

ERRATUM TO "ON THE UNIFORM CONVERGENCE OF QUASICONFORMAL MAPPINGS"

BY

BRUCE PALKA

The author is grateful to Raimo Näkki for pointing out that Lemma 8—and, consequently, Theorem 5—of [1] is false without the assumption $n \geq 3$. Corollary 3 remains true when $n = 2$, but a short argument is required to show that (iv) \rightarrow (iii).
