TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using $\text{T}_{\text{E}}\text{X}$ and the $\text{A}_{\text{M}}\text{S}-\text{T}_{\text{E}}\text{X}$ macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 Revision) representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of \$50 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 299–304 (1987) are \$643 list; \$514 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$25; subscribers in India must pay a postage surcharge of \$48.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 78–280, \$96 list, \$77 institutional members; for Volumes 281–286, \$111 list, \$89 institutional members; for Volumes 287–292, \$135 list, \$108 institutional members; for Volumes 293–298, \$150 list, \$120 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-9930. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. ∞

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations, and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to ROBERT J. ZIMMER, Department of Mathematics, University of Chicago, Chicago, IL 60637.

Abstract analysis to VAUGHAN F. R. JONES, Department of Mathematics, University of California, Berkeley, CA 94720.

Classical analysis to PETER W. JONES, Department of Mathematics, Box 2155 Yale Station, Yale University, New Haven, CT 06520.

Algebra, algebraic geometry, and number theory to DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713.

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602.

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395.

Probability and statistics to RONALD K. GETOOR, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

Logic, set theory, and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706.

All other communications to the editors should be addressed to the Managing Editor, LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Replication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

(Continued from back cover)

Riccati techniques and variational principles in oscillation theory for linear systems	
By G. J. BUTLER, L. H. ERBE and A. B. MINGARELLI	263
Smale flows on the three-sphere	
By KETTY DE REZENDE	283
Sporadic and irrelevant prime divisors	
By STEPHEN MCADAM and L. J. RATLIFF, JR.	311
A formula for the resolvent of $(-\Delta)^m + M_q^{2m}$ with applications to trace class	
By PETER TAKÁČ	325
On the generalized spectrum for second-order elliptic-systems	
By ROBERT STEVEN CANTRELL and CHRIS COSNER	345
Scalar curvatures on S^2	
By WENXIONG CHEN and WEIYUE DING	365
A GCH example of an ordinal graph with no infinite path	
By JEAN A. LARSON	383
Convergence in distribution of products of random matrices: A semigroup approach	
By ARUNAVA MUKHERJEA	395
Homological stability for $O_{n,n}$ over a local ring	
By STANISŁAW BETLEY	413

Stopping times and Γ -convergence	
By J. BAXTER, G. DAL MASO and U. MOSCO	1
Character table and blocks of finite simple triality groups ${}^3D_4(q)$	
By D. I. DERIZIOTIS and G. O. MICHLER	39
An étale cohomology duality theorem for number fields with a real embedding	
By MEL BIENENFELD	71
Braids and the Jones polynomial	
By JOHN FRANKS and R. F. WILLIAMS	97
Where does the L^p -norm of a weighted polynomial live?	
By H. N. MHASKAR and E. B. SAFF	109
The Milne problem for the radiative transfer equations (with frequency dependence)	
By FRANÇOIS GOLSE	125
The structure of groups which are almost the direct sum of countable Abelian groups	
By ALAN H. MEKLER	145
Scalar curvature and warped products of Riemann manifolds	
By F. DOBARRO and E. LAMI DOZO	161
Global existence for 1D, compressible, isentropic Navier-Stokes equations with large initial data	
By DAVID HOFF	169
Strong Ramsey theorems for Steiner systems	
By JAROSLAV NEŠETŘIL and VOJTĚCH RÖDL	183
Polynomial approximation in the mean with respect to harmonic measure on crescents	
By JOHN AKEROYD	193
On a property of Castelnuovo varieties	
By CIRO CILIBERTO	201
Bounded weak solutions of an elliptic-parabolic Neumann problem	
By J. HULSHOF	211
On the differentiability of Lipschitz-Besov functions	
By JOSÉ R. DORRONSORO	229
Thue equations with few coefficients	
By WOLFGANG M. SCHMIDT	241
A new proof that Teichmüller space is a cell	
By A. E. FISCHER and A. J. TROMBA	257
