Information for Subscribers

The journal is published quarterly in one volume per year, with issues numbered serially since Volume 1, Number 1. The subscription price is \$24.00. All back volumes are available. For Volumes 1–19 (1943–1965), prices are \$20.00 per volume; for Volumes 20–23 (1966–1969), \$24.00 per volume and Volumes 24–26 (1970–1972), \$30.00 per volume.

Unpublished Mathematical Tables

The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page.

Subscriptions, address changes, business communications and payments should be sent to:

Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and one copy of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "Information for Contributors to Mathematics of Computation" and "Manual for Authors," both of which are available upon request from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Eugene Isaacson, Chairman, Editorial Committee, Mathematics of Computation, New York University, Courant Institute of Mathematical Sciences, 251 Mercer Street, New York, New York 10012. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by AMS (MOS) subject classification numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the Index to *Mathematical Reviews*, Volume 39 (June 1970).

Microcard Edition

Volumes 1–14 (1943–1960) are available on Microcards at \$39.00 for the complete set and may be purchased from Microcard Editions, Inc., 901 26th Street, N. W., Washington, D.C. 20037.

U. S. POSTAL SERVICE STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION <small>(Act of August 12, 1970: Section 3685, Title 39, United States Code)</small>		SEE INSTRUCTIONS ON PAGE 2 (REVERSE)
1. TITLE OF PUBLICATION Mathematics of Computation		2. DATE OF FILING October 1, 1973
3. FREQUENCY OF ISSUE Quarterly		
4. LOCATION OF KNOWN OFFICE OF PUBLICATION <i>(Street, city, county, state, ZIP code) (Not printers)</i> 321 South Main Street, Providence, Rhode Island 02903		
5. LOCATION OF THE HEADQUARTERS OR GENERAL BUSINESS OFFICES OF THE PUBLISHERS <i>(Not printers)</i> Same as item 4		
6. NAMES AND ADDRESSES OF PUBLISHER, EDITOR, AND MANAGING EDITOR		
PUBLISHER <i>(Name and address)</i> American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940		
EDITOR <i>(Name and address)</i> Eugene Isaacson, New York University, 251 Mercer Street, New York, New York 10012		
MANAGER EDITOR <i>(Name and address)</i> Mrs. Christine Leftan, American Mathematical Society, P. O. Box 6248, Providence, R. I. 02940		
7. OWNER <i>(If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given.)</i>		
NAME	ADDRESS	
American Mathematical Society	P. O. Box 6248, Providence, Rhode Island 02940	
8. KNOWN BONDHOLDERS, MORTGAGEES, AND OTHER SECURITY HOLDERS OWNING OR HOLDING 1 PERCENT OR MORE OF TOTAL AMOUNT OF BONDS, MORTGAGES OR OTHER SECURITIES <i>(If there are none, so state)</i>		
NAME	ADDRESS	
None		
9. FOR OPTIONAL COMPLETION BY PUBLISHERS MAILING AT THE REGULAR RATES (Section 132.121, Postal Service Manual)		
39 U. S. C. 3626 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4359 of this title shall mail such matter at the rates provided under this subsection unless he files annually with the Postal Service a written request for permission to mail matter at such rates." In accordance with the provisions of this statute, I hereby request permission to mail the publication named in Item 1 at the reduced postage rates presently authorized by 39 U. S. C. 3626.		
(Signature and title of editor, publisher, business manager, or owner)		
 (Gordon L. Walker, Executive Director)		
10. FOR COMPLETION BY NONPROFIT ORGANIZATIONS AUTHORIZED TO MAIL AT SPECIAL RATES <i>(Section 132.122, Postal Manual)</i> <i>(Check one)</i>		
The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes <input checked="" type="checkbox"/> Have not changed during preceding 12 months <input type="checkbox"/> Have changed during preceding 12 months <i>(If changed, publisher must submit explanation of change with this statement.)</i>		
11. EXTENT AND NATURE OF CIRCULATION	AVERAGE NO. COPIES EACH ISSUE DURING PRECEDING 12 MONTHS	ACTUAL NUMBER OF COPIES OF SINGLE ISSUE PUBLISHED NEAREST TO FILING DATE
A. TOTAL NO. COPIES PRINTED <i>(Net Press Run)</i>	3,600	3,600
B. PAID CIRCULATION		
1. SALES THROUGH DEALERS AND CARRIERS, STREET VENDORS AND COUNTER SALES	-0-	-0-
2. MAIL SUBSCRIPTIONS	2,831	2,644
C. TOTAL PAID CIRCULATION	2,831	2,644
D. FREE DISTRIBUTION BY MAIL, CARRIER OR OTHER MEANS		
1. SAMPLES, COMPLIMENTARY, AND OTHER FREE COPIES	31	31
2. COPIES DISTRIBUTED TO NEWS AGENTS, BUT NOT SOLD	-0-	-0-
E. TOTAL DISTRIBUTION <i>(Sum of C and D)</i>	2,862	2,675
F. OFFICE USE, LEFT-OVER, UNACCOUNTED, SPOILED AFTER PRINTING	738	925
G. TOTAL <i>(Sum of E & F—should equal net press run shown in A)</i>	3,600	3,600
(Signature of editor, publisher, business manager, or owner)		
		
I certify that the statements made by me above are correct and complete.		

