JOSHUA CHOVER
WILHELM MAGNUS
S. M. SHAH
PETER UNGAR

VOLUME 16, NUMBER 6
DECEMBER, 1965

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1965.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to RTHUR AP. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139* or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois 61801*; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, 4 Washington Place, New York, New York 10002; in geometry and topology to ELDON DYER, Department of Mathematics, Rice University, Houston, Texas 77001; in other branches of analysis, applied mathematics, and all other fields to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850 or FRITZ JOHN. All other communications to the editors should be addressed to the Managing Editor, R. C. BUCK. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1965. The subscription price is $11.00. Vols. 1–15 (1950–1964) are available at the price of $14.00 each. Volume 1 was published in 1950.

* Please note this change of editor effective January 1966.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

All inquiries for Volumes 1–69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for Volumes 70–120 should be directed to the American Mathematical Society.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $11.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

INDEX TO VOLUME 16

*Starred items are "Shorter Notes"

Adams, J. F., Lax, P. D. and Phillips, R. S. *On matrices whose real linear combinations are nonsingular*, 318.

Adler, R. L. and Palais, R. *Homeomorphic conjugacy of automorphisms on the torus*, 1222.

Akcoglu, M. A. *An ergodic lemma*, 388.

Akcoglu, M. A. and Chacon, R. V. *Generalized eigenvalues of automorphisms*, 676.

Albert, A. A. *On associative division algebras of prime degree*, 799.

Almgren, F. J., Jr. *Mass continuous cochains are differential forms*, 1291.

Anderson, D. R. *On connected irresolvable Hausdorff spaces*, 463.

*Andrews, G. E. *A simple proof of Jacobi's triple product identity*, 333.

Andrews, J. J. and Curtis, M. L. *Free groups and handlebodies*, 192.

Arbib, Michael and Blum, Manuel. *Machine dependence of degrees of difficulty*, 442.

Armstrong, J. W. *On the indecomposability of torsion-free abelian groups*, 323.

Artemiadis, Nicolas. *On a class of holomorphic functions*, 879.

Askey, Richard. *Orthogonal expansions with positive coefficients*, 1191.

Atchison, T. A. *A class of Riemann surfaces*, 731.

Aull, C. E. *A note on countably paracompact spaces and metrization*, 1316.

Auslander, L. and Schenkman, E. *Free groups, Hirsch-Plotkin radicals, and applications to geometry*, 784.

Auslander, Louis. *An account of the theory of crystallographic groups*, 1230.

Austin, A. K. *A note on models of identities*, 522.

Austin, Donald. *A geometric proof of the Lebesgue differentiation theorem*, 220.

Ax, James. *On the undecidability of power series fields*, 846.

Ax, James. *Proof of some conjectures on cohomological dimension*, 1241.

Barr, Michael. *A cohomology theory for commutative algebras*. I, 1379.

Barr, Michael. *A cohomology theory for commutative algegras*. II, 1385.

Barth, T. J. *Extension of normal families of holomorphic functions*, 1236.

Bass, H. *A remark on an arithmetic theorem of Chevalley*, 875.

Baxter, W. E. *Concerning the commutator subgroup of a ring*, 803.

Bear, H. S. *A geometric characterization of Gleason parts*, 407.

Bennett, Ralph. *Embedding products of chainable continua*, 1026.

Berberian, S. K. *On the extension of Borel measures*, 415.

Berg, I. D. *Open sets of conservative matrices*, 719.

Bergman, G. M. *A counter example in differential algebra*, 1407.

Bethel, E. L. *A note on a reducible continuum*, 1331.

Bing, R. H. *A translation of the normal Moore space conjecture*, 612.

Birkhoff, Garrett. *Note on positive linear operators*, 14.

Bishop, R. L. and Goldberg, S. I. *On the second cohomology group of a Kaehler manifold of positive curvature*, 119.

Blackburn, Norman. *Conjugacy in nilpotent groups*, 143.

Blakley, G. R. and Roy, Prabir. *A Hölder type inequality for symmetric matrices with nonnegative entries*, 1243.

Blum, J. R. and Hanson, D. L. *A note on the ergodic theorem*, 413.

Blum, Manuel. See Arbib, Michael.

Bogdanowicz, Witold. *On nowhere differentiable functions being a convolution of continuous functions*, 97.

