March 1986, Whole Number 610

**Providence, Rhode Island USA**

ISSN 0002-9947

## TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 Revision) representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of \$50.00 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 293–298 (1986) are \$598.00 list; \$478.00 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$25.00; subscribers in India must pay a postage surcharge of \$48.00.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 78–280, \$96.00 list, \$77.00 institutional members; for volumes 281–286, \$111 list, \$89 institutional members; for volumes 287–292, \$135 list, \$108 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

---

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

## **MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY**

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

---

### **SUBMISSION OF MANUSCRIPT**

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations, and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to LINDA PREISS ROTHSCILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Abstract analysis to VAUGHAN F. R. JONES, Department of Mathematics, University of California, Berkeley, CA 94720.

Classical analysis to PETER W. JONES, Department of Mathematics, Box 2155 Yale Station, Yale University, New Haven, CT 06520.

Algebra, algebraic geometry, and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Geometric topology and general topology to ROBERT D. EDWARDS, Department of Mathematics, University of California, Los Angeles, CA 90024.

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903.

Probability and statistics to RONALD K. GETOOR, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

Logic, set theory, and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706.

All other communications to the editors should be addressed to the Managing Editor, WILLIAM B. JOHNSON, Department of Mathematics, Texas A&M University, College Station, TX 77843-3368.

### **COPYING AND REPRINTING**

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

(Continued from back cover)

On type of metric spaces	295
By J. BOURGAIN, V. MILMAN and H. WOLFSON .....	295
Nonexistence of stable harmonic maps to and from certain homogeneous spaces and submanifolds of Euclidean space	
By RALPH HOWARD and S. WALTER WEI.....	319
Boundary uniqueness theorems in $C^n$	
By JOSEPH A. CIMA and EMIL J. STRAUBE.....	333
Lower bounds of the gap between the first and second eigenvalues of the Schrödinger operator	
By QIHUANG YU and JIA-QING ZHONG .....	341
The law of the iterated logarithm in uniformly convex Banach spaces	
By MICHEL LEDOUX.....	351
An analytic set-valued selection and its applications to the corona theorem, to polynomial hulls and joint spectra	
By ZBIGNIEW SŁODKOWSKI.....	367
Corrigendum to “On isometric embeddings of graphs”	
By R. L. GRAHAM and P. M. WINKLER.....	379
Correction to “Some applications of Nevanlinna theory to mathematical logic: Identities of exponential functions”	
By C. WARD HENSON and LEE A. RUBEL .....	381

## CONTENTS

Vol. 294, No. 1

March 1986

Whole No. 610

Potent axioms

By MATTHEW FOREMAN .....	1
Extensions of Verma modules	
By KEVIN J. CARLIN .....	29
Bounds on the dimension of variations of Hodge structure	
By JAMES A. CARLSON .....	45
Clarke's gradients and epsilon-subgradients in Banach spaces	
By JAY S. TREIMAN .....	65
Hyperreflexivity and a dual product construction	
By DAVID R. LARSON .....	79
On sieved orthogonal polynomials. III: Orthogonality on several intervals	
By MOURAD E. H. ISMAIL .....	89
Some generalized Brown-Gitler spectra	
By PAUL G. GOERSS, JOHN D. S. JONES and MARK E. MAHOWALD....	113
$H^p$ -classes on rank one symmetric spaces of noncompact type. I. Nontangential	
and probabilistic maximal functions	
By PATRICIO CIFUENTES .....	133
Classification of metabelian $p$ -groups	
By WU-NAN CHOU .....	151
On linking double lines	
By JUAN MIGLIORE .....	177
Joint spectra and analytic set-valued functions	
By M. KLIMEK .....	187
Anosov diffeomorphisms and expanding immersions. II	
By LOWELL JONES .....	197
Existence and nonoscillation theorems for an Emden-Fowler equation with	
deviating argument	
By WILLIAM F. TRENCH .....	217
A bilaterally deterministic $\rho$ -mixing stationary random sequence	
By RICHARD C. BRADLEY .....	233
Properties of relatively free inverse semigroups	
By N. R. REILLY and P. G. TROTTER .....	243
On coupled multiparameter nonlinear elliptic systems	
By ROBERT STEPHEN CANTRELL .....	263
Dominated permutations of subsequences of random variables	
By AARON MEYEROWICZ and MARK SCHWARTZ .....	287
