Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to e-MATH. Articles are posted to e-MATH individually soon after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly. Beginning in January 1996 *Transactions* is accessible from e-MATH via the World Wide Web at the URL <http://www.ams.org/publications/>. Subscription prices for Volume 351 (1999) are as follows: for paper delivery, \$1191 list, \$953 institutional member, \$1072 corporate member; for electronic delivery, \$1072 list, \$858 institutional member, \$965 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add \$27 for surface delivery outside the United States and India; \$50 to India. Expedited delivery to destinations in North America is \$45; elsewhere \$142. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Transactions of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

INDEX TO VOLUME 351 (1999)

- Akian, Marianne. *Densities of idempotent measures and large deviations*, 4515
- Akin, Ethan. *See Miller, Walter*
- Alekseevsky, D. V., Marchiafava, S., and Pontecorvo, M. *Compatible complex structures on almost quaternionic manifolds*, 997
- Alemaný, O. *See Cominetti, R.*
- Alikakos, Nicholas D., Bates, Peter W., and Chen, Xinfu. *Periodic traveling waves and locating oscillating patterns in multidimensional domains*, 2777
- Alseda, Ll., Kolyada, S., Llibre, J., and Snoha, L^V. *Entropy and periodic points for transitive maps*, 1551
- Aluffi, Paolo. *Chern classes for singular hypersurfaces*, 3989
- Andres, Jan, Gabor, Grzegorz, and Górniewicz, Lech. *Boundary value problems on infinite intervals*, 4861
- Andreu, F., Mazón, J. M., Segura de León, S., and Toledo, J. *Existence and uniqueness for a degenerate parabolic equation with L^1 -data*, 285
- Arone, Greg. *A generalization of Snaith-type filtration*, 1123
- Ayer, Elizabeth, and Strichartz, Robert S. *Exact Hausdorff measure and intervals of maximum density for Cantor sets*, 3725
- Badea, C., and Mbekhta, M. *Compressions of resolvents and maximal radius of regularity*, 2949
- Baranov, Alexander, and Kleshchev, Alexander. *Maximal ideals in modular group algebras of the finitary symmetric and alternating groups*, 595
- Barbasch, Dan, and Moy, Allen. *Classification of one K -type representations*, 4245
- Bates, Peter W. *See Alikakos, Nicholas D.*
- Baues, Hans-Joachim. *Quadratic homology*, 429
- Baues, Oliver. *Left-symmetric algebras for $\mathfrak{gl}(n)$* , 2979
- Benson, D. J., and Wheeler, Wayne W. *Direct sum decompositions of infinitely generated modules*, 3843
- Berestovskii, Valera, Plaut, Conrad, and Stallman, Cornelius. *Geometric groups. I*, 1403
- Bergamasco, Adalberto P. *Remarks about global analytic hypoellipticity*, 4113
- Bergman, George M. *Supports of derivations, free factorizations, and ranks of fixed subgroups in free groups*, 1531
- Bessis, D. N., and Clarke, F. H. *Partial subdifferentials, derivatives and Rademacher's Theorem*, 2899
- Bhatt, S. J., Inoue, A., and Ogi, H. *Admissibility of weights on non-normed $*$ -algebras*, 4629
- Black, Elena V. *Deformations of dihedral 2-group extensions of fields*, 3229
- Blokh, Alexander, and Misiurewicz, Michał. *Rotating an interval and a circle*, 63
- Bloom, T., and Levenberg, N. *Capacity convergence results and applications to a Bernstein-Markov inequality*, 4753
- Bohman, Tom. *Discrete threshold growth dynamics are omnivorous for box neighborhoods*, 947
- Böttcher, Albrecht, and Karlovich, Yuri I. *Toeplitz operators with pc symbols on general Carleson Jordan curves with arbitrary Muckenhoupt weights*, 3143
- Bourdon, P. S., Cima, J. A., and Matheson, A. L. *Compact composition operators on BMOA*, 2183
- Bowditch, B. H. *Connectedness properties of limit sets*, 3673
- Brega, Alfredo O. *On the unitary dual of $\text{Spin}(2n, \mathbb{C})$* , 403
- Brendle, Jörg, and Shelah, Saharon. *Ultrafilters on ω —their ideals and their cardinal characteristics*, 2643
- Brešar, Matej, and Šemrl, Peter. *On locally linearly dependent operators and derivations*, 1257
- Britten, D. J., and Lemire, F. W. *On modules of bounded multiplicities for the symplectic algebras*, 3413
- Bueler, Edward L. *The heat kernel weighted Hodge Laplacian on noncompact manifolds*, 683
- Burdzy, Krzysztof, and Salisbury, Thomas S. *On minimal parabolic functions and time-homogeneous parabolic h -transforms*, 3499
- Cardin, Nancy. *Embeddings of open manifolds*, 2353
- Carlson, Robert. *Inverse eigenvalue problems on directed graphs*, 4069
- do Carmo, Manfredo P., and Zhou, Detang. *Eigenvalue estimate on complete noncompact Riemannian manifolds and applications*, 1391
- Castro, Alfonso, and Kuiper, Hendrik J. *On the number of radially symmetric solutions to Dirichlet problems with jumping nonlinearities of superlinear order*, 1919

