TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 *Revision*) representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of \$50.00 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 293–298 (1986) are \$598.00 list; \$478.00 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$25.00; subscribers in India must pay a postage surcharge of \$48.00.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 78–280, \$96.00 list, \$77.00 institutional members; for volumes 281–286, \$111 list, \$89 institutional members; for volumes 287–292, \$135 list, \$108 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to LINDA PREISS ROTHSCHILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Abstract, analysis to ROBERT D. EDWARDS, Department of Mathematics, University of California, Los Angeles, CA 90024

Classical analysis to PETER W. JONES, Department of Mathematics, Yale University, Box 2155 Yale Station, New Haven, CN 06520

Algebra, algebraic geometry and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Topology to VAUGHAN F. R. JONES, Department of Mathematics, University of California, Berkeley, CA 94720

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903

Probability and statistics to DONALD L. BURKHOLDER, Department of Mathematics, University of Illinois, Urbana, IL 61801

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT & T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974

Logic, set theory and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706

All other communications to the editors should be addressed to the Managing Editor, WILLIAM B. JOHNSON, Department of Mathematics, Texas A & M University, College Station, TX 77843-3368

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

(Continued from back cover)

On the existence and uniqueness of complex structure and spaces with “few” operators By STANISLAW J. SZAREK	339
Reflexivity and order properties of scalar-type spectral operators in locally convex spaces By P. G. DODDS, B. DE PAGTER and W. RICKER	355
The trace of an action and the degree of a map By DANIEL HENRY GOTTLIEB	381
Long time asymptotics of the Korteweg-de Vries equation By STEPHANOS VENAKIDES	411
Symmetric semicontinuity implies continuity By JAROMIR UHER	421

CONTENTS

Vol. 293, No. 1

January 1986

Whole No. 608

Self-maps of loop spaces. I	
By H. E. A. CAMPBELL, F. P. PETERSON and P. S. SELICK.....	1
Self-maps of loops spaces. II	
By H. E. A. CAMPBELL, F. R. COHEN, F. P. PETERSON and P. S. SELICK	41
Derivatives of mappings with applications to nonlinear differential equations	
By MARTIN SCHECHTER	53
A rearranged good λ inequality	
By RICHARD J. BAGBY and DOUGLAS S. KURTZ.....	71
Conjugacy problem in $GL_2(\mathbb{Z}[\sqrt{-1}])$ and units of quadratic extensions of $\mathbb{Q}(\sqrt{-1})$	
By HIRONORI ONISHI.....	83
The balanced-projective dimension of abelian p -groups	
By L. FUCHS and P. HILL	99
The fifth and seventh order mock theta functions	
By GEORGE E. ANDREWS	113
Strange attractors of uniform flows	
By ITTAI KAN.....	135
Multivariate rational approximation	
By RONALD A. DEVORE and XIANG-MING YU	161
On periodic solutions of superlinear parabolic problems	
By M. J. ESTEBAN.....	171
Quasilinear evolution equations and parabolic systems	
By HERBERT AMANN	191
Regularization for n th-order linear boundary value problems using m th-order differential operators	
By D. A. KOUBA and JOHN LOCKER	229
Derivation, L^Ψ -bounded martingales and covering conditions	
By MICHEL TALAGRAND.....	257
McKay quivers and extended Dynkin diagrams	
By MAURICE AUSLANDER and IDUN REITEN	293
The normal closure of the coproduct of rings over a division ring	
By WALLACE S. MARTINDALE III.....	303
Approximation theorems for Nash mappings and Nash manifolds	
By MASAHIRO SHIOTA	319
