PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

R. P. BOAS
IRVING KAPLANSKY
P. R. HALMOS
HANS SAMELSON

WITH THE COÖPERATION OF

RAOUL BOTT
R. V. KADISON
M. O. READE
PAUL CIVIN
ERWIN KLEINFELD
I. M. SINGER
JOHN WERMER
EDWIN HEWITT
JACOB KOREVAAR
R. M. THRALL

VOLUME 9, NUMBER 6
DECEMBER, 1958

PUBLISHED BY THE SOCIETY
MENASHA, WIS., AND PROVIDENCE, R. I.

Journals Published by the

American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and details of its meeting. It contains some of the officially invited addresses presented before the Society, research announcements and problems, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1958. The subscription price is $7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1–27, 29 (1894–1921, 1923), $23.50 each; vol. 28 (1922), $19.70; vols. 30–35 (1924–1929), $20.00 each; vols. 36–55 (1930–1949), $28.00 each; vols. 56–63 (1950–1957), $14.00 each.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced, and the manuscript should not exceed 12 pages. The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to IRVING KAPLANSKY, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in probability, real variables, logic and foundations to P. R. HALMOS, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in abstract analysis to either P. R. HALMOS or IRVING KAPLANSKY; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Mich.; in other branches of analysis, applied mathematics and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Ill. All other communications to the editors should be addressed to the managing editor, IRVING KAPLANSKY.

One volume of six numbers is planned for 1958. The subscription price is $11.00. Vols. 1–8 (1950–1957) are available at the price of $14.00 each.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the PROCEEDINGS.

Three volumes of two numbers each will be published in 1958. The price per volume is $8.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) and 78–88 (1955–1958) consist of two numbers each. All other volumes consist of three numbers each. The prices of back volumes, insofar as they are available, are as follows: vols. 1–36 (1900–1934), $16.00 each; vols. 37–65, 68–77 (1934–1954), $12.00 each; vols. 66, 67, 78–88 (1949, 1955–1958), $8.00 each.

Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly, excepting July, and the price per annual volume is $35.00. Orders for complete volumes only are accepted. Volumes 10 and 17 are not available. Volumes 1–9, 11–16 and 18 are available at the following prices: Vols. 1–2 (1940–1941), $24.00 each; all other volumes $36.00.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, Curtis Reed Plaza, Menasha, Wis., or 190 Hope Street, Providence 6, R. I.

Entered as second-class matter at the post office at Menasha, Wisconsin. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 35.40, paragraph d., P. L. & R. Second-class postage paid at Menasha, Wisconsin.

CONTENTS

Vol. 9, No. 6 DECEMBER, 1958 Whole No. 54

	Page
On Riemannian curvature of homogeneous spaces. By SIGURÐUR HELGASON	831
B paracompact does not imply B^1 paracompact. By EDWARD FADELL	839
Classification of finite 2-complexes. By E. F. WHITTLESEY	841
A sufficient condition that a monotone image of the three-sphere be a topological three-sphere. By O. G. HARROLD, JR.	846
Correspondance entre deux surfaces par trois couples de tangentes parallèles. By PAVEL DRĂGILĂ	851
Correspondance entre deux surfaces par quatre couples de tangentes parallèles. By PAVEL DRĂGILĂ	855
A characterization of light open maps of Euclidean spaces into Euclidean spaces. By J. J. ANDREWS	860
On completely continuous Hankel matrices. By PHILIP HARTMAN	862
Convex sets and nearest points. II. By R. R. PHELPS	867
Note on products in Ext. By NOBUO YONEDA	873
Generalized rings. By R. A. BEAUMONT	876
On totally bounded subsets of sequence spaces. By C. W. MCARTHUR	881
The simplicity of certain nonassociative algebras. By RIMHAK REE	886
A note on complete Boolean algebras. By R. S. PIERCE	892
On rings of (γ, δ)-type. By L. A. KOKORIS	897
Spitzer's formula: A short proof. By J. G. WENDEL	905
Rings of zero-divisors. By P. M. COHN	909
Characterizations of generalized uniserial algebras. II. By D. W. WALL	915
An invariant property of Cesari's surface integral. By L. H. TURNER	920
Homothetic mappings of Riemann spaces. By M. S. KNEBELMAN	926
Finite noncommutative division algebras. A. A. ALBERT	928
Solvable Lie groups and locally Euclidean Riemann spaces. By L. AUSLANDER and M. AUSLANDER	933
Comparison of subtheories. By AZRIEL LÉVY	942
Approximation by a polynomial and its derivatives on certain closed sets. By ERRETT BISHOP	946
An identity in the theory of the generalized polynomials of Jacobi. By B. GERMANSKY	953
An integral transformation relation. By R. G. BUSCHMAN	956
Rings of meromorphic functions. By H. L. ROYDEN	959
A semi-simple matrix group is of Type *I*. By W. F. STINESPRING	965
An application of fractional integration to chain transform theory. By CHARLES FOX	968
Sur les fonctions dérivées, intégrables au sens de Riemann et sur les dérivées partielles mixtes. By S. MARCUS	973
On the harmonic summability of double Fourier series. By P. L. SHARMA	979
On a theorem of von Neumann. By DOROTHY MAHARAM	987
On two theorems of Jessen. By DOROTHY MAHARAM	995
Errata, Volume 8	1000
Errata, Volume 9	1000
Index of Volume 9	1001