- Chan, Kit C., and Čučković, Željko. *C^* -algebras generated by a subnormal operator*, 1445
- Chang, Der-Chen, Dafni, Galia, and Stein, Elias M. *Hardy spaces, BMO, and boundary value problems for the Laplacian on a smooth domain in \mathbf{R}^n* , 1605
- Chatzidakis, Zoé, and Hrushovski, Ehud. *Model theory of difference fields*, 2997
- Chen, Chien-Hsiung. *Warped products of metric spaces of curvature bounded from above*, 4727
- Chen, Kwang-Wu. *See Eie, Minking*
- Chen, Xinfu. *See Alikakos, Nicholas D.*
- Chiantini, L., and Ciliberto, C. *Towards a Halphen theory of linear series on curves*, 2197
- Chinburg, Ted, Savage, Carla D., and Wilf, Herbert S. *Combinatorial families that are exponentially far from being listable in Gray code sequence*, 379
- Cianchi, Andrea. *Hardy inequalities in Orlicz spaces*, 2459
- Ciliberto, C. *See Chiantini, L.*
- Cima, J. A. *See Bourdon, P. S.*
- Ciocan-Fontanine, Ionuț. *The quantum cohomology ring of flag varieties*, 2695
- Clarke, F. H. *See Bessis, D. N.*
- Cohen, Daniel C., and Suciu, Alexander I. *Alexander invariants of complex hyperplane arrangements*, 4043
- Collet, Pierre, Martínez, Servet, and Schmitt, Bernard. *On the enhancement of diffusion by chaos, escape rates and stochastic instability*, 2875
- Cominetti, R., and Alemany, O. *Steepest descent evolution equations: asymptotic behavior of solutions and rate of convergence*, 4847
- Coornaert, Michel, and Papadopoulos, Athanase. *Spherical functions and conformal densities on spherically symmetric $CAT(-1)$ -spaces*, 2745
- Corlette, Kevin, and Iozzi, Alessandra. *Limit sets of discrete groups of isometries of exotic hyperbolic spaces*, 1507
- Costa, Douglas L., and Keller, Gordon E. *On the normal subgroups of $G_2(A)$* , 5051
- Coulhon, Thierry, and Duong, Xuan Thinh. *Riesz transforms for $1 \leq p \leq 2$* , 1151
- Crossley, M. D. *Monomial bases for $H^*(\mathbf{C}P^\infty \times \mathbf{C}P^\infty)$ over $\mathcal{A}(p)$* , 171
- Čučković, Željko. *See Chan, Kit C.*
- Dafni, Galia. *See Chang, Der-Chen*
- Dajani, Karma, and Kraaikamp, Cor. *A Gauss-Kusmin theorem for optimal continued fractions*, 2055
- Damelin, S. B., and Kuijlaars, A. B. J. *The support of the equilibrium measure in the presence of a monomial external field on $[-1, 1]$* , 4561
- D'Amour, Alain, and Racine, Michel. **-polynomial identities of matrices with the transpose involution: the low degrees*, 5089
- Deloup, Florian. *Linking forms, reciprocity for Gauss sums and invariants of 3-manifolds*, 1895
- Denzler, Jochen. *Windows of given area with minimal heat diffusion*, 569
- van Diejen, J. F. *Properties of some families of hypergeometric orthogonal polynomials in several variables*, 233
- Ding, Hongming. *Weighted Laplace transforms and Bessel functions on Hermitian symmetric spaces*, 4205
- Dooley, A. H., and Wildberger, N. J. *Global character formulae for compact Lie groups*, 477
- Dorschfeldt, Ch., and Tarkhanov, N. N. *Golubev series for solutions of elliptic equations*, 581
- Doty, Stephen. *Representation theory of reductive normal algebraic monoids*, 2539
- Dougherty, Randall, and Hjorth, Greg. *Reducibility and nonreducibility between ℓ^p equivalence relations*, 1835
- Dräxler, Peter, Reiten, Idun, Smalø, Sverre O., Solberg, Øyvind, and with an appendix by Keller, B. *Exact categories and vector space categories*, 647
- Duong, Xuan Thinh. *See Coulhon, Thierry*
- Duursma, Iwan M. *Weight distributions of geometric Goppa codes*, 3609
- Dykema, Kenneth J. *Simplicity and the stable rank of some free product C^* -algebras*, 1
- Eie, Minking, and Chen, Kwang-Wu. *A theorem on zeta functions associated with polynomials*, 3217
- Eisworth, Todd, and Roitman, Judith. *CH with no Ostaszewski spaces*, 2675
- Elias, Juan. *On the depth of the tangent cone and the growth of the Hilbert function*, 4027
- Evans, Steven N., and Williams, Ruth J. *Transition operators of diffusions reduce zero-crossing*, 1377

