Mathematics of Computation

This journal is devoted to research articles of the highest quality in computational mathematics. Areas covered include numerical analysis, computational discrete mathematics, including number theory, algebra and combinatorics, and related fields such as stochastic numerical methods. Articles must be of significant computational interest and contain original and substantial mathematical analysis or development of computational methodology.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Mathematics of Computation* is published bimonthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 88 (2019) are as follows: for paper delivery, US\$812.00 list, US\$649.60 institutional member, US\$730.80 corporate member, US\$487.20 individual member; for electronic delivery, US\$715.00 list, US\$572.00 institutional member, US\$643.50 corporate member, US\$429.00 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$6 for delivery within the United States; US\$36 for delivery outside the United States. Subscription renewals are subject to late fees. See www.ams.org/help-faq for more journal subscription information.

Back number information. For back issues see the www.ams.org/backvols.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2213 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Requests for permission to reuse portions of AMS publication content are handled by the Copyright Clearance Center. For more information, please visit www.ams.org/publications/pubpermissions.

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

Mathematics of Computation (ISSN 0025-5718 (print); ISSN 1088-6842 (online)) is published bimonthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA.

MATHEMATICS OF COMPUTATION
CONTENTS

Vol. 88, No. 320

November 2019

M. Bonazzoli, V. Dolean, I. G. Graham, E. A. Spence, and P.-H. Tournier, Domain decomposition preconditioning for the high-frequency time-harmonic Maxwell equations with absorption	2559
Charles M. Elliott, Hans Fritz, and Graham Hobbs, Second order splitting for a class of fourth order equations	2605
Klaus Deckelnick, Charles M. Elliott, Tatsu-Hiko Miura, and Vanessa Styles, Hamilton–Jacobi equations on an evolving surface	2635
Xiang Wang, Weizhang Huang, and Yonghai Li, Conditioning of the finite volume element method for diffusion problems with general simplicial meshes	2665
Philippe Chartier, Nicolas Crouseilles, Mohammed Lemou, Florian Méhats, and Xiaofei Zhao, Uniformly accurate methods for Vlasov equations with non-homogeneous strong magnetic field	2697
Ming Zhou and Klaus Neymeyr, Cluster robust estimates for block gradient-type eigensolvers	2737
Tony Shardlow, A Walk Outside Spheres for the fractional Laplacian: Fields and first eigenvalue	2767
Raphael Kruse and Yue Wu, A randomized and fully discrete Galerkin finite element method for semilinear stochastic evolution equations ...	2793
Michaël Sdika, Diffeomorphic B-spline vector fields with a tractable set of inequalities	2827
Wenjie Liu, Li-Lian Wang, and Huiyuan Li, Optimal error estimates for Chebyshev approximations of functions with limited regularity in fractional Sobolev-type spaces	2857
Peter Mathé, Bayesian inverse problems with non-commuting operators .	2897
Nadir Murru and Lea Terracini, On p -adic multidimensional continued fractions	2913
Peter Shiu, Corrigendum to “Counting sums of two squares: the Meissel-Lehmer method”	2935
Francesc Bars and Josep González Rovira, Bielliptic modular curves $X_0^*(N)$ with square-free levels	2939
Omar León Sánchez, Estimates for the coefficients of differential dimension polynomials	2959
Emre Can Sertöz, Computing periods of hypersurfaces	2987
Thomas Breuer, Gerhard Hiss, Frank Lübeck, and Klaus Lux, The completion of the 3-modular character table of the Chevalley group $F_4(2)$ and its covering group	3023
Gary R. W. Greaves and Pavlo Yatsyna, On equiangular lines in 17 dimensions and the characteristic polynomial of a Seidel matrix	3041
Jonathan Bayless, Paul Kinlaw, and Dominic Klyve, Sums over primitive sets with a fixed number of prime factors	3063

INDEX TO VOLUME 88 (2019)

