Journals Published by the

# American Mathematical Society

## Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and details of its meeting. It contains some of the officially invited addresses presented before the Society, research announcements and problems, and reviews of advanced mathematical books.

One volume of six numbers is planned for 1959. The subscription price is $7.00. The prices of back volumes, insofar as they are available, are as follows: vols. 1–27, 29 (1894–1921, 1923), $23.50 each; vol. 28 (1922), $19.70; vols. 30–35 (1924–1929), $20.00 each; vols. 36–55 (1930–1949), $28.00 each; vols. 56–63 (1950–1958), $14.00 each.

## Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. Volume 1 appeared in 1950.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced, and the manuscript should not exceed 12 pages. The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to IRVING KAPLANSKY, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in probability, real variables, logic and foundations to P. R. HALMOS, Eckhart Hall, University of Chicago, Chicago 37, Ill.; in abstract analysis to either P. R. HALMOS or IRVING KAPLANSKY; in geometry and topology to HANS SAMELSON, Department of Mathematics, University of Michigan, Ann Arbor, Mich.; in other branches of analysis, applied mathematics and all other fields to R. P. BOAS, Lunt Building, Northwestern University, Evanston, Ill. All other communications to the editors should be addressed to the managing editor, IRVING KAPLANSKY.

One volume of six numbers is planned for 1959. The subscription price is $11.00. Vols. 1–8 (1950–1958) are available at the price of $14.00 each.

## Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general longer memoirs than the PROCEEDINGS.

Four volumes of three numbers each will be published in 1959. The price per volume is $8.00. Volumes 1–36 (1900–1934) consist of four numbers each. Volumes 66–67 (1949) and 78–88 (1955–1958) consist of two numbers each. All other volumes consist of three numbers each. The prices of back volumes, insofar as they are available, are as follows: vols. 1–36 (1900–1934), $16.00 each; vols. 37–65, 68–77 (1934–1954), $12.00 each; vols. 66, 67, 78–92 (1949, 1955–1959), $8.00 each.

## Mathematical Reviews

This journal contains abstracts and reviews of the current mathematical literature of the world. It is sponsored by thirteen mathematical organizations, located both in the United States and abroad.

The publication of MATHEMATICAL REVIEWS was begun in 1940. It appears monthly, excepting July, and the price per annual volume is $50.00. Orders for complete volumes only are accepted. Volumes 10 and 17 are not available. Volumes 1–9, 11–16, 18, and 19 are available at the following prices: Vols. 1–14 (1940–1953), $24.00 each; all other volumes $50.00.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February April, June, August, October, and December. Price per annual volume is $11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, Curtis Reed Plaza, Menasha, Wis., or 190 Hope Street, Providence 6, R. I.

Entered as second-class matter at the post office at Menasha, Wisconsin, Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 35.40, paragraph d., P. L. & R. Second-class postage paid at Menasha, Wisconsin.

# INDEX OF VOLUME 10

Alavi, Y. and Wells, C. P. *Expansions of parabolic wave functions*, 876.

Anderson, L. W. *One dimensional topological lattices*, 715.

Anderson, R. D. and Choquet, Gustave. *A plane continuum no two of whose nondegenerate subcontinua are homeomorphic: An application of inverse limits*, 347.

Artzy, R. *On automorphic-inverse properties in loops*, 588.

Auslander, L. and MacKenzie, R. E. *On the topology of tangent bundles*, 627.

Ball, B. J. *Certain collections of arcs in $E^3$*, 699.

Barrett, J. H. *Disconjugacy of second-order linear differential equations with nonnegative coefficients*, 552.

Baxter, Glen. *On the measure of Hilbert neighborhoods for processes with stationary, independent increments*, 690.

Bear, H. S. and Yood, Bertram. *Multiplicative functionals on semigroups of continuous functions*, 736.

Bellman, Richard. *On inequalities with alternating signs*, 807.

Benson, D. C. *On surfaces with the representation $z=f(x, y)$*, 980.

Berberian, S. K. *Note on a theorem of Fuglede and Putnam*, 175.

Berman, Gerald and Silverman, R. J. *Simplicity of near-rings of transformations*, 456.

Bing, R. H. *Each homogeneous nondegenerate chainable continuum is a pseudo-arc*, 345.

Bishop, Errett. *Simultaneous approximation by a polynomial and its derivatives*, 741.

Blumenthal, R. M. *Some relationships involving subordination*, 502.