- Everitt, W. N., and Markus, L. *Complex symplectic geometry with applications to ordinary differential operators*, 4905
- Fabes, E. B., Safonov, M. V., and Yuan, Yu. *Behavior near the boundary of positive solutions of second order parabolic equations. II*, 4947
- Falcone, Tony, and Takesaki, Masamichi. *Operator valued weights without structure theory*, 323
- Fečkan, Michal. *Chaotic solutions in differential inclusions: Chaos in dry friction problems*, 2861
- Foata, Dominique, and Zeilberger, Doron. *A combinatorial proof of Bass's evaluations of the Ihara-Selberg zeta function for graphs*, 2257
- Ford, Ben. *Overgroups of irreducible linear groups, II*, 3869
- Fukuma, Yoshiaki. *On sectional genus of quasi-polarized 3-folds*, 363
- Gabor, Grzegorz. *See Andres, Jan*
- Gammelin, H. *Gorenstein space with nonzero evaluation map*, 3433
- Gan, Wee Teck. *See Gross, Benedict H.*
- Gatto, Letterio, and Ponza, Fabrizio. *Derivatives of Wronskians with applications to families of special Weierstrass points*, 2233
- Geiss, Stefan. *A counterexample concerning the relation between decoupling constants and UMD-constants*, 1355
- Geller, William, and Misiurewicz, Michal. *Rotation and entropy*, 2927
- Ghamsari, Manouchehr, and Herron, David A. *Bilipschitz homogeneous Jordan curves*, 3197
- Gilbert, John E., and Nahmod, Andrea R. *Hardy spaces and a Walsh model for bilinear cone operators*, 3267
- Górniewicz, Lech. *See Andres, Jan*
- Graham, Ian, and Minda, David. *A Schwarz lemma for multivalued functions and distortion theorems for Bloch functions with branch points*, 4741
- Greenwood, Matt, and Lin, Xiao-Song. *On Vassiliev knot invariants induced from finite type 3-manifold invariants*, 3659
- Grinfeld, M., and Novick-Cohen, A. *The viscous Cahn-Hilliard equation: Morse decomposition and structure of the global attractor*, 2375
- Grispolakis, Joachim, Mayer, John C., and Oversteegen, Lex G. *Building blocks for quadratic Julia sets*, 1171
- Gross, Benedict H., and Gan, Wee Teck. *Haar measure and the Artin conductor*, 1691
- Guo, Li, and Shu, Lingsueh. *Class numbers of cyclotomic function fields*, 4445
- Haruta, Mako E. *Newton's method on the complex exponential function*, 2499
- Hayashi, Nakao, and Naumkin, Pavel I. *Large time asymptotics of solutions to the generalized Benjamin-Ono equation*, 109
- Heinig, Hans P., and Wang, Sichun. *Maximal function estimates of solutions to general dispersive partial differential equations*, 79
- Herron, David A. *See Ghamsari, Manouchehr*
- Hjorth, Greg. *See Dougherty, Randall*
- Hjorth, Greg, and Solecki, Slawomir. *Vaught's conjecture and the Glimm-Effros property for Polish transformation groups*, 2623
- Hoffman, Christopher. *A K counterexample machine*, 4263
- Hopkins, Nora C., and Kinyon, Michael K. *Quadratic differential equations in \mathbb{Z}_2 -graded algebras*, 4545
- Hrushovski, Ehud. *See Chatzidakis, Zoé*
- Hu, Yueyun, Shi, Zhan, and Yor, Marc. *Rates of convergence of diffusions with drifted Brownian potentials*, 3915
- Huang, Qingbo. *Harnack inequality for the linearized parabolic Monge-Ampère equation*, 2025
- Hueter, Irene. *Limit theorems for the convex hull of random points in higher dimensions*, 4337
- Hyry, Eero. *The diagonal subring and the Cohen-Macaulay property of a multigraded ring*, 2213
- Inoue, A. *See Bhatt, S. J.*
- Intermont, Michele. *An equivariant smash spectral sequence and an unstable box product*, 2763
- Iozzi, Alessandra. *See Corlette, Kevin*
- Iwase, Norio, Saito, Shiroshi, and Sumi, Toshio. *Homology of the universal covering of a co-H-space*, 4837
- Izydorek, Marek. *Bourgoin-Yang type theorem and its application to \mathbb{Z}_2 -equivariant Hamiltonian systems*, 2807