- Anema, A. S. I. *Elliptic curves maximal over extensions of finite base fields*, 453
- Aurentz, Jared, Thomas Mach, Leonardo Robol, Raf Vandebril, and David S. Watkins. *Fast and backward stable computation of eigenvalues and eigenvectors of matrix polynomials*, 313
- Azimzadeh, Parsiad. *A fast and stable test to check if a weakly diagonally dominant matrix is a nonsingular M -matrix*, 783
- Badr, Eslam, Francesc Bars, and Elisa Lorenzo García. *On twists of smooth plane curves*, 421
- Bailey, Geoff, Stephen D. Cohen, Nicole Sutherland, and Tim Trudgian. *Existence results for primitive elements in cubic and quartic extensions of a finite field*, 931
- Bars, Francesc. *See* Badr, Eslam
- Bars, Francesc, and Josep González Rovira. *Bielliptic modular curves $X_0^*(N)$ with square-free levels*, 2939
- Barsukow, Wasilij. *Stationarity preserving schemes for multi-dimensional linear systems*, 1621
- Bayless, Jonathan, Paul Kinlaw, and Dominic Klyve. *Sums over primitive sets with a fixed number of prime factors*, 3063
- Bean, Christian, Bjarki Gudmundsson, and Henning Ulfarsson. *Automatic discovery of structural rules of permutation classes*, 1967
- Beckmann, Matthias, and Armin Iske. *Error estimates and convergence rates for filtered back projection*, 801
- Bennett, Michael A., Adela Gherga, and Andrew Rechnitzer. *Computing elliptic curves over \mathbb{Q}* , 1341
- Berrone, Stefano, Andrea Bonito, Rob Stevenson, and Marco Verani. *An optimal adaptive Fictitious Domain Method*, 2101
- Blagouchine, Iaroslav V. *See* Johansson, Fredrik
- Bochev, Pavel. *See* Cheung, James
- Bonazzoli, M., V. Dolean, I. G. Graham, E. A. Spence, and P.-H. Tournier. *Domain decomposition preconditioning for the high-frequency time-harmonic Maxwell equations with absorption*, 2559
- Bonito, Andrea. *See* Berrone, Stefano
- Booker, Andrew R., Stephen D. Cohen, Nicole Sutherland, and Tim Trudgian. *Primitive values of quadratic polynomials in a finite field*, 1903
- Breuer, Thomas, Gerhard Hiss, Frank Lübeck, and Klaus Lux. *The completion of the 3-modular character table of the Chevalley group $F_4(2)$ and its covering group*, 3023
- Briuelle, Ludovic, Luca De Feo, Javad Doliskani, Jean-Pierre Flori, and Éric Schost. *Computing isomorphisms and embeddings of finite fields*, 1391
- Bujanda, Blanca, José L. López, and Pedro J. Pagola. *Convergent expansions of the confluent hypergeometric functions in terms of elementary functions*, 1773
- Calo, Victor, Matteo Cicuttin, Quanling Deng, and Alexandre Ern. *Spectral approximation of elliptic operators by the Hybrid High-Order method*, 1559
- Capuano, Laura, Francesco Veneziano, and Umberto Zannier. *An effective criterion for periodicity of ℓ -adic continued fractions*, 1851
- Chan, Andrew J., and Diane Maclagan. *Gröbner bases over fields with valuations*, 467
- Chartier, Philippe, Nicolas Crouseilles, Mohammed Lemou, Florian Méhats, and Xiaofei Zhao. *Uniformly accurate methods for Vlasov equations with non-homogeneous strong magnetic field*, 2697
- Chen, Jingwei. *See* Feng, Yong
- Chen, Zheng, and Cory D. Hauck. *Multiscale convergence properties for spectral approximations of a model kinetic equation*, 2257
- Cheung, James, Mauro Perego, Pavel Bochev, and Max Gunzburger. *Optimally accurate higher-order finite element methods for polytopial approximations of domains with smooth boundaries*, 2187
- Chu, Eric King-Wah. *See* Guo, Zhen-Chen
- Chua, Lynn, Mario Kummer, and Bernd Sturmfels. *Schottky algorithms: Classical meets tropical*, 2541
- Cicuttin, Matteo. *See* Calo, Victor
- Cléry, Fabien, Carel Faber, and Gerard van der Geer. *Covariants of binary sextics and modular forms of degree 2 with character*, 2423
- Cohen, Stephen D. *See* Bailey, Geoff
- _____. *See* Booker, Andrew R.

