H. S. SHAPIRO
J. A. WOLF

VOLUME 17, NUMBER 1
FEBRUARY, 1966

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1966.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139 or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois 61801; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10002; in geometry and topology to ELDON DYER, Department of Mathematics, Columbia University, New York, New York; in other branches of analysis, applied mathematics, and all other fields to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850 or FRITZ JOHN. All other communications to the editors should be addressed to the Managing Editor, R. C. BUCK. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1966. The subscription price is $12.00. Vols. 1–16 (1950–1965) are available at the price of $14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

All inquiries for Volumes 1–69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York 3, New York. Orders for Volumes 70–120 should be directed to the American Mathematical Society.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

CONTENTS

Vol. 17, No. 1 FEBRUARY, 1966 Whole No. 97

Page

Note on an irrational power series. By H. DAVENPORT 1
A mean value theorem for the heat equation. By W. FULKS 6
Convergence of positive functions in the space on Mikusiński operators. By T. K. BOEHME 12
Enclosure theorems for eigenvalues of elliptic operators. By C. A. SWANSON 18
Upper bounds for a Bloch constant. By P.-S. CHIANG and A. J. MACINTYRE .. 26
Some inequalities for hypergeometric functions. By B. C. CARLSON 32
On the asymptotic growth of solutions to a nonlinear equation. By S. P. HASTINGS 40
Exponential solutions of linear systems of differential equations whose coefficient matrix is skew symmetric. By I. J. EPSTEIN 48
On the solutions of the differential equation $y''+p^2y=0$. By E. J. MCSHANE .. 55
On a result of Nehari. By J. A. JENKINS 62
Convergence of $i^{i^{i^{\cdots}}}$. By A. J. MACINTYRE 67
A note on the identification of linear systems. By RICHARD BELLMAN 68
A Volterra equation with a very singular kernel. By E. L. ROETMAN 71
Two elementary theorems on the interpolation of linear operators. By R. O'NEIL 76
Extension of functionals and inequalities of an Abelian semi-group. By ROBERT KAUFMAN 83
On pure states of C^*-algebras. By SHÔICHIRÔ SAKAI 86
A complementary triangle inequality in Hilbert and Banach spaces. By J. B. DIAZ and F. T. METCALF 88
On the structure of representations of continuous functions of several variables as finite sums of continuous functions of one variable. By D. A. SPRECHER .. 98
Isomorphism types of index sets of partial recursive functions. By LOUISE HAY 106
Elementary proof of Hu's theorem on isotone mappings. By N. C. HSU 111
The Baire classification of ordinary and approximate partial derivatives. By L. E. SNYDER 115
Tensor products of locally convex algebras. By H. A. SMITH 124
Square roots in Banach algebras. By L. T. GARDNER 132
Inclusion relations among Orlicz spaces. By ROBERT WELLAND 135
On a combinatorial problem of Erdös. By D. KLEITMAN 139
Nonexistence of quasi-invariant measures on infinite-dimensional linear spaces. By JACOB FELDMAN 142
A note on the recursive unsolvability of primitive recursive arithmetic. By R. E. GRANDY 146
Weak compactness in locally convex spaces. By J. D. PRYCE 148
Permanently optimal strategies in extensive games. By W. H. CLINGMAN 156
Spectra of tensor products of operators. By ARLEN BROWN and CARL PEARCY 162
Kirzbraun's theorem and Kolmogorov's principle. By EDWARD SILVERMAN .. 166
On the Sheffer A-type of polynomials generated by $A(t)\psi[xB(t)]$. By J. L. GOLDBERG 170
Another equivalent form of the axiom of choice. By J. R. ISBELL and F. B. WRIGHT 174
Equivalence of connectivity maps and peripherally continuous transformations. By M. R. HAGAN 175

Continued on back cover

Contents—*Continued from inside back cover*

On the annulus conjecture. By R. C. KIRBY 178
Uncountably many different involutions of S^3. By W. R. ALFORD 186
On complete lattices having the Hausdorff interval topology. By KOICHI ATSUMI 197
The cone axiom implies the homotopy axiom. By R. J. KNILL 200
A property of l_p spaces. By J. R. CALDER 202
A characterization of orbits. By J. W. ENGLAND 207
A Schwarz lemma for bounded symmetric domains. By ADAM KORÁNYI 210
A characterization of tame 2-spheres in E^3. By C. A. PERSINGER 213
Finite supersolvable wreath products. By J. R. DURBIN 215
Partially ordered groups of the second and third kinds. By A. H. CLIFFORD 219
Permanents of direct products. By MARVIN MARCUS 226
An estimate for the enumerative functions of certain sets of integers. By R. L. ROBINSON 232
Antiflexible algebras which are not power-associative. By D. J. RODABAUGH .. 237
Solvability of linear homogeneous difference equations by elementary operations. By C. H. FRANKE 240
Cyclic injective modules of full linear rings. By B. L. OSOFSKY 247
An existence theorem for difference polynomials. By R. M. COHN 254
A note on the p-adic convergence of solutions of linear differential equations. By D. N. CLARK 262
Nilpotent elements in rings of integral representations. By IRVING REINER ... 270
Note on analytically unramified semi-local rings. By L. J. RATLIFF, JR. 274
Block idempotents of twisted group algebras. By W. F. REYNOLDS 280

SHORTER NOTES

Examples of minimal parallel slit domains. By JIRÔ TAMURA, KÔTARO OIKAWA and KEIJIRO YAMAZAKI 283
Successive differences of bounded sequences. By D. J. NEWMAN 285

GEORGE BANTA COMPANY, INC., MENASHA, WISCONSIN
