TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy.

FORM OF MANUSCRIPT. The first page should consist of a descriptive title, followed by an abstract which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The descriptive title should be short, but informative; useless or vague phrases such as “Some remarks about” or “concerning” should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The abstract should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 Mathematics Subject Classification (1985 Revision) representing the primary and secondary subjects of the article, which may be followed by a list of key words and phrases describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of Mathematical Reviews, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galleys will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of $50.00 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 293–298 (1986) are $598.00 list; $478.00 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25.00; subscribers in India must pay a postage surcharge of $48.00.

BACK NUMBER INFORMATION. Back number prices per volume are: for Volumes 78–280, $96.00 list, $77.00 institutional members; for volumes 281–286, $111 list, $89 institutional members; for volumes 287–292, $135 list, $108 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. All orders must be accompanied by payment. Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

AUTHOR INDEX

1986, Volumes 293–298

Throughout this Index, bold numerals are used to denote the volume number; lightface numerals denote the pages.

Adams, David R. Weighted nonlinear potential theory, 297, 73.
Aisbett, Janet. On K3 of truncated polynomial rings, 294, 517.
Albrecht, Ulrich. Baer’s Lemma and Fuchs’ Problem 84a, 293, 565.
Ali Khan, M. Equilibrium points of nonatomic games over a Banach space, 293, 737.
Allday, Christopher and Puppe, Volker. On the rational homotopy Lie algebra of a fixed point set of a torus action, 297, 521.
Alon, N., Frankl, P. and Lovász, L. The chromatic number of Kneser hypergraphs, 298, 359.
Ammann, Herbert. Quasilinear evolution equations and parabolic systems, 293, 191.
Andersen, Henning Haahr. On the generic structure of cohomology modules for semisimple algebraic groups, 295, 397.
Anderson, Joel. See Akmann, Charles A.
Andrews, George E. The fifth and seventh order mock theta functions, 293, 113.
Anick, David J. On the homology of associative algebras, 296, 641.
Ash, C. J. Recursive labelling systems and stability of recursive structures in hyperarithmetic degrees, 298, 497.
Attouch, Hedy and Wets, Roger J. B. Isometries for the Legendre-Fenchel transform, 296, 33.
Auslander, Maurice. Rational singularities and almost split sequences, 293, 511.
Auslander, Maurice and Reiten, Idun. McKay quivers and extended Dynkin diagrams, 293, 293.
Avenhaus, J., Madlener, K. and Otto, F. Groups presented by finite two-monadic Church-Rosser Thue systems, 297, 427.
Ball, Richard N., Conrad, Paul and Darnel, Michael. Above and below subgroups of a lattice-ordered group, 297, 1.
Bañuelos, Rodrigo. Martingale transforms and related singular integrals, 293, 547.
Barlow, Martin T. and Perkins, Edwin A. Brownian motion at a slow point, 296, 741.
Barron, Emmanuel Nicholas and Jensen, Robert. The Pontryagin Maximum Principle from dynamic programming and viscosity solutions to first-order partial differential equations, 298, 635.
Bauman, Patricia and Phillips, Daniel. Large-time behavior of solutions to a scalar conservation law in several space dimensions, 298, 401.
Beardon, A. F., Lehner, J. and Sheingorn, M. Closed geodesics on a Riemann surface with application to the Markov spectrum, 295, 635.
Bedford, Eric and Taylor, B. A. The complex equilibrium measure of a symmetric convex set in R^n, 294, 705.
Bekolle, David. The dual of the Bergman space A^1 in symmetric Siegel domains of type II, 296, 607.
———. The Bergman projection of L^∞ in tubes over cones of real, symmetric, positive-definite matrices, 296, 621.
Berman, Robert D. Some results concerning the boundary zero sets of general analytic functions, 293, 827.

Bertsch, M. and Hulshof, J. Regularity results for an elliptic-parabolic free boundary problem, 297, 337.

Bieri, Robert and Groves, John R. J. A rigidity property for the set of all characters induced by valuations, 294, 425.

Block, L. S. and Coppel, W. A. Stratification of continuous maps of an interval, 297, 587.

Boratyński, M. On a conormal module of smooth set theoretic complete intersections, 296, 291.

Bourgain, J. On the dichotomy problem for tensor algebras, 293, 793.

Boyer, Steven. Simply-connected 4-manifolds with a given boundary, 298, 331.

Bradley, Richard C. A bilaterally deterministic p-mixing stationary random sequence, 294, 233.

Brothers, John E. Stability of minimal orbits, 294, 537.

Burdzy, Krzysztof. Brownian excursions from hyperplanes and smooth surfaces, 295, 35.

Caffarelli, Luis A. and Friedman, Avner. The blow-up boundary for nonlinear wave equations, 297, 223.

Cano, F. Desingularizations of plane vector fields, 296, 83.

