JANUARY 1972

NUMBER 1

WHOLE NO. 151

Published by the
AMERICAN MATHEMATICAL SOCIETY
PROVIDENCE, RHODE ISLAND

Proceedings of the American Mathematical Society

THIS JOURNAL is devoted entirely to research in pure and applied mathematics, and the publication of original papers of moderate length. The maximum length of an acceptable paper is about 8 printed pages. Since a page of the PROCEEDINGS contains about 400 words, a rule of thumb is that under 10 typed pages is probably within the limit, but that over 12 typed pages is probably too long.

SHORTER NOTES. Very short notes not to exceed 1 printed page of an unusual nature are also accepted, and appear under the heading SHORTER NOTES. Items deemed suitable include an elegant new proof of an important and well-known theorem, an illuminating example or counterexample, or a new viewpoint on familiar results. New results, if of a brief and striking character, might also be acceptable, though in general a paper which is merely very short will not be suitable for the SHORTER NOTES department.

PREPARATION OF THE MANUSCRIPT. Articles for insertion should be typewritten and double spaced. Ditto is not generally satisfactory, although other modes of multiple reproduction may be. The *Manual for Authors*, available from the Society, should be consulted for symbols and style conventions. Authors should take the greatest possible care in preparing the original manuscript. Hand drawn symbols are satisfactory, if clearly done; directions to the printer should be included where necessary on a separate sheet, not in the accompanying letter. Authors must keep a complete copy of their manuscript, and editors will acknowledge receipt; manuscripts can therefore be sent by ordinary mail and any other kind (registered, certified) is entirely unnecessary. Submission of two copies of the manuscript is helpful, but by no means necessary.

FORM OF MANUSCRIPT. The first page should consist of a *descriptive title*, followed by an *abstract* which summarizes the article in language suitable for workers in the general field (algebra, analysis, etc.). The *descriptive title* should be short, but informative; useless or vague phrases such as "some remarks about" or "concerning" should be avoided. Also avoid proper names unless mathematical usage associates them with the work. The *abstract* should be at least one complete sentence, and at most 150 words. Included with the footnotes to your paper, but placed before the first footnote, there should be first the AMS (MOS) *subject classification numbers* representing the primary and secondary subjects of the article. This may be followed by a list of *key words and phrases* describing the subject matter of the article and taken from it. The AMS (MOS) Subject Classification Scheme (1970) with instructions for its use can be found as an appendix to *Mathematical Reviews*, Index to Volume 39 (June 1970). See the June 1970 Notices for more details, as well as illustrative examples.

SUBMISSION OF MANUSCRIPTS, REPRINTS AND ADDRESS CHANGES. See the last page of this issue.

SUBSCRIPTION INFORMATION. Five volumes are planned for 1972; the subscription price is \$100. Back number prices are as follows: Volumes 1-16, \$14 per volume; Volumes 17-19, \$18 per volume; Volumes 20-26, \$30 per volume; Volumes 27-30, \$27 per volume.

THE PROCEEDINGS OF THE AMERICAN MATHEMATICAL SOCIETY is published monthly. Subscriptions, orders for back numbers and inquiries in regard to nondelivery of current numbers should be addressed to the American Mathematical Society, P.O. Box 6248, Providence, R.I. 02904.
Second-class postage paid at Providence, Rhode Island, and additional mailing offices.

RESEARCH AND REVIEW JOURNALS PUBLISHED BY THE AMERICAN MATHEMATICAL SOCIETY

Bulletin of the American Mathematical Society

This journal is the official organ of the Society. It reports official acts of the Society and the details of its meetings. It contains some of the officially invited addresses presented before the Society, reviews of advanced mathematical books, and a department of research announcements.

The current issue of the journal lists editors to whom prospective publications should be addressed. Publication is bimonthly.

Transactions of the American Mathematical Society

This monthly journal is devoted entirely to research in pure and applied mathematics, and includes in general longer papers than those in the PROCEEDINGS.

The current issue of the journal lists editors to whom prospective publications should be addressed.

Mathematics of Computation

A journal devoted to original papers in numerical analysis, the application of numerical methods and high-speed calculator devices, the computation of mathematical tables, the theory of high-speed calculating devices and other aids to computation. In addition it publishes reviews and notes in these and related fields.

Prospective publications should be addressed to the Editor, Professor Eugene Isaacson, Courant Institute of Mathematical Sciences, New York University, 251 Mercer Street, New York, New York 10012. The author may suggest the name of an editor for review of his paper.

Mathematical Reviews

This journal is devoted to abstracts and reviews of the current mathematical literature of the world. Currently publication is monthly; two volumes are published each year, each volume consisting of 6 regular issues plus an index issue. In each regular issue the abstracts and reviews are grouped under subject headings. Publication began in 1940.

Soviet Mathematics—Doklady

This bimonthly is a translation journal containing the entire pure mathematics section of the DOKLADY AKADEMII NAUK SSSR, the Reports of the Academy of Sciences of the USSR. The DOKLADY for a year contains about 500 articles, each about 4 pages long.