- Costa, Edgar, Nicolas Mascot, Jeroen Sijsling, and John Voight. *Rigorous computation of the endomorphism ring of a Jacobian*, 1303
- Covanov, Svyatoslav, and Emmanuel Thomé. *Fast integer multiplication using generalized Fermat primes*, 1449
- Crouseilles, Nicolas. *See* Chartier, Philippe
- Daalhuis, Adri B. Olde. *See* Nemes, Gergő
- De Feo, Luca. *See* Brieulle, Ludovic
- De Silva, Dilum, Michael J. Mossinghoff, Vincent Pigno, and Christopher Pinner. *The Lind-Lehmer constant for certain p -groups*, 949
- Deckelnick, Klaus, Charles M. Elliott, Tatsu-Hiko Miura, and Vanessa Styles. *Hamilton–Jacobi equations on an evolving surface*, 2635
- Deng, Quanling. *See* Calo, Victor
- Derickx, Maarten, and Filip Najman. *Torsion of elliptic curves over cyclic cubic fields*, 2443
- van Diejen, J. F., and E. Emsiz. *Exact cubature rules for symmetric functions*, 1229
- Dokchitser, Tim, and Christopher Doris. *3-torsion and conductor of genus 2 curves*, 1913
- Dolean, V. *See* Bonazzoli, M.
- Doliskani, Javad. *See* Brieulle, Ludovic
- Dopico, Froilán M., Javier Pérez, and Paul Van Dooren. *Structured backward error analysis of linearized structured polynomial eigenvalue problems*, 1189
- Doris, Christopher. *See* Dokchitser, Tim
- Du, Qiang, Lili Ju, and Jianfang Lu. *A discontinuous Galerkin method for one-dimensional time-dependent nonlocal diffusion problems*, 123
- Elliott, Charles M. *See* Deckelnick, Klaus
- Elliott, Charles M., Hans Fritz, and Graham Hobbs. *Second order splitting for a class of fourth order equations*, 2605
- Emsiz, E. *See* van Diejen, J. F.
- Ern, Alexandre. *See* Calo, Victor

Mathematics of Computation

This journal is devoted to research articles of the highest quality in computational mathematics. Areas covered include numerical analysis, computational discrete mathematics, including number theory, algebra and combinatorics, and related fields such as stochastic numerical methods. Articles must be of significant computational interest and contain original and substantial mathematical analysis or development of computational methodology.

Submission information. See **Information for Authors** at the end of this issue.

Publication on the AMS website. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue.

Subscription information. *Mathematics of Computation* is published bimonthly and is also accessible electronically from www.ams.org/journals/. Subscription prices for Volume 88 (2019) are as follows: for paper delivery, US\$812.00 list, US\$649.60 institutional member, US\$730.80 corporate member, US\$487.20 individual member; for electronic delivery, US\$715.00 list, US\$572.00 institutional member, US\$643.50 corporate member, US\$429.00 individual member. Upon request, subscribers to paper delivery of this journal are also entitled to receive electronic delivery. If ordering the paper version, add US\$6 for delivery within the United States; US\$36 for delivery outside the United States. Subscription renewals are subject to late fees. See www.ams.org/help-faq for more journal subscription information.

Back number information. For back issues see the www.ams.org/backvols.

Subscriptions and orders should be addressed to the American Mathematical Society, P.O. Box 845904, Boston, MA 02284-5904 USA. *All orders must be accompanied by payment.* Other correspondence should be addressed to 201 Charles Street, Providence, RI 02904-2213 USA.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication is permitted only under license from the American Mathematical Society. Requests for permission to reuse portions of AMS publication content are handled by the Copyright Clearance Center. For more information, please visit www.ams.org/publications/pubpermissions.

Excluded from these provisions is material for which the author holds copyright. In such cases, requests for permission to reuse or reprint material should be addressed directly to the author(s). Copyright ownership is indicated in the notice in the lower right-hand corner of the first page of each article.

Mathematics of Computation (ISSN 0025-5718 (print); ISSN 1088-6842 (online)) is published bimonthly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213 USA. Periodicals postage is paid at Providence, Rhode Island. Postmaster: Send address changes to Mathematics of Computation, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA.

