AMERICAN
MATHEMATICAL
SOCIETY

Providence, Rhode Island USA

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 375 (2022) are as follows: for paper delivery, US\$2974 list, US\$2379.20 institutional member, US\$2676.60 corporate member; for electronic delivery, US\$2617 list, US\$2093.60 institutional member, US\$2355.30 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$20 for delivery within the United States; US\$90 for delivery outside the United States. Subscription renewals are subject to late fees. See www.ams.org/journal-faq for more journal subscription information.

Back number information. For back issues see www.ams.org/backvols.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2213 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Requests for permission to reuse portions of AMS publication content are handled by the Copyright Clearance Center. For more information, visit www.ams.org/publications/pubpermissions.

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

Transactions of the American Mathematical Society (ISSN 0002-9947 (print); ISSN 1088-6850 (online)) is published monthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to *Transactions, American Mathematical Society*, 201 Charles Street, Providence, RI 02904-2213 USA.

December 2022

Ewain Gwynne and Joshua Pfeffer, KPZ formulas for the Liouville quantum gravity metric	8297
Cuipo Jiang and Zongzhu Lin, Tensor decomposition, parafermions, level-rank duality, and reciprocity law for vertex operator algebras	8325
Alexei Borodin and Michael Wheeler, Nonsymmetric Macdonald polynomials via integrable vertex models	8353
Matthew Gibson, Li-Sheng Tseng, and Stefano Vidussi, Symplectic structures with non-isomorphic primitive cohomology on open 4-manifolds	8399
Bobo Hua and Yanhui Su, Total curvature of planar graphs with nonnegative combinatorial curvature	8423
Jiayin Pan and Jikang Wang, Some topological results of Ricci limit spaces	8445
Xiaojun Huang, Jin Lu, Xiaomin Tang, and Ming Xiao, Proper mappings between indefinite hyperbolic spaces and type I classical domains	8465
Andreia Chapouto and Nobu Kishimoto, Invariance of the Gibbs measures for periodic generalized Korteweg-de Vries equations	8483
Uriel Sinichkin, Enumeration of algebraic and tropical singular hypersurfaces	8529
Julian L. Demeio, The étale Brauer-Manin obstruction to strong approximation on homogeneous spaces	8581
Pedro J. Chocano, Manuel A. Morón, and Francisco R. Ruiz del Portal, On some topological realizations of groups and homomorphisms	8635
Vladimir Kanovei and Vassily Lyubetsky, On the ‘definability of definable’ problem of Alfred Tarski, Part II	8651
Subhadip Dey and Michael Kapovich, Patterson–Sullivan theory for Anosov subgroups	8687
Misja F.A. Steinmetz, Explicit Serre weights for two-dimensional Galois representations over a ramified base	8739
Yingxin Mu, Eviatar B. Procaccia, and Yuan Zhang, Scaling limit of DLA on a long line segment	8769
Robert Lipshitz and Sucharit Sarkar, A mixed invariant of nonorientable surfaces in equivariant Khovanov homology	8807
Liangjun Weng and Chao Xia, Alexandrov-Fenchel inequality for convex hypersurfaces with capillary boundary in a ball	8851
Dimitris Michail Gerontogiannis, On finitely summable Fredholm modules from Smale spaces	8885
Dario Mathiä and Ulrich Thiel, Wreath Macdonald polynomials at $q = t$ as characters of rational Cherednik algebras	8945
Nicolas Addington and Ryan Takahashi, A categorical \mathfrak{sl}_2 action on some moduli spaces of sheaves	8969

Ilijas Farah and Saharon Shelah, Between reduced powers and ultrapowers, II	9007
---	------

INDEX TO VOLUME 375 (2022)

