**SUBSCRIPTION INFORMATION:** MATHEMATICS OF COMPUTATION is published quarterly, with issues numbered serially since Volume 1, Number 1. Subscription prices for Volumes 42 and 43 (1984) are \$100.00 list; \$75.00 institutional member; \$50.00 member of CBMS organizations; \$40.00 individual AMS member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of \$5.00; subscribers in India must pay a postage surcharge of \$8.00. Combination paper and microfiche subscription prices are \$133.00 list; \$100.00 institutional member; \$67.00 member of CBMS organizations; \$53.00 individual AMS member. Microfiche of each issue will be mailed the fastest way before the issue is mailed by the printer.

**BACK NUMBER INFORMATION:** Back number prices *per volume* are for Volumes 1–21, \$80.00 list, \$60.00 member; for Volumes 22–33, \$120.00 list, \$90.00 member; for Volumes 34–41, \$80.00 list, \$60.00 member. Back volumes may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

**UNPUBLISHED MATHEMATICAL TABLES:** The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books*. Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page. All tables and correspondence concerning the UMT should be sent to Walter Gautschi, Chairman, Department of Computer Sciences, Purdue University, West Lafayette, IN 47907.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to the AMS, P.O. Box 1571, Annex Station, Providence, RI 02901. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940.

MATHEMATICS OF COMPUTATION is published quarterly by the American Mathematical Society, 201 Charles Street, Providence, RI 02904. Second-class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P.O. Box 6248, Providence, RI 02940.

### Information for Contributors

Manuscripts should be typewritten double-spaced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "A Manual for Authors of Mathematical Papers," which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, Indiana 47907. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Chairman of the Editorial Committee, and it is the responsibility of the author to submit manuscripts directly to this office. Institutions sponsoring research reported in the journal are assessed page and microfiche charges.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by 1980 *Mathematics Subject Classification* numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the 1978 Subject Index to *Mathematical Reviews*.

The research journals of the American Mathematical Society carry a page charge of \$50.00 per page to help defray the cost of publication. This amount is charged to the institution or to a contract supporting the research reported in the published paper. The publication charge policy of the United States Federal Council for Science and Technology (FCST) is reported on page 112 of the February, 1975 issue of the NOTICES of the American Mathematical Society. In no case is the author personally responsible for paying the page charge, nor is acceptance of the author's paper for publication dependent upon payment of the page charge.

### Copying and Reprinting

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Executive Director, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law, provided that the fee of \$1.00 plus \$.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

# **the Mathematical Reviews**

## **Family of Publications**

### **Keys to the Mathematical Literature of the World**

---

#### **Current Mathematical Publications**

- Complete biweekly listings by subject area of all items selected for review by Mathematical Reviews
- Page proofs of the tables of contents of major journals
- In your hands within twelve weeks of receipt at Mathematical Reviews, frequently before the journal issues covered are on your library shelves
- Includes biweekly and semi-annual author indexes
- At a price affordable by individuals as well as department offices, common rooms, etc.

#### **Mathematical Reviews**

- Evaluative reviews of all published research in core mathematics, about 23,000 reviews annually
- Reviews of authors' summaries of over 17,000 items per year in applied mathematics
- Monthly, Midyear, and Annual Author Indexes
- Annual Subject Index

#### **Mathematical Reviews Sections**

- Sets of related sections from each issue of Mathematical Reviews, priced for individual subscribers

#### **Subject Reviews Volumes**

Reviews in Topology, 1940—67, ed. N. E. Steenrod  
Reviews in Number Theory, 1940—72, ed. W. J. LeVeque  
Reviews in Number Theory, 1973—83 (in process), ed. R. K. Guy  
Reviews on Infinite Groups, 1940—70, ed. G. Baumslag  
Reviews on Finite Groups, 1940—70, ed. D. Gorenstein  
Reviews in Graph Theory, 1940—78, ed. W. G. Brown  
Reviews in Ring Theory, 1960—79, ed. L. W. Small