- Jacquet, Hervé, and Ye, Yangbo. *Germans of Kloosterman integrals for $GL(3)$* , 1227
- James, Donald G. *Conjugacy classes of $SU(h, \mathcal{O}_S)$ in $SL(2, \mathcal{O}_S)$* , 825
- Ji, You Qing. *Quasitriangular + small compact = strongly irreducible*, 4657
- Jia, Rong-Qing. *Characterization of smoothness of multivariate refinable functions in Sobolev spaces*, 4089
- Jiang, Qingtang. *Multivariate matrix refinable functions with arbitrary matrix dilation*, 2407
- Jiang, Yunping. *Geometry of Cantor systems*, 1975
- Jing, Naihuan, and Misra, Kailash C. *Vertex operators for twisted quantum affine algebras*, 1663
- Kaji, Hajime. *Homogeneous projective varieties with degenerate secants*, 533
- Kalton, N. J., and Verbitsky, I. E. *Nonlinear equations and weighted norm inequalities*, 3441
- Kang, Seok-Jin, and Kim, Myung-Hwan. *Dimension formula for graded Lie algebras and its applications*, 4281
- Kappeler, T., and Mityagin, B. *Gap estimates of the spectrum of Hill's equation and action variables for KdV*, 619
- Karaca, Ismet. *The nilpotence height of P_t^s for odd primes*, 547
- Karlovich, Yuri I. *See Böttcher, Albrecht*
- Katsevich, A. I. *Local tomography with nonsmooth attenuation*, 1947
- Keller, B. *See Dräxler, Peter*
- Keller, Gordon E. *See Costa, Douglas L.*
- Kharlampovich, O., Lioutikova, E., and Myasnikov, A. *Equations in the \mathbf{Q} -completion of a torsion-free hyperbolic group*, 2961
- Khoshnevisan, Davar. *Brownian sheet images and Bessel–Riesz capacity*, 2607
- Kim, Jong Uhn. *An L^p a priori estimate for the Tricomi equation in the upper half space*, 4611
- Kim, Myung-Hwan. *See Kang, Seok-Jin*
- Kinyon, Michael K. *See Hopkins, Nora C.*
- Kiriakouli, P. *A classification of Baire-1 functions*, 4599
- Kleshchev, Alexander. *See Baranov, Alexander*

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publisher Item Identifier. The Publisher Item Identifier (PII) appears at the top of the first page of each article published in this journal. This alphanumeric string of characters uniquely identifies each article and can be used for future cataloging, searching, and electronic retrieval.

Postings to e-MATH. Articles are posted to e-MATH individually soon after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly. Beginning in January 1996 *Transactions* is accessible from e-MATH via the World Wide Web at the URL <http://www.ams.org/publications/>. Subscription prices for Volume 351 (1999) are as follows: for paper delivery, \$1191 list, \$953 institutional member, \$1072 corporate member; for electronic delivery, \$1072 list, \$858 institutional member, \$965 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add \$27 for surface delivery outside the United States and India; \$50 to India. Expedited delivery to destinations in North America is \$45; elsewhere \$142. For paper delivery a late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year.

Back number information. For back issues see the *AMS Catalog of Publications*.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Material in this journal may be reproduced by any means for educational and scientific purposes without fee or permission with the exception of reproduction by services that collect fees for delivery of documents and provided that the customary acknowledgment of the source is given. This consent does not extend to other kinds of copying for general distribution, for advertising or promotional purposes, or for resale. Requests for permission for commercial use of material should be addressed to the Assistant to the Publisher, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to reprint-permission@ams.org.