Braden, C. M. See Koehler, Fulton.

de Branges, Louis. *The Stone-Weierstrass theorem*, 822.

——— *The Bernstein problem*, 825.

——— *Some mean squares of entire functions*, 833.

——— *Some Hilbert spaces of entire functions*, 840.

Braunschweiger, C. C. *A geometric construction of the M-space conjugate to an L-space*, 77.

Brown, Morton. *Weak n-homogeneity implies weak $(n-1)$-homogeneity*, 644.

Bruck, R. H. *Sums of normal endomorphisms*, 674.

Burgess, C. E. *Some conditions under which a homogeneous continuum is a simple closed curve*, 613.

Buzby, B. and Whaples, G. Errata to *Quadratic forms over arbitrary fields*, 174.

Callahan, F. P., Jr. *An extremal problem for polynomials*, 754.

Calloway, A. See Grosswald, E.

Calloway, J. See Grosswald, E.

Carlitz, L. *A determinant connected with Fermat's last theorem*, 686.

——— *A congruence satisfied by the theta-constant $\vartheta_3$*, 912.

Chacon, R. V. *On a question of Paul Lévy*, 460.

Chamberlin, R. E. *A class of unknotted curves in 3-space*, 149.

Chang, C. C. *On unions of chains of models*, 120.

Cheney, Ward and Goldstein, A. A. *Proximity maps for convex sets*, 448.

Choquet, Gustave. See Anderson, R. D.

Chowla, S. See Skolem, Th.

Civin, Paul. *A maximum modulus property of maximal subalgebras*, 51.

Cohen, Haskell and Krule, I. S. *Continuous homomorphic images of real clans with zero*, 106.

Cohen, P. J. *On Green's theorem*, 109.

Connell, E. H. *Properties of fixed point spaces*, 974.

Conner, P. E. *A note on a theorem of Liao*, 730.
Conner, P. E. and Floyd, E. E. *On the construction of periodic maps without fixed points*, 354.
——— *A note on the action of SO(3)*, 616.
Conrad, Paul. *A correction and improvement of a theorem on ordered groups*, 182.
Cossar, J. *The Bohr spectrum of a function*, 294.
Crouch, R. B. *A class of irreducible systems of generators for infinite symmetric groups*, 910.
Curtis, H. B., Jr. *Some properties of functions which uniformize a class of simply connected Riemann surfaces*, 525.
Curtis, M. L. See Bing, R. H.
Curtis, M. L. and Fort, M. K., Jr. *The fundamental group of one-dimensional spaces*, 140.
Davis, R. L. *Torsion in Engel modules*, 679.
Dawson, D. F. *Convergence of continued fractions of Stieltjes type*, 12.
Day, M. M. *On criteria of Kasahara and Blumenthal for inner-product spaces*, 92.
Dinculeanu, Nicolae. *Sur la représentation intégrale des certaines opérations linéaires. III*, 59.
Doyle, P. H. *Tame triods in 3-space*, 656.
Doyle, P. H. and Hocking, J. G. *A note on piercing a disk*, 633.
Drăgilă, P. *Correspondance entre deux surfaces par des faisceaux de tangentes parallèles*, 366.
Ellis, Robert. *Equicontinuity and almost periodic functions*, 637.
Faith, C. C. *Submodules of rings*, 596.
——— *Abelian Galois groups*, 767.
Farrell, O. J. *On approximation by nonvanishing functions*, 888.
Feit, Walter. *On p-regular extensions of local fields*, 592.
Fleishman, B. A. *Progressing waves in an infinite nonlinear string*, 329.
Floyd, E. E. See Conner, P. E.
Fort, M. K., Jr. See Curtis, M. L.
Fort, Tomlinson. *A problem in linear differential equations*, 300.
Foulkes, H. O. *The analysis of the characters of the Lie representations of the general linear group*, 497.
Fox, W. C. *A new inequality for the Green's function*, 562.
Fulton, C. M. *A pseudo-Euclidean geometry*, 304.
Gil de Lamadrid, J. and Jans, J. P. *The set of all covering spaces*, 710.
Glicksberg, Irving. *A remark on a theorem of Beurling and Helson*, 587.
Goblirsch, R. P. *On decompositions of 3-space by linkages*, 728.
Goldberg, R. R. *Certain operators and Fourier transforms on $L^2$*, 385.
Goldman, Lawrence. *Solutions of first order differential equations which are solutions of linear differential equations of higher order*, 936.
Goldstein, A. A. See Cheney, Ward.
Gorenstein, Daniel and Herstein, I. N. *On the structure of certain factorizable groups*, I, 940.
Greub, Werner and Rheinboldt, Werner. *On a generalization of an inequality of L. V. Kantorovich*, 407.
Grosswald, E., Calloway, A. and Calloway, J. *The representation of integers by three positive squares*, 451.
Halberg, C. J. A., Jr., Levin, Eugene and Straus, E. G. *On contiguous congruent sets in Euclidean space*, 335.