#### **Cumulative Indexes of Mathematical Reviews**

1940—59, 1960—64, and 1965—72 Cumulative Author Indexes  
1973—79 Cumulative Author and Subject Indexes  
1940—58 Cumulative Subject Index (in process)  
1959—72 Cumulative Subject Index (in process)

#### **MATHFILE**

- Online computer file of bibliographic information in Mathematical Reviews from 1973 to the present
- Soon to be extended back to 1959
- Contains reviews beginning with mid-1979

---

**For details, see the individual listings in the AMS Catalogue of Publications**

**Write to the American Mathematical Society, P.O. Box 6248, Providence, R.I. 02940, or**  
**Call (800) 556-7774 for information or to order using VISA/MasterCard.**

## RECENT AMERICAN MATHEMATICAL SOCIETY PUBLICATION

### CONFERENCE PROCEEDINGS OF THE CANADIAN MATHEMATICAL SOCIETY

#### Second Edmonton Conference on Approximation Theory

Zeev Ditzian, Amram Meir,  
Sherman D. Riemenschneider,  
and Ambikeshwar Sharma, Editors

The Second Edmonton Conference on Approximation Theory was held in Edmonton, Alberta, June 7–11, 1982. The Conference was devoted to Approximation Theory and related topics, including spline approximation, computational problems, complex and rational approximation, and techniques from harmonic analysis and the theory of interpolation of operators. In conformity with the requirements of this series, this volume consists of refereed papers by some of the invited speakers.

Sponsored by the Canadian Mathematical Society, the Conference was supported by grants from the Natural Sciences and Engineering Research Council of Canada and the University of Alberta.

#### Contents

- Dan Amir and Jaroslav Mach, *Best  $n$ -nets in normed spaces*
- R. Bojanic and F. H. Cheng, *Estimates for the rate of approximation of functions of bounded variation by Hermite-Fejér polynomials*
- P. L. Butzer and R. L. Stens, *The Poisson summation Formula, Whittaker's cardinal series and approximate integration*
- A. S. Cavaretta, Jr., T. N. T. Goodman, C. A. Micchelli and A. Sharma, *Multivariate interpolation and the Radon transform part III: Lagrange representation*
- C. K. Chui, L. L. Schumaker and R. H. Wang, *On spaces of piecewise polynomials with boundary conditions II: Type-1 triangulations*
- C. K. Chui, L. L. Schumaker and R. H. Wang, *On spaces of piecewise polynomials with boundary conditions III: Type-2 triangulations*
- Z. Ciesielski, *Spline bases in spaces of analytic functions*
- Christian Coatmelec, *Prolongement explicite des éléments de  $L^p(\Omega)$  et majoration du module de régularité du prolongement-applications à la convergence des suites d'opérateurs linéaires positifs*
- Frank Deutsch, *When does the metric projection admit a linear selection?*
- Ronald A. Devore, *Maximal functions and their application to rational approximation*
- John J. F. Fournier, *Some remarks on the recent proofs of the Littlewood conjecture*
- W. H. J. Fuchs and A. A. Gončar, *Approximation of entire functions on unbounded continua*
- T. N. E. Greville, I. J. Schoenberg and A. Sharma, *The behavior of the exponential Euler spline  $S_n(x; t)$  as  $n \rightarrow \infty$  for negative values of the base  $t$*
- J. Korevaar, *Müntz-type theorems for arcs and for  $\mathbb{R}^n$*
- M. A. Lachance and E. B. Saff, *Bounds for algebraic polynomials with zeros in an interval*
- D. Leviatan, *The degree of comonotone approximation of differentiable functions*
- G. G. Lorentz, *Some problems in Birkhoff interpolation*
- M. J. Marsden and S. D. Riemenschneider, *Asymptotic formulae for variation-diminishing splines*
- Paul Nevai, *Orthogonal polynomials associated with  $\exp(-x^4)$*
- Jaak Peetre, *Hankel operators, rational approximation and allied questions of analysis*
- Q. I. Rahman and St. Ruscheweyh, *On the zeros of rational functions arising from certain determinants*
- Robert C. Sharpley, *Cone conditions and the modulus of continuity*
- P. C. Sikkema, *Approximation with convolution operators*
- P. W. Smith and J. D. Ward, *Compression and factorization of diagonally dominant matrices*
- Hans Wallin, *Markov's inequality on subsets of  $\mathbb{R}^n$*