Excluded from these provisions is material in articles for which the author holds copyright. In such cases, requests for permission to use or reprint should be addressed directly to the author(s). (Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.)

Transactions of the American Mathematical Society is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions*, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248.

TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 351, No. 1

Whole No. 764

January 1999

Kenneth J. Dykema, Simplicity and the stable rank of some free product C^*-algebras	1
Joyce Wagner, An algorithm for calculating the Nielsen number on surfaces with boundary	41
Alexander Blokh and Michał Misiurewicz, Rotating an interval and a circle	63
Hans P. Heinig and Sichun Wang, Maximal function estimates of solutions to general dispersive partial differential equations	79
Nakao Hayashi and Pavel I. Naumkin, Large time asymptotics of solutions to the generalized Benjamin-Ono equation	109
M. F. Newman and E. A. O'Brien, Classifying 2-groups by coclass	131
M. D. Crossley, Monomial bases for $H^*(\mathbb{C}P^\infty \times \mathbb{C}P^\infty)$ over $\mathcal{A}(p)$	171
Fiona Murnaghan and Joe Repka, Reducibility of some induced representations of p-adic unitary groups	193
A. J. Zaslavski, Turnpike property for extremals of variational problems with vector-valued functions	211
J. F. van Diejen, Properties of some families of hypergeometric orthogonal polynomials in several variables	233
Alexander Vardy, Density doubling, double-circulants, and new sphere packings	271
F. Andreu, J. M. Mazón, S. Segura de León, and J. Toledo, Existence and uniqueness for a degenerate parabolic equation with L^1-data	285
Corran Webster and Soren Winkler, The Krein-Milman theorem in operator convexity	307
Tony Falcone and Masamichi Takesaki, Operator valued weights without structure theory	323
Jiehua Mai, Multi-separation, centrifugality and centripetality imply chaos ..	343
Jiehua Mai, Scrambled sets of continuous maps of 1-dimensional polyhedra ..	353
Yoshiaki Fukuma, On sectional genus of quasi-polarized 3-folds	363
Ted Chinburg, Carla D. Savage, and Herbert S. Wilf, Combinatorial families that are exponentially far from being listable in Gray code sequence	379
Alfredo O. Brega, On the unitary dual of $Spin(2n, \mathbb{C})$	403
Anthony To-Ming Lau and Viktor Losert, Ergodic sequences in the Fourier-Stieltjes algebra and measure algebra of a locally compact group ..	417

Vol. 351, No. 2

Whole No. 765

February 1999

Hans-Joachim Baues, Quadratic homology	429
--	-----

A. H. Dooley and N. J. Wildberger, Global character formulae for compact Lie groups	477
Brailey Sims and Michael A. Smyth, On some Banach space properties sufficient for weak normal structure and their permanence properties .	497
Bin Liu, The stability of the equilibrium of reversible systems	515
Hajime Kaji, Homogeneous projective varieties with degenerate secants ..	533
Ismet Karaca, The nilpotence height of P_t^s for odd primes	547
M. Pollicott and M. Yuri, Regularity of solutions to the measurable Livsic equation	559
Jochen Denzler, Windows of given area with minimal heat diffusion	569
Ch. Dorschfeldt and N. N. Tarkhanov, Golubev series for solutions of elliptic equations	581
Alexander Baranov and Alexander Kleshchev, Maximal ideals in modular group algebras of the finitary symmetric and alternating groups	595
T. Kappeler and B. Mityagin, Gap estimates of the spectrum of Hill's equation and action variables for KdV	619
Peter Dräxler, Idun Reiten, Sverre O. Smalø, Øyvind Solberg, and with an appendix by B. Keller, Exact categories and vector space categories	647
Edward L. Bueler, The heat kernel weighted Hodge Laplacian on noncompact manifolds	683
Andrzej Skowroński and Kunio Yamagata, Galois coverings of selfinjective algebras by repetitive algebras	715
Koichi Takase, On Siegel modular forms of half-integral weights and Jacobi forms	735
Brooks Roberts, The nonarchimedean theta correspondence for $\mathrm{GSp}(2)$ and $\mathrm{GO}(4)$	781
Hiroshige Shiga and Harumi Tanigawa, Projective structures with discrete holonomy representations	813
Donald G. James, Conjugacy classes of $SU(h, \mathcal{O}_S)$ in $SL(2, \mathcal{O}_S)$	825
Peer Christian Kunstmann, Distribution semigroups and abstract Cauchy problems	837