Bourgin, D. G. *A condition for finite dimensional convexity*, 1311.
Brahana, T. R., Fort, M. K., Jr. and Horstman, W. G. *Homotopy for cellular set-valued functions*, 455.
Brickell, F. *A new proof of Deicke's theorem on homogeneous functions*, 190.
Brickell, F. *On the differentiability of affine and projective transformations*, 567.
Bronsted, A. and Rockafellar, R. T. *On the subdifferentiability of convex functions*, 605.
Browder, F. E. *Commutators with powers of an unbounded operator in Hilbert space*, 1211.
Brown, Arlen and Douglas, R. G. *Partially isometric Toeplitz operators*, 681.
Brown, R. F. and Fadell, Edward. *Non-singular path fields on compact topological manifolds*, 1342.
Bruckner, A. M. and Leonard, John L. *Stationary sets and determining sets for certain classes of Darboux functions*, 935.
Buchsbaum, D. A. and Rim, D. S. *A generalized Koszul complex*, III. *A remark on generic acyclicity*, 555.
Buckholtz, J. D. *The maximum term of an entire series with gaps*, 272.
Butts, H. S. *Quasi-invertible prime ideals*, 291.
Camion, Paul. *Characterization of totally unimodular matrices*, 1068.
Cantor, D. G. and Phelps, R. R. *An elementary interpolation theorem*, 523.
Cantor, D. G. *On powers of real numbers* (mod 1), 791.
Carlitz, L. *The coefficients in an asymptotic expansion*, 248.
Carlson, B. C. *A hypergeometric mean value*, 759.
Casler, B. G. *An imbedding theorem for connected 3-manifolds with boundary*, 559.
Ceder, J. G. *On a problem of Grünbaum*, 188.
Chacon, R. V. See Akcoglu, M. A.
Chamberlain, E. W. *Differential operators approximately of the form* $(1-(1/W(x))d/dx)^n$, 725.
Chandler, R. E. *Cellular subcomplexes of piecewise-linear manifolds*, 599.

STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION

(Act of October 23, 1962; Section 4369, Title 39' United States Code)

1. *Date of filing:* September 22, 1965
2. *Title of Publication:* Proceedings of the American Mathematical Society
3. *Frequency of issue:* Six issues per year
4. *Location of known office of publication:* P. O. Box 6248, Providence, R. I. 02904
5. *Location of the headquarters or general business offices of the publishers:* P. O. Box 6248, Providence, R. I. 02904
6. *Names and addresses of publisher, editor and managing editor. Publisher:* American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904. *Editor:* Eldon Dyer, Chairman of the Editorial Committee, P. O. Box 6248, Providence, R. I. 02904. *Managing editor:* None
7. *Owner:* None
8. *Known bondholders, mortgagees, and other security holders owning or holding 1 percent or more of total amount of bonds, mortgages or other securities:* None
9. Paragraphs 7 and 8 include, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, also the statements in the two paragraphs show the affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner. Names and addresses of individuals who are stockholders of a corporation which itself is a stockholder or holder of bonds, mortgages or other securities of the publishing corporation have been included in paragraphs 7 and 8 when the interests of such individuals are equivalent to 1 percent or more of the total amount of the stock or securities of the publishing corporation.

I certify that the statements made by me above are correct and complete.—Gordon L. Walker

Journals Published by the
American Mathematical Society

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Two volumes will be published in 1965, Volume 29 and Volume 30. Each volume will consist of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This journal contains the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR in translation. It appears six times a year, each bimonthly issue corresponding to one volume of the Soviet DOKLADY (The DOKLADY AKADEMII NAUK SSSR is issued three times a month, six issues constituting a volume.)

Chinese Mathematics—Acta

This is a cover to cover translation into English of Acta Mathematica Sinica, published by Academia Sinica Peking, People's Republic of China. Acta Mathematica Sinica contains current research in all fields of pure mathematics.

Notices of the American Mathematical Society

This journal announces the programs of the meetings of the Society. It carries the abstracts of all contributed papers presented at the meetings of the Society and publishes news items of interest to mathematical scientists.

All communications should be addressed to the Editor, P. O. Box 6248, Providence, Rhode Island 02904. News items and insertions for each issue must be in the hands of the editor on or before the deadline for the abstracts for the papers to be presented in the meetings announced in that issue. These deadlines are published regularly on the back of the title page.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Contents—*Continued from back cover*

Nonsingular path fields on compact topological manifolds. By R. F. BROWN and EDWARD FADELL 1342
Lie groups and products of spheres. By P. G. KUMPEL, JR. 1350
Contractible complexes in S^n. By L. C. GLASER 1357
Hilbert manifolds without epiconjugate points. By NATHANIEL GROSSMAN 1365
A remark concerning quasi-Frobenius rings. By E. A. RUTTER, JR. 1372
On the subgroups of the Picard group. By H. V. WALDINGER 1373
A cohomology theory for commutative algebras. I. By MICHAEL BARR 1379
A cohomology theory for commutative algebras. II. By MICHAEL BARR 1385
On partially ordered groups satisfying the Riesz interpolation property. By J. R. TELLER 1392
On flat extensions of Noetherian rings. By BIRGER IVERSEN 1401
A counterexample in differential algebra. By G. M. BERGMAN 1407
On the characteristic roots of matrices. By D. E. CRABTREE 1410
Three results for locally compact groups connected with the Haar measure density theorem. By B. J. MUELLER 1414
Errata to *On a realisation of a complemented algebra*. By P. P. SAWOROTNOW 1417
Errata to *Multiple transitivity of primitive permutation groups*. By L. A. MACHTINGER 1417
Index to Volume 16 1418

