APRIL, 1971

CODEN: PAMYAR

PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Proceedings of the American Mathematical Society

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. The maximum length of an acceptable paper is about 8 printed pages. Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.

SHORTER NOTES. Very short notes not to exceed 1 printed page of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

PREPARATION OF THE MANUSCRIPT. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) *subject classification numbers* representing the primary and secondary subjects of the article, followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to Mathematical Reviews, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

Submission of two copies of the manuscript is helpful, but by no means necessary.

SUBMISSION OF MANUSCRIPTS, REPRINTS AND ADDRESS CHANGES. See the last page of this issue.

SUBSCRIPTION INFORMATION. Five volumes are planned for 1971. The subscription price is \$72. Back issues of Volumes 1-16 are available at a price of \$14 each. Volumes 17-19 at a price of \$18 each, and Volumes 20-27 at a price of \$30 each.

THE PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscriptions, orders for back numbers and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P. O. Box 6248, Providence, R.I. 02904.

Second-class postage paid at Providence, Rhode Island, and additional mailing offices.

RESEARCH AND REVIEW JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

Bulletin of the American Mathematical Society

The journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The current issue of the journal lists editors to whom prospective publications should be addressed. Publication is bimonthly.

Transactions of the American Mathematical Society

This monthly journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than the PROCEEDINGS.

The current issue of the journal lists editors to whom prospective publications should be addressed.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Currently publication is monthly; two volumes are published each year, each volume consisting of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This bimonthly is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long.

Mathematics of the USSR—Izvestija

This journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIJA MATEMATIČESKAJA, published bimonthly by the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published bimonthly starting with Volume 1, Number 1, January-February, 1967, which corresponds to the Russian original Tom 31, Number 1.

Mathematics of the USSR—Sbornik

This journal is a cover-to-cover translation of MATEMATIČESKII SBORNIK (New Series), published monthly by the Moscow Mathematical Society and the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published monthly starting with Volume 1, Number 1, January 1967, which corresponds to the Russian original Tom 72 (114), No. 1.

Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper.

Algebra and number theory.

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

JOSEPH J. ROTMAN, Mathematics Department, University of Illinois, Urbana, Illinois 61801

Modern or classical analysis.

IRVING GLICKSBERG, Mathematics Department, University of Washington, Seattle, Washington 98105

W. H. J. FUCHS, Department of Mathematics, White Hall, Cornell University, Ithaca, New York 14850

ALLEN SHIELDS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48104

Algebraic geometry.

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

Set-theoretic and general topology.

ERNEST MICHAEL, Mathematics Department, University of Washington, Seattle, Washington 98105

Algebraic topology and all other types of geometry.

EMERY THOMAS, Mathematics Department, University of California, Berkeley, California 94720

Applied mathematics, differential equations, and related areas of analysis.

FRED BRAUER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

Probability, statistics, and related fields.

JOSHUA CHOVER, Mathematics Department, University of Wisconsin, Madison, Wisconsin 53706

Logic, set theory, and related areas.

W. W. BOONE, Mathematics Department, University of Illinois, Urbana, Illinois 61801

All other communications should be addressed to the Managing Editor, W. H. J. FUCHS, at the above address.

Reprints and Address Changes

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P. O. Box 6248, Providence, Rhode Island 02904.

CONTENTS—Continued from back cover

Coefficients of meromorphic schlicht functions. By PETER L. DUREN...	169
Invariant measures on locally compact semigroups. By ROGER RIGELHOF.....	173
Analyticity of determinants of operators on a Banach space. By JAMES S. HOWLAND.....	177
Unicity of the extremum problems in $H^1(U^n)$. By Kôzô YABUTA....	181
A comparison theorem. By WALTER LEIGHTON and WILLIAM Oo KIAN KE.....	185
Decomposition of function-lattices. By S. D. SHORE.....	189
Abstract martingales in Banach spaces. By J. J. UHL, JR.....	191
Almost periodic solutions of Poisson's equation. By YASUTAKA SIBUYA.	195

D. GEOMETRY

On congruence indices for simple closed curves. By S. G. WAYMENT....	199
On an integral formula of Gauss-Bonnet-Grotemeyer. By BANG-YEN CHEN.....	208
On differentiability of minimal surfaces at a boundary point. By TUNC GEVECI.....	213
Minimal immersions of 2-spheres in S^4 . By ERNST A. RUH.....	219

F. STATISTICS AND PROBABILITY

An extremal property of stochastic integrals. By STEVEN ROSENCRAINS.	223
--	-----

