VOLUME 322 NUMBER 2

DECEMBER 1990

WHOLE NUMBER 667

TRANSACTIONS OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

Avner D. Ash
James E. Baumgartner
James W. Cannon
Sun-Yung A. Chang
Ralph Cohen
Burgess Davis
Eugene Fabes
Jerry L. Kazdan
Roger D. Nussbaum
Carl Pomerance
Judith D. Sally
David J. Saltman, Managing Editor
Masamichi Takesaki
Audrey Terras

PROVIDENCE, RHODE ISLAND USA

ISSN 0002-9947

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and includes, in general, longer papers than those in the PROCEEDINGS. Papers should be at least 16 typed pages in length.

PREPARATION OF THE MANUSCRIPT. All papers should be typewritten double-spaced, and two copies should be sent to the appropriate editor. The author should keep a complete copy. To encourage the submission of manuscripts in electronic form using TEX and the $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX macro package, the Executive Committee of the Council has adopted a policy that allows for accelerating the publication date of such manuscripts by as much as 20 weeks, which is approximately equal to the time normally needed by the Society for copyediting, typesetting, and proofreading an average manuscript.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "Some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 300 words, with the upper limit primarily for longer papers. Included with the footnotes to your paper, but placed before the first footnote, there should be first the 1980 *Mathematics Subject Classification* (1985 *Revision*) representing the primary and secondary subjects of the article, which may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. A list of the numbers may be found in the annual subject index of *Mathematical Reviews*, published with the December issue starting in 1984.

SUBMISSION OF MANUSCRIPT. See the back of this journal.

COPYRIGHT TRANSFER AGREEMENT. The signing of a Copyright Transfer Agreement is a requirement for publication.

GALLEY PROOF. When a paper with more than one author has been accepted for publication, only one set of galley proof will be sent. Joint authors should, therefore, indicate on the original manuscript which of them should receive galley proof in the event that the manuscript is accepted for publication.

BACKLOG. 100 pages. Two-thirds of the papers currently being accepted by the editors will be published in 14–16 months.

SUBSCRIPTION INFORMATION. TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscription prices for Volumes 317–322 (1990) are $714 list; $571 institutional member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $25; subscribers in India must pay a postage surcharge of $48.

BACK NUMBER INFORMATION. Back number prices *per volume* are: for Volumes 78–280, $102 list, $82 institutional members; for Volumes 281–286, $118 list, $94 institutional members; for Volumes 287–292, $144 list, $115 institutional members; for Volumes 293–298, $160 list, $128 institutional members; for Volumes 299–304, $172 list, $138 institutional members; for Volumes 305–310, $175 list, $140 institutional members; for Volumes 311–316, $177 list, $142 institutional members. Volumes 1–77 may be ordered from Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10003. Back numbers may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, Michigan 48106.

Subscriptions and orders for publications of the American Mathematical Society should be addressed to American Mathematical Society, P. O. Box 1571, Annex Station, Providence, R. I. 02901-1571. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, R. I. 02940-6248.

TRANSACTIONS of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, R. I. 02904-2213. Second-class postage is paid at Providence, Rhode Island. Postmaster: Send address changes to TRANSACTIONS, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940-6248.

Transactions of the American Mathematical Society

AUTHOR INDEX

1990, Volumes 317–322

Aaronson, Jon and Denker, Manfred. *Upper bounds for ergodic sums of infinite measure preserving transformations*, **319,** 101.

Adachi, Kenzō. *Extending H^p functions from subvarieties to real ellipsoids*, **317,** 351.

Adams, M. E., Koubek, V. and Sichler, J. *Isomorphism universal varieties of Heyting algebras*, **319,** 309.

Aluffi, Paolo. *The enumerative geometry of plane cubics.* I: *Smooth cubics*, **317,** 501.

Amasaki, Mutsumi. *Application of the generalized Weierstrass preparation theorem to the study of homogeneous ideals*, **317,** 1.

