor Campus, Boston, MA 02125.

**Harmonic and complex analysis** to R. O. WELLS, JR., Department of Mathematics, Rice University, P. O. Box 1892, Houston, Texas 77001.

**Abstract analysis** to W. A. J. LUXEMBURG, Department of Mathematics 253–37, California Institute of Technology, Pasadena, CA 91125.

**Algebra and number theory** (excluding universal algebras) to MICHAEL ARTIN, Department of Mathematics, Room 2-239, Massachusetts Institute of Technology, Cambridge, MA 02139.

**Logic, foundations, universal algebras and combinatorics** to SOLOMON FEFERMAN, Department of Mathematics, Stanford University, Stanford, CA 94305.

**Topology** to JAMES D. STASHEFF, Department of Mathematics, University of North Carolina, Chapel Hill, NC 27514.

**Global analysis and differential geometry** to ALAN D. WEINSTEIN, Department of Mathematics, Rice University, Houston, Texas 77001.

**Probability and statistics** to STEVEN OREY, School of Mathematics, University of Minnesota, Minneapolis, MN 55455.

All other communications to the editors should be addressed to the Managing Editor, JAMES D. STASHEFF.

## COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc., Operations Center, P. O. Box 765, Schenectady, New York 12301. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

## CONTENTS

Vol. 248, No. 1

February 1979

Whole No. 525

A general Stone-Gelfand duality By J. LAMBEK and B. A. RATTRAY.....	1
Higher order Massey products and links By EDWARD J. O'NEILL.....	37
Circle-preserving functions of spheres By JOEL GIBBONS and CARY WEBB.....	67
Uniquely arcwise connected plane continua have the fixed-point property By CHARLES L. HAGOPIAN.....	85
On tails and domains of attraction of stable measures in Banach spaces By ALOISIO ARAUJO and EVARIST GINÉ.....	105
Small zeros of additive forms in many variables By WOLFGANG M. SCHMIDT.....	121
Some infinite free boundary problems By DAVID E. TEPPER and GERALD WILDENBERG.....	135
The periodic behavior of Morse-Smale diffeomorphisms on compact surfaces By CAROLYN C. NARASIMHAN.....	145
On a case of extensions of group schemes By B. WEISFEILER.....	171
The PL Grassmanian and PL curvature By NORMAN LEVITT.....	191
Automorphisms of the deformation space of a Kleinian group By JAMES A. GENTILESCO.....	207
Erratum to "Torsion in the bordism of oriented involutions" By RUSSELL J. ROWLETT.....	221
