CORRECTION TO **“THE UNIFORM SEPARATION PROPERTY** **AND BANACH–STONE THEOREMS** **FOR LATTICE-VALUED LIPSCHITZ FUNCTIONS”**

A. JIMÉNEZ-VARGAS, A. MORALES CAMPOY, AND MOISÉS VILLEGAS-VALLECILLOS

There is a mistake in our paper [1]. To fix it, one must insert “norm-closed” before “vector sublattices” on page 3770, lines 17 and 22; page 3774, line 4; and page 3776, line 11. The problem is in the proof of Theorem 4.1. We use that the vector lattice isomorphism $T : A(X, E) \rightarrow A(Y, F)$, where $A(X, E)$ and $A(Y, F)$ are vector sublattices of $\text{Lip}(X, E)$ and $\text{Lip}(Y, F)$ respectively, is a topological isomorphism, but we know that this fact is true only if the spaces are complete (see Theorem 4.3 in: C. D. Aliprantis and O. Burkinshaw, *Positive Operators*, Springer, Dordrecht, 2006, MR2262133. This book is a reprint of the 1985 original cited in reference 1 of [1]).

We also have noticed that on page 3770, line 24, one reads “ $\text{Lip}(X, E)$ onto $\text{Lip}(Y, F)$ ”, but it must read “ $A(X, E)$ onto $A(Y, F)$ ”.
