PROCEEDINGS

OF THE

AMERICAN MATHEMATICAL SOCIETY

EDITED BY

ELDON DYER
R. C. BUCK
W. H. J. FUCHS
FRITZ JOHN
A. P. MATTUCK
IRVING REINER

WITH THE COÖPERATION OF

D. A. BUCHSBAUM
JOSHUA CHOVER
D. J. LEWIS
WILHELM MAGNUS
MELVIN ROTHENBERG
S. M. SHAH
H. S. SHAPIRO
J. A. WOLF

VOLUME 17, NUMBER 4
AUGUST, 1966

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Journals Published by the
American Mathematical Society

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, research problems and a department of research announcements.

One volume of six numbers is planned for 1966.

Proceedings of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and is devoted principally to the publication of original papers of moderate length. A department called SHORTER NOTES was established in 1961. The purpose of this department is to publish very short papers (maximum length, 1 printed page) of an unusually elegant and polished character, for which there is normally no other outlet. The definitive new proof of an important and long-known theorem, an illuminating new fact, or an interesting lemma used for proof of a theorem in a different field are examples of subjects suitable for publication in this department.

Articles for insertion in the PROCEEDINGS should be typewritten, double spaced. The maximum length of an acceptable paper is 8 printed pages. (A page of the PROCEEDINGS contains an average of 400 words; a typewritten page contains an average of 300 words. A rough rule of thumb, accordingly, is that under 10 typewritten pages is probably within the allowed limit, but over 11 typewritten pages is probably not.) The greatest possible care should be taken in preparing the manuscript and if necessary The Manual for Authors published by the Society should be consulted. The authors should keep a complete copy.

Papers in algebra and number theory should be sent to ARTHUR P. MATTUCK, Department of Mathematics, Massachusetts Institute of Technology, Cambridge, Massachusetts 02193 or IRVING REINER, Department of Mathematics, University of Illinois, Urbana, Illinois 61801; in probability, real variables, logic, and foundations to R. C. BUCK, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53705; in abstract analysis to either R. C. BUCK, or FRITZ JOHN, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012; in geometry and topology to ELDON DYER, Graduate Studies Division, The City University of New York, New York, New York 10036; in other branches of analysis, applied mathematics, and all other fields to W. H. J. FUCHS, White Hall, Cornell University. Ithaca, New York 14850 or FRITZ JOHN. All other communications to the editors should be addressed to the Managing Editor, R. C. BUCK. Inquiries from authors regarding reprints and changes of addresses for mailing galley proof should be sent to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

One volume of six numbers is planned for 1966. The subscription price is $12.00. Vols. 1–16 (1950–1965) are available at the price of $14.00 each. Volume 1 was published in 1950.

Transactions of the American Mathematical Society

This journal is devoted entirely to research in pure and applied mathematics, and includes in general, longer memoirs than the PROCEEDINGS.

All inquiries for Volumes 1–69 should be directed to Johnson Reprint Corporation, 111 Fifth Avenue, New York, New York 10012. Orders for Volumes 70–123 should be directed to the American Mathematical Society.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published bimonthly, in February, April, June, August, October, and December. Price per annual volume is $12.00. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R. I. 02904.

Second-class postage paid at Providence, Rhode Island and additional mailing offices. Authorization is granted under the authority of the act of August 24, 1912, as amended by the act of August 4, 1947 (sec. 34.21, P. L. & R.). Acceptance for mailing at the special rate of postage provided for in section 34.40, paragraph d., P. L. & R.

Contents—*Continued from back cover*

Regular topologies and posets. By W. J. Pervin and H. J. Biesterfeldt, Jr. 903
The maximal GCR ideal in an AW*-algebra. By Herbert Halpern . . 906
A note on the action of p-groups of abelian groups. By D. S. Passman 915
Outer automorphisms of certain p-groups. By Charles Godino 922
On splitting fields for certain Lie algebras of prime characteristic. By Richard T. Barnes 930
On extending nonvanishing semicharacters. By W. W. Comfort and Paul Hill 936
Polynomial rings with a pivotal monomial. By S. K. Jain 942
Correction to "On matrices whose real linear combinations are nonsingular." By J. F. Adams, Peter D. Lax and Ralph S. Phillips . . . 945
On the number of inequivalent binary unimodular forms. By Samson M. Rosenzweig 948
A note on two set-transitive permutation groups. By Chong-Yun Chao 953
A note on the Brauer group. By Alan McConnell 956

SHORTER NOTES

Abelian formal groups. By Ian. G. Connell 958
The free modular lattice, $FM(2+2+2)$, is infinite. By Howard L. Rolf 960
Idempotents in group rings. By D. B. Coleman 962

GEORGE BANTA COMPANY, INC., MENASHA, WISCONSIN

CONTENTS

Vol. 17, No. 4 AUGUST, 1966 Whole No. 100

Page

An inversion formula for a kernel involving a Mellin-Barnes type integral. By R. K. Saxena . . . 771
Uniqueness theorem for the reduced wave equation under an Nth order differential boundary condition. By R. C. Morgan . . . 780
Maximum and minimum first eigenvalues for a class of elliptic operators. By Carlo Pucci . . . 788
On dual series relations involving series of generalized Bateman K-functions. By K. N. Srivastava . . . 796
On the stability of a perturbed nonlinear system. By Aaron Strauss 803
Periodic solutions of fourth-order differential equations. By George R. Sell . . . 808
On cubic transformations of orthogonal polynomials. By Pierre Barrucand and David Dickinson . . . 810
Remarks on global asymptotic stability of certain quasi-linear differential equations. By James S. W. Wong . . . 815
On a class of meromorphic functions. By I. N. Baker . . . 819
On the boundary behavior of functions meromorphic in the unit disk. By Peter Colwell . . . 822
The homeomorphic transformation of c-sets into d-sets. By William J. Gorman III . . . 825
Lebesgue equivalence to functions of the first Baire class. By William J. Gorman III . . . 831
A representation theorem for Archimedean linear lattices. By Leon Brown and Hidegoro Nakano . . . 835
Completeness, the recursion theorem, and effectively simple sets. By Donald A. Martin . . . 838
Projections and retractions. By John B. Conway . . . 843
Continuous linear operators on spaces of continuous functions. By H. Elton Lacey and Peter D. Morris . . . 848
On topology induced by measure. By P. A. Fillmore . . . 854
Isomorphisms of group algebras. By Robert S. Strichartz . . . 858
A note on representing measures. By N. T. Peck . . . 863
On the oscillation of sums of random variables. By D. L. Hanson and Melvin Katz . . . 864
The boundary of the range of a vector measure. By Volker Baumann 865
A paracompact semi-metric space which is not an M_3-space. By R. W. Heath . . . 868
Exotic metrics on immersed surfaces. By Joseph A. Wolf . . . 871
A metrization theorem. By Janet S. Allsbrook . . . 878
On conformally-flat Riemannian space of class one. By R. N. Sen . . . 880
Complementation in the lattice of T_1-topologies. By A. K. Steiner . . . 884
Spaces with acyclic point complements. By Michael C. McCord . . . 886
Homotopic arcs are isotopic. By C. D. Feustel . . . 891
Spaces of constancy of curvature operators. By Alfred Gray . . . 897
