THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “Some remarks about” or “concerning” should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 287–292 (1985) are $540.00 list; $432.00 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $15.00; subscribers in India must pay a postage surcharge of $28.00.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–280, $96.00 list, $77.00 institutional members; for volumes 281–286, $111 list, $89 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

AUTHOR INDEX

1985, Volumes 287–292

Throughout this Index, bold numerals are used to denote the volume number; lightface numerals denote the pages.

Adams, Colin C. Thrice-punctured spheres in hyperbolic 3-manifolds, 287, 645.

Aimar, Hugo. Singular integrals and approximate identities on spaces of homogeneous type, 292, 135.

Albert, Ralph. Lipschitzian mappings and total mean curvature of polyhedral surfaces. I, 288, 661.

Alexanderson, G. L. and Wetzel, John E. Divisions of space by parallels, 291, 363.

Alligood, Kathleen T. A canonical partition of the periodic orbits of chaotic maps, 292, 713.

Alling, Norman L. Conway’s field of surreal numbers, 287, 365.

Ancel, Fredric D. The role of countable dimensionality in the theory of cell-like relations, 287, 1.

Andrews, Kevin T. and Ward, Joseph D. Factorization of diagonally dominant operators on L1((0,1),X), 291, 789.

Ansellotti, Gabriele. The Euler equation for functionals with linear growth, 290, 483.

Auslander, Joseph and Markley, Nelson. Graphic flows and multiple disjointness, 292, 483.

Bachmuth, Seymour and Mochizuki, Horace Y. Aut(F) → Aut(F/F") is surjective for free group F of rank ≥ 4, 292, 81.

Ball, R. D. (n – 1)-axial SO(n) and SU(n) actions on homotopy spheres, 292, 51.

Ball, Richard N. and Droste, Manfred. Normal subgroups of doubly transitive automorphism groups of chains, 290, 647.

Barcelo Taberner, Bartolome. On the restriction of the Fourier transform to a conical surface, 292, 321.

Barge, Marcy and Martin, Joe. Chaos, periodicity, and snakelike continua, 289, 355.

Barnsley, M. F., Geronimo, J. S. and Harrington, A. N. Condensed Julia sets, with an application to a fractal lattice model Hamiltonian, 288, 537.

Batty, C. J. K. Local operators and derivations on C*-algebras, 287, 343.

Becker, Howard. A property equivalent to the existence of scales, 287, 591.

Bell, Denis. A quasi-invariance theorem for measures on Banach spaces, 290, 851.

Bellow, A. and Losert, V. The weighted pointwise ergodic theorem and the individual ergodic theorem along subsequences, 288, 307.

Bendersky, Martin. Unstable towers in the odd primary homotopy groups of spheres, 287, 529.

Bennett, Andrew G. Probabilistic square functions and a priori estimates, 291, 159.

Benson, Chal and Ellis, David B. Characteristic classes of transversely homogeneous foliations, 289, 849.

Bercovici, Hari. A reflexivity theorem for weakly closed subspaces of operators, 288, 139.

Berend, Daniel. Ergodic semigroups of epimorphisms, 289, 393.

Bergman, Clifford. See Hogben, Leslie.

Bešlagić, Amer. A Dowker product, 292, 519.

741

Bhatt, Subhash J. An irreducible representation of a symmetric star algebra is bounded, 292, 645.

Bialynicki-Birula, Andrzej and Sommese, Andrew John. Quotients by C* x C* actions, 289, 519.

Bloch, Ethan D. Simplexwise linear near-embeddings of a 2-disk into R^2, 288, 701.

Bloom, Steven. A commutator theorem and weighted BMO, 292, 103.

Boe, Brian D. Homomorphisms between generalized Verma modules, 288, 791.

Boggess, A. and Shaw, M.-C. A kernel approach to the local solvability of the tangential Cauchy Riemann equations, 289, 643.

Bowers, Philip L. General position properties satisfied by finite products of dendrites, 288, 739.

Bojarski, A. See Byers, W.

Bressoud, D. M. and Goulden, I. P. Constant term identities extending the q-Dyson theorem, 291, 203.

Brin, Matthew G. and Thickstun, T. L. On the proper Steenrod homotopy groups, and proper embeddings of planes into 3-manifolds, 289, 737.

Brookes, Christopher J. B. and Brown, Kenneth A. Primitive group rings and Noetherian rings of quotients, 288, 605.

Browder, William. See Assadi, Amir.

Brown, Kenneth A. See Brookes, Christopher J. B.

Bruckner, A. M. See Agronsky, S.

Bryant, Robert L. Minimal surfaces of constant curvature in S^n, 290, 259.

Byers, W. and Bojarski, A. Absolutely continuous invariant measures that are maximal, 290, 303.

Carbery, Anthony. A weighted inequality for the maximal Bochner-Riesz operator on R^2, 287, 673.

Carlsson, James A. Polyhedral resolutions of algebraic varieties, 292, 595.