- Acciarri, Cristina, Robert M. Guralnick, and Pavel Shumyatsky. *Coprime automorphisms of finite groups*, 4549
- Adamczewski, Boris, Michael Drmota, and Clemens Müllner. *(Logarithmic) densities for automatic sequences along primes and squares*, 455
- Addario-Berry, Louigi, Erin Beckman, and Jessica Lin. *Asymmetric cooperative motion in one dimension*, 2883
- Addas-Zanata, Salvador, and Andres Koropecki. *Homotopically unbounded disks for generic surface diffeomorphisms*, 5859
- Addington, Nicolas, and Ryan Takahashi. *A categorical \mathfrak{sl}_2 action on some moduli spaces of sheaves*, 8969
- Ademehin, Ibukun. *Graded multiplicities in the exterior algebra of the little adjoint module*, 2341
- Ahmadian, R. *Toroidization of locally toroidal morphisms*, 2949
- Akagi, Goro, Christian Kuehn, and Ken-Ichi Nakamura. *Traveling wave dynamics for Allen-Cahn equations with strong irreversibility*, 3173
- Albritton, Dallas, and Zachary Bradshaw. *Non-decaying solutions to the critical surface quasi-geostrophic equations with symmetries*, 587
- Aliaga, Ramón J., Chris Gartland, Colin Petitjean, and Antonín Procházka. *Purely 1-unrectifiable metric spaces and locally flat Lipschitz functions*, 3529
- Alkorn, Kateryna, and Zhenghe Zhang. *On the correspondence between domination and the spectrum of Jacobi operators*, 8101
- Amrutam, Tattwamasi, and Dan Ursu. *A generalized Powers averaging property for commutative crossed products*, 2237
- Ando, Hiroshi, Michal Doucha, and Yasumichi Matsuzawa. *Large scale geometry of Banach-Lie groups*, 2827
- Angst, Jürgen, Thibault Pautrel, and Guillaume Poly. *Real zeros of random trigonometric polynomials with dependent coefficients*, 7209
- Apostolov, Vestislav, Jeffrey Streets, and Yuri Ustinovskiy. *Generalized Kähler-Ricci flow on toric Fano varieties*, 4369
- Arancibia Robert, Nicolás. *Characteristic cycles, micro local packets and packets with cohomology*, 997
- Archita, M., and R. Preeti. *Rational equivalence on adjoint groups of type D_n over fields of virtual cohomological dimension 2*, 7373
- Asadollahi, Javad, and Somayeh Sadeghi. *Higher ideal approximation theory*, 2113
- Asaoka, Masayuki. *Stable intersection of Cantor sets in higher dimension and robust homoclinic tangency of the largest codimension*, 873
- Aschenbrenner, Matthias, Artem Chernikov, Allen Gehret, and Martin Ziegler. *Distality in valued fields and related structures*, 4641
- Assaf, Sami H. *Demazure crystals for Kohnert polynomials*, 2147
- Assiotis, Theodoros. *Infinite p -adic random matrices and ergodic decomposition of p -adic Hua measures*, 1745
- Bailey, R. A., Peter J. Cameron, Cheryl E. Praeger, and Csaba Schneider. *The geometry of diagonal groups*, 5259
- Baker, Simon, and Sascha Troscheit. *Analogues of Khintchine's theorem for random attractors*, 1411
- Balitskiy, Alexey, and Aleksandr Berdnikov. *Waist of maps measured via Urysohn width*, 1261
- Banerjee, Soumyarup, and Ben Kane. *Finiteness theorems for universal sums of squares of almost primes*, 7669
- Bargagnati, Giuseppe, and Roberto Frigerio. *The simplicial volume of contractible 3-manifolds*, 3305
- Batanin, Michael, and David White. *Homotopy theory of algebras of substitutes and their localization*, 3569
- Batista, Márcio, and Anderson Lima. *Min-max widths of the real projective 3-space*, 5239
- Battista, Ludovico, and Bruno Martelli. *Hyperbolic 4-manifolds with perfect circle-valued Morse functions*, 2597
- Bayındır, Haldun Özgür, and Tasos Moulinos. *Algebraic K -theory of $\mathrm{THH}(\mathbb{F}_p)$* , 4177
- Beckman, Erin. *See Addario-Berry, Louigi*