CONTENTS

Vol. 16, No. 6 DECEMBER, 1965 Whole No. 96

Page

The summation of certain series of infinite regressive isols. By F. J. SANSONE 1135
Some theorems on the Fourier analysis of positive definite functions. By L. SCHMETTERER .. 1141
A note on the Hausdorff moment problem. By C. W. LEININGER 1146
A note on the two cardinal problem. By C. C. CHANG 1148
A remark on Wiener's Tauberian theorem. By M. KAC 1155
Exact probability distribution functions of some Rényi type statistics. By MIKLÓS CSÖRGÖ 1158
Banach algebras of scalar-type elements. By BERTRAM WALSH 1167
On the de la Vallée Poussin derivative. By C. KASSIMATIS 1171
A probability bound for integrals with respect to stochastic processes with independent increments. By D. L. HANSON and L. H. KOOPMANS 1173
Echelon spaces of order ∞. By E. DUBINSKY 1178
On extreme points of the numerical range of normal operators. By C. R. MACCLUER 1183
On the mean modulus of trigonometric polynomials whose coefficients have random signs. By S. UCHIYAMA 1185
Orthogonal expansions with positive coefficients. By RICHARD ASKEY 1191
Iterated w^*-sequential closure of a Banach space in its second conjugate. By R. D. MCWILLIAMS 1195
Inner and outer functions on Riemann surfaces. By MICHAEL VOICHICK and LAWRENCE ZALCMAN 1200
Differentiability almost everywhere. By C. J. NEUGEBAUER 1205
Commutators with powers of an unbounded operator in Hilbert space. By F. E. BROWDER 1211
Proof of some conjectures on cohomological dimension. By JAMES AX 1214
Homeomorphic conjugacy of automorphisms on the torus. By R. L. ADLER and R. PALAIS 1222
Invertible solutions to the operator equation $TA-BT=C$. By D. G. LUENBERGER 1226
An account of the theory of crystallographic groups. By LOUIS AUSLANDER 1230
Extension of normal families of holomorphic functions. By T. J. BARTH 1236
Adjoint linear differential operators. By ANTON ZETTL 1239
Lower bounds for solutions of differential inequalities in Hilbert space. By HAJIMU OGAWA 1241
A Hölder type inequality for symmetric matrices with nonnegative entries. By G. R. BLAKLEY and PRABIR ROY 1244
Fourier cosine transforms whose real parts are non-negative in a strip. By D. V. WIDDER 1246
Some remarks on boundary value problems. By R. S. FREEMAN 1253
A general convergence criterion for continued fractions $K(a_n/b_n)$. By K. L. HILLAM and W. J. THRON 1256
Smoothness of functions generated by Riesz products. By P. L. DUREN 1263
The rapidity of convergence of the Hermite-Fejér approximation to functions of one or several variables. By O. SHISHA and B. MOND 1269
A note on means of entire functions. By T. V. LAKSHMINARASIMHAN 1277
Translations of the image domains of analytic functions. By T. H. MACGREGOR 1280
An L^1 extremal problem for polynomials. By D. J. NEWMAN 1287
Mass continuous cochains are differential forms. By F. J. ALMGREN, JR. 1291
On the asymptotic behavior of solutions of the differential equation $y''+p(x)y=0$. By A. C. LAZER 1295
On Bergman's kernel function for some uniformly elliptic partial differential equations. By G. G. WEILL 1299
Local convexity and L_n sets. By F. A. VALENTINE 1305
A condition for finite dimensional convexity. By D. G. BOURGIN 1311
A universal snake-like continuum. By R. M. SCHORI 1313
A note on countably paracompact spaces and metrization. By C. E. AULL 1316
Some characterizations of semi-locally connected spaces. By YU-LEE LEE 1318
A technique for constructing examples. By M. E. RUDIN 1320
On dense subspaces of Moore spaces. By BEN FITZPATRICK, JR. 1324
A remark on the existence of a G-structure. By E. T. KOBAYASHI 1329
A note on a reducible continuum. By E. L. BETHEL 1331
Cellularity at the boundary of a manifold. By CHARLES GREATHOUSE 1334