Carlsson, Hasse, Sjögren, Peter and Strömberg, Jan-Olov. Multiparameter maximal functions along dilation-invariant hypersurfaces, 292, 335.

do Carmo, Manfredo, Dajczer, Marcos and Mercuri, Francesco. Compact conformally flat hypersurfaces, 288, 189.

Cass, Daniel M. Minimal leaves in foliations, 287, 201.

Chipot, Michel and Sideris, Thomas. An upper bound for the waiting time for nonlinear degenerate parabolic equations, 288, 423.

Chou, Arthur Weichung. The Dirac operator on spaces with conical singularities and positive scalar curvatures, 289, 1.

Clarke, F. H. and Vinter, R. B. Regularity properties of solutions to the basic problem in the calculus of variations, 289, 73.

Clarke, Frank H. Periodic solutions of Hamilton's equations and local minima of the dual action, 287, 239.

Cook, Edith A. Free boundary regularity for surfaces minimizing Area(S) + c Area(∂S), 290, 503.

Dadok, Jiri. Polar coordinates induced by actions of compact Lie groups, 288, 125.

Dahmen, Wolfgang and Micchelli, Charles A. On the solution of certain systems of partial difference equations and linear dependence of translates of box splines, 292, 305.

Dajczer, Marcos. See do Carmo, Manfredo.

Damek, Ewa. Harmonic functions on semidirect extensions of type H nilpotent groups, 290, 375.

Dani, S. G. On invariant finitely additive measures for automorphism groups acting on tori, 287, 189.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to LINDA PREISS ROTHSCILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Abstract, analysis to WILLIAM B. JOHNSON, Department of Mathematics, Texas A & M University, College Station, TX 77843-3368.

Classical analysis to PETER W. JONES, Department of Mathematics, Yale University, Box 2155 Yale Station, New Haven, CN 06520.

Algebra, algebraic geometry and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Topology to WALTER D. NEUMANN, Mathematical Sciences Research Institute, 2223 Fulton Street, Berkeley, CA 94720.

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903.

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT & T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

Logic, set theory and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706.

All other communications to the editors should be addressed to the Managing Editor, R. O. WELLS, JR., Department of Mathematics, Rice University, Houston, TX 77251.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.
Combinatorial lower bound arguments for deterministic and nondeterministic Turing machines
By Wolfgang Maass ................................................................. 675
A dynamical meaning of fractal dimension
By Steve Pelikan ................................................................. 695
Noncommutative algebras of dimension three over integral schemes
By Rick Miranda and Mina Teicher ........................................ 705
A canonical partition of the periodic orbits of chaotic maps
By Kathleen T. Alligood ......................................................... 713
Rational homotopy of spaces of maps into spheres and complex projective spaces
By Jesper Michael Møller and Martin Raussen ................. 721
Boundary behavior of $\text{BMO}(B_n)$
By Paula A. Russo ........................................................... 733
Index to Volume 292 .......................................................... 741
CONTENTS

Vol. 292, No. 2 December 1985 Whole No. 607

Compensated compactness and general systems of conservation laws
By RONALD J. DiPERNA ........................................... 383

Algorithmic solution of extremal digraph problems
By W. G. BROWN, P. ERDŐS and M. SIMONOVITS .................. 421

Les groupes ω-stables de rang fini
By DANIEL LASCAR ........................................... 451

Linearizing certain reductive group actions
By H. BASS and W. HABOUSH ...................................... 463

Graphic flows and multiple disjointness
By JOSEPH AUSLANDER and NELSON MARKLEY ................. 483

Radial limits of M-subharmonic functions
By DAVID ULLRICH ........................................... 501

A Dowker product
By AMER BEŠLAGIĆ ............................................ 519

Stationary solutions of chemotaxis systems
By RENATE SCHAAF ........................................... 531

Representation of set valued operators
By NIKOLAOS S. PAPAGEORGIOU .................................. 557

Joint continuity of division of smooth functions. I: Uniform Lojasiewicz estimates
By MARK ALAN MOSTOW and STEVEN SHNIDER .................. 573

Joint continuity of division of smooth functions. II: The distance to a Whitney stratified set from a transversal submanifold
By MARK ALAN MOSTOW ........................................ 585

Polyhedral resolutions of algebraic varieties
By JAMES A. CARLSON .......................................... 595

Embeddings of locally connected compacta
By GERARD A. VENEMA ......................................... 613

Nonmonotoneity of Picard principle
By MITSURU NAKAI and TOSHIASA TADA ......................... 629

An irreducible representation of a symmetric star algebra is bounded
By SUBHASH J. BHATT ......................................... 645

Isometric homotopy in codimension two
By JOHN DOUGLAS MOORE ....................................... 653

Local and global envelopes of holomorphy of domains in \( C^2 \)
By ERIC BEDFORD ............................................... 665

(Continued on inside back cover)
