

PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

R. P. BOAS

SHIZUO KAKUTANI

IRVING KAPLANSKY

HANS SAMELSON

WITH THE COÖPERATION OF

RAOUL BOTT

R. H. BRUCK

PAUL CIVIN

EDWIN HEWITT

JACOB KOREVAAR

R. V. KADISON

WALTER RUDIN

R. M. THRALL

I. M. SINGER

JOHN WERMER

VOLUME 8, NUMBER 5

OCTOBER, 1957

PUBLISHED BY THE SOCIETY

MENASHA, WIS., AND PROVIDENCE, R. I.

Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings, with abstracts of all research papers presented. It contains some of the officially invited addresses presented before the Society. It contains also announcements and notes on matters of current interest, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1957. The subscription price is \$7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1-27, 29 (1894-1921, 1923) \$23.50 each; vol. 28 (1922) \$19.70; vols. 30-35 (1924-1929) \$20.00 each; vols. 36-55 (1930-1949) \$28.00 each; vols. 56-62 (1950-1956) \$14.00 each.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced, and the manuscript should not exceed 12 pages. The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra, number theory, logic and foundations should be sent to IRVING KAPLANSKY, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Mich.; in probability, real variables and abstract analysis to SHIZUO KAKUTANI, Leet Oliver Memorial Hall, Yale University, New Haven 11, Conn.; in other branches of analysis, applied mathematics, and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Ill. All other communications to the editors should be addressed to the Managing Editor, IRVING KAPLANSKY.

One volume of six numbers is planned for 1957. The subscription price is \$11.00. Vols. 1-7 (1950-1956) are available at the price of \$14.00 each.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the PROCEEDINGS.

Three volumes of two numbers each will be published in 1957. The price per volume is \$8.00. Volumes 1-36 (1900-1934) consist of four numbers each. Volumes 66-67 (1949) and 78-84 (1955-1957) consist of two numbers each. All other volumes consist of three numbers each. The prices of back volumes, insofar as they are available, are as follows: vols. 1-36 (1900-1934), \$16.00 each; vols. 37-65, 68-77 (1934-1954) \$12.00 each; vols. 66, 67, 78-85 (1949, 1955-1957) \$8.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly, excepting July, and the price per annual volume is \$35.00. Orders for complete volumes only are accepted. Volumes 10 and 17 are not available. Volumes 1-9 and 11-16 are available at the following prices: Vols. 1-2 (1940-1941) \$24.00 each; all other volumes \$36.00.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 450 Ahnaip Street, Menasha, Wis., or 190 Hope Street, Providence 6, R. I.

Entered as second-class matter at the post office at Menasha, Wisconsin. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 35.40, paragraph d, P. L. & R.

The price to members of the American Mathematical Society is 25% less than list. Volumes which are not listed above are out of print.

CONTENTS

Vol. 8, No. 5

OCTOBER, 1957

Whole No. 47

	Page
Bounded groups of transformations. By R. C. T. SMITH.....	831
Differential equations involving a parametric function. By R. H. CAMERON.....	834
On the Laguerre method for separating the roots of algebraic equations. By STEPHEN KULIK.....	841
A class of inequalities. By H. D. BLOCK.....	844
Discrete analogues of certain integral inequalities. By H. D. BLOCK.....	852
Discrete isoperimetric-type inequalities. By H. D. BLOCK.....	860
Note on absolutely convergent Dirichlet series. By EDWIN HEWITT and J. H. WILLIAMSON.....	863
Multivalently close-to-convex functions. By TOSHIO UMEZAWA.....	869
A note on an integral inequality. By P. R. BEESACK.....	875
A composition theorem for general unitary transforms. By CHARLES FOX.....	880
A property of the Laplace transformation. By P. G. ROONEY.....	883
On the existence of a mixing measure. By J. C. HOLLADAY.....	887
On the spectra of certain Laurent matrices. By G. L. KRABBE.....	894
Continuity properties of derivatives of sequences of functions. By G. R. MACLANE.....	897
On co-recursive orthogonal polynomials. By T. S. CHIHARA.....	899
Quasi-reflexive spaces. By PAUL CIVIN and BERTRAM YOOD.....	906
Isotopy in 3-manifolds. I. Isotopic deformations of 2-cells and 3-cells. By D. E. SANDERSON.....	912
Bloch functions of the third kind and the constant \mathfrak{A} . By C. ULUÇAY.....	923
A T -system which is not a Bernstein system. By R. G. LONG.....	925
On a theorem of Richardson. By J. R. ISBELL.....	928
Subalgebras of an algebra with a single generator are finitely generated. By DAVID GALE.....	929
Normal subgroups of monomial groups. By R. B. CROUCH and W. R. SCOTT.....	931
Transient Markov chains with stationary measures. By T. E. HARRIS.....	937
Coherence invariant mappings of symmetric transformations. By H. G. JACOB.....	943
The Whitehead first lemma for alternative algebras. By E. J. TAFT.....	950
Principal representations in commutative semigroups. By W. M. PEREL.....	957
A limit theorem for processes with stationary independent increments. By FRANK KOZIN.....	960
Quasicreative sets. By J. R. SHOENFIELD.....	964
On some Mercerian theorems in summability. By M. R. PARAMESWARAN.....	968
A theorem of Dickson on nonvanishing cubic forms in a finite field. By L. CARLITZ.....	975
A note on some partially transitive projective planes. By D. R. HUGHES.....	978
Remark on my paper <i>On a theorem of J. L. Walsh</i> . By ARYEH DVORETZKY.....	982
Assosymmetric rings. By ERWIN KLEINFELD.....	983
A property of polynomial extensions of rings. By MICHIO YOSHIDA.....	987
Concerning real valued maps of the n -sphere. By G. R. LIVESAY.....	989
An extremal problem concerning the centre of gravity of a convex disc. By H. G. HELFENSTEIN.....	992
A note on function quantification. By J. W. ADDISON and S. C. KLEENE.....	1002