Mathematics of the USSR—Izvestija

This journal is a cover-to-cover translation of IZVESTIJA AKADEMII NAUK SSSR SERIJA MATEMATIČESKAJA, published bimonthly by the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published bimonthly starting with Volume 1, Number 1, January-February 1967.

Mathematics of the USSR—Sbornik

This journal is a cover-to-cover translation of MATEMATIČESKIĀ SBORNIK (New Series), published monthly by the Moscow Mathematical Society and the Academy of Sciences of the USSR. It is a journal of current research in all fields of pure mathematics. The translation is published monthly starting with Volume 1, Number 1, January 1967.

Submission of Manuscript

Send papers directly to one of the editors listed under the subject field of the paper,

Algebra and number theory.

JOSEPH J. ROTMAN, Department of Mathematics, University of Illinois, Urbana, Illinois 61801

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

Modern or classical analysis.

JACOB FELDMAN, Department of Mathematics, University of California, Berkeley, California 94720

LEE A. RUBEL, Department of Mathematics, University of Illinois, Urbana, Illinois 61801

ALLEN L. SHIELDS, Department of Mathematics, University of Michigan, Ann Arbor, Michigan 48104

Algebraic geometry.

GEORGE B. SELIGMAN, Department of Mathematics, Yale University, New Haven, Connecticut 06520

Set-theoretic and general topology.

W. WISTAR COMFORT, Department of Mathematics, Wesleyan University, Middletown, Connecticut 06457

Algebraic topology and all other types of geometry.

GLEN E. BREDON, Department of Mathematics, Rutgers University, New Brunswick, New Jersey 08903.

Applied mathematics, differential equations, and related areas of analysis.

FRED G. BRAUER, Department of Mathematics, University of Wisconsin, Madison, Wisconsin 53706

Probability, statistics, and related fields.

JAMES D. KUELBS, Department of Mathematics, 213 Van Vleck Hall, University of Wisconsin, Madison, Wisconsin 53706

Logic, set theory, and related areas.

ROBERT I. SOARE, Department of Mathematics, University of Illinois at Chicago Circle, Chicago, Illinois 60680

All other communications should be addressed to the Managing Editor, JOSEPH J. ROTMAN, at the above address.

Reprints and Address Changes

Any inquiries concerning a paper which has been accepted for publication, including information regarding reprints or changes of address for mailing proof, should be sent directly to the Editorial Department, American Mathematical Society, P.O. Box 6248, Providence, Rhode Island 02904.

CONTENTS—Continued from back cover

A Prüfer transformation for nonselfadjoint systems. By KURT KREITH	147
On a tauberian theorem of Wiener and Pitt. By HAROLD G. DIAMOND	152
On the functional equation $\phi(x) = g(x)\phi(\beta(x)) + u(x)$. By R. C. BUCK.....	159
Interpolation in H^p spaces. By P. L. DUREN and H. S. SHAPIRO	162
Quasiharmonic classification of Riemannian manifolds. By MITSURU NAKAI and LEO SARIO	165
On the bifurcation theory of semilinear elliptic eigenvalue problems. By CHARLES V. COFFMAN.....	170
Some remarks on the Volterra operator. By CIPRIAN FOIAŞ and J. P. WILLIAMS.	177
On a factorization theorem of D. Lowdenslager. By V. MANDREKAR and H. SALEHI.....	185
Note on the structure of fixed point sets of 1-set-contractions. By W. V. PETRYSHYN	189
Spaces on which each absolutely summing map is nuclear. By D. R. LEWIS.....	195
Oscillation theorems for second-order differential equations with functional arguments. By CURTIS C. TRAVIS.....	199
Factorization and disconjugacy of third order differential equations. By ANTON ZETTL	203
A remark on a stability theorem of M. Marachkoff. By JOHN R. HADDOCK.....	209
A note on two point boundary problems for nonlinear matrix differential systems. By GARRET J. ETGEN	213
Periodic solutions for perturbed nonlinear differential equations. II. By T. G. PROCTOR.....	219
A new l_1 estimate and a problem of Katznelson. By D. J. NEWMAN.....	225
C. APPLIED MATHEMATICS	
The counting vector of a simple game. By EITAN LAPIDOT.....	228
D. GEOMETRY	
Metric transforms and the hyperbolic four-point property. By JOSEPH E. VALEN- TINE and STANLEY G. WAYMENT	232
Minimal surfaces in S^m with Gauss curvature ≤ 0 . By BANG-YEN CHEN.....	235
E. LOGIC AND FOUNDATIONS	
Equations in the theory of monadic algebras. By TH. LUCAS.....	239
The game quantifier. By YIANNIS N. MOSCHOVAKIS.....	245
F. STATISTICS AND PROBABILITY	
Equivalence-singularity dichotomies from zero-one laws. By RAOUL D. LEPAGE and V. MANDREKAR	251
G. TOPOLOGY	
On the level sets of a distance function in a Minkowski space. By RONALD GARIEPY and W. D. PEPE	255
A commutative diagram and an application to differentiable transformation groups. By W. D. CURTIS.....	260
The Wallman compactification is an epireflection. By DOUGLAS HARRIS	268
A metric characterization of zero-dimensional spaces. By LUDVIK JANOS	271
A strong homotopy axiom for Alexander cohomology. By KERMIT SIGMON	276
One-to-one mappings. By DIX H. PETTEY	279
Manifolds with few cells and the stable homotopy of spheres. By LARRY SMITH....	285
Ordered power associative groupoids. By DESMOND A. ROBBIE	291
Semi-local-connectedness and cut points in metric continua. By E. D. SHIRLEY..	297
A note on fixed point free involutions and equivariant maps. By JACK UCCI.....	299
Generalized positive linear functionals on a Banach algebra with an involution. By PARFENY P. SAWOROTNOW	305
Stable splitting of $K(G, 1)$. By RICHARD HOLZSAGER	307
Some examples relating the deleted product to imbeddability. By BRIAN R. UMMEL	
SHORTER NOTES	
Local units in $L^1(G)$. By G. F. BACHELIS, W. A. PARKER and K. A. ROSS.....	312
A note on finitely additive set functions. By D. RAMACHANDRAN	314
Algebraic solution of $x^y = y^x$ ($0 < x < y$). By DAIHACHIRO SATO.....	316