- Bedrossian, Jacob, Maria Pia Gualdani, and Stanley Snelson. *Non-existence of some approximately self-similar singularities for the Landau, Vlasov-Poisson-Landau, and Boltzmann equations*, 2187
- Behrndt, Jussi, A. F. M. ter Elst, and Fritz Gesztesy. *The generalized Birman-Schwinger principle*, 799
- Berdnikov, Aleksandr. *See* Balitskiy, Alexey
- Berger, Aaron, Ashwin Sah, Mehtaab Sawhney, and Jonathan Tidor. *Popular differences for matrix patterns*, 2677
- Berman, Mark N., Itay Glazer, and Michael M. Schein. *Pro-isomorphic zeta functions of nilpotent groups and Lie rings under base extension*, 1051
- Bertoin, Jean. *Counting the zeros of an elephant random walk*, 5539
- Berwick-Evans, Daniel. *Equivariant elliptic cohomology, gauged sigma models, and discrete torsion*, 369
- Bessenrodt, Christine, Chris Bowman, and Rowena Paget. *The classification of multiplicity-free plethysms of Schur functions*, 5151
- Bianchi, Andrea, Jeremy Miller, and Jennifer C. H. Wilson. *Mapping class group actions on configuration spaces and the Johnson filtration*, 5461
- Bikram, Panchugopal. *See* Rajarama Bhat, B. V.
- Bilz, Constantin. *Large sets without Fourier restriction theorems*, 6983
- Blekherman, Grigoriy, Annie Raymond, Mohit Singh, and Rekha R. Thomas. *Tropicalization of graph profiles*, 6281
- Blokh, Alexander, Lex Oversteegen, and Vladlen Timorin. *Slices of the parameter space of cubic polynomials*, 5313
- Blomquist, Jacobson R., and John E. Harper. *Higher stabilization and higher Freudenthal suspension*, 8193
- Blum, Talia, Caroline Choi, Alexandra Hoey, Jonas Iskander, Kaya Lakein, and Thomas C. Martinez. *On class numbers, torsion subgroups, and quadratic twists of elliptic curves*, 351
- Bondarko, Mikhail V., and Vladimir A. Sosnilo. *On Chow-weight homology of geometric motives*, 173
- Bonk, Mario, and Daniel Meyer. *Uniformly branching trees*, 3841
- Böröczky, Károly J., and Pavlos Kalantzopoulos. *Log-Brunn-Minkowski inequality under symmetry*, 5987
- Borodin, Alexei, and Michael Wheeler. *Nonsymmetric Macdonald polynomials via integrable vertex models*, 8353
- Bowman, Chris. *See* Bessenrodt, Christine
- Box, Joshua. *Elliptic curves over totally real quartic fields not containing $\sqrt{5}$ are modular*, 3129
- Bradshaw, Zachary. *See* Albritton, Dallas
- Brändén, Petter, and Katharina Jochemko. *The Eulerian transformation*, 1917
- Brandolini, Luca, Leonardo Colzani, Sinai Robins, and Giancarlo Travaglini. *An Euler-MacLaurin formula for polygonal sums*, 151
- Brazitikos, Silouanos, and Dimitris-Marios Liakopoulos. *On a version of the slicing problem for the surface area of convex bodies*, 5561
- de la Bretèche, Régis, and Andrew Granville. *Exponential sums with multiplicative coefficients and applications*, 6875
- Brown, Michael K., and Daniel Erman. *Minimal free resolutions of differential modules*, 7509
- Bruner, Robert R., and John Rognes. *The Adams spectral sequence for the image-of-J spectrum*, 5803
- Bruno, Tommaso. *Homogeneous algebras via heat kernel estimates*, 6903
- Burchard, Almut, Galia Dafni, and Ryan Gibara. *Mean oscillation bounds on rearrangements*, 4429
- Byun, Sung-Soo, Jaehun Lee, and Tulasi Ram Reddy. *Zeros of random polynomials and their higher derivatives*, 6311
- Cameron, Peter J. *See* Bailey, R. A.
- Cancino-Manríquez, J. *Every maximal ideal may be Katětov above of all F_σ ideals*, 1861
- Cao, Mingming, Andrea Olivo, and Kôzô Yabuta. *Extrapolation for multilinear compact operators and applications*, 5011
- Carrasco, Pablo D., and Radu Saghin. *Extended flexibility of Lyapunov exponents for Anosov diffeomorphisms*, 3411