Two books for computer scientists. Can you afford to miss them?

THE STRUCTURE OF LANGUAGE — A NEW APPROACH

By Petr Beckmann

Natural languages, says the author (a professor of electrical engineering at the University of Colorado fluent in five languages), are structured like error-detecting codes. To prove his point, he has used a generative grammar based on this principle to write a program that will construct *trillions* of grammatical sentences from less than 100 unprocessed words. He has also worked out an information theory based on the *meaning* of a message rather than on its formal structure alone.

You can use the method for a hundred applications of linguistic processing and artificial intelligence. For example, make English a subroutine called by the main program, and get the output in English, not in pre-stored sentences, but in what the main program decides to construct.

Besides that, you can get enjoyable insight into the structure of Language. For example, what the "her" is doing in *She shrugged her shoulders*, and why it is absent from this sentence in German, French, Russian, and most other languages.

ORTHOGONAL POLYNOMIALS FOR ENGINEERS AND PHYSICISTS

By Petr Beckmann

Orthogonal polynomials are no longer the confusing labyrinth of systems that they used to be. The important properties of all classical systems can now be derived from their weighting functions alone — you can get the recurrent formulas, the Rodriguez relations, leading and second coefficients, norms, generating functions, integral representations and most other properties by substituting in general formulas, which are particularly well suited for digital computing. Look up both the method and the results in this book. Read the applications, not to 19th century antiques, but to numerical analysis, quantum mechanics, electromagnetics, systems theory, probability theory, and the other subjects where today's action is. Find, *for the first time*, how to construct the two-dimensional density of a random process given only its one-dimensional density (not necessarily normal) and its correlation function. Get a 50-page appendix with several hundred integrals over orthogonal polynomials and interrelations among them.

A new book series

Selected Tables in Mathematical Statistics Volume 1

Edited by the Institute of Mathematical Statistics

Each volume in this new series will contain several sets of extensive tables of interest to statisticians and users of statistical tables.

Volume 1 was first published in 1970 by the Markham Publishing Company. The AMS is now reprinting it with corrections. It contains five sets of tables, each with introductory material. Four of these sets were computed for the original edition, one was a reprint and extension of previously published material.

The contents:

Tables of the Cumulative Non-central Chi-square Distribution, by G. E. Haynam, Z. Govindarajulu, and F. C. Leone (43 pages)

Tables of the Exact Sampling Distribution of the Two-sample Kolmogorov-Smirnov Criterion $D_{m,n}(m, n)$, by P. J. Kim and R. I. Jennrich (50 pages)

Critical Values and Probability Levels for the Wilcoxon Rank Sum Test and the Wilcoxon Signed Rank Test, by Frank Wilcoxon, S. K. Katti, and Roberta A. Wilcox (66 pages)

The Null Distribution of the First Three Product-Moment Statistics for Exponential, Half-Gamma, and Normal Scores, by P. A. W. Lewis and A. S. Goodman (55 pages)

Tables to Facilitate the Use of Orthogonal Polynomials for Two Types of Error Structures, by Kirkland B. Stewart (49 pages)

The tentative plans are for Volume 2 to contain five new sets of tables. These will deal with

Probability Integral of the Doubly Noncentral t -distribution.
Doubly Noncentral F -distribution.

Expected Sample Size for Curtailed Fixed Sample Size Tests.

Distribution of Some Product-moment Statistics Under a Null Permutation Hypothesis.

Zonal Polynomials of Order 1-2.

Donald B. Owen is the chairman of the IMS Committee on Tables, James M. Davenport the managing editor, and H. Leon Harter the co-editor.

Publication of both volumes is expected in 1974. Standing orders for this series are being solicited.

The price for Volume One is \$8.60 list; \$6.45 for members.

American Mathematical Society P. O. Box 6248 Providence, R. I. 02904

REVIEW VOLUMES

Three sets of collected reviews are now being prepared for publication in the very near future: *Reviews of Papers on Infinite Groups* edited by Gilbert Baumslag, *Reviews of Papers on Finite Groups* edited by Daniel Gorenstein, and *Reviews of Papers in Number Theory* edited by William J. LeVeque. Professors Baumslag, Gorenstein, and LeVeque have compiled, edited, and classified the reviews on their particular topics which have been published in *Mathematical Reviews* since 1940. The purpose of these collections is to assist those who search the literature to find what has been done on a certain topic. In addition to subject classifications, the volumes contain an author index, listing not only the author but the title, journal or publisher, and year of publication. Of special interest are the forward citations which are given at the end of many reviews. These citations take note of any references made to the article at a later date.

