NUMBER 2

QUARTERLY OF APPLIED MATHEMATICS

This periodical is published quarterly under the sponsorship of Brown University, Providence, R. I. For its support, an operational fund is being set up to which industrial organizations may contribute. To date, contributions of the following industrial companies are gratefully acknowledged:

BELL TELEPHONE LABORATORIES, INC.; NEW YORK, N. Y.,
THE BRISTOL COMPANY; WATERBURY, CONN.,
CURTISS WRIGHT CORPORATION; AIRPLANE DIVISION; BUFFALO, N. Y.,
EASTMAN KODAK COMPANY; ROCHESTER, N. Y.,
GENERAL ELECTRIC COMPANY; SCHENECTADY, N. Y.,
GULF RESEARCH AND DEVELOPMENT COMPANY; PITTSBURGH, PA.,
LEEDS & NORTHRUP COMPANY; PHILADELPHIA, PA.,
PRATT & WHITNEY, DIVISION NILES-BEMENT-POND COMPANY; WEST HARTFORD,
CONN.,
REPUBLIC AVIATION CORPORATION; FARMINGDALE, LONG ISLAND, N. Y.,
UNITED AIRCRAFT CORPORATION; EAST HARTFORD, CONN.,
WESTINGHOUSE ELECTRIC AND MANUFACTURING COMPANY; PITTSBURGH, PA.

The QUARTERLY prints original papers in applied mathematics which have an intimate connection with application in industry or practical science. It is expected that each paper will be of a high scientific standard; that the presentation will be of such character that the paper can be easily read by those to whom it would be of interest; and that the mathematical argument, judged by the standard of the field of application, will be of an advanced character.

Manuscripts submitted for publication in the QUARTERLY OF APPLIED MATHEMATICS should be sent to the Managing Editor, Professor W. Prager, Quarterly of Applied Mathematics, Brown University, Providence 12, R. I., either directly or through any one of the Editors or Collaborators. In accordance with their general policy, the Editors welcome particularly contributions which will be of interest both to mathematicians and to engineers. Authors will receive galley proofs only. Seventy-five reprints without covers will be furnished free; additional reprints and covers will be supplied at cost.

The subscription price for the QUARTERLY is \$6.00 per volume (April-January), single copies \$2.00. Subscriptions and orders for single copies may be addressed to: Quarterly of Applied Mathematics, Brown University, Providence 12, R. I., or to 8 North 6th St., Richmond, Va.

Entered as second class matter March 14, 1944, at the post office at Providence, Rhode Island, under the act of March 3, 1879. Additional entry at Richmond, Virginia.

WILLIAM BYRD PRESS, INC., RICHMOND, VIRGINIA

Announcing a new journal

QUARTERLY JOURNAL OF MECHANICS AND APPLIED MATHEMATICS

Beginning with the March 1948 issue a new English periodical will appear providing a medium for the publication of papers on Classical Mechanics and Mathematical Techniques. It will cover the following subjects: Hydrodynamics (including aerodynamics, sound, dynamical meteorology); Elasticity and Plasticity; Numerical Methods; Non-Linear Mechanics; Heat Conduction; Classical Electromagnetism; Ballistics. The Editorial Board is composed of such distinguished scholars as S. Goldstein, G. I. Taylor, R. V. Southwell, and G. Temple. American subscriptions may be ordered from: Oxford University Press, Inc., 114 Fifth Avenue, New York 11, New York.

Yearly subscription: \$8.50

Single issue: \$2.66

DOVER BOOKS ON APPLIED MATHEMATICS

TABLES

Eleven and fifteen place tables of Bessel functions of the first kind, to all significant orders

By Enzo Cambi, Eng.D.

The main tables give $J_n(x)$ for $x = 0$ (0.01) 10.5 and $n = 0$ (1) 29 to eleven places. A supplementary table gives $J_n(x)$ for $x = 0$ (0.001) 0.5 and $n = 0$ (1) 11 to fifteen places.

8½ x 10¾. vi + 154 pages. 2 graphs.
Durable binding \$3.95

Gas dynamics tables for air

By Howard W. Emmons

An exceedingly useful set of tables of the most commonly used functions occurring in gas dynamics. The quantities tabulated include pressure, velocity, density, stream tube area, dynamic pressure, temperature, velocity of sound and Prandtl-Meyer angles as functions of the Mach number over the complete range.

6⅞ x 9¼. 48 pages, 10 graphs.
Semi-stiff binding \$1.75

Tables of functions, with formulae and curves

By E. Jahnke and F. Emde

Fourth revised edition. Text in English and German.

5½ x 8½. xv + 379 pages,
212 graphs \$3.95

TEXTS

Partial differential equations of mathematical physics

By H. Bateman

This truly encyclopedic exposition of the analytical methods of solving boundary value problems of mathematical physics covers an astonishingly broad field of problems and contains full references to classical and contemporary literature.

6 x 9. xxii + 522 pages,
29 illustrations \$3.95

Ordinary differential equations

By E. L. Ince

5½ x 9. viii + 558 pages,
18 illustrations \$3.95

Die Mathematischen Hilfsmittel des Physikers

By Erwin Madelung

An instant reference collection of 4000 formulas of pure and applied mathematics prepared for the use of the physicist. German text with German-English glossary.

6 x 9. xiii + 384 pages,
25 illustrations \$3.95

Please send for any of the above books on approval

DOVER PUBLICATIONS, INC. • 1780 B'WAY • NEW YORK 19, N. Y.

CONTENTS

G. K. BATCHELOR: Energy decay and self-preserving correlation functions in isotropic turbulence	97
G. E. ALBERT and J. L. SYNGE: The general problem of antenna radiation—Part I	117
J. L. SYNGE: The general problem of antenna radiation—Part II	133
A. E. HEINS: The radiation and transmission properties of a pair of semi-infinite parallel plates—I	157
L. BRILLOUIN: A practical method for solving Hill's equation	167
NOTES:	
J. L. B. COOPER: The solution of natural frequency equations by relaxation methods	179
A. WINTNER: A norm criterion for non-oscillatory differential equations	183
G. F. CARRIER: The extrusion of plastic sheet through frictionless rollers	186
R. KING and D. MIDDLETON: Additional corrections to our paper "The cylindrical antenna: Current and impedance"	192

McGraw-Hill Books of Unusual Interest

BALLISTICS OF THE FUTURE. With Special Reference to the Dynamical and Physical Theory of the Rocket Weapons

By J. M. J. KOOEY, Aeronautical School, The Hague, and J. W. H. UYTENBOGAART, Technical University of Delft. 472 pages, \$12.00

Covers the rapid advances made in both chemico-thermodynamical and mechanico-dynamical ballistics, and incorporates the wide practical experience of the authors in this field during the Second World War.

PRINCIPLES OF MATHEMATICAL PHYSICS. *New Second Edition*

By W. V. HOUSTON, President, Rice Institute. *International Series in Pure and Applied Physics.* Ready this summer

Supplies mathematical methods of treating physical problems of increasing complexity, and fills the gap between elementary courses in physics and advanced courses on special subjects. The new edition contains additional material on various topics, new problems, and new illustrative drawings.

THE THEORY OF FUNCTIONS OF REAL VARIABLES

By LAWRENCE M. GRAVES, Professor of Mathematics, The University of Chicago. 300 pages, \$4.00

A compact and well-integrated presentation of the theorems and methods which are fundamental for research in analysis. The more basic and generally useful parts of the theory of functions of real variables are treated in detail, together with many results not usually found in standard treatises on the subject.