- Chan, Stephanie. *Integral points on the congruent number curve*, 6675
- Chan, Swee Hong, Igor Pak, and Greta Panova. *The cross-product conjecture for width two posets*, 5923
- Chan, Wai Kiu, and Han Li. *On realization of isometries for higher rank quadratic lattices over number fields*, 4619
- Chan, William, Stephen Jackson, and Nam Trang. *The size of the class of countable sequences of ordinals*, 1725
- Chapouto, Andreia, and Nobu Kishimoto. *Invariance of the Gibbs measures for periodic generalized Korteweg-de Vries equations*, 8483
- Chardin, Marc, Yairon Cid-Ruiz, and Aron Simis. *Generic freeness of local cohomology and graded specialization*, 87
- Chardin, Marc, Dipankar Ghosh, and Navid Nemati. *The (ir)regularity of Tor and Ext*, 47
- Chas, Moira, and Arpan Kabiraj. *The Lie bracket of undirected closed curves on a surface*, 2365
- Chataur, David, and Joana Cirici. *Sheaves of E-infinity algebras and applications to algebraic varieties and singular spaces*, 925
- Chaudru de Raynal, Paul-Éric, and Stéphane Menozzi. *Regularization effects of a noise propagating through a chain of differential equations: an almost sharp result*, 1
- Chen, Bo, and Yuxiang Li. *Huber's theorem for manifolds with $L^{\frac{1}{2}}$ integrable Ricci curvatures*, 5907
- Chen, Ke, Quoc-Hung Nguyen, and Yiran Xu. *The Muskat problem with C^1 data*, 3039
- Chen, Yen-Tsung, and Oğuz Gezmiş. *On Drinfeld modular forms of higher rank and quasi-periodic functions*, 2387
- Chen, Zhen-Qing, Panki Kim, Takashi Kumagai, and Jian Wang. *Heat kernels for reflected diffusions with jumps on inner uniform domains*, 6797
- Cheng, Heng Yi. *Curvature-free linear length bounds on geodesics in closed Riemannian surfaces*, 5217
- Cheong, Gilyoung, and Yifeng Huang. *Betti and Hodge numbers of configuration spaces of a punctured elliptic curve from its zeta functions*, 6363
- Chernikov, Artem. *See* Aschenbrenner, Matthias
- Chirvasitu, Alexandru, and Mateusz Wasilewski. *Random quantum graphs*, 3061
- Chocano, Pedro J., Manuel A. Morón, and Francisco R. Ruiz del Portal. *On some topological realizations of groups and homomorphisms*, 8635
- Choi, Caroline. *See* Blum, Talia
- Choi, Seung-Il, Young-Hun Kim, Sun-Young Nam, and Young-Tak Oh. *The projective cover of tableau-cyclic indecomposable $H_n(0)$ -modules*, 7747
- Choi, Yemon, Bence Horváth, and Niels Jakob Laustsen. *Approximately multiplicative maps between algebras of bounded operators on Banach spaces*, 7121
- Chu, Jianchun, Man-Chun Lee, and Luen-Fai Tam. *Kähler manifolds and mixed curvature*, 7925
- Cid-Ruiz, Yairon. *See* Chardin, Marc
- Cinti, E., F. Glaudo, A. Pratelli, X. Ros-Oton, and J. Serra. *Sharp quantitative stability for isoperimetric inequalities with homogeneous weights*, 1509
- Cirici, Joana. *See* Chataur, David
- Clemens, John D. *Relative primeness and Borel partition properties for equivalence relations*, 111
- de Clercq, Charles, Anne Quéguiner-Mathieu, and Maksim Zhykhovich. *Critical varieties and motivic equivalence for algebras with involution*, 7529
- Colzani, Leonardo. *See* Brandolini, Luca
- Conder, Marston, Alexander Lubotzky, Jeroen Schillewaert, and François Thilmany. *Constructing highly regular expanders from hyperbolic Coxeter groups*, 325
- Constantinescu, C., R. Loeffen, and P. Patie. *First passage times over stochastic boundaries for subdiffusive processes*, 1629
- Constantinescu, Petru, and Asbjørn Christian Nordentoft. *Residual equidistribution of modular symbols and cohomology classes for quotients of hyperbolic n -space*, 7001
- Corvaja, Pietro, Aaron Levin, and Umberto Zannier. *Intersections in subvarieties of \mathbb{G}_m^1 and applications to lacunary polynomials*, 71
- Côte, Raphaël, and Yvan Martel. *Corrigendum to "Multi-travelling waves for the nonlinear Klein-Gordon equation"*, 3755
- Dafni, Galia. *See* Burchard, Almut

