TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in
general, longer papers than those in the PROCEEDINGS.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and
two copies should be sent to the appropriate editor. The author should keep a complete copy.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an
abstract which summarizes the article in language suitable for workers in the general field (algebra,
analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as
"Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical
usage associates them with the work. The abstract should be at least one complete sentence, and at most
300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper,
but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification
representing the primary and secondary subjects of the article, which may be followed by a list of key
words and phrases describing the subject matter of the article and taken from it. The 1980 Mathematics
Subject Classification can be found in the Annual Subject Indexes to Mathematical Reviews beginning
with the December 1978 issue.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a
requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only
one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript
which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a
page charge of $50.00 per page to help defray the cost of publication. The amount is charged to the
institution or to a contract supporting the research reported in the published paper. The publication
charge policy of the United States Federal Council for Science and Technology (FCST) is reported on
page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case
is the author personally responsible for paying the page charge, nor is acceptance of his paper for
publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be
published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATI-
CAL SOCIETY is published monthly. Subscription prices for Volumes 287–292 (1985) are $540.00 list;
$432.00 institutional member. A late charge of 10% of the subscription price will be imposed upon orders
received from nonmembers after January 1 of the subscription year. Subscribers outside the United States
and India must pay a postage surcharge of $15.00; subscribers in India must pay a postage surcharge of
$28.00.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–280,
$96.00 list, $77.00 institutional members; for volumes 281–286, $111 list, $89 institutional members.
Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New
York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms
International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed
to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All
orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248,
Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by
the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904.
Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address
changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248,
Providence, R. I. 02940.

The paper used in this journal is acid-free and falls within the guidelines
established to ensure permanence and durability.
## INDEX TO VOLUME 289
### May–June 1985

Benson, Chai and Ellis, David B. *Characteristic classes of transversely homogeneous foliations*, 849.

Bergman, Clifford. See Hogben, Leslie.

Biarynicki-Birula, Andrzej and Sommese, Andrew John. *Quotients by $\mathbb{C}^* \times \mathbb{C}^*$ actions*, 519.

Brin, Matthew G. and Thickstun, T. L. *On the proper Steenrod homotopy groups, and proper embeddings of planes into 3-manifolds*, 737.

Bruckner, A. M. See Agronsky, S.

Clarke, F. H. and Vinter, R. B. *Regularity properties of solutions to the basic problem in the calculus of variations*, 73.

Ellis, David B. See Benson, Chal.

Farmaki, V. See Argyros, S.

Gordon, Carolyn S. and Wilson, Edward N. *The fine structure of transitive Riemannian isometry groups*. I, 367.

Griffith, Phillip. See Evans, E. Graham.

Gutiérrez, Christian E. See Gatto, Angel E.

Hopkins, Nora C. *Some structure theory for a class of triple systems*, 203.

Kierstead, H. A. and Remmel, J. B. *Degrees of indiscernibles in decidable models*, 41.

Laczkovich, M. See Agronsky, S.

Levenberg, Norman. *Monge–Ampère measures associated to extremal plurisubharmonic functions in $\mathbb{C}^n$*, 333.

Lin, Chung-Yuan. See Eie, Minking.