Andjel, Enrique D. *Ergodic and mixing properties of equilibrium measures for Markov processes*, **318,** 601.

Ariño, Miguel A. and Muckenhoupt, Benjamin. *Maximal functions on classical Lorentz spaces and Hardy's inequality with weights for nonincreasing functions*, **320,** 727.

Aschbacher, Michael. *The 27-dimensional module for E_6*, III, **321,** 45.

Ash, C. J., Jockusch, C. G., Jr. and Knight, J. F. *Jumps of orderings*, **319,** 573.

Aslaksen, Helmer. *Laws of trigonometry on $SU(3)$*, **317,** 127.

Baldwin, Stewart. *A complete classification of the piecewise monotone functions on the interval*, **319,** 155.

Ball, Richard N. and Hager, Anthony W. *Epicomplete archimedean ℓ-groups and vector lattices*, **322,** 459.

Bass, Richard F. *The Dirichlet problem for radially homogeneous elliptic operators*, **320,** 593.

Batty, C. J. K. *Tauberian theorems for the Laplace-Stieltjes transform*, **322,** 783.

Batty, Charles J. K. and Phóng, Vũ Quôc. *Stability of individual elements under one-parameter semigroups*, **322,** 805.

Beiss, Rachel Sturm. *The Arf and Sato link concordance invariants*, **322,** 479.

Benguria, Rafael D. and Yarur, Cecilia. *Symmetry properties of the solutions to Thomas-Fermi-Dirac-von Weizsäcker type equations*, **320,** 665.

Benkart, Georgia and Osborn, J. Marshall. *Simple Lie algebras of characteristic p with dependent roots*, **318,** 783.

Benson, Chal, Jenkins, Joe and Ratcliff, Gail. *On Gelfand pairs associated with solvable Lie groups*, **321,** 85.

Bergelson, Vitaly and Hindman, Neil. *Nonmetrizable topological dynamics and Ramsey theory*, **320,** 293.

Berhanu, S. *An asymptotic formula for hypo-analytic pseudodifferential operators*, **322,** 711.

Berstel, Jean and Reutenauer, Christophe. *Zeta functions of formal languages*, **321,** 533.

Bertsch, Michiel, Dal Passo, Roberta and Ughi, Maura. *Discontinuous "viscosity" solutions of a degenerate parabolic equation*, **320,** 779.

Bisch, Dietmar H. *On the existence of central sequences in subfactors*, **321,** 117.

Blanc, David A. *A Hurewicz spectral sequence for homology*, **318,** 335.

Blau, H. I. and Michler, G. O. *Modular representation theory of finite groups with T.I. Sylow p-subgroups*, **319,** 417.

Blei, Ron C. *$\Lambda(q)$ processes*, **319,** 777.

Bleiler, Steven A. and Eudave-Muñoz, Mario. *Composite ribbon number one knots have two-bridge summands*, **321,** 231.

Bloom, Thomas. *A spannng set for $C(I^n)$*, **321,** 741.

Boyer, S. and Nicas, A. *Varieties of group representations and Casson's invariant for rational homology 3-spheres*, **322,** 507.

Bratteli, Ola, Kurose, Hideki and Robinson, Derek W. *Comparison of commuting one-parameter groups of isometries*, **320,** 677.

Brennan, J. P., Pinto, M. V. and Vasconcelos, W. V. *The Jacobian module of a Lie algebra*, **321,** 183.

Bressler, Paul and Evens, Sam. *The Schubert calculus, braid relations, and generalized cohomology*, **317,** 799.

Brown, K. A., Goodearl, K. R. and Lenagan, T. H. *Prime ideals in differential operator rings. Catenarity*, **317,** 749.

Brown, Russell M. *The initial-Neumann problem for the heat equation in Lipschitz cylinders*, **320,** 1.

Brungs, H. H. and Gräter, J. *Extensions of valuation rings in central simple algebras*, **317,** 287.