MATHEMATICS OF COMPUTATION

CONTENTS

Vol. 88, No. 315

January 2019

Buyang Li, Analyticity, maximal regularity and maximum-norm stability of semi-discrete finite element solutions of parabolic equations in nonconvex polyhedra	1
Felipe Lepe, Salim Meddahi, David Mora, and Rodolfo Rodríguez, Acoustic vibration problem for dissipative fluids	45
Dietmar Gallistl, Rayleigh–Ritz approximation of the inf-sup constant for the divergence	73
Haijin Wang, Yunxian Liu, Qiang Zhang, and Chi-Wang Shu, Local discontinuous Galerkin methods with implicit-explicit time-marching for time-dependent incompressible fluid flow	91
Qiang Du, Lili Ju, and Jianfang Lu, A discontinuous Galerkin method for one-dimensional time-dependent nonlocal diffusion problems	123
L. Beirão da Veiga, D. Mora, and G. Rivera, Virtual elements for a shear-deflection formulation of Reissner–Mindlin plates	149
Martin W. Licht, Smoothed projections over weakly Lipschitz domains ..	179
Junping Wang, Qilong Zhai, Ran Zhang, and Shangyou Zhang, A weak Galerkin finite element scheme for the Cahn–Hilliard equation ..	211
Yanqiu Wang, A nonconforming Crouzeix–Raviart type finite element on polygonal meshes	237
Pierre Lissy and Ionel Roventă, Optimal filtration for the approximation of boundary controls for the one-dimensional wave equation using a finite-difference method	273
Igor Moret and Paolo Novati, Krylov subspace methods for functions of fractional differential operators	293
Jared Aurentz, Thomas Mach, Leonardo Robol, Raf Vandebril, and David S. Watkins, Fast and backward stable computation of eigenvalues and eigenvectors of matrix polynomials	313
Marko Lange and Siegfried M. Rump, Sharp estimates for perturbation errors in summations	349
A. Hajdu, L. Hajdu, and R. Tijdeman, Finding well approximating lattices for a finite set of points	369
Kevin J. McGown, Jonathan W. Sands, and Daniel Vallières, Numerical evidence for higher order Stark-type conjectures	389
Eslam Badr, Francesc Bars, and Elisa Lorenzo García, On twists of smooth plane curves	421
Jan Tuitman, Computing zeta functions of generic projective hypersurfaces in larger characteristic	439
A. S. I. Anema, Elliptic curves maximal over extensions of finite base fields	453
Andrew J. Chan and Diane Maclagan, Gröbner bases over fields with valuations	467
Jens Forsgård, Laura Felicia Matusevich, Nathan Mehlhop, and Timo de Wolff, Lopsided approximation of amoebas	485
David Harvey and Joris van der Hoeven, Faster integer multiplication using plain vanilla FFT primes	501

Johnny Guzmán and L. Ridgway Scott , The Scott-Vogelius finite elements revisited	515
Shuonan Wu and Jinchao Xu , Nonconforming finite element spaces for $2m$th order partial differential equations on \mathbb{R}^n simplicial grids when $m = n + 1$	531
Kaibo Hu and Jinchao Xu , Structure-preserving finite element methods for stationary MHD models	553
Andrew Gillette and Tyler Kloefkorn , Trimmed serendipity finite element differential forms	583
Martin W. Licht , Smoothed projections and mixed boundary conditions .	607
R. H. Nochetto, D. Ntoggas, and W. Zhang , Two-scale method for the Monge-Ampère equation: Convergence to the viscosity solution	637
Jan Nordström and Cristina La Cognata , Energy stable boundary conditions for the nonlinear incompressible Navier–Stokes equations ..	665
Sulin Wang and Zhengfu Xu , Total variation bounded flux limiters for high order finite difference schemes solving one-dimensional scalar conservation laws	691
Ludwig Gauckler, Jianfeng Lu, Jeremy L. Marzuola, Frédéric Rousset, and Katharina Schratz , Trigonometric integrators for quasilinear wave equations	717
Jörg Grande , Red–green refinement of simplicial meshes in d dimensions .	751
Parsiad Azimzadeh , A fast and stable test to check if a weakly diagonally dominant matrix is a nonsingular M-matrix	783
Matthias Beckmann and Armin Iske , Error estimates and convergence rates for filtered back projection	801
Zev Klagsbrun, Travis Sherman, and James Weigandt , The Elkies curve has rank 28 subject only to GRH	837
Pascal Molin and Christian Neurohr , Computing period matrices and the Abel-Jacobi map of superelliptic curves	847
Davide Lombardo , Computing the geometric endomorphism ring of a genus-2 Jacobian	889
Geoff Bailey, Stephen D. Cohen, Nicole Sutherland, and Tim Trudgian , Existence results for primitive elements in cubic and quartic extensions of a finite field	931
Dilum De Silva, Michael J. Mossinghoff, Vincent Pigno, and Christopher Pinner , The Lind-Lehmer constant for certain p-groups	949
Kwang-Seob Kim and John C. Miller , Class numbers of large degree nonabelian number fields	973
Aleksander Malnič and Rok Požar , On split liftings with sectional complements	983
Paul Pollack and Peter Schorn , Dirichlet’s proof of the three-square theorem: An algorithmic perspective	1007