1980 Mathematics Subject Classifications: 41-06; 41A10, 41A15, 41A20, 42A10

Conference Proceedings of the  
Canadian Mathematical Society  
Volume 3, xii + 400 pages (soft cover)  
List price \$29, institutional member \$22,  
individual member \$15  
ISBN 0-8218-6004-6; LC 83-12271  
Publication date: September 1983  
To order, please specify CMSAMS/3

Prepayment is required for all AMS publications. Order from AMS, P.O. Box 1571, Annex Station, Providence, RI 02901, or call toll free 800-556-7774 to charge with Visa or MasterCard.

## AMERICAN MATHEMATICAL SOCIETY

### PROCEEDINGS OF SYMPOSIA IN PURE MATHEMATICS

#### The Mathematical Heritage of Henri Poincaré

Felix E. Browder, Editor

On April 7-10, 1980, the American Mathematical Society sponsored a Symposium on the Mathematical Heritage of Henri Poincaré, held at Indiana University, Bloomington, Indiana. This volume presents the written versions of all but three of the invited talks presented at this Symposium (those by W. Browder, A. Jaffe, and J. Mather were not written up for publication). In addition, it contains two papers by invited speakers who were not able to attend, S. S. Chern and L. Nirenberg.

If one traces the influence of Poincaré through the major mathematical figures of the early and mid-twentieth century, it is through American mathematicians as well as French that this influence flows, through G. D. Birkhoff, Solomon Lefschetz, and Marston Morse. This continuing tradition represents one of the major strands of American as well as world mathematics, and it is as a testimony to this tradition as an opening to the future creativity of mathematics that this volume is dedicated.

#### Contents: PART 1

##### Section 1. Geometry

Shiing-Shen Chern, *Web geometry*

Jun-ichi Igusa, *Problems on abelian functions at the time of Poincaré and some at present*

John Milnor, *Hyperbolic geometry: the first 150 years*

Ngaiming Mok and Shing-Tung Yau, *Completeness of the Kähler-Einstein metric on bounded domains and the characterization of domains of holomorphy by curvature conditions*

Alan Weinstein, *Symplectic geometry*

##### Section 2. Topology

J. Frank Adams, *Graeme Segal's Burnside ring conjecture*

William P. Thurston, *Three dimensional manifolds, Kleinian groups and hyperbolic geometry*

##### Section 3. Riemann surfaces, discontinuous groups and Lie groups

Lipman Bers, *Finite dimensional Teichmüller spaces and generalizations*

Wilfried Schmid, *Poincaré and Lie groups*

Dennis Sullivan, *Discrete conformal groups and measurable dynamics*

##### Section 4. Several complex variables

Michael Beals, Charles Fefferman and Robert Grossman, *Strictly pseudoconvex domains in  $C^n$*

Phillip A. Griffiths, *Poincaré and algebraic geometry*  
Roger Penrose, *Physical space-time and nonrealizable CR-structures*

R. O. Wells, Jr., *The Cauchy-Riemann equations and differential geometry*

#### PART 2

##### Section 5. Topological methods in nonlinear problems

Raoul Bott, *Lectures on Morse theory, old and new*  
Haim Brezis, *Periodic solutions of nonlinear vibrating strings and duality principles*

Felix E. Browder, *Fixed point theory and nonlinear problems*

L. Nirenberg, *Variational and topological methods in nonlinear problems*

##### Section 6. Mechanics and dynamical systems

Jean Leray, *The meaning of Maslov's asymptotic method: the need of Planck's constant in mathematics*

