Journals Published by the
American Mathematical Society

Proceedings of the American Mathematical Society

The PROCEEDINGS of the American Mathematical Society is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The maximum length of an acceptable paper is about 8 printed pages. (Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.) The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary.

Very short notes (not to exceed 1 printed page) of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. (Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example of counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.)

Papers in algebra and number theory should be sent to ARTHUR MATTUCK, Room 2-275, Mathematics Department, Massachusetts Institute of Technology, Cambridge, Massachusetts 02139, or to IRVING REINER, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

Papers in modern or classical analysis should be sent to IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105, or to W. H. J. FUCHS, White Hall, Cornell University, Ithaca, New York 14850.

Papers in algebraic geometry should be sent to ARTHUR MATTUCK; papers in set-theoretic and general topology to ERNEST MICHAEL, Mathematics Department, University of Washington, Seattle, Washington 98105; in algebraic topology and all other types of geometry to P. EMERY THOMAS, Mathematics Department, University of California, Berkeley, California 94720.

Papers in applied mathematics, differential equations, and related areas of analysis should be sent to FRED BRAUER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in probability, statistics, and related fields should be sent to JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706.

Papers in logic, set theory, and related areas should be sent to W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801.

All other communications should be addressed to the Managing Editor, ARTHUR MATTUCK, at the above address.

Inquiries from authors regarding reprints, or changes of addresses for mailing proofs, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

Four volumes of three issues are planned for 1969. The subscription price is \$80.00 for the four volumes. Back issues of Volumes 1-16 are available at a price of \$14.00 each and Volumes 17-21 at a price of \$18.00 each.

The American Mathematical Society also publishes the following journals which accept research papers: BULLETIN, TRANSACTIONS and MATHEMATICS OF COMPUTATION. For details and the list of editors, please consult a recent issue. Reviews of the current mathematical literature of the world are published in MATHEMATICAL REVIEWS; editorial correspondence for this journal should be sent to: 416 Fourth Street, Ann Arbor, Michigan 48103.

The PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscriptions, orders for back numbers, and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, 321 S. Main St., P. O. Box 6248, Providence, R. I. 02904.
Second-class postage paid at Providence, Rhode Island and additional mailing offices.

Contents—Continued from back cover

Approximation of real continuous functions on Lindelöf spaces. By A. W. HAGER.....	156
Lebesgue characterizations of uniformity-dimension functions. By J. C. SMITH, Jr.....	164
On centralizers of involutions. By MARCEL HERZOG.....	170
On the isomorphisms of two metacyclic groups. By B. G. BASMAJI..	175
On the zeros of the Riemann zeta-function. By B. C. BERNDT.....	183
Commutative rings whose matrix rings are Baer rings. By C. R. YOHE	189
Weight spaces and irreducible representations of simple Lie algebras. By F. W. LEMIRE.....	192
On the norms of units in quadratic fields. By H. F. TROTTER.....	198
CCN-groups of order divisible by three primes. By H. J. BERNSTEIN.	202
Galois cohomology and class number in constant extension of algebraic function fields. By J. R. C. LEITZEL.....	206
On finitely generated subgroups of a free group. By A. KARRASS and D. SOLITAR.....	209
On subgroups of finite solvable groups. By AVINOAM MANN.....	214
On Krull overrings of a noetherian domain. By WILLIAM HEINZER..	217
Secondary cohomology operations and complex vector bundles. By S. GITLER, M. MAHOWALD and R. J. MILGRAM.....	223
Extending homeomorphisms of $S^p \times S^q$. By RALPH TINDELL.....	230
The connection between two geometrical axioms of H. N. Gupta. By WOLFRAM SCHWABHÄUSER.....	233
Groups which are cogroups. By M. L. CURTIS and J. DUGUNDJI....	235
Rational cohomology operations and Massey products. By DAVID KRAINES.....	238
Compact means in the plane. By PHILIP BACON.....	242
Montgomery-Samelson singular fiberings of spheres. By P. L. ANTO- NELLI.....	247
On periodic maps which respect a symplectic structure. By C. B. THOMAS.....	251
Remarks on commuting involutions. By LAWRENCE CONLON.....	255
An inequality similar to Opial's inequality. By K. M. DAS.....	258
The nonhomogeneous linear difference equation with variable difference interval. By TOMLINSON FORT.....	262
A nonhomogeneous linear differential system with interface conditions. By R. N. BRYAN.....	270
Sturmian theorems for hyperbolic equations. By KURT KREITH.....	277
On an inequality of Lyapunov. By HARRY HOCHSTADT.....	282
Uniqueness for second order linear parabolic operators. By R. D. RUPP, JR.....	285
An elementary derivation of Khintchine's estimate for large devia- tions. By MARK PINSKY.....	288
On continuity and other analytic properties of stochastic process sam- ple functions. By M. R. LEADBETTER and E. W. WEISSNER.....	291
Positive operators on $C(X)$. By S. R. FOGUEL.....	295
A note about Wiener-Hopf sets. By GÉRARD LETAC.....	298