Hubertus Grillmeier and Günther Grün, Nonnegativity preserving convergent schemes for stochastic porous-medium equations	1021
Seungchan Ko and Endre Süli, Finite element approximation of steady flows of generalized Newtonian fluids with concentration-dependent power-law index	1061
Dietmar Gallistl, Numerical approximation of planar oblique derivative problems in nondivergence form	1091
Marlis Hochbruck and Andreas Sturm, Upwind discontinuous Galerkin space discretization and locally implicit time integration for linear Maxwell's equations	1121
Mariarosa Mazza, Ahmed Ratnani, and Stefano Serra-Capizzano, Spectral analysis and spectral symbol for the 2D curl-curl (stabilized) operator with applications to the related iterative solutions	1155
Froilán M. Dopico, Javier Pérez, and Paul Van Dooren, Structured backward error analysis of linearized structured polynomial eigenvalue problems	1189
J. F. van Diejen and E. Emsiz, Exact cubature rules for symmetric functions	1229
Tamiru Jarso and Tim Trudgian, Quadratic non-residues that are not primitive roots	1251
Bartosz Żrałek, An extension of a result about divisors in a residue class and its application to reducing integer factorization to computing Euler's totient	1261
Aurore Guillevic, Faster individual discrete logarithms in finite fields of composite extension degree	1273
Edgar Costa, Nicolas Mascot, Jeroen Sijsling, and John Voight, Rigorous computation of the endomorphism ring of a Jacobian	1303
Michael A. Bennett, Adela Gherga, and Andrew Rechnitzer, Computing elliptic curves over \mathbb{Q}	1341
Ludovic Briulle, Luca De Feo, Javad Doliskani, Jean-Pierre Flori, and Éric Schost, Computing isomorphisms and embeddings of finite fields	1391
Jim Hoste and Patrick D. Shanahan, An enumeration process for racks	1427
Svyatoslav Covanov and Emmanuel Thomé, Fast integer multiplication using generalized Fermat primes	1449
Yong Feng, Jingwei Chen, and Wenyan Wu, The PSLQ algorithm for empirical data	1479
Hanh My Nguyen and Carl Pomerance, The reciprocal sum of the amicable numbers	1503

Natalia Kopteva, Logarithm cannot be removed in maximum norm error estimates for linear finite elements in 3D	1527
---	------

Leo G. Rebholz, Alex Viguerie, and Mengying Xiao, Efficient nonlinear iteration schemes based on algebraic splitting for the incompressible Navier-Stokes equations	1533
Victor Calo, Matteo Cicuttin, Quanling Deng, and Alexandre Ern, Spectral approximation of elliptic operators by the Hybrid High-Order method	1559
Thomas Führer, Norbert Heuer, and Antti H. Niemi, An ultraweak formulation of the Kirchhoff–Love plate bending model and DPG approximation	1587
Wasilij Barsukow, Stationarity preserving schemes for multi-dimensional linear systems	1621
Michael Hanke, Roswitha März, and Caren Tischendorf, Least-squares collocation for higher-index linear differential-algebraic equations: Estimating the instability threshold	1647
Wenyi Tian and Xiaoming Yuan, An alternating direction method of multipliers with a worst-case $O(1/n^2)$ convergence rate	1685
Max Gunzburger, Buyang Li, and Jilu Wang, Sharp convergence rates of time discretization for stochastic time-fractional PDEs subject to additive space-time white noise	1715
Jie Shen, Yingwei Wang, and Jianlin Xia, Fast structured Jacobi-Jacobi transforms	1743
Blanca Bujanda, José L. López, and Pedro J. Pagola, Convergent expansions of the confluent hypergeometric functions in terms of elementary functions	1773
Przemysław Rutka and Ryszard Smarzewski, Difference inequalities and barycentric identities for classical discrete iterated weights	1791
Gergő Nemes and Adri B. Olde Daalhuis, Asymptotic expansions for the incomplete gamma function in the transition regions	1805
Fredrik Johansson and Iaroslav V. Blagouchine, Computing Stieltjes constants using complex integration	1829