David Ruelle, *Differentiable dynamical systems and the problem of turbulence*

Steve Smale, *The fundamental theorem of algebra and complexity theory*

##### Section 7. Ergodic theory and recurrence

Harry Furstenberg, *Poincaré recurrence and number theory*

H. Furstenberg, Y. Katznelson and D. Ornstein, *The ergodic theoretical proof of Szemerédi's theorem*

##### Section 8. Historical material

P. S. Aleksandrov, *Poincaré and topology*

Henri Poincaré, *Résumé analytique*

Jacques Hadamard, *L'oeuvre mathématique de Poincaré*

1980 Mathematics Subject Classifications: 01, 14, 22, 30, 32 & others

Proceedings of Symposia in Pure Mathematics

Volume 39: Parts 1 and 2 (hard cover)

x + 439 pages (Part 1); vi + 470 pages (Part 2)

# Mathematical Reviews Sections

ENJOY THE CONVENIENCE OF HAVING MATHEMATICAL REVIEWS AT YOUR DESK. HAVE YOU THOUGHT HOW REALLY HANDY IT WOULD BE TO HAVE THE SECTIONS RELEVANT TO YOUR RESEARCH RIGHT BEFORE YOU?

MR has been divided into 37 affordable Sets for individual subscribers. Each month you can receive the Section Sets you have chosen with an author index. With your December Sets you will receive an annual author and subject index (as with MR). Also available for Section subscribers are three-ring binders of sturdy quality in the familiar tangerine color of MR to hold your subscription. The binders have a two-inch spine and are adequate to hold 400 pages.

Section Sets are divided into Class 1 and Class 2 according to the estimated number of pages per year.

Set	Sections	Subjects	<input type="checkbox"/> 2I	42, 43, 44, 45	Harmonic analysis, integral transforms/equations (Class 2)
<input type="checkbox"/> 1A	00, 01	General, history, biography (Class 1)	<input type="checkbox"/> 1J	46	Functional analysis (Class 1)
<input type="checkbox"/> 1B	03, 04	Logic, foundations, set theory (Class 1)	<input type="checkbox"/> 1K	47	Operator theory (Class 1)
<input type="checkbox"/> 1C	05	Combinatorics (Class 1)	<input type="checkbox"/> 2J	49	Calculus of variations, optimization (Class 2)
<input type="checkbox"/> 2A	06, 08	Order, lattices, general systems (Class 2)	<input type="checkbox"/> 2K	51, 52	Geometry, convex sets (Class 2)
<input type="checkbox"/> 1D	10	Number theory (Class 1)	<input type="checkbox"/> 1L	53	Differential geometry (Class 1)
<input type="checkbox"/> 2B	12	Algebraic number theory, field theory, polynomials (Class 2)	<input type="checkbox"/> 2L	54	General topology (Class 2)
<input type="checkbox"/> 2C	13, 14	Commutative rings and algebras, algebraic geometry (Class 2)		55, 57	See 1E (18, 55, 57)
<input type="checkbox"/> 2D	15	Linear and multilinear algebra, matrix theory (Class 2)	<input type="checkbox"/> 1M	58	Global analysis, analysis on manifolds (Class 1)
<input type="checkbox"/> 2E	16, 17	Associative/nonassociative rings, algebras (Class 2)	<input type="checkbox"/> 1N	60	Probability theory and stochastic processes (Class 1)
<input type="checkbox"/> 1E	18, 55, 57	Category theory, algebraic topology, manifolds (Class 1)	<input type="checkbox"/> 1P	62	Statistics (Class 1)
<input type="checkbox"/> 1F	20	Group theory, generalizations (Class 1)	<input type="checkbox"/> 1Q	65	Numerical analysis (Class 1)
<input type="checkbox"/> 2F	22	Topological groups, Lie groups (Class 2)	<input type="checkbox"/> 1R	68	Computer science (including automata) (Class 1)