- Dai, Feng, and Andriy Prymak. *L^p -Bernstein inequalities on C^2 -domains and applications to discretization*, 1933
- Damanik, David. *See* Li, Long
- De, Sandipan. *See* Rajarama Bhat, B. V.
- Dell'Ambrogio, Ivo. *Green 2-functors*, 7783
- Demeio, Julian L. *The étale Brauer-Manin obstruction to strong approximation on homogeneous spaces*, 8581
- Demeter, Ciprian. *On L^{12} square root cancellation for exponential sums associated with nondegenerate curves in \mathbb{R}^4* , 7715
- Deng, Chang-Song, René L. Schilling, and Lihu Xu. *Singular integrals of subordinators with applications to structural properties of SPDEs*, 6043
- Dey, Subhadip, and Michael Kapovich. *Patterson-Sullivan theory for Anosov subgroups*, 8687
- Dirbák, Matúš, Ľubomír Snoha, and Vladimír Špitalský. *Minimal direct products*, 6453
- Domínguez, Óscar, and Sergey Tikhonov. *New estimates for the maximal functions and applications*, 3969
- Dong, Changguang, and Adam Kanigowski. *Bernoulli property for certain skew products over hyperbolic systems*, 1607
- Doucha, Michal. *See* Ando, Hiroshi
- Draganić, Nemanja, Michael Krivelevich, and Rajko Nenadov. *Rolling backwards can move you forward: On embedding problems in sparse expanders*, 5195
- Drmota, Michael. *See* Adamczewski, Boris
- Du, Shi-Zhong. *Necessary and sufficient conditions to Bernstein theorem of a Hessian equation*, 4873
- Du, Xiumin, Yumeng Ou, and Ruixiang Zhang. *On the multiparameter Falconer distance problem*, 4979
- Ebenfelt, Peter, Ilya Kossovskiy, and Bernhard Lamel. *The equivalence theory for infinite type hypersurfaces in \mathbb{C}^2* , 4019
- Ehard, Stefan, and Felix Joos. *Decompositions of quasirandom hypergraphs into hypergraphs of bounded degree*, 7035
- Ehrenborg, Richard, Sophie Morel, and Margaret Readdy. *Sharing pizza in n dimensions*, 5829
- Einmahl, Uwe. *Feller's upper-lower class test in Euclidean space*, 6575
- El-Baz, Daniel, Daniel Loughran, and Efthymios Sofos. *Multivariate normal distribution for integral points on varieties*, 3089

AMERICAN
MATHEMATICAL
SOCIETY

Providence, Rhode Island USA

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Transactions of the American Mathematical Society* is published monthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 375 (2022) are as follows: for paper delivery, US\$2974 list, US\$2379.20 institutional member, US\$2676.60 corporate member; for electronic delivery, US\$2617 list, US\$2093.60 institutional member, US\$2355.30 corporate member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$20 for delivery within the United States; US\$90 for delivery outside the United States. Subscription renewals are subject to late fees. See www.ams.org/journal-faq for more journal subscription information.