Juan González-Meneses and Marithania Silvero, Polynomial braid combing	2027

Xiaoli Li, Jie Shen, and Hongxing Rui , Energy stability and convergence of SAV block-centered finite difference method for gradient flows	2047
F. Guillén-González, M. A. Rodríguez-Bellido, and D. A. Rueda-Gómez , Unconditionally energy stable fully discrete schemes for a chemo-repulsion model	2069
Stefano Berrone, Andrea Bonito, Rob Stevenson, and Marco Verani , An optimal adaptive Fictitious Domain Method	2101
Natalia Kopteva , Error analysis of the L1 method on graded and uniform meshes for a fractional-derivative problem in two and three dimensions	2135
Bangti Jin, Buyang Li, and Zhi Zhou , Subdiffusion with a time-dependent coefficient: Analysis and numerical solution	2157
James Cheung, Mauro Perego, Pavel Bochev, and Max Gunzburger , Optimally accurate higher-order finite element methods for polytopial approximations of domains with smooth boundaries	2187
Pei Fu, Gero Schnücke, and Yinhua Xia , Arbitrary Lagrangian-Eulerian discontinuous Galerkin method for conservation laws on moving simplex meshes	2221
Zheng Chen and Cory D. Hauck , Multiscale convergence properties for spectral approximations of a model kinetic equation	2257
Wei Wang and Xuejun Xu , On the convergence of a two-level preconditioned Jacobi–Davidson method for eigenvalue problems	2295
Zhen-Chen Guo, Eric King-Wah Chu, and Wen-Wei Lin , Doubling algorithm for the discretized Bethe-Salpeter eigenvalue problem	2325
Ana F. Loureiro and Kuan Xu , Volterra-type convolution of classical polynomials	2351
Olivier Ramaré , Corrigendum to Explicit estimates on several summatory functions involving the Moebius function	2383
Jackson S. Morrow , Composite images of Galois for elliptic curves over \mathbb{Q} and entanglement fields	2389
Fabien Cléry, Carel Faber, and Gerard van der Geer , Covariants of binary sextics and modular forms of degree 2 with character	2423
Maarten Derickx and Filip Najman , Torsion of elliptic curves over cyclic cubic fields	2443
Ekin Ozman and Samir Siksek , Quadratic points on modular curves . . .	2461
Faruk Göloğlu and Antoine Joux , A simplified approach to rigorous degree 2 elimination in discrete logarithm algorithms	2485
Muhammad Imran Qureshi , Biregular models of log Del Pezzo surfaces with rigid singularities	2497
Petr Vojtěchovský and Seung Yeop Yang , Enumeration of racks and quandles up to isomorphism	2523
Lynn Chua, Mario Kummer, and Bernd Sturmfels , Schottky algorithms: Classical meets tropical	2541

M. Bonazzoli, V. Dolean, I. G. Graham, E. A. Spence, and P.-H. Tournier , Domain decomposition preconditioning for the high-frequency time-harmonic Maxwell equations with absorption	2559
Charles M. Elliott, Hans Fritz, and Graham Hobbs , Second order splitting for a class of fourth order equations	2605
Klaus Deckelnick, Charles M. Elliott, Tatsu-Hiko Miura, and Vanessa Styles , Hamilton–Jacobi equations on an evolving surface	2635
Xiang Wang, Weizhang Huang, and Yonghai Li , Conditioning of the finite volume element method for diffusion problems with general simplicial meshes	2665
Philippe Chartier, Nicolas Crouseilles, Mohammed Lemou, Florian Méhats, and Xiaofei Zhao , Uniformly accurate methods for Vlasov equations with non-homogeneous strong magnetic field	2697
Ming Zhou and Klaus Neymeyr , Cluster robust estimates for block gradient-type eigensolvers	2737
Tony Shardlow , A Walk Outside Spheres for the fractional Laplacian: Fields and first eigenvalue	2767
Raphael Kruse and Yue Wu , A randomized and fully discrete Galerkin finite element method for semilinear stochastic evolution equations . . .	2793
Michaël Sdika , Diffeomorphic B-spline vector fields with a tractable set of inequalities	2827
Wenjie Liu, Li-Lian Wang, and Huiyuan Li , Optimal error estimates for Chebyshev approximations of functions with limited regularity in fractional Sobolev-type spaces	2857
Peter Mathé , Bayesian inverse problems with non-commuting operators ..	2897
Nadir Murru and Lea Terracini , On p -adic multidimensional continued fractions	2913
Peter Shiu , Corrigendum to “Counting sums of two squares: the Meissel-Lehmer method”	2935
Francesc Bars and Josep González Rovira , Bielliptic modular curves $X_0^*(N)$ with square-free levels	2939
Omar León Sánchez , Estimates for the coefficients of differential dimension polynomials	2959
Emre Can Sertöz , Computing periods of hypersurfaces	2987
Thomas Breuer, Gerhard Hiss, Frank Lübeck, and Klaus Lux , The completion of the 3-modular character table of the Chevalley group $F_4(2)$ and its covering group	3023
Gary R. W. Greaves and Pavlo Yatsyna , On equiangular lines in 17 dimensions and the characteristic polynomial of a Seidel matrix	3041
Jonathan Bayless, Paul Kinlaw, and Dominic Klyve , Sums over primitive sets with a fixed number of prime factors	3063