Calderón, Calixto P. *Existence of weak solutions for the Navier-Stokes equations with initial data in L^p*, **318,** 179.

———. *Addendum to the paper "Existence of weak solutions for the Navier-Stokes equations with initial data in L^p"*, **318,** 201.

Capuzzo-Dolcetta, I. and Lions, P.-L. *Hamilton-Jacobi equations with state constraints*, **318,** 643.

Carlson, James W. *The spectra and commutants of some weighted composition operators*, **317,** 631.

Chan, Kit Chak. *On the Dirichlet space for finitely connected regions*, **319,** 711.

Chanillo, Sagun and Sawyer, Eric. *Unique continuation for $\Delta + v$ and the C. Fefferman-Phong class*, **318,** 275.

Chen, Wanxi. *Defect relations for degenerate meromorphic maps*, **319,** 499.

Chou, Ching. *Almost periodic operators in* VN(G), **317,** 229.

———. *Weakly almost periodic functions and thin sets in discrete groups*, **321,** 333.

Ciesielski, Krzysztof. *Algebraically invariant extensions of σ-finite measures on Euclidean space*, **318,** 261.

Cima, Anna and Llibre, Jaume. *Bounded polynomial vector fields*, **318,** 557.

Clapp, Mónica and Puppe, Dieter. *The generalized Lusternik-Schnirelmann category of a product space*, **321,** 525.

Clarke, F. H. and Vinter, R. B. *A regularity theory for variational problems with higher order derivatives*, **320,** 227.

Cochran, W. George. *Random Blaschke products*, **322,** 731.

Connett, William C. and Schwartz, Alan L. *Analysis of a class of probability preserving measure algebras on compact intervals*, **320,** 371.

Coomes, Brian A. *Polynomial flows on $\mathbb{C}^n$*, **320,** 493.

Courant, Theodore James. *Dirac manifolds*, **319,** 631.

Cowen, Michael J. *The method of negative curvature: The Kobayashi metric on $\mathbb{P}_2$ minus 4 lines*, **319,** 729.

Cwikel, M., Jawerth, B. and Milman, M. *The domain spaces of quasilogarithmic operators*, **317,** 599.

Dal Passo, Roberta. See Bertsch, Michiel

Denker, Manfred. See Aaronson, Jon

Dereziński, Jan. *The Mourre estimate for dispersive N-body Schrödinger operators*, **317,** 773.

Deza, M. and Maehara, H. *Metric transforms and Euclidean embeddings*, **317,** 661.

Dillon, Meighan I. *Weight strings in nonstandard representations of Kac-Moody algebras*, **320,** 161.

Douglass, J. Matthew. *Cells and the reflection representation of Weyl groups and Hecke algebras*, **318,** 373.

Dugas, Manfred, Hill, Paul and Rangaswamy, K. M. *Butler groups of infinite rank* II, **320,** 643.

Dyn, N. and Ron, A. *Local approximation by certain spaces of exponential polynomials, approximation order of exponential box splines, and related interpolation problems*, **319,** 381.

Eklof, Paul C., Fuchs, Laszlo and Shelah, Saharon. *Baer modules over domains*, **322,** 547.

Eudave-Muñoz, Mario. See Bleiler, Steven A.

Evans, W. D. and Lewis, Roger T. *N-body Schrödinger operators with finitely many bound states*, **322,** 593.

Evens, Sam. See Bressler, Paul

Faierman, M. *Elliptic problems involving an indefinite weight*, **320,** 253.

Farkas, Daniel R. *Remarks and corrections for "Groups acting on affine algebras"*, **319,** 821.

Fernando, S. L. *Lie algebra modules with finite dimensional weight spaces*, I, **322,** 757.

Filliman, P. *The extreme projections of the regular simplex*, **317,** 611.

Floer, Andreas. *A topological persistence theorem for normally hyperbolic manifolds via the Conley index*, **321,** 647–657.

Foote, Richard. *Nonmonomial characters and Artin's conjecture*, **321,** 261.