Halmos, P. R. *Free monadic algebras*, 219.
Hanneken, C. B. *Irreducible congruences over $GF(p)$*, 18.
Hartman, Philip. *On smooth linear partial differential equations without solutions*, 252.
Hausner, Alvin. *On generalized group algebras*, 1.
Heerema, Nickolas. *On ramified complete discrete valuation rings*, 490.
Heider, L. J. *Compactifications of dimension zero*, 377.
Herstein, I. N. See Gorenstein, Daniel.
Hocking, J. G. See Doyle, P. H.
Homann, F. A. Errata to *On transformations preserving Laguerre-Forsyth canonical form*, 174.
Horne, J. G., Jr. *On primary ideals in $C(X)$*, 158.
Horváth, J. *On some composition formulas*, 433.

Vol. 10, No. 6 DECEMBER, 1959 Whole No. 60

| | Page |
|---|---|
| Recursive functions over well ordered partial orderings. By HARTLEY ROGERS, JR. | 847 |
| On a special integral equation. By D. A. WOODWARD | 853 |
| Some theorems on Fourier coefficients. By WALTER RUDIN | 855 |
| A functional equation proposed by R. Bellman. By E. G. STRAUS | 860 |
| On typically-real functions in a cut plane. By E. P. MERKES | 863 |
| On the pole and zero locations of rational Laplace transformations of non-negative functions. By A. H. ZEMANIAN | 868 |
| On projections of separable subspaces of $(m)$ onto $(c)$. By R. D. MCWILLIAMS. | 872 |
| Expansions of parabolic wave functions. By Y. ALAVI and C. P. WELLS | 876 |
| A free boundary problem for pseudo-analytic functions. By MARTIN SCHECHTER | 881 |
| On approximation by nonvanishing functions. By O. J. FARRELL | 888 |
| A note on well distributed sequences. By B. LAWTON | 891 |
| The existence of nonabsolutely convergent Fourier series on compact groups. By GUSTAVE RABSON | 893 |
| On the Galois theory of division rings. By J. H. WALTER | 898 |
| On the multiplicative semigroup of a commutative ring. By J. R. ISBELL | 908 |
| A class of irreducible systems of generators for infinite symmetric groups. By R. B. CROUCH | 910 |
| A congruence satisfied by the theta-constant $\vartheta_3$. By L. CARLITZ | 912 |
| On cubic forms permitting composition. By R. D. SCHAFER | 917 |
| A generalization of noncommutative Jordan algebras. By R. W. RITCHIE | 926 |
| A note on gradient mappings. By E. H. ROTHE | 931 |
| Solutions of first order differential equations which are solutions of linear differential equations of higher order. By LAWRENCE GOLDMAN | 936 |
| On the structure of certain factorizable groups, I. By DANIEL GORENSTEIN and I. N. HERSTEIN | 940 |
| Construction of some sets of mutually orthogonal latin squares. By E. T. PARKER | 946 |
| The undecidability of algebraic rings and fields. By JULIA ROBINSON | 950 |
| Concerning local separability in locally peripherally separable spaces. By L. B. TREYBIG | 957 |
| On the normal bundle of a sphere imbedded in Euclidean space. By W. S. MASSEY | 959 |
| Subsets and subgraphs with maximal properties. By OYSTEIN ORE and T. S. MOTZKIN | 965 |
| Sufficient conditions that a mapping be open. By C. J. TITUS | 970 |
| Properties of fixed point spaces. By E. H. CONNELL | 974 |
| On surfaces with the representation $z=f(x, y)$. By D. C. BENSON | 980 |
| On limits of module-systems. JOHANN SONNER | 983 |
| On the space-of-loops isomorphism. By JAMES STASHEFF | 987 |
| Existential Horn sentences. By R. C. LYNDON | 994 |
| A note on my paper *"On a result of G. D. Birkhoff on linear differential systems."* By P. MASANI | 999 |
| Errata, Volume 9 | 1000 |
| Errata, Volume 10 | 1000 |
| Index of Volume 10 | 1001 |
