Hello, fellow librarians!

I am excited to join the American Mathematical Society as its first Marketing and Library Relations Strategist. I come from a library background, earning my MLIS from Wayne State University in Detroit and acting as a Collection Development Librarian at the Jackson District Library in Michigan. I hope to bring librarian values and perspectives to the AMS as we develop initiatives in the future.

I would also love to hear from you. What are your library's needs, and how can we help? Do you have an impressive LibGuide or a great research story? Please contact me with any questions, feedback, or comments you have regarding the AMS. I look forward to getting to know you and your libraries.

Best regards,
Tyler Kane

MathSciNet – New Interface

The AMS has developed a new interface for MathSciNet, which is available for beta testing. The most notable changes include a cleaner design, increased functionality for mobile devices, as well as improved usability and accessibility tools.

Now, users can utilize mobile-optimized features such as collapsing menus and updated filter options. The new design also improves color, contrast, font, and font size for users with visual impairments, as well as heading compatibility with screen readers.

Please share your feedback with us at msn-beta@ams.org.
Charleston Conference 2022

It was wonderful to gather with so many of you in the beautiful city of Charleston, SC. Thank you to everyone who stopped by to see us during the Vendor Showcase. I enjoyed seeing familiar faces and meeting some of you for the first time during breaks and social events. I look forward to seeing you at the 2023 library meetings, and introducing you to Tyler – you will enjoy working with him!

Regards,
Nicola Poser

Take Advantage of Your Institutional Membership

Coming together as a society allows us to elevate mathematics in ways we can't as individuals.

Through AMS membership you support advocacy for mathematics funding, a robust publishing mission, pathways to graduate education, conferences for scientific exchange, professional development services, and programs for mathematics teachers and learners. AMS Institutional Members receive discounts on AMS books, journals, and MathSciNet, and may nominate graduate students and/or faculty for complimentary AMS membership.

New! The 2023 AMS individual dues structure has been redesigned to help make AMS membership accessible to a wider audience and streamline rate options. Changes include a new “Friend of Math” category, which applies to a member who is not a mathematician and who supports the AMS mission.

For more information, visit the AMS membership webpage or contact cust-serv@ams.org.

Contact us!

Finally, as the new academic year kicks off, let us know if we can help you with orientation workshops for new students and faculty. We can send copies of the updated MathSciNet QuickStart guide, and even some swag, to help you welcome your new patrons. Please contact Nicola at nsp@ams.org.