CONTENTS*

Vol. 31, No. 1

JANUARY 1972

Whole No. 151

	Page
A. ALGEBRA AND NUMBER THEORY	
Induced automorphisms of free metabelian groups. By ORIN CHEIN.....	1
Finite automorphic algebras over GF(2). By FLETCHER GROSS.....	10
More on the Schur subgroup. By MURRAY M. SCHACHER.....	15
Localization of the zeros of the permanent of a characteristic matrix. By P. M. GIBSON.....	18
Localization in a principal right ideal domain. By RAYMOND A. BEAUREGARD...	21
The functional equation of some Dirichlet series. II. By BRUCE C. BERNDT.....	24
Modules over the endomorphism ring of a finitely generated projective module. By F. L. SANDOMIERSKI.....	27
Constructing sequences of divided powers. By KENNETH NEWMAN.....	32
Invariant means on locally compact semigroups. By JAMES C. S. WONG.....	39
The generalized inverse of a nonnegative matrix. By R. J. PLEMMONS and R. E. CLINE.....	46
2-generator groups and parabolic class numbers. By MORRIS NEWMAN.....	51
Primary modules determined by indecomposable idempotent endomorphisms. By ROBERT W. STRINGALL.....	54
On elements with negative squares. By RALPH DEMARR and ARTHUR STEGER...	57
A nonarchimedean theory of analytic continuation in several variables. By A. I. THALER.....	61
Nakayama's Lemma for half-exact functors. By ARTHUR OGUS and GEORGE BERGMAN.....	67
A note on finite dimensional subrings of polynomial rings. By PAUL EAKIN.....	75
Minimal ideals in group rings. By D. S. PASSMAN.....	81
Group rings satisfying a polynomial identity. III. By D. S. PASSMAN.....	87
Morita duality for endomorphism rings. By ROBERT W. MILLER and DARRELL R. TURNIDGE.....	91
A note on Lie-admissible nilalgebras. By HYO CHUL MYUNG.....	95
B. ANALYSIS	
Approximation of vector-valued continuous functions. By ALAN H. SHUCHAT...	97
On almost periodic solutions for undamped systems with almost periodic forcing. By GEORGE SEIFERT.....	104
On total nonnorming subspaces. By WILLIAM J. DAVIS and JORAM LINDENSTRAUSS.	109
Global hypoellipticity and Liouville numbers. By STEPHEN J. GREENFIELD and NOLAN R. WALLACH.....	112
Hypoelliptic vector fields and continued fractions. By STEPHEN J. GREENFIELD...	115
A remark on "pairs" of regular functions. By JAMES A. JENKINS.....	119
Bounded projections on Fourier-Stieltjes transforms. By CHARLES F. DUNKL and DONALD E. RAMIREZ.....	122
A nonprincipal invariant subspace of the Hardy space on the torus. By CHESTER ALAN JACEWICZ.....	127
Continuous functions of Hermitian operators. By P. R. HALMOS.....	130
Remark on some integrals involving products of Whittaker functions. By H. M. SRIVASTAVA.....	133
Some extensions of the Mehler formula. By H. M. SRIVASTAVA and J. P. SINGHAL.	135
Continuity and linearity of centralizers on a complemented algebra. By PARFENY P. SAWOROTNOW and GEORGE R. GIELLIS.....	142

* The volume indexes contain a mapping showing the correspondence between sections A-G and the AMS (MOS) subject classification numbers.