---
Martin, Joe. See Barge, Marcy.
de Melo, W., dos Reis, G. L. and Mendes, P. Equivariant diffeomorphisms with simple recurrences on two-manifolds, 793.
Mendes, P. See de Melo, W.
Murray, Margaret A. M. The Cauchy integral, Calderón commutators, and conjugations of singular integrals in $R^n$, 497.
Nart, Enric. On the index of a number field, 171.
Negami, Seiya and Okita, Kazuo. The splittability and triviality of 3-bridge links, 253.
Okita, Kazuo. See Negami, Seiya.
Phillips, Ralph S. See Lax, Peter D.
Porter, Jack and Vermeer, Johannes. Spaces with coarser minimal Hausdorff topologies, 59.
Preiss, D. See Agronsky, S.
dos Reis, G. L. See de Melo, W.
Remmel, J. B. See Kierstead, H. A.
Rice, J. W. See Dooley, A. H.
Row, W. H. and Walsh, John J. A nonshrinkable decomposition of $S^3$ whose nondegenerate elements are contained in a cellular arc, 227.
Shambayati, R. and Zielezny, Z. Convolution equations in spaces of distributions with one-sided bounded support, 707.
Shaw, M.-C. See Boggess, A.
Smoller, Joel. See Hoff, David.
Sommese, Andrew John. See Białynicki-Birula, Andrzej.
Spencer, Joel. Six standard deviations suffice, 679.
Stafford, J. T. On the ideals of a Noetherian ring, 381.
Stampfli, Joseph G. See Wang, Hsiao-lan.
Terman, David. Directed graphs and traveling waves, 809.
Thickstun, T. L. See Brin, Matthew G.
Vermeer, Johannes. See Porter, Jack.
Vigué, Jean-Pierre. Points fixes d'applications holomorphes dans un domaine borne convexe de $C^n$, 345.
Vinter, R. B. See Clarke, F. H.
Walsh, John J. See Row, W. H.
Wang, Hsiao-lan and Stampfli, Joseph G. Uniform operators, 163.
Wheeden, Richard L. See Gatto, Angel E.
Wilson, Edward N. See Gordon, Carolyn S.
Wójtowicz, Zigmunt. The typical structure of the sets $\{ x: f(x) = h(x) \}$ for $f$ continuous and $h$ Lipschitz, 471.
Zielezny, Z. See Shambayati, R.
MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109
Complex and harmonic analysis to LINDA PREISS ROTHSCHILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92039
Abstract analysis to WILLIAM B. JOHNSON, Department of Mathematics, Texas A & M University, College Station, TX 77843-3368
Classical analysis to PETER W. JONES, Department of Mathematics, University of Chicago, Chicago, IL 60637
Algebra, algebraic geometry and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92039
Toplogy to WALTER D. NEUMANN, Mathematical Sciences Research Institute, 2223 Fulton Street, Berkeley, CA 94720
Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903
Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801
Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT & T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974
Logic, set theory and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, Rice University, Houston, TX 77251

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
On the proper Steenrod homotopy groups, and proper embeddings of planes into 3-manifolds
  By Matthew G. Brin and T. L. Thickstun ............................................ 737
Obstruction theory and multiparameter Hopf bifurcation
  By Jorge Ize ............................................................................. 757
Equivariant diffeomorphisms with simple recurrences on two-manifolds
  By W. de Melo, G. L. dos Reis and P. Mendes .................................. 793
Directed graphs and traveling waves
  By David Terman ....................................................................... 809
Characteristic classes of transversely homogeneous foliations
  By Chal Benson and David B. Ellis ................................................ 849
Index to Volume 289 .................................................................. 860

(Continued from back cover)
CONTENTS

Vol. 289, No. 2       June 1985       Whole No. 601

Properties of center manifolds
   By Jan Sijbrand .................................................. 431

The typical structure of the sets \( \{ x : f(x) = h(x) \} \) for \( f \) continuous and \( h \) Lipschitz
   By Zigmunt Wójtowicz ............................................. 471

Fixed points and conjugacy classes of regular elliptic elements in \( \text{Sp}(3, \mathbb{Z}) \)
   By Minking Eie and Chung-Yuan Lin ................................ 485

The Cauchy integral, Calderón commutators, and conjugations of singular integrals in \( \mathbb{R}^n \)
   By Margaret A. M. Murray ....................................... 497

Quotients by \( C^* \times C^* \) actions
   By Andrzej Białynicki-Birula and Andrew John Sommese ....... 519

On differential equations associated with Euler product expressions
   By Ian Knowles ..................................................... 545

Fractional integrals on weighted \( H^p \) spaces
   By Angel E. Gatto, Christian E. Gutiérrez and Richard L.
     Wheeden ............................................................. 575

Invariant regions for systems of conservation laws
   By David Hoff ....................................................... 591

Error bounds for Glimm difference approximations for scalar conservation laws
   By David Hoff and Joel Smoller .................................. 611

A kernel approach to the local solvability of the tangential Cauchy Riemann equations
   By A. Boggess and M.-C. Shaw ................................... 643

Convexity conditions and intersections with smooth functions
   By S. Agronsky, A. M. Bruckner, M. Laczkovich and D. Preiss. 659

Six standard deviations suffice
   By Joel Spencer .................................................... 679

Convolution equations in spaces of distributions with one-sided bounded support
   By R. Shambayati and Z. Zielezny ................................ 707

Translation representations for automorphic solutions of the wave equation in non-Euclidean spaces; the case of finite volume
   By Peter D. Lax and Ralph S. Phillips ........................... 715

(Continued on inside back cover)
