SUBSCRIPTION INFORMATION: MATHEMATICS OF COMPUTATION is published quarterly, with issues numbered serially since Volume 1, Number 1. Subscription prices for Volumes 50 and 51 (1988) are $181.00 list; $145.00 institutional member; $118.00 member of CBMS organizations; $109.00 individual AMS member. A late charge of 10% of the subscription price will be imposed upon orders received from nonmember institutions and organizations after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $8.00; subscribers in India must pay a postage surcharge of $18.00. Combination paper and microfiche subscription prices are $241.00 list; $193.00 institutional member. Microfiche of each issue will be mailed the fastest way before the issue is mailed by the printer.

BACK NUMBER INFORMATION: Back number prices *per volume* are for Volumes 1–21, $82.00 list, $66.00 member; for Volumes 22–33, $124.00 list, $99.00 institutional member; for Volumes 34–43, $82.00 list, $64.00 institutional member; Volumes 44–45, $113.00 list, $90.00 institutional member; Volumes 46–47, $127.00 list, $102.00 institutional member; Volumes 48–49, $135.00 list, $108.00 institutional member. Back volumes may be purchased on microfilm or microfiche from University Microfilms International, 300 North Zeeb Road, Ann Arbor, MI 48106.

UNPUBLISHED MATHEMATICAL TABLES: The editorial office of the journal maintains a repository of Unpublished Mathematical Tables (UMT). When a table is deposited in the UMT repository a brief summary of its contents is published in the section *Reviews and Descriptions of Tables and Books.* Upon request, the chairman of the editorial committee will supply copies of any table for a nominal cost per page. All tables and correspondence concerning the UMT should be sent to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, IN 47907.

Orders for subscriptions and publications of the American Mathematical Society should be addressed to the AMS, P.O. Box 1571, Annex Station, Providence, RI 02901-9930. *All orders must be accompanied by payment.* Other correspondence should be addressed to P.O. Box 6248, Providence, RI 02940.

MATHEMATICS OF COMPUTATION is published quarterly by the American Mathematical Society, 201 Charles Street, Providence, RI 02940. Second-class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, P.O. Box 6248, Providence, RI 02940.

Information for Contributors

Authors are encouraged to prepare articles electronically with the $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX software package in the AMS pre-print style and to provide the article in this electronic form for typesetting. While this procedure may not reduce the interval between submission and publication of an article, generally much more accurate copy will be returned for proofreading. Production time for manuscripts prepared with other systems, even TEX itself without $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX, currently prevents cost-effective use of the existing electronic form. Before sending an $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX manuscript for typesetting, contact the AMS Composition department for details.

Manuscripts prepared by some means other than $\mathcal{A}\mathcal{M}\mathcal{S}$-TEX should be doubled-spaced and produced in the format used by the journal. For journal abbreviations, see the latest *Mathematical Reviews* volume index. An author should submit the original and two copies of the manuscript and retain one copy. The author may suggest an appropriate editor for his paper. It is recommended that the author acquaint himself with the pertinent material contained in "A Manual for Authors of Mathematical Papers," which is available from the American Mathematical Society. All contributions intended for publication and all books for review should be addressed to Walter Gautschi, Chairman, Editorial Committee, Mathematics of Computation, Department of Computer Sciences, Purdue University, West Lafayette, Indiana 47907. The date received, which is published with the final version of an accepted paper, is the date received in the office of the Chairman of the Editorial Committee, and it is the responsibility of the author to submit manuscripts directly to this office.

Each article submitted for publication must be accompanied by a brief and reasonably self-contained abstract, and by 1980 *Mathematics Subject Classification* (1985 *Revision*) numbers. If a list of key words and phrases is included, it will be printed as a footnote on the first page. A list of the classification numbers may be found in the 1984 Subject Index to Mathematical Reviews. Authors are also encouraged to supply electronic addresses when available. These will be printed after the postal address at the end of each article.

Copying and Reprinting

Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews provided the customary acknowledgement of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addessed to the Executive Director, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02940.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to Copyright Clearance Center, Inc., 21 Congress Street, Salem, Massachusetts 01970. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotion purposes, for creating new collective works, or for resale.

DANIEL SHANKS, DEDICATION
Special Issue
Mathematics of Computation

This special issue of *Mathematics of Computation* (Volume 48, Number 177, January 1987) is dedicated to Daniel Shanks on the occasion of his 70th birthday. Since 1959, when Shanks joined the Editorial Committee for this journal, he has been a guiding force in shaping the computational number theory component of the journal, and has had an immense influence in the field. This volume contains papers by some of the top researchers in the field and covers such topics as elliptic curves, primality testing, congruences, class groups, and cyclotomic fields. Although a numbered issue of the *Mathematics of Computation* journal, it will serve as a stand alone reference work for computational number theory.

Contents

William W. Adams, *Characterizing Pseudoprimes for third-order linear recurrences*
Leonard M. Adelman, Dennis R. Estes, and Kevin S. McCurley, *Solving bivariate quadratic congruences in random polynomial time*

The Joy of TEX

A Gourmet Guide to Typesetting with the AMS-TEX macro package

M. D. SPIVAK

The Joy of TEX is the user-friendly user's guide for AMS-TEX, an extension of TEX, Donald Knuth's revolutionary program for typesetting technical material. AMS-TEX was designed to simplify the input of mathematical material in particular, and to format the output according to any of various preset style specifications.

There are two primary features of the TEX system: it is a computer system for typesetting technical text, especially text containing a great deal of mathematics; and it is a system for producing beautiful text, comparable to the work of the finest printers.

Most importantly, TEX's capabilities are not available only to TEXperts. While mathematicians and experienced technical typists will find that TEX allows them to specify mathematical formulas with great accuracy and still have control over the finished product, even novice technical typists will find the manual easy to use in helping them produce beautiful technical TEXt.

This book is designed as a user's guide to the AMS-TEX macro package and details many features of this extremely useful text processing package. Parts 1 and 2, entitled "Starters" and "Main Courses," teach the reader how to typeset most normally encountered text and mathematics. "Sauces and Pickles," the third section, treats more exotic problems and includes a 60-page dictionary of special TEXniques.

Exercises sprinkled generously through each chapter encourage the reader to sit down at a terminal and learn through experimentation. Appendixes list summaries of frequently used and more esoteric symbols as well as answers to the exercises.

Cumulative Index to Mathematics of Computation 1970-84

NOW AVAILABLE–

Author and Subject Indexes in One Volume

This index is a sequel to the Cumulative Index to Mathematics of Computation 1943-1969. It is a compilation by author and subject of all material appearing in Mathematics of Computation during the years 1970-1984 (volumes 24-43).

The author index gives full bibliographic information on all of the items, including classification numbers. The Mathematical Reviews number and reviewer name have also been provided when available. The subject index is changed from the 1943-1969 subject index and now includes title, language, and MR number (when available) as well as author name. The codes found in the previous index are retained.
