

PROCEEDINGS
OF THE
AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ELDON DYER	R. C. BUCK
W. H. J. FUCHS	FRITZ JOHN
A. P. MATTUCK	IRVING REINER

WITH THE COÖPERATION OF

D. A. BUCHSBAUM	WILHELM MAGNUS	S. M. SHAH
JOSHUA CHOVER	MELVIN ROTHENBERG	H. S. SHAPIRO
D. J. LEWIS		J. A. WOLF

VOLUME 17, NUMBER 3
JUNE, 1966

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1966.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called **SHORTER NOTES** was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the **PROCEEDINGS** should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the **PROCEEDINGS** contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary *The Manual for Authors* published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to **ARTHUR P. MATTUCK**, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139 or **IRVING REINER**, Department of Mathematics, University of Illinois, Urbana, Illinois 61801; in probability, real variables, logic, and foundations to **R. C. BUCK**, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either **R. C. BUCK**, or **Fritz JOHN**, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012; in geometry and topology to **ELDON DYER**, Graduate Studies Division, The City University of New York, New York, New York 10036; in other branches of analysis, applied mathematics, and all other fields to **W. H. J. FUCHS**, White Hall, Cornell University, Ithaca, New York 14850 or **Fritz JOHN**. All other communications to the editors should be addressed to the Managing Editor, **R. C. BUCK**. Inquiries from authors regarding reprints and changes of address for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1966. The subscription price is \$12.00. Vols. 1-16 (1950-1965) are available at the price of \$14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the **PROCEEDINGS**.

All inquiries for Volumes 1-69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10012. Orders for Volumes 70-122 should be directed to the American Mathematical Society.

The **PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY** is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is \$12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Contents—Continued from back cover

On immersions with singular second fundamental form operators. By E. F. STIEL.....	699
On k -spaces and function spaces. By R. W. BAGLEY and J. S. YANG.....	703
On the squares of oriented manifolds. By R. E. STONG.....	706
A characterization of hereditarily indecomposable continua. By W. R. ZAME.....	709
Some wild imbeddings in codimension two. By RALPH TINDELL.....	711
Ideals generated by products. By A. P. HILLMAN, D. G. MEAD, K. B. O'KEEFE and E. S. O'KEEFE.....	717
A dynamic programming generalization of xy to n variables. By A. P. HILLMAN, D. G. MEAD, K. B. O'KEEFE and E. S. O'KEEFE.....	720
Completely 0-simple and homogeneous n regular semigroups. By J. B. KIM.....	724
Equations in free metabelian groups. By R. C. LYNDON.....	728
The number of isomorphism types of finite algebras. By M. A. HARRISON.....	731
l -sequences for nonembeddable functions. By E. JABOTINSKY.....	738
A problem on endomorphisms of primary Abelian groups. By R. W. STRINGALL.....	742
Hadamard matrices of order cube plus one. By K. GOLDBERG.....	744
A partial geometry $(q^3+1, q^2+1, 1)$ and corresponding PBIB design. By C. T. BENSON.....	747
The differential ideal $[uv]$. By K. B. O'KEEFE and E. S. O'KEEFE.....	750
Unusual power products and the ideal $[y^2]$. By K. B. O'KEEFE.....	757
Generalization of Dehn's result on the conjugacy problem. By SEYMOUR LIPSCHUTZ.....	759
Countable direct sums of torsion complete groups. By J. M. IRWIN, FRED RICHMAN and E. A. WALKER.....	763

SHORTER NOTES

Operators with closed range. By ROBERT KAUFMAN.....	767
A short proof of Jacobi's four square theorem. By L. CARLITZ.....	768
Addendum to <i>Local trajectory equivalence of differential equations</i> . By COURTNEY COLEMAN.....	770
Errata to <i>Transformation groups in the theory of topological loops</i> . By S. N. HUDSON.....	770

CONTENTS

Vol. 17, No. 3

JUNE, 1966

Whole No. 99

	Page
Some relations associated with an extension of Koshliakov's formula. By KUSUM SONI.....	543
On the generalisation of a formula of Rainville. By JYOTI CHAUDHURI	552
Periodic solutions of hyperbolic partial differential equations. By A. K. AZIZ.....	557
The uniformization of a hyperbolic Riemann surface. By GEORGE INNIS.....	567
Inner factors and Blaschke products. By NORMAN RUSHFIELD.....	572
On a bounded increasing power series. By P. B. KENNEDY AND P. SZÜSZ	580
On the boundary behavior of Blaschke products in the unit disk. By PETER COLWELL.....	582
On functions satisfying $R\{f(z)/z\} > 0$. By KUNIO YAMAGUCHI.....	588
On functions satisfying the mean value property with respect to a product measure. By A. M. GARSIA and E. RODEMICH.....	592
The existence of proper solutions of a second order ordinary differential equation. By J. D. SCHUUR.....	595
On polynomials characterized by a certain mean value property. By LEOPOLD FLATTO.....	598
A general uniqueness theorem. By R. D. MOYER.....	602
On the geometry of streamlines in hydromagnetic fluid flows when the magnetic field is along a fixed direction. By M. Z. v. KRZYWOBLOCKI	608
A comparison theorem for elliptic differential equations. By C. A. SWANSON.....	611
q -analogues of Cauchy's formulas. By W. A. AL-SALAM.....	616
On subharmonicity of doubly subharmonic functions. By M. G. ARSOVE.....	622
A disconjugacy condition for $y''' + a_2y'' + a_1y' + a_0y = 0$. By R. M. MATHSEN.....	627
Generalized derivatives and the de la Vallée Poussin derivative. By C. KASSIMATIS.....	633
Two theorems in stability theory. By J. F. P. MARTIN.....	636
Elementary proof of a theorem on conformal rigidity. By EDGAR REICH	644
Čebyšev subspaces of finite dimension in L_1 . By R. R. PHELPS.....	646
Discriminatory solutions of n -person games. By GUILLERMO OWEN...	653
Linear continuous functionals on the space (BV) with weak topologies. By T. H. HILDEBRANDT.....	658
Metric entropy of certain classes of Lipschitz functions. By A. C. VOSBURG.....	665
Bases in vector spaces and the axiom of choice. By J. D. HALPERN	670
Locally connected 2-cell and 2-sphere-like continua. By RALPH BENNETT.....	674
Enumeration of mixed graphs. By FRANK HARARY and ED PALMER	682
Reflexive compact mappings. By EDWIN DUDA.....	688
Left zero simplicity in semirings. By JOHN SELDEN.....	694
