TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using $\text{T}_{\text{E}}\text{X}$ and the $\text{A}_{\text{M}}\text{S}-\text{T}_{\text{E}}\text{X}$ macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 *Revision*) representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

PUBLICATION CHARGES. The research journals of the American Mathematical Society carry a page charge of \$50 per page to help defray the cost of publication. The amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of his paper for publication dependent upon payment of the page charge.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 10–12 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 299–304 (1987) are \$643 list; \$514 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$25; subscribers in India must pay a postage surcharge of \$48.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 78–280, \$96 list, \$77 institutional members; for Volumes 281–286, \$111 list, \$89 institutional members; for Volumes 287–292, \$135 list, \$108 institutional members; for Volumes 293–298, \$150 list, \$120 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Volumes 1–286 may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-9930. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940.

Information on Copying and Reprinting can be found at the back of this journal.

The paper used in this journal is acid-free and falls within the guidelines established to ensure permanence and durability. ∞

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Ordinary differential equations, partial differential equations, and applied mathematics to JOEL A. SMOLLER, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109.

Complex and harmonic analysis to ROBERT J. ZIMMER, Department of Mathematics, University of Chicago, Chicago, IL 60637.

Abstract analysis to VAUGHAN F. R. JONES, Department of Mathematics, University of California, Berkeley, CA 94720.

Classical analysis to PETER W. JONES, Department of Mathematics, Box 2155 Yale Station, Yale University, New Haven, CT 06520.

Algebra, algebraic geometry, and number theory to DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713.

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602.

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305.

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395.

Probability and statistics to RONALD K. GETOOR, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

Combinatorics and number theory to RONALD L. GRAHAM, Mathematical Sciences Research Center, AT&T Bell Laboratories, 600 Mountain Avenue, Murray Hill, NJ 07974.

Logic, set theory, and general topology to KENNETH KUNEN, Department of Mathematics, University of Wisconsin, Madison, WI 53706.

All other communications to the editors should be addressed to the Managing Editor, LANCE W. SMALL, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093.

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

(Continued from back cover)

Local estimates for subsolutions and supersolutions of oblique derivative problems for general second order elliptic equations	
By GARY M. LIEBERMAN	343
All infinite groups are Galois groups over any field	
By MANFRED DUGAS and RÜDIGER GÖBEL	355
Existence domains of holomorphic functions of restricted growth	
By M. JARNICKI and P. PFLUG	385
Traveling waves in combustion processes with complex chemical networks	
By STEFFEN HEINZE	405
Classifying spaces for foliations with isolated singularities	
By PETER GREENBERG	417

CONTENTS

Vol. 304, No. 1

November 1987

Whole No. 630

Invariance results for delay and Volterra equations in fractional order Sobolev spaces	1
By F. KAPPEL and K. KUNISCH.....	
Oscillatory integrals and Fourier transforms of surface carried measures	53
By MICHAEL COWLING and GIANCARLO MAUCERI	
Applications of group cohomology to space constructions	69
By PAUL IGODT and KYUNG BAI LEE	
On strongly summable ultrafilters and union ultrafilters	83
By ANDREAS BLASS and NEIL HINDMAN	
Holomorphic kernels and commuting operators	101
By AMEER ATHAVALA	
Taming wild extensions with Hopf algebras	111
By LINDSAY N. CHILDS	
The Szegő kernel as a singular integral kernel on a family of weakly pseudoconvex domains	141
By KATHARINE PERKINS DIAZ	
A strong generalization of Helgason's theorem	171
By KENNETH D. JOHNSON	
The Morava K -theories of some classifying spaces	193
By NICHOLAS J. KUHN	
Equivariant geometry and Kervaire spheres	207
By ALLEN BACK and WU-YI HSIANG	
Universal Loeb-measurability of sets and of the standard part map with applications	229
By D. LANDERS and L. ROGGE	
Contributions to the theory of set valued functions and set valued measures	245
By NIKOLAOS S. PAPAGEORGIOU.....	
Riemann problems for nonstrictly hyperbolic 2×2 systems of conservation laws	267
By DAVID G. SCHAEFFER and MICHAEL SHEARER.....	
Visibility and rank one in homogeneous spaces of $K \leq 0$	307
By MARÍA J. DRUETTA	
Ideals of holomorphic functions with C^∞ boundary values on a pseudoconvex domain	323
By EDWARD BIERSTONE and PIERRE D. MILMAN	

(Continued on inside back cover)