Vol. 351, No. 3

Whole No. 766

March 1999

S. Z. Levendorskii, Asymptotic formulae with remainder estimates for eigenvalue branches of the Schrödinger operator $H - \lambda W$ in a gap of H	857
Bernhard Lani-Wayda, Erratic solutions of simple delay equations	901
Tom Bohman, Discrete threshold growth dynamics are omnivorous for box neighborhoods	947
Gaoyong Zhang, Dual kinematic formulas	985
D. V. Alekseevsky, S. Marchiafava, and M. Pontecorvo, Compatible complex structures on almost quaternionic manifolds	997
C. Krattenthaler and M. Prohaska, A remarkable formula for counting nonintersecting lattice paths in a ladder with respect to turns	1015

Kerstin Waas , On graphs with a metric end space	1043
Maohua Le , On the diophantine equation $(x^3 - 1)/(x - 1) = (y^n - 1)/(y - 1)$	1063
Xiaotie She , On the non-vanishing of cubic twists of automorphic L -series	1075
Michael L. Mihalik , Group extensions and tame pairs	1095
Piotr Minc , A weakly chainable tree-like continuum without the fixed point property	1109
Greg Arone , A generalization of Snaith-type filtration	1123
Thierry Coulhon and Xuan Tinh Duong , Riesz transforms for $1 \leq p \leq 2$	1151
Joachim Grispolakis, John C. Mayer, and Lex G. Oversteegen , Building blocks for quadratic Julia sets	1171
Walter Miller and Ethan Akin , Invariant measures for set-valued dynamical systems	1203
Hervé Jacquet and Yangbo Ye , Germs of Kloosterman integrals for $GL(3)$	1227
Matej Brešar and Peter Šemrl , On locally linearly dependent operators and derivations	1257
S. Pumplün , Composition algebras over rings of genus zero	1277

Vol. 351, No. 4

Whole No. 767

April 1999

Dan Laksov and Anders Thorup , These are the differentials of order n	1293
Stefan Geiss , A counterexample concerning the relation between decoupling constants and UMD-constants	1355
Steven N. Evans and Ruth J. Williams , Transition operators of diffusions reduce zero-crossing	1377
Manfredo P. do Carmo and Detang Zhou , Eigenvalue estimate on complete noncompact Riemannian manifolds and applications	1391
Valera Berestovskii, Conrad Plaut, and Cornelius Stallman , Geometric groups. I	1403
Gabor Toth , Universal constraints on the range of eigenmaps and spherical minimal immersions	1423
Kit C. Chan and Željko Čučković , C^* -algebras generated by a subnormal operator	1445
Juris Steprāns , Decomposing Euclidean space with a small number of smooth sets	1461
Rahul Pandharipande , Intersections of \mathbb{Q} -divisors on Kontsevich's moduli space $\overline{M}_{0,n}(\mathbb{P}^r, d)$ and enumerative geometry	1481
Kevin Corlette and Alessandra Iozzi , Limit sets of discrete groups of isometries of exotic hyperbolic spaces	1507
George M. Bergman , Supports of derivations, free factorizations, and ranks of fixed subgroups in free groups	1531
Ll. Alsedà, S. Kolyada, J. Llibre, and L^v. Snoha , Entropy and periodic points for transitive maps	1551
Ian Melbourne , Steady-state bifurcation with Euclidean symmetry	1575

Der-Chen Chang, Galia Dafni, and Elias M. Stein, Hardy spaces, BMO, and boundary value problems for the Laplacian on a smooth domain in \mathbf{R}^n	1605
Naihuan Jing and Kailash C. Misra, Vertex operators for twisted quantum affine algebras	1663
Benedict H. Gross and Wee Teck Gan, Haar measure and the Artin conductor	1691

Vol. 351, No. 5

Whole No. 768

May 1999

Robert S. Strichartz, Isoperimetric estimates on Sierpinski gasket type fractals	1705
Frank Morgan, The hexagonal honeycomb conjecture	1753

Editorial Information

To be published in the *Transactions*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication.

Papers submitted to the *Transactions* should exceed 10 published journal pages in length. Shorter papers may be submitted to the *Proceedings of the American Mathematical Society*. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{T}\mathcal{E}\mathcal{X}$.

As of August 31, 1999, the backlog for this journal was approximately 12 issues. This estimate is the result of dividing the number of manuscripts for this journal in the Providence office that have not yet gone to the printer on the above date by the average number of articles per issue over the previous twelve months, reduced by the number of issues published in four months (the time necessary for editing and composing a typical issue). In an effort to make articles available as quickly as possible, articles are posted to e-MATH individually soon after proof is returned from authors and before appearing in an issue.