SHORTER NOTE

Orientability of hypersurfaces in R^n . By HANS SAMELSON.....	301
---	-----

CONTENTS

Vol. 22, No. 1

JULY, 1969

Whole No. 121

	Page
On the convergence of Bernstein polynomials for some unbounded analytic functions. By P. C. TONNE.....	1
The structure of $B[c]$ and extensions of the concept of conull matrix. By H. I. BROWN, D. R. KERR and H. H. STRATTON.....	7
On the relation between the Abel and Borel-type methods of summability. By B. L. R. SHAWYER.....	15
Multipliers of H^1 and Hankel matrices. By J. H. HEDLUND.....	20
On the multipliers of H^p spaces. By P. L. DUREN.....	24
On composite abstract homogeneous polynomials. By MORRIS MARDEN	28
Basis preserving maps. By W. J. DAVIS.....	34
On the kernel function for the intersection of two simply connected domains. By T. J. SUFFRIDGE.....	37
On integration-by-parts for weighted integrals. By F. M. WRIGHT and J. D. BAKER.....	42
An asymptotic analog of the F. and M. Riesz radial uniqueness theorem. By K. F. BARTH and W. J. SCHNEIDER.....	53
Absolute continuity of Hamiltonian operators with repulsive potential. By R. B. LAVINE.....	55
Reflexivity of cyclic Banach spaces. By L. TZAFRIRI.....	61
Asymptotic convergence of operators in Hilbert space. By FRANK GILFEATHER.....	69
A note on the holomorphic functional calculus in a Banach algebra. By G. R. ALLAN.....	77
The structure of spectral operators with completely continuous imaginary part. By NOBORU SUZUKI.....	82
Invariant subspaces with invariant complements. By C. F. SCHUBERT.	85
Some remarks on infinitesimal generators of analytic semigroups. By J. A. GOLDSTEIN.....	91
Some types of Borel measures. By R. A. JOHNSON.....	94
On the Gleason and Harnack metrics for uniform algebras. By HEINZ KÖNIG.....	100
On the dual of Hornich's space. By J. A. CIMA.....	102
Determinantal rank and flat modules. By S. H. COX, JR.....	104
A nonidentity for right alternative rings. By ERWIN KLEINFELD and MARGARET HUMM KLEINFELD.....	109
Harrison primes in a ring with few zero divisors. By M. D. LARSEN..	111
On lower bounds for permanents of $(0, 1)$ matrices. By HENRYK MINC	117
A recursion formula for finite partition lattices. By T. J. BROWN.....	124
Idempotent Noether lattices. By K. P. BOGART.....	127
Nonimbeddable Noether lattices. By K. P. BOGART.....	129
A theorem on the semigroup of binary relations. By JAW-CHING YANG..	134
On the Hausdorff open continuous images of Hausdorff paracompact p -spaces. By H. H. WICKE.....	136
A note on Wallman spaces. By ALAN ZAME.....	141
A note on expansive mappings. By R. K. WILLIAMS.....	145
On the uniformization of Souslin \mathfrak{F} sets. By R. C. WILLMOTT.....	148