Editorial Information

Information on the backlog for this journal can be found on the AMS website starting from <http://www.ams.org/mcom>.

In an effort to make articles available as quickly as possible, articles are electronically published on the AMS website individually after proof is returned from authors and before appearing in an issue.

A Consent to Publish is required before we can begin processing your paper. After a paper is accepted for publication, the Providence office will send a Consent to Publish and Copyright Agreement to all authors of the paper. By submitting a paper to this journal, authors certify that the results have not been submitted to nor are they under consideration for publication by another journal, conference proceedings, or similar publication.

Information for Authors

Initial submission. All articles submitted to this journal are peer-reviewed. The AMS has a single blind peer-review process in which the reviewers know who the authors of the manuscript are, but the authors do not have access to the information on who the peer reviewers are. The AMS uses Centralized Manuscript Processing for initial submission. Authors should submit a PDF file using the Initial Manuscript Submission form found at www.ams.org/submission/mcom, or send one copy of the manuscript to the following address: Centralized Manuscript Processing, MATHEMATICS OF COMPUTATION, 201 Charles Street, Providence, RI 02904-2213 USA. If a paper copy is being forwarded to the AMS, indicate that it is for *Mathematics of Computation* and include the name of the corresponding author and contact information, such as an email address or mailing address. The author may suggest an appropriate editor for his or her paper.

The first page must consist of a *descriptive title*, followed by an *abstract* that summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as “some remarks about” or “concerning” should be avoided. The *abstract* must be brief, reasonably self-contained, and not exceed 300 words. Included with the footnotes to the paper should be the 2010 *Mathematics Subject Classification* representing the primary and secondary subjects of the article. The classifications are accessible from www.ams.org/msc/. The Mathematics Subject Classification footnote may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. Journal abbreviations used in bibliographies are listed in the latest *Mathematical Reviews* annual index. The series abbreviations are also accessible from www.ams.org/mshtml/serials.pdf. To help in preparing and verifying references, the AMS offers MR Lookup, a Reference Tool for Linking, at www.ams.org/mrlookup/.

Electronically prepared manuscripts. Manuscripts should be electronically prepared in $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$. To this end, the Society has prepared $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ author packages for each AMS publication. Author packages include instructions for preparing electronic manuscripts, samples, and a style file that generates the particular design specifications of that publication series. Articles properly prepared using the $\mathcal{A}\mathcal{M}\mathcal{S}\text{-}\mathcal{L}\mathcal{A}\mathcal{T}\mathcal{E}\mathcal{X}$ style file and the `\label` and `\ref` commands automatically enable extensive intra-document linking to the bibliography and other elements of the article for searching electronically on the Web.

Authors may retrieve an author package for *Mathematics of Computation* from www.ams.org/mcom/mcomauthorpac.html. The *AMS Author Handbook* is available in PDF format from the author package link. The author package can also be obtained free of charge by sending email to tech-support@ams.org or from the Publication Division, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA. When requesting an author package, please specify the publication in which your paper will appear. Please be sure to include your complete email address.

After acceptance. The source files for the final version of the electronic manuscript should be sent to the Providence office immediately after the paper has been accepted for publication. The author should also submit a PDF of the final version of the paper to the Managing Editor, who will forward a copy to the Providence office. Accepted electronically prepared manuscripts can be submitted via the web at www.ams.org/submit-book-journal/, sent via email to pub-submit@ams.org, or sent on CD to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA. When sending a manuscript electronically via email or CD, please be sure to include a message indicating in which publication the paper has been accepted. Complete instructions on how to send files are included in the author package.