A Consent to Publish and Copyright Agreement is required before a paper will be published in this journal. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. Two copies of the paper should be sent directly to the appropriate Editor and the author should keep a copy. *If an editor is agreeable*, an electronic manuscript prepared in $\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ may be submitted by pointing to an appropriate URL on a preprint or e-print server.

The first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper should be the 2000 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from <http://www.ams.org/msc>. The list of classifications will also be available in print starting with the 1999 annual index of *Mathematical Reviews*. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from <http://www.ams.org/publications>. When the manuscript is submitted, authors should supply the editor with electronic addresses if available. These will be printed after the postal address at the end of each article.

Electronically prepared manuscripts. The AMS encourages electronically prepared manuscripts, with a strong preference for $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, the *AMS Author*

Handbook, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file automatically provide hypertext linking to the bibliography and other elements of the article for searching electronically on the World Wide Web. Because linking must often be added manually to electronically prepared manuscripts in other forms of $\mathcal{T}\mathcal{E}\mathcal{X}$, using $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ also reduces the amount of technical intervention once the files are received by the AMS. This results in fewer errors in processing and saves the author proofreading time. $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ papers also move more efficiently through the production stream, helping to minimize publishing costs.

$\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the highly preferred format of $\mathcal{T}\mathcal{E}\mathcal{X}$, but author packages are also available in $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$. Those authors who make use of these style files from the beginning of the writing process will further reduce their own efforts. Manuscripts prepared electronically in $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or plain $\mathcal{T}\mathcal{E}\mathcal{X}$ are normally not acceptable due to the high amount of technical time required to insure that the file will run properly through the AMS in-house production system. $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ users will find that $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ is the same as $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ with additional commands to simplify the typesetting of mathematics, and users of plain $\mathcal{T}\mathcal{E}\mathcal{X}$ should have the foundation for learning $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Authors may retrieve an author package from e-MATH via the World Wide Web through the URL <http://www.ams.org/tex/> or via FTP to <ftp.ams.org> (login as `anonymous` and enter username as password). The author package can also be obtained free of charge by sending e-mail to pub@ams.org (Internet) or from the Publication Division, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When requesting an author package, please specify $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$, Macintosh or IBM (3.5) format, and the publication in which your paper will appear. Please be sure to include your complete mailing address.

At the time of submission, authors should indicate if the paper has been prepared using $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ or $\mathcal{A}\mathcal{M}\mathcal{S}$ - $\mathcal{T}\mathcal{E}\mathcal{X}$ and provide the Editor with a paper manuscript that matches the electronic manuscript. The final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also send the final version of the paper manuscript to the Editor, who will forward a copy to the Providence office. Editors will require authors to send their electronically prepared manuscripts to the Providence office in a timely fashion. Electronically prepared manuscripts can be sent via e-mail to pub-submit@ams.org (Internet) or on diskette to the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. When sending a manuscript electronically, please be sure to include a message indicating in which publication the paper has been accepted. No corrections will be accepted electronically. Authors must mark their changes on their proof copies and return them to the Providence office. Complete instructions on how to send files are included in the author package.

Electronic graphics. Figures may be sent to the AMS in an electronic format. The AMS recommends that graphics created electronically be saved in Encapsulated PostScript (EPS) format. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images.

If the graphics package used does not support EPS output, the graphics file should be saved in one of the standard graphics formats—such as TIFF, PICT, GIF, etc.—rather than in an application-dependent format. Graphics files sent in

an application-dependent format are not likely to be used. No matter what method was used to produce the graphic, it is necessary to provide a paper copy to the AMS.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly.

T_EX files available. Beginning with the January 1992 issue of the *Bulletin* and the January 1996 issues of *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS*, T_EX files can be downloaded from e-MATH, starting from URL <http://www.ams.org/journals/>. Authors without Web access may request their files at the address given below after the article has been published. For *Bulletin* papers published in 1987 through 1991 and for *Transactions*, *Proceedings*, *Mathematics of Computation*, and the *Journal of the AMS* papers published in 1987 through 1995, T_EX files are available upon request for authors without Web access by sending e-mail to file-request@ams.org or by contacting the Electronic Prepress Department, American Mathematical Society, P.O. Box 6248, Providence, RI 02940-6248. The request should include the title of the paper, the name(s) of the author(s), the name of the publication in which the paper has or will appear, and the volume and issue numbers if known. The T_EX file will be sent to the author making the request after the article goes to the printer. If the requestor can receive Internet e-mail, please include the e-mail address to which the file should be sent. Otherwise please indicate a diskette format and postal address to which a disk should be mailed. **Note:** Because T_EX production at the AMS sometimes requires extra fonts and macros that are not yet publicly available, T_EX files cannot be guaranteed to run through the author’s version of T_EX without errors. The AMS regrets that it cannot provide support to eliminate such errors in the author’s T_EX environment.

