New Titles from the AMS

Mathematics Everywhere
Martin Aigner and Ehrhard Behrends, Freie Universität Berlin, Germany, Editors
Translated by Philip G. Spain
This series of lectures from renowned mathematicians demonstrates the prominent role of mathematics in our daily life, through science, technology and culture. The common theme throughout is mathematics' unique position as both the art of pure thought and universally applicable science. The book also includes a leisurely treatment of recent hot topics, including the solution of the Poincaré conjecture.

Mathematical Connections
A Capstone Course
John B. Conway, George Washington University, District of Columbia
This book illustrates the connections between the topics in the various courses taken by undergraduate mathematicians majors. It emphasizes the importance of having a broad view of mathematics, for the instructor and the research mathematician as well as the student. A number of exercises are designed to assist the student in understanding and doing mathematics.

A Mathematical Medley
Fifty Easy Pieces on Mathematics
George G. Szpiro, Neue Zürcher Zeitung, Zurich, Switzerland
This collection of 50 short articles on mathematics and mathematicians uses laymen's language to familiarize general readers with mathematics' applications. The accessible articles focus on recently solved problems, research from scientific journals, and mathematical observations about contemporary life. The articles' approach makes mathematics intelligible to the non-specialist reader.

Thirty-three Miniatures
Mathematical and Algorithmic Applications of Linear Algebra
Jirí Matoušek, Charles University, Prague, Czech Republic
This book presents interesting problems and theorems as a collection of independent, intriguing issues. These applications of linear algebra are mainly in the areas of combinatorics, geometry and algorithms. The text can serve as supplementary reading for an undergraduate linear algebra course or as the main text for a special-topics course on linear algebraic methods.
