TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using $\text{T}_{\text{E}}\text{X}$ and the $\text{AMS-T}_{\text{E}}\text{X}$ macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 *Revision*) representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of \$50 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10-12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 299-304 (1987) are \$643 list; \$514 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$25; subscribers in India must pay a postage surcharge of \$48.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 78-280, \$96 list, \$77 institutional members; for Volumes 281-286, \$111 list, \$89 institutional members; for Volumes 287-292, \$135 list, \$108 institutional members; for Volumes 293-298, \$150 list, \$120 institutional members. Volumes 1-77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1-286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-9930. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. ♾

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations, and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to ROBERT J. ZIMMER, Department of Mathematics, University of Chicago, Chicago, IL 60637.

Abstract analysis to VAUGHAN F. R. JONES, September 1986–July 1987: Institut des Hautes Études Scientifiques, Bures-sur-Yvette, France 91440.

Classical analysis to PETER W. JONES, Department of Mathematics, Box 2155 Yale Station, Yale University, New Haven, CT 06520.

Algebra, algebraic geometry, and number theory to DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713.

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602.

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395.

Probability and statistics to RONALD K. GETOOR, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

Logic, set theory, and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706.

All other communications to the editors should be addressed to the Managing Editor, LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

(Continued from back cover)

Approximation by equivariant homeomorphisms. I	
By MARK STEINBERGER and JAMES WEST	297
The Conner-Floyd map for formal A -modules	
By KEITH JOHNSON	319
A residual property of certain linear groups	
By PETER F. STEBE	333
Splitting of closed ideals in (DFN)-algebras of entire functions and the property (DN)	
By REINHOLD MEISE and B. ALAN TAYLOR.....	341
The proximal normal formula in Banach space	
By J. M. BORWEIN and J. R. GILES.....	371

CONTENTS

Vol. 302, No. 1

July 1987

Whole No. 626

Reflection, removable singularities, and approximation for partial differential equations. II	1
By LEON EHRENPREIS	
On the invariance of q -convexity and hyperconvexity under finite holomorphic surjections	47
By NGUYEN VAN KHUE and LE VAN THANH	
The L^2 boundedness of pseudodifferential operators	55
By I. L. HWANG	
Variations on Lusin's theorem	77
By JACK B. BROWN and KAREL PRIKRY	
Almost split sequences for rational double points	87
By MAURICE AUSLANDER and IDUN REITEN	
Half-canonical series on algebraic curves	99
By MONTSERRAT TEIXIDOR I BIGAS	
On certain 3-generator Artin groups	117
By CRAIG C. SQUIER	
Periodic points and automorphisms of the shift	125
By MIKE BOYLE and WOLFGANG KRIEGER	
Complete groups with nonabelian composition factors	151
By JAY ZIMMERMAN	
Interpolating sequences in the polydisc	161
By BO BERNDTSSON, SUN-YUNG A. CHANG and KAI-CHING LIN	
Special points on first order partial differential equations and the deformations of solutions	171
By MAREK KOSSOWSKI	
Martin boundaries of random walks: Ends of trees and groups	185
By MASSIMO A. PICARDELLO and WOLFGANG WOESS	
The set of continuous functions with everywhere convergent Fourier series	207
By M. AJTAI and A. S. KECHRIS	
Totally ramified valuations on finite-dimensional division algebras	223
By J.-P. TIGNOL and A. R. WADSWORTH	
On a problem concerning permutation polynomials	251
By GERHARD TURNWALD	
On the distribution of the number of prime factors of sums $a + b$	269
By P. ERDÖS, H. MAIER and A. SÁRKÖZY	
Small zeros of quadratic forms over number fields	281
By JEFFREY D. VAALER
