Nonlinear Partial Differential Equations

Asymptotic Behavior of Solutions and Self-Similar Solutions

Mi-Ho Giga, University of Tokyo, Japan;
Yoshikazu Giga, University of Tokyo, Japan;
Jürgen Saal, University of Konstanz, Germany

The main focus of the textbook, in two parts, is on showing how self-similar solutions are useful in studying the behavior of solutions of nonlinear partial differential equations, especially those of parabolic type. The exposition moves systematically from the basic to more sophisticated concepts with recent developments and several open problems. With challenging exercises, examples, and illustrations to help explain the rigorous analytic basis for the Navier–Stokes equations, mean curvature flow equations, and other important equations describing real phenomena, this book is written for graduate students and researchers, not only in mathematics but also in other disciplines.

Discrete Groups, Expanding Graphs and Invariant Measures

Alexander Lubotzky, Hebrew University, Jerusalem, Israel; **Jonathan D. Rogawski**, University of California, Los Angeles, CA, USA

1ST ED. 1994. 2ND PRINTING, 2010. 208 P., SOFTCOVER
ISBN 978-3-0346-0331-7
ORIGINALLY PUBLISHED IN THE SERIES: PROGRESS IN MATHEMATICS VOL 125
MODERN BIRKHÄUSER CLASSICS
\$39.95

New Journal for 2010

Journal of Pseudo-Differential Operators and Applications

The Journal of Pseudo-Differential Operators and Applications is a forum for high quality papers in the mathematics, applications and numerical analysis of pseudo-differential operators. Pseudo-differential operators are understood in a very broad sense, embracing but not limited to, harmonic analysis, functional analysis, operator theory and algebras, partial differential equations, geometry, mathematical physics, and novel applications in engineering, geophysics, and medical sciences.

Arrangements, Local Systems and Singularities

CIMPA Summer School, Galatasaray University, Istanbul, 2007

Fouad El Zien, American University of Beirut, Lebanon; **Alexander I. Suci**, Northeastern University, Boston, MA, USA; **Meral Tosun**, Galatasaray University, Istanbul, Turkey; **Muhammed Uludag**, Galatasaray University, Istanbul, Turkey; **Sergey Yuzvinsky**, University of Oregon, Eugene, OR, USA (Eds).

This volume comprises the Lecture Notes of the CIMPA/TUBITAK Summer School Arrangements, Local systems and Singularities held at Galatasaray University, Istanbul during June 2007. The reader will find a variety of open problems involving arrangements, local systems and singularities proposed by the lecturers at the end of the school.

The Theory of the Top

Volume 2: Development of the Theory for the Heavy Symmetric Top

Felix Klein, **Arnold Sommerfeld**,

Translators: **Raymond J. Nagem**, **Guido Sandri**, Boston University, Boston, MA, USA

The Theory of the Top was originally presented by Felix Klein as an 1895 lecture at Göttingen University that was broadened in scope and clarified as a result of collaboration with Arnold Sommerfeld. **The Theory of the Top: Volume II. Development of the Theory for the Heavy Symmetric Top** is the second installment in a series of four self-contained English translations that provide insights into kinetic theory and kinematics.