Freiling, Chris. *Symmetric derivates, scattered, and semi-scattered sets*, **318,** 705.
Fuchs, Laszlo. See Eklof, Paul C.
Fujita, Hisaaki. *Tiled orders of finite global dimension*, **322,** 329.
Garofalo, Nicola and Lanconelli, Ermanno. *Level sets of the fundamental solution and Harnack inequality for degenerate equations of Kolmogorov type*, **321,** 775.
Garvan, Frank G. *The crank of partitions* mod 8, 9 *and* 10, **322,** 79.
Gasharov, Vesselin N. and Peeva, Irena V. *Boundedness versus periodicity over commutative local rings*, **320,** 569.
Gérardin, Paul and Li, Wen-Ch'ing Winnie. *Identities on quadratic Gauss sums*, **321,** 159.
Ghahramani, F., Lau, A. T. and Losert, V. *Isometric isomorphisms between Banach algebras related to locally compact groups*, **321,** 273.
Ghoussoub, N., Maurey, B. and Schachermayer, W. *Geometrical implications of certain infinite dimensional decompositions*, **317,** 541.
Globevnik, Josip. *Zero integrals on circles and characterizations of harmonic and analytic functions*, **317,** 313.
Goodearl, K. R. See Brown, K. A.
Graham, Ian. *Holomorphic maps which preserve intrinsic metrics or measures*, **319,** 787.
Gräter, J. See Brungs, H. H.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy a chapter for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The owner consents to copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that a fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. When paying this fee please use the code 0002-9947/90 to refer to this publication. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 322, No. 1 November 1990 Whole No. 666

Mean-square approximation by polynomials on the unit disk
By THOMAS L. KRIETE III and BARBARA D. MACCLUER 1
The fixed point theorem in equivariant cohomology
By J. D. S. JONES and S. B. PETRACK 35
Generalized second derivatives of convex functions and saddle functions
By R. T. ROCKAFELLAR 51
The crank of partitions mod 8, 9 and 10
By FRANK G. GARVAN 79
Homotopy theory of minimal simplicial spaces
By MARK D. PRITT 95
Existence and uniqueness of the Riemann problem for a nonlinear system of conservation laws of mixed type
By L. HSIAO and P. DE MOTTONI 121
The diffeotopy group of the twisted 2-sphere bundle over the circle
By M. HO KIM and FRANK RAYMOND 159
Rotation and winding numbers for planar polygons and curves
By BRANKO GRÜNBAUM and G. C. SHEPHARD 169
Basic dual homotopy invariants of Riemannian foliations
By PETER Y. PANG 189
Unusually large gaps between consecutive primes
By HELMUT MAIER and CARL POMERANCE 201
L^1-approximation with constraints
By ALLAN PINKUS and HANS STRAUSS 239
Boundary behavior of the fast diffusion equation
By Y. C. KWONG 263
A class of algebras similar to the enveloping algebra of sl(2)
By S. P. SMITH 285
Interpretations of Euclidean geometry
By S. ŚWIERCZKOWSKI 315
Tiled orders of finite global dimension
By HISAAKI FUJITA 329
A character theoretic approach to embeddings of rooted maps in an orientable surface of given genus
By D. M. JACKSON and T. I. VISENTIN 343

Character theory and rooted maps in an orientable surface of given genus: face-colored maps
By D. M. Jackson and T. I. Visentin 365
On a multiplier conjecture for univalent functions
By V. Gruenberg, F. Rønning and St. Ruscheweyh 387
Time-delay operators in semiclassical limit. II. Short-range potentials
By Xue-Ping Wang 395