Back number information. For back issues see www.ams.org/backvols.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2213 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Requests for permission to reuse portions of AMS publication content are handled by the Copyright Clearance Center. For more information, visit www.ams.org/publications/pubpermissions.

Ilijas Farah and Saharon Shelah, Between reduced powers and ultrapowers, II.	9007

Editorial Information

To be published in the *Transactions*, a paper must be correct, new, nontrivial, and significant. Further, it must be well written and of interest to a substantial number of mathematicians. Piecemeal results, such as an inconclusive step toward an unproved major theorem or a minor variation on a known result, are in general not acceptable for publication.

Papers submitted to the *Transactions* should be 15 or more published journal pages in length. Shorter papers may be submitted to the *Proceedings of the American Mathematical Society*. Published pages are the same size as those generated in the style files provided for $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$.

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/tran>.

In an effort to make articles available as quickly as possible, articles are electronically published on the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish is required before we can begin processing your paper. After a paper is accepted for publication, the Providence office will send a Consent to Publish to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. All articles submitted to this journal are peer reviewed. The AMS has a single blind peer-review process in which the reviewers know who the authors of the manuscript are, but the authors do not have access to the information on who the reviewers are. The AMS uses Centralized Manuscript Processing for initial submissions. Authors should submit a PDF file using the Initial Manuscript Submission form found at www.ams.org/submission/tran, or send one copy of the manuscript to the following address: Centralized Manuscript Processing, TRANSACTIONS OF THE AMS, 201 Charles Street, Providence, RI 02904-2213 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Transactions* and include the name of the corresponding author, contact information such as email address or mailing address, and the name of an appropriate Editor to review the paper (see the list of Editors below).

The first page of an article must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* should be at least one complete sentence, and at most 300 words. Included with the footnotes to the paper should be the 2020 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/msnhtml/serials.pdf. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. Manuscripts should be electronically prepared in $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web.

Authors may retrieve an author package for *Transactions of the AMS* from www.ams.org/tran/tranauthorpac.html. The *AMS Author Handbook* is available in PDF

format from the author package link. The author package can also be obtained free of charge by sending email to tech-support@ams.org, or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA. When requesting an author package, please specify the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org, or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from www.ams.org/authors/journals.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

Any graphics created in color will be rendered in grayscale for the printed version unless color printing is authorized by the Managing Editor and the Publisher. In general, color graphics will appear in color in the online version.

AMS policy on making changes to articles after publication. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually published to the AMS website, changes cannot be made in place in the paper. The AMS does not keep author-related information such as affiliation, current address, and email address up to date after a paper is electronically published.

Corrections of critical errors may be made to the paper by submitting an errata article to the Editor. The errata article will be published electronically, will appear in a future print issue, and will link back and forth on the Web with the original article.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/. An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to tran-query@ams.org.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to tran-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA.

Editors

The AMS uses Centralized Manuscript Processing for initial submissions to AMS journals. Authors should follow instructions listed on the Initial Submission page found at www.ams.org/tran/transubmit.html.

MEMOIRS OF THE AMERICAN MATHEMATICAL SOCIETY

Memoirs is devoted to research in pure and applied mathematics of the same nature as *Transactions*. An issue consists of one or more separately bound research tracts for which the authors provide reproduction copy. Papers intended for *Memoirs* should normally be at least 80 pages in length. *Memoirs* has the same editorial committee as *Transactions*; authors may choose an Editor from the list above upon submission.