Any inquiries concerning a paper that has been accepted for publication should be sent directly to the Electronic Prepress Department, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

Editors

Two copies of papers intended for publication in *Transactions* or *Memoirs* should be addressed to the appropriate editor. Subjects, and the editors associated with them, follow.

Harmonic analysis, representation theory, and Lie theory, ROBERT J. STANTON, Department of Mathematics, Ohio State University, 231 West 18th Avenue, Columbus, OH 43210-1174; e-mail: stanton@math.ohio-state.edu

Operator algebras and functional analysis, BRUCE E. BLACKADAR, Department of Mathematics, University of Nevada, Reno, NV 89557; e-mail: bruceb@math.unr.edu

Ergodic theory and dynamical systems, ROBERT F. WILLIAMS, Department of Mathematics, University of Texas, Austin, TX 78712-1082; e-mail: bob@math.utexas.edu

Algebra, CHARLES W. CURTIS, Department of Mathematics, University of Oregon, Eugene, OR 97403-1222; e-mail: cwc@darkwing.uoregon.edu

Geometric topology, knot theory, hyperbolic geometry, and general topology, JOHN LUECKE, Department of Mathematics, University of Texas, Austin, TX 78712-1082; e-mail: luecke@math.utexas.edu

Algebraic topology and cohomology of groups, STEWART PRIDDY, Department of Mathematics, Northwestern University, 2033 Sheridan Road, Evanston, IL 60288-2730; e-mail: s.priddy@math.nwu.edu

Ordinary differential equations, partial differential equations, and applied mathematics, JOHN MALLETT-PARET, Division of Applied Mathematics, Brown University, Providence, RI 02912-9000; e-mail: jmp@cfm.brown.edu

Differential geometry and global analysis, CHUU-LIAN TERNG, Department of Mathematics, Northeastern University, Boston, MA 02115-5096; e-mail: terng@neu.edu

Probability and statistics, RODRIGO BAÑUELOS, Department of Mathematics, Purdue University, West Lafayette, IN 47907; e-mail: banuelos@math.purdue.edu

Combinatorics and Lie theory, PHILIP J. HANLON, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1003; e-mail: hanlon@math.lsa.umich.edu

Logic, THEODORE SLAMAN, Department of Mathematics, University of California, Berkeley, CA 94720-3840; e-mail: slaman@math.berkeley.edu

Number theory and arithmetic algebraic geometry, ALICE SILVERBERG, c/o Mathematisches Institut, Universitaet Erlangen-Nuernberg, Bismarckstraße 1 1/2, 91054 Erlangen, Germany; e-mail: silver@math.ohio-state.edu

Complex analysis and complex geometry, DANIEL M. BURNS, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109-1003; e-mail: dburns@math.lsa.umich.edu

Algebraic geometry and commutative algebra, LAWRENCE EIN, Department of Mathematics, University of Illinois, 851 S. Morgan (M/C 249), Chicago, IL 60607-7045; e-mail: ein@uic.edu

Real and harmonic analysis and geometric partial differential equations, WILLIAM BECKNER, Department of Mathematics, University of Texas, Austin, TX 78712-1082; e-mail: beckner@math.utexas.edu

Partial differential equations and applied mathematics, BARBARA LEE KEYFITZ, Department of Mathematics, University of Houston, 4800 Calhoun, Houston, TX 77204-3476; e-mail: keyfitz@uh.edu

All other communications to the editors should be addressed to the Managing Editor, PETER SHALEN, Department of Mathematics, Statistics and Computer Science (M/C 249), University of Illinois at Chicago, 851 S. Morgan Street, Chicago, IL 60607-7045; e-mail: shalen@math.uic.edu.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

This bimonthly journal is devoted to research in pure and applied mathematics of much the same nature as appears in *Transactions*. An issue consists of one or more separately bound research tracts for which the author(s) has provided reproduction copy. Prior to 1975 this was published as a monograph series. The editorial committee is identical with that for the *Transactions* so that papers intended for publication in this series should be addressed to one of the editors.