CONTENTS

Vol. 322, No. 2 December 1990 Whole No. 667

On sets that are uniquely determined by a restricted set of integrals
By J. H. B. Kemperman 417
Epicomplete archimedean ℓ-groups and vector lattices
By Richard N. Ball and Anthony W. Hager 459
The Arf and Sato link concordance invariants
By Rachel Sturm Beiss 479
Multipliers, linear functionals and the Fréchet envelope of the Smirnov class $N_*(U^n)$
By Marek Nawrocki 493
Varieties of group representations and Casson's invariant for rational homology 3-spheres
By S. Boyer and A. Nicas 507
The connection matrix in Morse-Smale flows
By James F. Reineck 523
Baer modules over domains
By Paul C. Eklof, Laszlo Fuchs and Saharon Shelah 547
Dualizing complexes of affine semigroup rings
By Uwe Schäfer and Peter Schenzel 561
Weak Chebyshev subspaces and A-subspaces of $C[a, b]$
By Wu Li 583
N-body Schrödinger operators with finitely many bound states
By W. D. Evans and Roger T. Lewis 593
Global families of limit cycles of planar analytic systems
By L. M. Perko 627
Solving Beltrami equations by circle packing
By Zheng-Xu He 657
Mean summability methods for Laguerre series

By KRZYSZTOF STEMPAK 671
On the smoothness of convex envelopes
By A. GRIEWANK and P. J. RABIER 691
An asymptotic formula for hypo-analytic pseudodifferential operators
By S. BERHANU 711
Random Blaschke products
By W. GEORGE COCHRAN 731
Lie algebra modules with finite dimensional weight spaces, I
By S. L. FERNANDO 757
Tauberian theorems for the Laplace-Stieltjes transform
By C. J. K. BATTY 783
Stability of individual elements under one-parameter semigroups
By CHARLES J. K. BATTY AND VŨ QUÔC PHÓNG 805

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in TRANSACTIONS. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the TRANSACTIONS so that papers intended for publication in this series should be addressed to one of the editors.

SUBMISSION OF MANUSCRIPT

Two copies of mathematical papers intended for publication in the TRANSACTIONS or the MEMOIRS should be addressed to one of the editors. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory to AVNER D. ASH, Department of Mathematics, The Ohio State University, 231 West 18th Avenue, Columbus, OH 43210

Abstract analysis to MASAMICHI TAKESAKI, Department of Mathematics, University of California, Los Angeles, CA 90024

Real and harmonic analysis to EUGENE FABES, Department of Mathematics, University of Minnesota, Minneapolis, MN 55455

Algebra and algebraic geometry to JUDITH D. SALLY, Department of Mathematics, Northwestern University, Evanston, IL 60208

Geometric topology and general topology to JAMES W. CANNON, Department of Mathematics, Brigham Young University, Provo, UT 84602

Algebraic topology and differential topology to RALPH COHEN, Department of Mathematics, Stanford University, Stanford, CA 94305

Ordinary differential equations, partial differential equations, and applied mathematics to ROGER D. NUSSBAUM, Department of Mathematics, Rutgers University, New Brunswick, NJ 08903

Global analysis and differential geometry to JERRY L. KAZDAN, Department of Mathematics, University of Pennsylvania, E1, Philadelphia, PA 19104-6395

Probability and statistics to BURGESS DAVIS, Departments of Mathematics and Statistics, Purdue University, West Lafayette, IN 47907

Combinatorics and number theory to CARL POMERANCE, Department of Mathematics, University of Georgia, Athens, GA 30602

Logic, set theory, general topology, and universal algebra to JAMES E. BAUMGARTNER, Department of Mathematics, Dartmouth College, Hanover, NH 03755

Algebraic number theory, analytic number theory, and modular forms to AUDREY TERRAS, Department of Mathematics, University of California at San Diego, La Jolla, CA 92093

Complex analysis and nonlinear partial differential equations to SUN-YUNG A. CHANG, Department of Mathematics, University of California, Los Angeles, CA 90024

All other communications to the editors should be addressed to the Managing Editor, DAVID J. SALTMAN, Department of Mathematics, University of Texas at Austin, Austin, TX 78713

COPYING AND REPRINTING

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940-6248.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.