Reviews of Papers on Infinite Groups, Compiled, edited, and classified by Gilbert Baumslag.

2 Volumes, 512 pages each, publication set for December 1973.

The reviews are classified under twenty-four major headings.

Books and Survey Articles;	Equations in groups and Various Embedding Theorems;
The Axioms for Groups and Some Algebraic Systems Related to Them;	Ordered, Partially Ordered, and Lattice Ordered Groups;
Groups given by Generators and Defining relations;	Group Rings and Group Algebras;
Algorithmic and other Problems Relating to Logic;	Morphisms and Mappings;
Decompositions of Groups and Group-Theoretical Constructions;	Homology and Cohomology of Groups;
Varieties of Groups;	Abelian Groups (further broken down under eight sub-headings);
Nilpotent Groups and Their Generalizations;	Some Unrelated Topics;
Commutator Calculus, Commutators and Related Topics;	Discrete Linear Groups;
Locally Finite and Periodic Groups;	The Classical Groups;
Classes of Groups;	Representation Theory of Discrete Groups;
Systems, Series, and Subgroup Lattices;	Groups of Knots, Braids, and Links;
Special Subgroups and Topics connected to Subgroups;	Groups connected to Geometry, Topology, and Analysis.

The index appears in the Second Volume.

Reviews of Papers on Finite Groups, Compiled, edited, and classified by Daniel Gorenstein.

1 volume of 736 pages, publication due in February 1974.

Books and Survey Articles;	Applications of Character Theory;
Ordinary Representations and Characters of Groups;	Symmetric Groups;
Modular Representations and Characters;	Permutation Groups;
Integral and p -adic Representations;	Groups of Lie Type and the Sporadic Groups;
Group Rings and Algebras;	Groups and Geometries;

REVIEW VOLUMES

Classification of Simple and Nonsolvable Groups; Some Unrelated Structural Problems; Nilpotent Groups; Solvable Groups; Characterizations of Solvable Groups;	π -Structure of Groups; Some Internal Properties of Groups; Automorphisms of Groups; Arithmetic and Combinatorial Problems; Cohomology of Groups; Miscellaneous Problems related to Rings.
---	---

Reviews of Papers in Number Theory, Compiled, edited and classified by William J. LeVeque.

6 volumes appearing during 1974.

Volume 1, 640 pages, February 1974:

Congruences, Arithmetical functions,
 Primes and factorization, Continued
 fractions, Other expansions;
 Sequences and sets;
 Polynomials and matrices.

Volume 2, 736 pages, April 1974:

Diophantine equations;
 Forms and linear algebraic groups;
 Discontinuous groups and automorphic forms;
 Diophantine geometry.

Volume 3, 424 pages, May 1974:

Geometry of numbers;
 Diophantine approximation;
 Distribution modulo 1,
 Metric theory of algorithms.

Volume 4, 672 pages, June 1974:

Exponential and Character sums;
 Zeta functions and L -functions,
 Analysis related to multiplicative and additive
 number theory;
 Multiplicative number theory;
 Additive number theory,
 Lattice point problems;
 Miscellaneous arithmetic—analytic questions.

Volume 5, 480 pages, June 1974:

Algebraic number theory—global fields;
 Algebraic number theory—local and p -adic fields;
 Finite fields and finite commutative rings;
 Connections with logic.

Volume 6, 424 pages, February 1974:

General;
 Subject index;
 Author index.

Orders are now being accepted for these three sets of review volumes. It should be noted that the two collections on group theory can be purchased as a set, and that the number theory volumes may be purchased individually, although it is suggested that those purchasing single volumes of the number theory set also purchase Volume 6 which contains the indexes.

AMERICAN MATHEMATICAL SOCIETY

Cumulative Index to Mathematics of Computation

The CUMULATIVE INDEX TO MATHEMATICS OF COMPUTATION is a compilation, by author and subject, of all material which has appeared in *Mathematics of Computation* and its predecessor, *Mathematical Tables and Other Aids to Computation*, during the years 1943 through 1969 (twenty-three published volumes). The INDEX contains over 7,000 entries.

This is an unusual publication since the character of the journal is unique, not only publishing research papers, but also reviews of material on mathematics of computation and a table errata section which covers a number of other publications. In addition an unpublished mathematical tables' file is maintained.

The new classification system developed in 1969 is used in the SUBJECT INDEX to classify all research papers, tables, reviews, table errata, queries and replies, and microfiche.

The AUTHOR INDEX gives bibliographical information on all of the items published in the journal.

462 pages; list price \$19.95; institutional member price \$14.96;
individual member price \$9.98;

ISBN 0-8218-4000-2; to order, please specify MCOMIN/1