G. TOPOLOGY

A sufficient condition for an arc to be nearly polyhedral. By JAMES M. MCPHERSON.....	229
A topological characterization of the dilation in E^n . By L. S. HUSCH....	234
The commutator subgroups of the alternating knot groups. By KUNIO MURASUGI.....	237
Homeomorphism groups of weak solenoidal spaces. By JAMES T. ROGERS, JR. and JEFFREY L. TOLLEFSON.....	242
An example of Hilton and Roitberg. By ALLAN J. SIERADSKI.....	247
Arcs in hyperspaces which are not compact. By L. E. WARD, JR....	254
s admits an injective metric. By JOHN R. ISBELL.....	259
The projective resolution of a compact space. By ANTHONY W. HAGER.	262
Continuous and proper decompositions. By G. K. WILLIAMS.....	267
A note on stable homeomorphisms of infinite-dimensional manifolds. By RAYMOND Y. T. WONG.....	271
No topologies characterize differentiability as continuity. By ROBERT GEROCH, ERWIN KRONHEIMER and GEORGE MCCARTY.....	273
A fixed point theorem for manifolds. By JAN W. JAWOROWSKI.....	275
Products of \mathcal{M} -compact spaces. By VICTOR SAKS and R. M. STEPHENSON, JR.....	279
A remark on Mahler's compactness theorem. By DAVID MUMFORD,...	289
A characterization of punctured open 3-cells. By O. L. COSTICH, P. H. DOYLE and D. E. GALEWSKI.....	295
Paracompactness and elastic spaces. By HISAHIRO TAMANO and J. E. VAUGHAN.....	299

H. MISCELLANEOUS FIELDS

Fixed points of order preserving multifunctions. By R. E. SMITHSON...	304
---	-----

SHORTER NOTES

The cardinality of ultrapowers—An example. By ANDREW ADLER.....	311
Extensions of derivations. By MICHAEL BARR and MAX-ALBERT KNUS	313
Note on a theorem of Pall. By KENNETH S. WILLIAMS.....	315
Analytic properties of elliptic and conditionally elliptic operators. By MICHAEL E. TAYLOR.....	317
H_2 of the commutator subgroup of a knot group. By D. W. SUMNERS...	319

CONTENTS*

Vol. 28, No. 1

APRIL, 1971

Whole No. 142

Page

A. ALGEBRA AND NUMBER THEORY

Two remarks about hereditary orders. By H. JACOBINSKI.....	1
Pseudo-complements in posets. By P. V. VENKATANARASIMHAN.....	9
On vectorial norms and pseudonorms. By EMERIC DEUTSCH.....	18
The Jacobi sums of order twenty-two. By YUN-CHENG ZEE.....	25
A weak Nullstellensatz for valuations. By GEORGE M. BERGMAN.....	32
Koecher's principle for quadratic Jordan algebras. By KEVIN MCCRIMMON.....	39
Overrings of principal ideal domains. By H. H. BRUNGS.....	44
Minimal nonnilpotent solvable Lie algebras. By ERNEST L. STITZINGER	47
On roots and subsemigroups of nilpotent groups. By JOSEPH E. KUCZKOWSKI.....	50
On the order of the error function of the k -free integers. By D. SURYA-NARAYANA and R. SITARAMACHANDRA RAO.....	53
Representations of l -groups by almost-finite quotient maps. By DONALD A. CHAMBLESS.....	59
A new characterization of Dedekind domains. By E. W. JOHNSON and J. P. LEDIAEV.....	63
Multiplicative linear functionals on convolution algebras. By PAUL AIZLEY.....	65
On the topological classification of the floors of certain Hilbert fundamental domains. By MICHAEL H. HALL.....	67
Quotients in Noetherian lattice modules. By J. A. JOHNSON.....	71
On idempotent, commutative, and nonassociative groupoids. By G. GRÄTZER and R. PADMANABHAN.....	75
Semilattices which are embeddable in a product of min intervals. By J. W. STEPP.....	81
On collections of subsets containing no 4-member Boolean algebra. By PAUL ERDÖS and DANIEL KLEITMAN.....	87
On the characteristic roots of real matrices. By H. H. SCHAEFER.....	91

B. ANALYSIS

On an asymptotic property of a Volterra integral equation. By A. F. IZE.....	93
On the uniform asymptotic stability of functional differential equations of the neutral type. By J. K. HALE and A. F. IZE.....	100
On special generators for properly infinite von Neumann algebras. By W. R. WOGEN.....	107
A model of Euclidean 2-space. By M. S. KRISHNA SASTRY.....	114
A transitive medial subspace lattice. By K. J. HARRISON, HEYDAR RADJAVI and PETER ROSENTHAL.....	119
Mean convergence and compact subsets of L_1 . By BENJAMIN HALPERN.	122
Bounded solutions of Stieltjes integral equations. By DAVID LOWELL LOVELADY.....	127
L^2 asymptotes for Fourier transforms of surface-carried measures. By STUART NELSON.....	134
The parabola theorem for continued fractions over a vector space. By F. A. ROACH.....	137
A Riemann mapping theorem for $C(X)$. By HUGH E. WARREN.....	147
Abelian differentials with double zeros. By HERSHEL M. FARKAS....	155
On algebras of operators with totally ordered lattice of invariant subspaces. By JOHN B. CONWAY.....	163

* The volume index will contain a mapping showing the correspondence between sections A-G and the AMS (MOS) subject classification numbers.