Electronic graphics. Comprehensive instructions on preparing graphics are available starting from www.ams.org/authors/journals.html. A few of the major requirements are given here.

Submit files for graphics as EPS (Encapsulated PostScript) files. This includes graphics originated via a graphics application as well as scanned photographs or other computer-generated images. If this is not possible, TIFF files are acceptable as long as they can be opened in Adobe Photoshop or Illustrator.

Authors using graphics packages for the creation of electronic art should also avoid the use of any lines thinner than 0.5 points in width. Many graphics packages allow the user to specify a “hairline” for a very thin line. Hairlines often look acceptable when proofed on a typical laser printer. However, when produced on a high-resolution laser imagesetter, hairlines become nearly invisible and will be lost entirely in the final printing process.

Screens should be set to values between 15% and 85%. Screens which fall outside of this range are too light or too dark to print correctly. Variations of screens within a graphic should be no less than 10%.

Any graphics created in color will be rendered in grayscale for the printed version unless color printing is authorized by the Managing Editor and the Publisher. In general, color graphics will appear in color in the online version.

AMS policy on making changes to articles after publication. Articles are published on the AMS website individually after proof is returned from authors and before appearing in an issue. To preserve the integrity of electronically published articles, once an article is individually published to the AMS website, changes cannot be made in place in the paper. The AMS does not keep author-related information, such as affiliation, current address, and email address, up to date after a paper is electronically published.

Corrections of critical errors may be made to the paper by submitting an errata article to the Editor. The errata article will be published electronically, will appear in a future print issue, and will link back and forth on the Web with the original article.

Secure manuscript tracking on the Web. Authors can track their manuscripts through the AMS journal production process using the personal AMS ID and Article ID printed in the upper right-hand corner of the Consent to Publish form sent to each author who publishes in AMS journals. Access to the tracking system is available from www.ams.org/mstrack/. An explanation of each production step is provided on the web through links from the manuscript tracking screen. Questions can be sent to mcom-query@ams.org.

Inquiries. Any inquiries concerning a paper that has been accepted for publication that cannot be answered via the manuscript tracking system mentioned above should be sent to mcom-query@ams.org or directly to the Electronic Prepress Department, American Mathematical Society, 201 Charles Street, Providence, RI 02904-2213 USA.

CONTENTS

Vol. 88, No. 320

November 2019

M. Bonazzoli, V. Dolean, I. G. Graham, E. A. Spence, and P.-H. Tournier, Domain decomposition preconditioning for the high-frequency time-harmonic Maxwell equations with absorption	2559
Charles M. Elliott, Hans Fritz, and Graham Hobbs, Second order splitting for a class of fourth order equations	2605
Klaus Deckelnick, Charles M. Elliott, Tatsu-Hiko Miura, and Vanessa Styles, Hamilton–Jacobi equations on an evolving surface	2635
Xiang Wang, Weizhang Huang, and Yonghai Li, Conditioning of the finite volume element method for diffusion problems with general simplicial meshes	2665
Philippe Chartier, Nicolas Crouseilles, Mohammed Lemou, Florian Méhats, and Xiaofei Zhao, Uniformly accurate methods for Vlasov equations with non-homogeneous strong magnetic field	2697
Ming Zhou and Klaus Neymeyr, Cluster robust estimates for block gradient-type eigensolvers	2737
Tony Shardlow, A Walk Outside Spheres for the fractional Laplacian: Fields and first eigenvalue	2767
Raphael Kruse and Yue Wu, A randomized and fully discrete Galerkin finite element method for semilinear stochastic evolution equations ...	2793
Michaël Sdika, Diffeomorphic B-spline vector fields with a tractable set of inequalities	2827
Wenjie Liu, Li-Lian Wang, and Huiyuan Li, Optimal error estimates for Chebyshev approximations of functions with limited regularity in fractional Sobolev-type spaces	2857
Peter Mathé, Bayesian inverse problems with non-commuting operators .	2897
Nadir Murru and Lea Terracini, On p -adic multidimensional continued fractions	2913
Peter Shiu, Corrigendum to “Counting sums of two squares: the Meissel-Lehmer method”	2935
Francesc Bars and Josep González Rovira, Bielliptic modular curves $X_0^*(N)$ with square-free levels	2939
Omar León Sánchez, Estimates for the coefficients of differential dimension polynomials	2959
Emre Can Sertöz, Computing periods of hypersurfaces	2987