Carlin, Kevin J. Extensions of Verma modules, 294, 29.

Carlson, James A. Bounds on the dimension of variations of Hodge structure, 294, 45.

Carothers, N. L. and Turett, B. Isometries on Lp,1, 297, 95.

——. On generalizing Boy's surface: constructing a generator of the third stable stem, 298, 103.

Carverhill, A. P. and Elworthy, K. D. Lyapunov exponents for a stochastic analogue of the geodesic flow, 295, 85.

Chacon, R. V. See Baxter, J. R.

Chanillo, Sagun, Kurtz, Douglas S. and Sampson, Gary. Weighted weak (1,1) and weighted Lp estimates for oscillating kernels, 295, 127.

Chanillo, Sagun and Muckenhoupt, Benjamin. Weak type estimates for Bochner-Riesz spherical summation multipliers, 294, 693.

Charatonik, J. J. and Maćkowiak, T. Around Effros' theorem, 298, 579.

Chen, Kuo-Tsai. Smooth maps, pullback path spaces, connections, and torsions, 297, 617.

Cherlin, G. and Lachlan, A. H. Stable finitely homogeneous structures, 296, 815.

Childs, Lindsay N. and Hurley, Susan. Tameness and local normal bases for objects of finite Hopf algebras, 298, 763.

Cifuentes, Patricio. Hp-classes on rank one symmetric spaces of noncompact type. I. Nontangential and probabilistic maximal functions, 294, 133.

Cima, Joseph A. and Straube, Emil J. Boundary uniqueness theorems in C^n, 294, 333.

Clapp, Mónica and Puppe, Dieter. Invariants of the Lusternik-Schnirelmann type and the topology of critical sets, 298, 603.

Cochran, T. D. and Lickorish, W. B. R. Unknotting information from 4-manifolds, 297, 125.

Cochrane, Todd. The distribution of solutions to equations over finite fields, 293, 819.

Cohen, F. R. See Campbell, H. E. A.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations, and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to LINDA PREISS ROTHSCILD, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Classical analysis to PETER W. JONES, Department of Mathematics, Box 2155 Yale Station, Yale University, New Haven, CT 06520.

Algebra, algebraic geometry, and number theory to LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Geometric topology and general topology to ROBERT D. EDWARDS, Department of Mathematics, University of California, Los Angeles, CA 90024.

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Global analysis and differential geometry to TILLA KLOTZ MILNOR, Department of Mathematics, Hill Center, Rutgers University, New Brunswick, NJ 08903.

Probability and statistics to RONALD K. GETOOR, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

Logic, set theory, and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706.

All other communications to the editors should be addressed to the Managing Editor, WILLIAM B. JOHNSON, Department of Mathematics, Texas A&M University, College Station, TX 77843-3368.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

CONTENTS

Vol. 298, No. 2 December 1986 Whole No. 619

A global theory of internal solitary waves in two-fluid systems
By C. J. AMICK and R. E. L. TURNER ........................................... 431

Hypoelliptic convolution equations in the space $K'_c$
By DAЕ HYЕON PAHK ................................................................. 485

Recursive labelling systems and stability of recursive structures in hyperarithmetical degrees
By C. J. ASH ............................................................................... 497

Explosion problems for symmetric diffusion processes
By KANJI IchIHARA ................................................................. 515

Vector bundles on complex projective spaces and systems of partial differential equations. I
By PETER F. STILLER ................................................................. 537

The Euler characteristic as an obstruction to compact Lie group actions
By VOLKER HAUSCHILD ............................................................ 549

Around Effros' theorem
By J. J. CHARATONIK and T. MACKOWIAK .................................... 579

Invariants of the Lusternik-Schnirelmann type and the topology of critical sets
By MÓNICA CLAPP and DIETER PUPPE ........................................ 603

A characterization and another construction of Janko's group $J_3$
By RICHARD WEISS .................................................................... 621

The Pontryagin Maximum Principle from dynamic programming and viscosity solutions to first-order partial differential equations
By EMMANUEL NICHOLAS BARRON and ROBERT JENSEN ............ 635

On the zeros of successive derivatives of even Laguerre-Polya functions
By LI-CHIEN SHEN ................................................................. 643

On maximal functions and Poisson-Szegö integrals
By JUAN SUEIRO .................................................................. 653

Crossed products and inner actions of Hopf algebras
By ROBERT J. BLATTNER, MIRIAM COHEN and SUSAN MONTGOMERY 671

Construction of high dimensional knot groups from classical knot groups
By MAGNHILD LIEN ................................................................. 713

Doubly sliced knots which are not the double of a disk
By L. SMOLINSKY .................................................................. 723

Singularly perturbed quadratically nonlinear Dirichlet problems
By ALBERT J. DESANTI ............................................................ 733

(Continued on inside back cover)
